Cumulative Performance

No chart data is currently available as the Fund has less than 12 months of performance

Source: Morningstar. Fund performance data is displayed on a Net Asset Value basis, in Share Class Base Currency terms (as shown in Fund Facts), with income reinvested, net of fees. Brokerage or transaction fees will apply. Data shown does not take into account any Initial Charge that may apply. Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product. Returns may increase or decrease as a result of currency fluctuations.

Performance data is based on the net asset value (NAV) of the ETF which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV performance.

Important Information:

Before investing you should read the Key Investor Information Document (KIID). The value of investments and any income from them may go down as well as up and an investor may not get back the amount invested. Where an investor's own currency is different to the currency of the fund's investments, the fund's returns can be affected by fluctuations in currency exchange rates. The use of financial derivative instruments may result in increased gains or losses within the fund. The fund promotes environmental and/or social characteristics. The Investment Manager's focus on securities of issuers which maintain sustainable characteristics may affect the fund's investment performance favourably or unfavourably in comparison to similar funds without such focus. The sustainable characteristics of securities may change over time.

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean a "risk free" investment.
- The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.
- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Movements in currency exchange rates can adversely affect the return of your investment. Currency hedging may be used to minimise the effect of this but may not always be successful.
