Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest. Terms not defined herein are as defined in the Prospectus.

State Street Saudi Arabia Enhanced Active Equity UCITS ETF (the "Fund"), a sub-fund of SSGA SPDR ETFs Europe I plc (a UCITS authorised Exchange Traded Fund). This Fund is managed by State Street Global Advisors Europe Limited.

Share Class: State Street Saudi Arabia Enhanced Active Equity UCITS ETF (Acc) (ISIN IE0002LI4M98)

Objectives and Investment Policy

Investment Objective The objective of the Fund is to provide a return greater than the performance of the Saudi Arabian equity markets.

The Fund is an actively managed fund.

Investment Policy The Fund is actively managed and aims to outperform S&P Saudi Arabia BMI 5/10/40 Capped Index (the "Index") over the medium to long term. The Investment Manager uses a proprietary quantitative model to select stocks based on factors such as quality, value, and market sentiment. The model also considers sector and country trends, as well as macroeconomic inputs.

The Fund's portfolio is constructed with a focus on balancing expected returns and risk. Limits are applied to country, sector, and individual stock exposures, both in absolute terms and relative to the Index.

Although the Fund is benchmarked against the Index, its holdings and weightings may differ to achieve its investment objective. Most investments will be in stocks listed on recognised markets and may include securities not in the Index but from countries within the Index.

The Index reflects the performance of the Saudi Arabian equity market and is weighted by market capitalisation. The Fund's performance will typically differ from and may under-perform the Index.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

The Shares of the USD Class are issued in U.S. Dollar.

Index Source: The Index is a trademark of S&P Global Inc., or its affiliates, and have been licensed for use by S&P Dow Jones Indices LLC ("S&P") and sub-licensed for use to State Street Investment Management ("State Street"). The Fund is not sponsored, endorsed, sold or promoted by S&P, its affiliates, or its third party licensors. Please see the Prospectus for the full index disclaimer.

Risk and Reward Profile

Lower risk Potentially lower reward — **Higher risk** Potentially higher reward

1	2	3	4	**5**	6	7

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical simulated proxy data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 5 as its return has experienced medium rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Active Risk: Investment return will not normally match that of the Index. Investment decisions by the Investment Manager and/or Sub-Investment Manager(s) to under or overweight securities in the Index or to vary the Fund's investments from the securities included in the Index, including as to specific securities or as to broader investment sectors, will affect the Fund performance versus that of the Index. In addition, the Fund performance against that of the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in the Portfolio, and the frequency and the timing of purchases and sales of interests in the Portfolio.

Management Risk: The Fund is actively managed. The Investment Manager's and/or Sub- Investment Manager's judgments about the attractiveness, relative value, or potential appreciation of a particular sector, security, commodity or investment strategy may prove to be incorrect, and may cause the Fund to incur losses. There can be no assurance that the Investment Manager's investment techniques and decisions will produce the desired results.

Emerging Market Risk: The Fund invests in securities issued by companies located in emerging markets. Emerging market countries may experience political, market, social, regulatory, and/or economic instabilities. These instabilities may reduce the value of the Fund's investments.

Modelling Risk: The Investment Manager uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by the Investment Manager. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can be no assurance that the models will behave as expected in all market conditions

Smaller Companies Risk: The securities of small-, mid-, and micro-capitalization companies may be more volatile and trade less frequently and in smaller volumes than the securities of larger companies. These companies may have limited product lines, markets or financial resources, may lack the competitive strength of larger companies, and may depend on a few key employees. In addition, these companies may have little or no track record of success.

Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or resale restrictions may limit the Fund's ability to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount and may affect the ability to meet redemptions on a timely basis. Where the Fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares

in the Fund may also trade at prices materially different to the last available NAV.

Please refer to the Supplement for full details about the risks associated with this Fund.

Charges

The charges you pay are used to pay the cost of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
