Performances related to distributing ETF are calculated reinvesting dividends into the ETF performance

* Source : Amundi. The above cover complete periods of 12 months for each calendar year. **Past performance is no predictor of current and future results and does not guarantee future yield**. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.

It is important for potential investors to evaluate the risks described below and in the fund prospectus which can be found on www.amundi.com

CAPITAL AT RISK : ETFs are tracking instruments: Their risk profile is similar to a direct investment in the Underlying Index. Investors' capital is fully at risk and investors may not get back the amount originally invested.

REPLICATION RISK : The fund objectives might not be reached due to unexpected events on the underlying markets which will impact the index calculation and the efficient fund replication.

COUNTERPARTY RISK : Investors are exposed to risks resulting from the use of an OTC Swap with MORGAN STANLEY BANK AG - SOCIETE GENERALE. In-line with UCITS guidelines, the exposure to the counterparty cannot exceed 10% of the total fund assets. Physically replicated ETFs may have counterparty risk resulting from the use of a Securities Lending Programme.

UNDERLYING RISK : The Underlying Index of a Amundi ETF may be complex and volatile. When investing in commodities, the Underlying Index is calculated with reference to commodity futures contracts exposing the investor to a liquidity risk linked to costs such as cost of carry and transportation. ETFs exposed to Emerging Markets carry a greater risk of potential loss than investment in Developed Markets as they are exposed to a wide range of unpredictable Emerging Market risks.

CURRENCY RISK : ETFs may be exposed to currency risk if the ETF is denominated in a currency different to that of the Underlying Index they are tracking. This means that exchange rate fluctuations could have a negative or positive effect on returns.

LIQUIDITY RISK : Liquidity is provided by registered market-makers on the respective stock exchange where the ETF is listed. On-exchange liquidity may be limited as a result of a suspension in the underlying market represented by the Underlying Index tracked by the ETF; a failure in the systems of one of the relevant stock exchanges, The market-maker systems; or an abnormal trading situation or event.

Risk indicators (Source: Fund Admin) *

	1 year	3 years
Portfolio volatility	18.99%	15.97%
Benchmark volatility	19.01%	15.97%
Ex-post Tracking Error	0.24%	0.23%
Sharpe ratio	0.01	0.95

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year.

The Tracking Error represents the annualised volatility of the performance differences between the ETF and the benchmark

Important information

This document is of a commercial nature and not of a regulatory nature.

It is each investor's responsibility to ascertain that it is authorised to subscribe, or invest into this product.

Prior to investing in the product, investors should seek independent financial, tax, accounting and legal advice.

AMUNDI Japan TOPIX II UCITS ETF is an investment company with Variable Capital (SICAV) incorporated under Luxembourg Law, listed on the official list of Undertakings for Collective Investment, authorised under Part I of the Luxembourg Law of 17th December 2010 (the "2010 Law") on Undertakings for Collective Investment in accordance with provisions of the Directive 2009/65/EC (the "2009 Directive") and subject to the supervision of the Commission de Surveillance du Secteur Financier (CSSF). The product is a sub-fund of AMUNDI Japan TOPIX II UCITS ETF and has been approved by the CSSF and has been notified to the AMF to be marketed in France.

Amundi Asset Management ("Amundi AM") recommend that investors read carefully the "risk factors" section of the product's prospectus and the "Risk and reward" section of the Key Investor Information Document (KIID). The prospectus in English and the KIID in French are available free of charge on www.amundiETF.com or upon request to info@amundiETF.com

The attention of investors is drawn to the fact that, the prospectus is only available in English.

Units of a specific UCITS ETF managed by an asset manager and purchased on the secondary market cannot usually be sold directly back to the asset manager itself. Investors must buy and sell units on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units and may receive less than the current net asset value when selling them.

Updated composition of the product's investment portfolio is available on www.amundiETF.com. In addition, the indicative net asset value is published on the Reuters and Bloomberg pages of the product, and might also be mentioned on the websites of the stock exchanges where the product is listed.

There is no guarantee that the fund's objective will be met. The fund may not always be able to replicate exactly the performance of the index (or indices).

This product includes a risk of capital loss. The redemption value of this product may be less than the amount initially invested. In a worst case scenario, investors could sustain the loss of their entire investment.
