WHAT IS THIS PRODUCT?

Type :

The product is a share class of the Sub-fund "BNP PARIBAS EASY II Short Duration Income Opportunities UCITS ETF" (the "fund") which is part of the ICAV "BNP PARIBAS EASY II ICAV" (the "ICAV").

Term :

This product has no maturity date, and could be liquidated under the conditions led down in the instrument of incorporation of the ICAV.

Objectives :

Investment Objective
To seek to provide income, in USD, from an actively managed portfolio of investment grade bonds.
Investment Policy
The Fund is actively managed in reference to the Bloomberg Global Aggregate Corporate 1-3 Yrs Total Return Index Hedged USD (the "Benchmark") in order to capture opportunities in the global investment grade bond market.
The Fund will invest primarily in short duration investment grade bonds issued by governments, companies or public institutions (i.e. bonds which are rated at least BBB- by Standard & Poor's or equivalent ratings by Moody's or Fitch or, if unrated, judged equivalent to those ratings by the Investment Manager) that are mainly listed or traded on global developed markets and denominated in USD, GBP and EUR (exposure of the Fund's assets in non-USD currency will be hedged against USD). The Fund may also invest in callable bonds. It may also invest in 144A securities where considered to offer the best opportunity for the Fund, and may be fully invested in these securities. The Fund seeks to maintain a duration of less than four years, although under certain market conditions, such as in periods of significant volatility in interest rates, the Fund's duration may be longer than four years. Duration is a measure of the price sensitivity of a debt security or a portfolio of debt securities to changes in relevant interest rates. For instance, a duration of four means that a security's or portfolio's price would be expected to decrease by approximately 4% with a 1% increase in interest rates.
As part of the investment process, the Fund will invest at least one third of its net assets in securities which are components of the Benchmark excluding cash and cash equivalent (the "Initial Investment Universe"). Depending on its investment convictions and after comprehensive macroeconomic and microeconomic analysis of the market, the Investment Manager can take more active positioning in terms of duration (duration measured in number of years and the portfolio's sensitivity to interest rate variations), geographical allocation and/or sector and/or grade or issuer selection compared to the Benchmark. Thus, the Fund's deviation from the Benchmark is expected to be significant. However, in certain market conditions (such as in conditions of high credit market volatility or, turmoil), the Fund's positioning may be closer to that of the Benchmark.
In the process of selection of securities from the Initial Investment Universe, the Investment Manager notably applies a disciplined and documented analysis of the credit fundamentals carried out by an internal and dedicated team.
In addition to investing in investment grade bonds, the Fund may also invest up to 10% in high yield bonds. The Fund does not invest in securities rated CCC+ or below.
The Fund may invest up to 10% of its net assets in defaulted and/or distressed securities and up to 10% of its net assets in the units/shares of Eligible Collective Investment Schemes. The Fund may also hold and maintain ancillary liquid assets and money market instruments.
The Fund may use financial derivative instruments ("FDI") including foreign exchange spot, forward contracts, interest rate futures and swaps for efficient portfolio management, hedging or investment purposes. The Fund may engage in securities lending up to 80% of its net assets with an expected level of 30%. The Fund will not enter total return swaps or instruments with similar characteristics neither engage in borrowing of securities nor repurchase/reverse agreements.
The Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.
The Share Class aims at hedging the foreign exchange risk resulting from the divergence between the base currency of the Fund and the currency of this Share Class by using derivatives instruments whilst retaining the exposure to Investment Policy of the Fund.
Income
For Capitalisation share classes (Cap), the dividend is reinvested.
Investment Horizon
The risk and the reward of the product may vary depending on the expected holding period. We recommend holding this product at least for 3 years.
Processing of subscription and redemption orders
The investor can buy or sell shares of the Fund on a daily basis, as further defined in the prospectus. Only Authorised participants can deal directly with the Fund

Intended retail investor :

The fund is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the fund but may bear total capital loss. It is suited for clients who seek growth of capital . Potential investors should have an investment horizon of at least 3 years years.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

The risk indicator assumes you keep the product for 3 years.
The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level. The risk category associated to this product was determined based on past observations, it is not guaranteed and can evolve in the future.
Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.
For further information, please refer to the prospectus.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.
What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the product and the suitable benchmark over the last 10 years. Markets could develop very differently in the future.
The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 3 years **Example Investment: EUR 10,000**		**If you exit after 1 year**	**If you exit after 3 years**
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment

WHAT HAPPENS IF BNP PARIBAS ASSET MANAGEMENT EUROPE SAS IS UNABLE TO PAY OUT?

The product is constituted as a separate entity from BNPP AM. In case of default of BNPP AM, the assets of the product kept by the custodian will not be affected. In case of default of the custodian, the risk of financial loss of the product is mitigated because of the legal segregation of the assets of the custodian from those of the product.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:

- in the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.
- EUR 10,000 is invested.

	If you exit after 1 year	**If you exit after 3 years**
Total costs	5.00 EUR	80.00 EUR
Annual cost impact(*)	0.30%	0.30% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.33% before costs and 0.03% after costs.
We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
