### AMUNDI ETF DAX UCITS ETF DR

ISIN code: (C/D) FR0010655712

This Fund is managed by Amundi Asset Management, an Amundi company

#### Objectives and Investment Policy

Classification by the French Market Regulator (AMF): Eurozone equities.

By subscribing to AMUNDI ETF DAX UCITS ETF DR, you are investing in a UCITS that is managed passively, the objective of which is to track, as closely as possible, the performance of the DAX NET RETURN Index ("the Index"), whether the Index rises or falls. The target for maximum tracking error between changes in the Fund's NAV and that of the Index is 2%.

The euro-denominated Index, net dividends reinvested (dividends net of tax paid by the equities that make up the index are included in the calculation of the index), is published by Deutsche Börse and calculated by STOXX.

The equities in the DAX Index are leading securities traded in the German markets. These are the 40 largest market caps on the Frankfurt Stock Exchange.

More information about the composition of the index and its operating rules are available in the prospectus and at [www.dax-indices.com](http://www.dax-indices.com).

The Index is available via Reuters (.GDAXIN) and Bloomberg (DAXNR).

To replicate the DAX NET RETURN Index, the Management Company applies "index-linked" management, using the direct replication method, which consists of investing in the financial securities that make up the DAX NET RETURN Index in proportions very close to those of the Index.

Forward financial instruments may be used for hedging and/or exposure purposes.

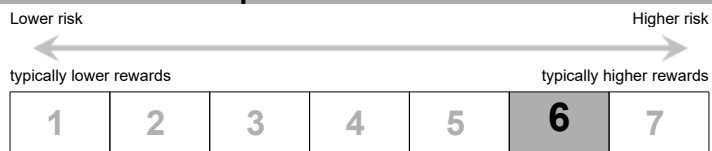

Through the Portfolio, you will be permanently invested at a level of at least 75% in stocks eligible for the Plan d'Épargne en Actions (PEA, tax wrapper reserved to residents in France).

The Fund's net profit and net realised capital gains are reinvested or redistributed each year at the discretion of the Management Company.

You may resell your units during the trading hours of the various stock exchanges, provided that the Market Makers can maintain market liquidity.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

#### Risk and reward profile

Particular risks for the Fund not included in these indicator are:

- Counterparty risk: this is the risk of default by a market operator, including a total return swap counterparty, that prevents it from honouring its obligations to the Fund.

The occurrence of one of these risks may decrease the net asset value of your portfolio.

This Fund's risk category primarily reflects the market risk of the European stocks in which it is invested.

The initial capital invested is not guaranteed.

Historical data such as that used to calculate the synthetic indicator may not be a reliable indicator of the future risk profile of the Fund. The risk category associated with this Fund is not guaranteed and may evolve over time.

The lowest category does not mean "risk free."
