ISIN: DE000A2QP349

Exchange Traded Fund (ETF)

Management Company: BlackRock Asset Management Deutschland AG

Objectives and Investment Policy

- ▶ The Unit Class iShares MDAX® UCITS ETF (DE) EUR (Dist) (the "Unit Class") is a unit class of the iShares MDAX® UCITS ETF (DE) (the "Fund") which is a passively managed exchange traded fund (ETF) that aims to track the performance of the MDAX® (Performance Index) as closely as possible. In this regard, it aims to replicate the benchmark (Index).
- ▶ The Index measures the performance of 50 medium-sized German companies from all industries, as well as foreign companies operating primarily in Germany. These companies are listed on the Prime Standard segment of the Frankfurt Stock Exchange and come in behind the 40 DAX® stocks in terms of free float market capitalisation and exchange turnover. The components are weighted by free float market capitalisation with a cap at 10%. Free float market capitalisation is the market value of a company's readily available outstanding shares. The Index composition is reviewed annually and rebalanced quarterly, along with extraordinary reviews as needed.
- ▶ The Fund mostly invests in equities in order to achieve the investment objective.
- ▶ The proportion of assets in the Fund which matches the weighting of the Index (duplication percentage) is at least 95% of the Fund's assets.
- ▶ It is not the Investment Manager's intention to leverage the Fund. However, the Fund may generate minimal amounts of leverage from time to time, for example, if using financial derivative instruments (FDIs) for efficient portfolio management purposes.
- ▶ Recommendation: This Fund is suitable for medium to long term investment, though the Fund may also be suitable for shorter term exposure to the Index.
- ▶ This Unit Class is distributing. Income from the Unit Class' investments will be paid out at least once a year as a dividend.
- ▶ The Unit Class is denominated in Euro.
- ▶ The units are listed on one or more Stock Exchange(s). Investors can buy or sell their units daily during business hours through an intermediary on such Stock Exchange(s).

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Unit Class.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Unit Class is rated six due to the nature of its investments which include the risks listed below. These factors may impact the value of the Unit Class' investments or expose the Unit Class to losses.
 - Investment risk is concentrated in specific sectors, countries, currencies or companies. This means the Fund is more sensitive to any localised economic, market, political, sustainability-related or regulatory events.
 - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Unit Class to financial loss.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Unit Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Investors dealing on exchanges will pay fees charged by their stock brokers. Such charges are publicly available on the exchanges on which the units are listed and traded, or can be obtained from stock brokers. If investors deal in units directly with the Fund or the Management Company of the Fund, the entry charge is up to 2% and the exit charge is up to 1%.

*Authorised participants dealing directly with the Fund or the Management Company (as the case may be) will pay related transaction costs.

The ongoing charges figure shown here is an estimate of the annualised charges. An estimate is being used because the Fund (or unit class) was newly launched or it has been launched within the reported period. The Fund's annual report for each financial year will include detail on the exact charges made.

One-off charges taken before or after you invest	
Entry Charge (entry charge 0% when traded on exchange)	2.00%*

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

Ongoing Charges	0.51%
Charges taken from the Unit Class under certain conditions	
Performance Fee	None

Past Performance

Past performance is not a guide to future performance.

The Fund was launched in 2001. The Unit Class was launched in 2021.

This chart has been left intentionally blank as there is less than one year's performance data.
