L&G Gerd Kommer Multifactor Equity UCITS ETF

Share Class USD Accumulating ETF - ISIN: IE0001UQQ933. The Fund is a sub-fund of Legal & General UCITS ETF Plc (the "**Company**").
Managed by LGIM Managers (Europe) Limited, a member of the Legal & General group (the "**Manager**")

OBJECTIVES AND INVESTMENT POLICY

- The L&G Gerd Kommer Multifactor Equity UCITS ETF (the "**Fund**") is a passively managed exchange traded fund ("**ETF**") that aims to track the performance of the Solactive Gerd Kommer Multifactor Equity Index NTR (the "**Index**"), subject to the deduction of the ongoing charges and other costs associated with operating the Fund.
- The Fund promotes a range of environmental and social characteristics which are met by tracking the Index. Further information on how such characteristics are met by the Fund can be found in the Fund Supplement.
- Dealing.** Shares in this share class (the "**Shares**") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on www.lgim.com.
- Index.** The Index is designed to provide exposure to the equity market in the developed and emerging market countries globally which is weighted by reference to certain factors: size, quality, value. The Index will exclude companies which (i) are non-compliant with the UN Global Compact, (ii) are associated with a controversy (i.e. companies that have been involved in events that have a severe impact on the environment and society, posing serious business risks to the company), (iii) have any direct involvement with controversial weapons or (iv) are involved in thermal coal extraction, coal power generation or supporting products/services. In addition to the foregoing, the Index will also exclude companies with a high carbon intensity score. Such exclusions and the definition of "involvement" are determined by reference to the Index methodology which is available at: www.solactive.com.
- Replication.** The Fund will primarily invest in an optimised portfolio of equity securities that, as far as possible and practicable, consists of the component securities of the Index in similar proportions to their weightings in the Index. The Fund will utilise optimisation/representative sampling techniques in order to achieve the Fund's investment objective, including by reducing overall transaction costs and taxes. This is achieved through the use of quantitative analysis (i.e. application of mathematical rules-based analysis based on the risk and return characteristics of the Index components) with the level of sampling techniques used by the Fund being determined by the nature of the Index components. The Fund may also invest in (1) companies that are not constituents of the Index that have similar risk and performance characteristics to the companies contained in the Index and (2) financial derivative instruments ("**FDIs**") (i.e. investments the prices of which are based on the companies contained in the Index and/or such other companies). Adjustments to the Fund's portfolio, including as a result of a reconstitution of the Index, will incur transaction costs.
- Dividend Policy.** This share class does not intend to pay dividends. Any income which may result from the Fund's investments will be re-invested into the Fund.
