What is this product?

Type: Shares in a Sub-Fund of Amundi, an undertaking for collective investment in transferable securities (UCITS), established as an investment fund.

This is a UCITS investment fund established in Germany. The Amundi investment fund is a collective investment undertaking which collects capital from a number of investors in order to invest it in accordance with a defined investment strategy for the benefit of these investors.

Term: The term of the Sub-Fund is open-ended. The Management Company may terminate the Fund by dissolution or merger with another fund, in accordance with the legal provisions.

Objectives: The Sub-Fund is a passively managed index-tracking UCITS.

The Sub-Fund replicates the MDAX[®] ESG+ (NR) EUR (Net Total Return Index) (ISIN DE000A3DMSJ4) (the "Index" of this Sub-Fund) as a benchmark and pursues the investment objective of providing investors with a return that tracks the performance of the MDAX[®] ESG+ (NR) EUR. This Sub-Fund promotes environmental and/or social characteristics as defined by Article 8 of Regulation (EU) 2019/2088 on sustainability investments in the financial services sector.

The index calculated by STOXX Ltd. tracks the performance of the MDAX[®] Index, using the ESG exclusion filters and valuation methodology of the ESG division of the data provider International Shareholder Services Inc. (ISS ESG) to exclude at least 20 percent of MDAX[®] companies that do not meet a minimum ESG rating, standards-based screening, controversial-weapons screening, and a number of commercial screenings. If the ESG rating excludes less than 20 percent of the companies in the MDAX[®] Index, companies that have an ESG rating better than D- but come closest to the rating of D- until the target is reached will be excluded.

With regard to nuclear energy and natural gas, the company may acquire assets of issuers or portfolio companies that generate their revenues through activities related to the production of energy or other uses of nuclear energy and natural gas and the extraction of uranium or natural gas. Details of this can be found in the "Description of the underlying index of the Sub-Fund" in the Special section of the prospectus.

A tracking error of up to 1% can be expected when linking to the performance of the Index. Information about the index is available online at www.dax-indices.com.

In compliance with the investment policy and investment limits described in the investment conditions and prospectus, the Sub-Fund shall endeavour

to achieve the investment objective by acquiring all (or, exceptionally, a significant number of) parts of the Index in the same proportion as the Index (as determined by the investment manager).

Fully replicating ETFs may not hold every part or the exact weighting of a part in the benchmark. Instead, they may seek exposure to a benchmark through the use of optimisation techniques (so-called sampling) and/or investments in securities that are not part of a benchmark. Securities loan transactions and repurchase agreements may not be concluded.

The Sub-Fund may invest a maximum of 10% of its assets in shares of other domestic or foreign UCITS or CIUs. The use of derivative financial instruments is possible only in special situations in the interest of investors. The value of derivative financial instruments may not exceed 10% of the Sub-Fund.

At least 94 percent of the value of the UCITS special fund is invested in equity investments as defined by § 2 (8) Investment Tax Act.

Intended retail investors: This product is intended for investors with a basic knowledge and with no or limited experience of investing in funds, who are prepared to take on a high level of risk to their original capital.

Redemption and dealing: The shares of the Sub-Fund are listed and traded on at least one stock exchange. Under normal circumstances, you may trade shares during stock exchange trading hours. Only eligible participants (e.g. selected financial institutions) can trade shares directly with the Management Company via the Sub-Fund on the primary market. For further details, please refer to the Amundi prospectus.

Distribution policy: The Sub-Fund income is ordinarily distributed.

What are the risks and what could I get in return?

RISK INDICATOR

We have classified this product as 5 out of 7, which is a medium-high risk class. The risk of potential losses from future performance is therefore classified as medium-high. In unfavourable market conditions, it is likely that our ability to pay you will be compromised.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Sub-Fund's performance. Further information can be found in the prospectus or the investor information document of Amundi.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

What happens if Amundi Luxembourg S.A. is unable to pay out?

A separate pool of assets is created and maintained for each Sub-Fund of Amundi. The assets and liabilities of the Sub-Fund are separate from those of other Sub-Funds and from those of the Management Company and there is no mutual liability. The Sub-Fund shall not be liable if the Management Company or a contracted service provider fails or falls into arrears.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you keep the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario
- EUR 10,000 is invested
