This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### iShares MSCI Brazil UCITS ETF (DE)

A sub-fund of iShares (DE) I Investmentaktiengesellschaft mit  
Teilgesellschaftsvermögen

### Exchange Traded Fund (ETF)

WKN: A0Q4R8

ISIN: DE000A0Q4R85

Management Company: BlackRock Asset Management Deutschland  
AG

## Objectives and Investment Policy

- ▶ iShares MSCI Brazil UCITS ETF (DE) (the "Fund") is a passively managed exchange traded fund (ETF) that aims to track the performance of the MSCI Brazil Index Net USD as closely as possible. In this regard, it aims to replicate the benchmark (Index).
- ▶ The Index measures the performance of large and mid-market capitalisation companies in the Brazilian equity market which comply with MSCI's size, liquidity, and free-float criteria. Companies are included in the Index based on a free float – adjusted market capitalisation weighted basis. Free float means that only shares available to international investors rather than all of a company's issued shares are used in calculating the Index. Free float – adjusted market capitalisation is the share price of a company multiplied by the number of shares available to international investors. Securities that are liquid means that they can be easily bought or sold in the market in normal market conditions. The Index is a net total return index which means that the net dividends of the constituents of the Index are reinvested after the deduction of certain applicable taxes. The Index is reviewed quarterly and rebalanced semiannually.
- ▶ The proportion of assets in the Fund which matches the weighting of the Index (duplication percentage) is at least 95% of the Fund's assets.
- ▶ It is not the Investment Manager's intention to leverage the Fund. However, the Fund may generate minimal amounts of leverage from time to time, for example, if using financial derivative instruments (FDIs) for efficient portfolio management purposes.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ The units in the Fund are accumulating units. Income from the Fund's investments will be included in the value of the units rather than being paid out as a dividend.
- ▶ The Fund units are denominated in US Dollar.
- ▶ The units are listed on one or more Stock Exchange(s). Investors can buy or sell their units daily during business hours through an intermediary on such Stock Exchange(s). Indicative net asset value is published on relevant stock exchanges websites.

For more information on risks, please see the Fund's prospectus in paragraph 'Risk Warnings', which is available at [www.ishares.com](http://www.ishares.com) (select your country and navigate to Documents/Legal information).

## Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated seven due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
  - Emerging markets are generally more sensitive to economic and political conditions than developed markets. Other factors include greater 'Liquidity Risk', restrictions on investment or transfer of assets, failed/delayed delivery of securities or payments to the Fund and sustainability-related risks.
  - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
  - Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
  - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

## Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

\*Investors dealing on exchanges will pay fees charged by their stock brokers. Such charges are publicly available on the exchanges on which the units are listed and traded, or can be obtained from stock brokers. If investors deal in units directly with the Fund or the Management Company of the Fund, the entry charge is up to 2% and the exit charge is up to 1%.

\*Authorised participants dealing directly with the Fund or the Management Company (as the case may be) will pay related transaction costs.

The ongoing charges figure is based on expenses for the twelve month period ending 31 January 2024. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

One-off charges taken before or after you invest	
Entry Charge (entry charge 0% when traded on exchange)	2.00%*
Exit Charge (exit charge 0% when traded on exchange)	1.00%*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Charges taken from the Fund over each year	
Ongoing Charges	0.27%
Charges taken from the Fund under certain conditions	
Performance Fee	None

## Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2018. Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.
