Term: The Fund has an unlimited duration. The Management Company may dissolve the Fund by means of liquidation or merger with another fund in accordance with legal requirements.

AMF classification: Eurozone country equities

Objectives: AMF (Autorité des Marchés Financiers) classification: Eurozone country equities.

By subscribing to AMUNDI ETF MSCI SPAIN UCITS ETF, you are investing in a passively managed UCITS whose objective is to replicate as closely as possible the performance of the MSCI Spain index (the "Index") regardless of whether it experiences a positive or negative development. The maximum tracking error objective between the growth of the net asset value of the Fund and that of the Index is 2%.

The Index, net dividends reinvested (the net tax dividends paid by the equities composing the index are included in the calculation of the index), denominated in euro, is calculated and published by the index provider MSCI.

The equities comprising the MSCI Spain index are derived from the universe of the most significant securities on the Spanish market.

Further information regarding the composition of the Index and its operating rules is available in the prospectus and at msci.com.

The index is available at Reuters (.dMIES00000NEU) and Bloomberg (MSDESPN).

In order to replicate the Index, the UCITS exchanges the performance of the assets held by the Fund for that of the Index by entering into futures contracts or total return swaps (a forward financial instrument, "TRS") (synthetic replication of the Index).

You will have a permanent investment, via the Basket, of at least 75% in securities eligible for the French Equity Savings Plan (PEA, savings plan reserved for French investors).

The Fund's net profit as well as its net realised capital gains are reinvested or redistributed at the discretion of the Management Company.

You may resell your units during the trading hours of the various stock exchanges, provided that the Market Makers can maintain market liquidity.
