

Key investor information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Xtrackers ESG EUR High Yield Corporate Bond UCITS ETF

Share class: 1C, ISIN: IE0006GNB732, Security code: DBX0SG, Currency: EUR

a sub-fund of Xtrackers (IE) plc. The management company is DWS Investment S.A., a member of the DWS Group.

Objectives and investment policy

The fund is passively managed. The aim is for your investment to reflect the performance of the Bloomberg MSCI Euro High Yield Sustainable and SRI Index (index). The index aims to reflect the performance of Euro-denominated, high yield, fixed-rate corporate bonds, excluding bonds which do not fulfil specific environmental, social and governance (ESG) criteria. The bonds must have a fixed rate of interest, must be rated less than Ba1/BB+ by major rating agencies and meet certain currency, sector, amount outstanding, credit quality, maturity, coupon, seniority of debt, market of issue, and security type criteria. Bonds rated below BB by MSCI ESG Research are excluded. Issuers with a "red" MSCI ESG Controversies score (less than 1) and issuers that are classified by MSCI in their MSCI ESG Business Involvement Screening Research (BISR) as breaching certain thresholds in controversial activities are also excluded from the index. At least 20% of issuers will be excluded from the original universe using the ESG criteria. Issuers with MSCI ESG Ratings of BBB or higher will be weighted in the index at 100% weight by market value while the weight of

bonds from issuers with MSCI ESG Ratings of BB will be weighted in the index at a 50% weight by market value. The weight of each issuer is limited to 3%. Any excess weight over the 3% cap will be redistributed on a pro rata basis to all other issuers' bonds below the 3% cap. The composition of the index is rebalanced monthly. The index is administered by Bloomberg Index Services Limited. The index is calculated on a total return basis which means that the payments from coupons are reinvested in the index. To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by DWS entities. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund. You may request the redemption of shares generally on a daily basis.

Risk and reward profile

The calculation of the risk and reward profile is based on simulated data that cannot be used as a reliable indicator for the future risk profile. This risk indicator is subject to changes; the classification of the fund may change over time and cannot be guaranteed. Even a fund that is classified in the lowest category (category 1) does not represent a completely risk-free investment. The fund is classified in category 4 because its share price fluctuates and the likelihood of both losses and gains may therefore be relatively high. The following risks could be of particular significance for the fund: The fund will attempt to replicate the performance of the index less costs, but your investment is not expected to match the performance of the index precisely. Exceptional circumstances may arise, such as, but not limited to, disruptive market conditions, additional costs/taxes or extremely volatile markets, which may cause the fund's performance to be substantially different from the performance of the index. DWS entities and related companies may act in several roles in relation to the fund such as distributor and management company which may involve conflicts of interest. The fund is not guaranteed and your investment is at risk. The value of your investment may go down as well as up. The index provides a notional exposure to the value and/or return of certain bonds which may fall. Markets in these asset classes may at times become volatile or illiquid. This means that ordinary trading activity

may occasionally be disrupted or impossible. Fluctuations in interest rates of the currency of the shares, the index or the other assets of the fund may affect the value of your investment. The fund may invest in bonds which are exposed to credit risk and interest rate risk. The fund invests in non-investment grade bonds which generally have a higher risk of default and are more susceptible to market fluctuations than investment grade bonds. This may affect the value of your investment. The ESG screening criteria are embedded within the index selection process, which seeks to exclude securities issued by companies involved in certain activities. The investment manager and sub-portfolio manager are not responsible for monitoring the screening process or confirming that all securities which pass the screening process are issued by companies with adequate ESG standards. The company is solely relying on the activities conducted by and information provided by the administrator of the index and MSCI ESG Research LLC for the ESG screening. ESG information from third-party data providers may be incomplete, inaccurate or unavailable. As a result, there is a risk that the index administrator may incorrectly assess a security or issuer, resulting in the incorrect inclusion or exclusion of a security in the index and therefore the portfolio of the fund. The fund may use derivatives to try to manage its investments more efficiently. This may not always be successful and may result in greater fluctuations in the value of the fund. This may negatively affect the value of the fund and your investment.

A more detailed description of risks and other general information can be found in the risk section(s) of the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None
This is the maximum that might be taken out of your money before it is invested (entry charge) and before the proceeds of your investment are paid out (exit charge).	
Charges taken from the fund over a year	
Ongoing charges	0.25 %
Charges taken from the fund under certain specific conditions	
Performance fee	None

Secondary market investors (those who buy or sell shares on a stock exchange) may be charged certain fees by their stock broker. These charges, if any, can be obtained from such stock broker. Authorised participants dealing directly with the fund will pay the transaction costs related to their subscriptions and redemptions.

The ongoing charges shown here are a cost estimate. It excludes portfolio transaction costs and performance fees, if any.

Additional information on costs can be found in the cost section(s) of the prospectus.
