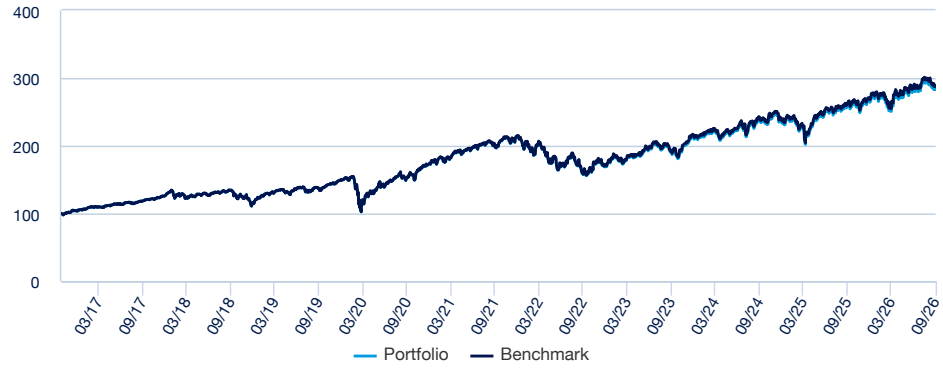
Objective and Investment Policy

The Fund is a passively managed index-based UCITS. The Fund promotes environmental and/or social characteristics within the meaning of Article 8 of the Disclosure Regulation The Fund's objective is to replicate, both upwards and downwards, the performance of the MSCI World Ex USA Screened ex-Thermal Coal index (the "Benchmark"), denominated in US dollars (USD), while minimising the tracking error between the Fund's performance and that of the Benchmark. The expected level of the Tracking Error under normal market conditions is indicated in the Fund prospectus. The Benchmark is representative of the performance of large- and mid-cap companies in developed countries, excluding companies in the MSCI World Ex USA index (the "Parent Index") based on environmental, social and governance (ESG) criteria (for example, exclusion based on commercial activities, including controversial weapons) and aiming for at least a 30% reduction in carbon intensity compared to its Parent Index. Its characteristics are as follows: The eligible universe includes all the securities that make up the Parent Index. The components of the Index are selected by applying a combination of value-based exclusions and an iterative process to reduce the intensity of carbon emissions compared to its Parent Index. The methodology of the Benchmark is aligned with certain criteria such as: i. Exclusion of certain activities based on ESG criteria, including tobacco, controversial weapons, civilian firearms, Arctic oil and gas, palm oil, thermal coal reserves and thermal coal power generation. In addition, on the basis of ratings and within the limits of the thresholds defined by MSCI, companies identified as being involved in ESG controversies or not respecting the United Nations Global Compact ("UNGC") are excluded from the Index. ii. A minimum reduction of 30% in greenhouse gas (GHG) intensity compared to the Parent Index The ESG rating methodology is based on key ESG issues including, but not limited to, water stress, carbon emissions, personnel management or business ethics. For more information on the general and specific environmental, social and governance (ESG) objectives targeted by the Sub-fund, please refer to the Sub-fund's Transparency Code available on https://amundietf.com/. The limitations of the benchmark methodology are described in the Fund's prospectus through risk factors such as market risk related to controversies and risks related to ESG methodologies and the calculation of the ESG score. The ESG score of companies is calculated by an ESG rating agency using raw data, models and estimates collected and calculated using proprietary methods. Due to the lack of standardisation and the uniqueness of each methodology, the information provided may be incomplete. Assessment of sustainability risks is complex and may be based on ESG data that is difficult to obtain, incomplete, estimated, outdated and/or materially inaccurate. Even when identified, there is no guarantee that this data will be correctly assessed. Additional information on the MSCI indices is available on the MSCI website (www.msci.com). The Benchmark is a net total return index. A net total return index measures the performance of the components of the Benchmark based on the criterion that any dividend or distribution is included in the returns of the Benchmark after deducting any withholding tax. The Sub-fund aims to achieve its objective through direct replication, i.e. by primarily investing in a basket of assets consisting of the securities comprising the Benchmark and/or eligible financial instruments representing all or part of the securities comprising the Benchmark. The updated composition of the portfolio of securities held by the Fund is mentioned on the website amundietf.com. In addition, the indicative net asset value appears on the Fund's Reuters and Bloomberg pages and may also be mentioned on the Fund's stock exchange websites.

Performances from 26/10/2016 to 30/09/2026 (Source : Fund Admin)



Risk indicators (Source: Fund Admin)

	1 year	3 years	Inception to date *
Portfolio volatility *	12.82%	14.03%	16.49%
Benchmark volatility	12.82%	14.06%	16.49%
Ex-post Tracking Error	0.21%	0.19%	0.11%
Sharpe ratio	0.54	0.69	0.52

* Volatility is a statistical indicator that measures an asset's variations around its average value. For example, market variations of +/- 1.5% per day correspond to a volatility of 25% per year. The higher the volatility, the higher the risk.
The Tracking Error indicator measures the performance's difference between the fund and the benchmark

** Source : Amundi. The above cover complete periods of 12 months for each calendar year.* ***Past performance is no predictor of current and future results and does not guarantee future yield*** *. Any losses or gains do not take into consideration any costs, commissions and fees incurred by the investor in the issue and buyout of the shares (e.g. taxes, brokerage fees or other commissions deducted by the financial intermediary). If performance is calculated in a currency other than the euro, any losses or gains generated can thereby be affected by exchange rate fluctuations (both upward and downward). The discrepancy accounts for the performance difference between the portfolio and the index.*

Risk & Reward Profile (SRRI) (Source: Fund Admin)

Lower risk, potentially lower rewards

Higher risk, potentially higher rewards

The SRRI represents the risk and return profile as presented in the Key Investor Information Document (KIID). The lowest category does not imply that there is no risk. The SRRI is not guaranteed and may change over time.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you. Additional risks: Market liquidity risk could amplify the variation of product performances. This product does not include any protection from future market performance so you could lose some or all of your investment. Beside the risks included in the risk indicator, other risks may affect the Sub-fund's performance. Please refer to the MULTI UNITS FRANCE prospectus.
