

Key Investor Information for Investors in the United Kingdom

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers S&P 500 Equal Weight ESG UCITS ETF

Share class: 1C, ISIN: IE0004MFRED4, Security code: DBX0S3, Currency: USD

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to reflect the performance, before fees and expenses, of the S&P 500® Equal Weight ESG Index (index) which is designed to reflect the equal weighted performance of the shares of large capitalisation companies representing all major US industries and which meet certain environmental, social and governance (ESG) criteria. The index is based on the S&P 500 Equal Weight Index (Parent Index) which is an equal weighted index reflecting the performance of large-cap common stocks of publicly held companies actively traded on regulated US Equities exchanges. The index seeks to target 60% of the number of constituents of each Global Industry Classification Standard Industry Group (GICS Industry Group) within the Parent Index, using an S&P DJI ESG score (ESG Score) after applying the exclusion criteria. The index excludes companies from the Parent Index which do not fulfil specific ESG criteria, including but not limited to (i) have an ESG Score that falls within the worst 25% of ESG Scores from each GICS Industry Group or which do not have an ESG Score, as calculated by S&P Global ESG Research using a company's 'Corporate Sustainability Assessment' which is derived using either company-provided data, publicly available information, or a combination thereof, (ii) are classified by Sustainalytics as breaching certain thresholds in controversial activities, including, but not limited to, tobacco, controversial weapons, and thermal coal; and/or (iii) do not act in accordance with the UNGC principles and their associated standards, conventions, and treaties as determined by

Sustainalytics. For each GICS Industry Group, the remaining companies are then selected in decreasing order of ESG Scores using a methodology to get as close as possible to the target of 60% of the number of constituents of each GICS Industry Group within the parent index. The index is calculated on a total return net basis which means that all dividends and distributions by the companies are reinvested in the shares after tax. The index is reviewed and rebalanced on an annual basis and reweighted on a quarterly basis. The index is administered by S&P Dow Jones Indices LLC. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The currency of the fund is USD. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 6 because its share price may fluctuate strongly and the likelihood of both losses and gains may therefore be high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The value of an investment in shares will depend on a number of factors including, but not limited to, market and economic conditions,

sector, geographical region and political events. The index is rules-based and is not capable of being adjusted to take into account changing market circumstances. As a result you may be negatively affected by, or may not benefit from, the lack of such adjustments in changing market circumstances. The fund is exposed to market movements in a single country or region which may be adversely affected by political or economic developments, government action or natural events that do not affect a fund investing in broader markets. The ESG screening criteria are embedded within the index selection process, which seeks to exclude securities issued by companies involved in certain activities. The investment manager and sub-portfolio manager are not responsible for monitoring the screening process or confirming that all securities which pass the screening process are issued by companies with adequate ESG standards. The company is relying on the activities conducted by and information provided by the administrator of the index. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the index and therefore the portfolio of the fund. The fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.17 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges shown here are a cost estimate. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.
