What is this product?

Type: Shares of a Sub-Fund of MULTI UNITS FRANCE, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an SICAV.

Term: The Sub-Fund has an unlimited duration. The Management Company may dissolve the Fund by means of liquidation or merger with another fund in accordance with legal requirements.

AMF classification: International equities

Objectives: The Fund is a passively managed index-based UCITS.

The Fund's objective is to replicate, both upwards and downwards, the performance of the MSCI ACWI IMI New Energy ESG Filtered Net Total Return Index (net dividends reinvested) (the "Benchmark"), denominated in US dollars (USD), while minimising the tracking error between the Fund's performance and that of the Benchmark.

The expected level of tracking error under normal market conditions is set out in the Fund prospectus.

The Benchmark is intended to represent the performance of securities whose activities are linked to the development of new products and services in the areas of alternative energy sources, energy efficiency, batteries and smart grid technologies.

It excludes companies that lag behind the theme universe in Environmental, Social and Governance ("ESG") terms, notably on the basis of an ESG rating.

The ESG rating methodology is based on key ESG issues including, but not limited to, water stress, carbon emissions, personnel management or business ethics.

The benchmark is based on a "best-in-class" approach, in other words, companies in the lower quartile per adjusted ESG rating of the sector are excluded from the theme universe.

For more information on the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-Fund, please refer to the Sub-Fund's Transparency Code available on <https://amundiETF.com/>.

The limitations of the benchmark methodology are described in the Fund's prospectus through risk factors such as market risk related to controversies and risks related to ESG methodologies and the calculation of the ESG score.

Additional information on the MSCI indices is available on the MSCI website (www.msci.com).

The Fund aims to achieve its objective through a direct replication method, namely by investing primarily in the components of the Benchmark.

In order to optimise Benchmark replication, the Fund may use a sampling technique as well as guaranteed temporary sales of securities.

Any use of these techniques is indicated on the website amundiETF.com.

The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundiETF.com.

Furthermore, the net asset value is shown on the Reuters and Bloomberg pages of the Fund and may also be shown on the websites of the Fund's stock exchanges.
