What is this product?

Type

The Fund is an investment company with variable capital. The Fund's value is dependent on the performance of the underlying assets and may go up as well as down. Any capital invested in the Fund may be at risk.

Objectives and Investment Policy

Investment Objective:

The Fund aims to track as closely as possible the returns of the Euronext ESG Biodiversity Screened World USD Index (the Index). The Fund will invest in, or gain exposure to shares which make up the Index.

Investment Policy:

The Index is a subset of the Euronext World Index (Parent Index) and made up of companies which are ranked by free float market capitalisation, with the 500 highest ranked companies being selected for the Index, from developed equity markets worldwide.

In replicating the performance of the Index, the Fund promotes certain environmental, social and/or governance (ESG) characteristics and has been categorised as an Article 8 fund for the purpose of the SFDR.

The Index employs a scoring, ratings and an exclusion based approach which considers, amongst other things, the impact of a company's activities on biodiversity. The Fund excludes: companies with a free float market capitalisation of less than 2 billion Euro; companies with Corporate Biodiversity Footprint scores of 5 or 6 or unscored; companies amongst those with the worst 25% ESG Risk score; companies identified as being involved in controversial weapons, tobacco, and other industries; and companies breaching United Nations Global Compact (UNGC) Principles. Please refer the Fund's Supplement for more details; including for the Corporate Biodiversity Footprint and ESG Risk scores, and also the Index construction methodology.

The Fund is passively managed and aims to invest in the shares of the companies in generally the same proportion as in the Index. There may be circumstances when it is not possible for the Fund to invest in all constituents of the Index and may gain exposure by using other investments such as depositary receipts, funds, or derivatives.

The Fund may invest up to 35% of its assets in securities from a single issuer during exceptional market conditions and up to 10% of its assets in other funds.

The Fund may invest up to 10% of its assets in total return swaps and contracts for difference. However, this is not expected to exceed 5%.

The Fund may also invest in derivatives for efficient portfolio management purposes (such as to manage risk and costs, or to generate additional capital or income) and for investment purposes.

- ◆ The Fund may enter into securities lending transactions for up to 30% of its assets. However, this is not expected to exceed 25%.

- ◆ The reference currency of the Fund is USD. The reference currency of this share class is USD.
- ◆ Income is reinvested.
- ◆ Authorised Participants only may deal in the Fund's shares directly with the UCITS.
- ◆ The Fund's shares are listed on one or more stock exchange(s).
- ◆ You may sell your investment on most working days.

Intended Retail Investor

Investment in the Fund may be suitable for investors seeking capital appreciation with a five year time horizon through investments made primarily in equities that are listed or traded on Recognised Markets, as defined in the Prospectus. An investor should consider his/her personal tolerance for the daily fluctuations of the market before investing in the Fund. Investors should be prepared to bear losses. Shares in the Fund will be available to both retail and institutional investors.

An investment in the Fund is only suitable for investors who are capable of evaluating the risks and merits of such an investment, and who have sufficient resources to bear any loss as the Fund is not guaranteed and they may receive back less than the amount invested. The Fund is designed for use as part of a diversified investment portfolio. Prospective investors should consult with their financial advisor before making an investment.

Term:

The Fund does not have a maturity date.

The PRIIP Manufacturer cannot terminate the Fund unilaterally. The Board of Directors may furthermore decide to liquidate the Fund in certain circumstances set out in the prospectus and articles of incorporation of the Fund.

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended Holding Period: 5 Years Investment of USD 10,000		If you exit after 1 year	If you exit after 5 years
Minimum	The Fund is not covered by an investor compensation or guarantee scheme, you may lose some or all of the amount invested.		
Stress Scenarios	What you might get back	USD 1,500	USD 1,600
	Average Return each year	-85.05 %	-30.72 %
Unfavourable Scenario	What you might get back	USD 7,340	USD 8,450
	Average Return each year	-26.64 %	-3.31 %
Moderate Scenario	What you might get back	USD 10,890	USD 15,350
	Average Return each year	8.91 %	8.94 %
Favourable Scenario	What you might get back	USD 15,190	USD 20,590
	Average Return each year	51.93 %	15.54 %

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between December 2021 and January 2023. The moderate scenario occurred for an investment between April 2017 and April 2022. The favourable scenario occurred for an investment between October 2016 and October 2021. A suitable benchmark was used where the Fund had insufficient history.

What happens if HSBC Investment Funds (Luxembourg) S.A. is unable to pay out?

The Fund's ability to pay out would not be affected by the default of HSBC Investment Funds (Luxembourg) S.A.. The Fund's assets are kept safe by the Depositary and are segregated from the assets of other Funds. This means that the holdings of one Fund are kept separate from the holdings of the other Funds and your investment in the Fund cannot be used to pay the liabilities of any other Fund. There is a potential liability risk for the Depositary if the assets of the Fund are lost. The Depositary is liable in case of its negligent or intentional failure to properly fulfil its obligations. In the event of a bankruptcy or insolvency of the Depositary or other service provider, investors could experience delays (for example, delays in the processing of subscriptions, conversions and redemption of shares) or other disruptions and there may be a risk of default. The Fund is not covered by an investor compensation or guarantee scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. For instance, if you invest in this product via a life insurer or capitalisation contract, this document does not take into account the fees of this contract.

Cost over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- ◆ In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- ◆ USD 10,000 is invested.

Recommended Holding Period: 5 Years Investment of USD 10,000	If you exit after 1 year	If you exit after 5 years
Total Costs	37 USD	288 USD
Annual cost impact % *	0.4%	0.4% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 9.35% before costs and 8.94% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.
