Reference Index key features

The Bloomberg MSCI USD Corporate and Agency Green Bond Index aims to reflect the performance of the following market:

- USD-denominated corporate and agency green bonds issued by US and non-US issuers
- Investment grade bonds only
- Minimum amount outstanding of USD 300mn
- 5% issuer weight capping
- Universe of eligible bonds must meet green bond eligibility criteria, including: the stated use of proceeds, process for green project evaluation and selection, management of proceeds, and ongoing reporting of environmental performance of the use of proceeds
- Bonds issued by entities failing to meet the following ESG standards are excluded: Companies associated with the production of controversial, civilian and nuclear weapons and tobacco, are assigned an MSCI ESG Rating of 'CCC' or are unrated, derive certain revenue thresholds from thermal coal, oil sands extraction, civilian firearms, or tobacco, and any issuer with a "Red" MSCI ESG Impact Monitor score of less than 1.

Additional information on the Index and the methodology concerning Bloomberg's indices can be found on the website of the index administrator: (www.bloombergindices.com/).

Key Risks

- **The value of your investment may go down as well as up and past performance does not predict future returns. Investor capital may be at risk up to a total loss.**
- The Fund will use financial contracts (known as derivatives) to try to reduce the effect of currency fluctuations between the currency of its assets and the currency of the shares. This may not be effective and may prevent the Fund from benefitting from an increase in value of (or expose a Fund to the decrease in value of) a particular currency.
- Bonds are exposed to credit risk and interest rate risk. There is a risk that the bond issuer may be unable to pay interest or repay the bond principal, resulting in your investment suffering a loss. If interest rates rise, typically the value of the bond will fall, which could also affect the value of your investment.
