

Amundi ETF

Key Investor Information

This document provides you with key investor information about this UCITS (the "Fund"). It is not a marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

AMUNDI ETF iSTOXX Europe Multi-Factor Market Neutral UCITS ETF

ISIN Code: (C/D) FR0013284304

This Fund is managed by Amundi Asset Management, an Amundi company

Objectives and Investment Policy

By subscribing to AMUNDI ETF iSTOXX Europe Multi-Factor Market Neutral UCITS ETF, you are investing in a UCITS strategy that is managed passively, the objective of which is to replicate, as closely as possible, the performance of the 100% iSTOXX EUROPE MULTI-FACTOR MARKET NEUTRAL Strategy Index ("the Strategy Index"), whether the Strategy Index rises or falls. The target for maximum tracking error between changes in the Fund's net asset value and that of the Strategy Index is 2%.

The euro-denominated Strategy Index, net dividends reinvested (dividends net of tax paid by the equities in the index are included in the calculation of the index), is calculated and published by the index provider Stoxx.

You are exposed to the exchange rate risk between the currencies in which the stocks of the Strategy Index are denominated and that of the Fund.

The objective of the iSTOXX Europe Multi-Factor Market Neutral Strategy Index is to be exposed to the performance gap between the iSTOXX Europe Multi-Factor index and the STOXX Europe 600 Futures Roll EUR Excess Return index. Its objective is therefore not to be exposed to movements in European equity markets. The iSTOXX Europe Multi-Factor Market Neutral Strategy Index may thus have a positive or negative performance, regardless of the upward or downward trend of European equity markets.

The iSTOXX Europe Multi-Factor Strategy Index is a smart beta index of small-, mid- and large-cap equities of developed European markets and the STOXX Europe 600 Futures Roll EUR Excess Return index is an index of futures contracts on the STOXX Europe 600 equity index, which is an index covering small-, mid- and large-cap equities and weighted by market capitalisations.

More information about the composition of the Strategy Index and its operating rules is available in the prospectus and at stoxx.com.

The Strategy Index is available via Reuters (.ISEXMETN) and Bloomberg (ISEXMETN).

To track the Index, the UCITS swaps the performance of the assets held by the Fund for that of the Index through a derivative contract or total return swap (a "TRS" derivative instrument) (swap-based replication of the Index).

The Fund's net profit and net realised capital gains are reinvested or redistributed each year at the discretion of the Management Company.

You may resell your units during the trading hours of the various stock exchanges, provided that the Market Makers can maintain market liquidity.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

This Fund's risk level reflects the Fund's maximum volatility level.

The initial capital invested is not guaranteed.

Historical data such as that used to calculate the synthetic indicator may not be a reliable indicator of the future risk profile of the Fund. The risk category associated with this Fund is not guaranteed and may evolve over time.

The lowest category does not mean "risk free."

Particular risks for the Fund not included in these indicator are:

- Liquidity risk: in a given case where trading on the financial markets is depressed, any equity buying or selling transaction can lead to significant market fluctuations.
- Counterparty risk: this is the risk of default by a market operator, including a total return swap counterparty, that prevents it from honouring its obligations to the Fund.

The occurrence of one of these risks may decrease the net asset value of your portfolio.

Charges

The charges and fees paid are used to cover the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0
Exit charge	0

The percentage indicated is the maximum that can be deducted from your capital before it is invested (entry) or redeemed (exit).

Charges taken from the Fund over a year

Operating expenses	0.55% of average net assets
--------------------	-----------------------------

Charges taken from the Fund under certain specific conditions

Performance fee	0
-----------------	---

Purchases and sales on the secondary market do not incur any entry or exit fees. However, in addition to the fees shown, other fees may apply such as brokerage fees or stock exchange fees, over which the Management Company has no control.

The **ongoing charges** are based on the figures for the previous financial year ended 30 December 2022. This percentage may vary from year to year. It excludes:

- Performance fees,
- Brokerage fees, except for the entry and exit charges paid by the UCITS when buying or selling units in another UCITS.

For more information about the charges of this Fund, please refer to the "Costs and Fees" section of the Fund's prospectus, which is available at amundiETF.com.

Past performance

Performance is not constant over time and is no guarantee of future performance.

The year-on-year performances presented on this chart are calculated after deduction of all fees charged by the Fund.

The Fund was launched on 31 October 2017.

The reference currency is the euro.

The benchmark index is: 100% ISTOXX EUROPE MULTI-FACTOR MARKET NEUTRAL.
