## Objectives & Investment Policy

The investment objective of the Sub-Fund is to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve income and capital growth.

Past performance is not a guide to future performance and should not be the sole factor of consideration when selecting a product. Returns may increase or decrease as a result of currency fluctuations. Performance data is based on the net asset value (NAV) of the ETF with income reinvested, net of fees, which may not be the same as the market price of the ETF. Brokerage or transaction fees will apply. Data shown does not take into account any Initial Charge that may apply. Individual shareholders may realise returns that are different to the NAV performance.

## Performance for 12 month periods in USD (%)

## Cumulative performance in USD (rebased to 100)

Source of fund performance and volatility and risk measures is Fidelity. Performance is excluding initial charge.

## Risk Indicator

For full risk details please consult the KID.

## Important Information

The value of your investment may fall as well as rise and you may get back less than you originally invested. Funds are subject to charges and expenses. Charges and expenses reduce the potential growth of your investment. This means you could get back less than you paid in. The costs may increase or decrease as a result of currency and exchange rate fluctuations. Please refer to the Prospectus and KID of the fund before making any final investment decisions. There is a risk that the issuers of bonds may not be able to repay the money they have borrowed or make interest payments. When interest rates rise, bonds may fall in value. Rising interest rates may cause the value of your investment to fall. The fund promotes environmental and/or social characteristics. The Investment Manager's focus on securities of issuers which maintain sustainable characteristics may affect the fund's investment performance unfavourably in comparison to similar funds without such focus. The sustainable characteristics of securities may change over time. When referring to sustainability-related aspects of the promoted fund, the decision to invest should take into account all characteristics or objectives of the promoted fund as detailed in the Prospectus. Information on sustainability-related aspects is provided pursuant to SFDR at <https://www.fidelity.lu/sfdr>.

## Glossary

**Average Maturity (Years):** The market-weighted average maturity of bonds held in the portfolio. Perpetual bonds are assigned a maturity of 31 December 2049. Derivatives are excluded from the calculation.

**Average Coupon (%):** The coupon is the interest rate stated on a bond when it is issued. Average Coupon is the weighted average coupon of bonds held in the portfolio. Derivatives are excluded from the calculation.

**Yield to Maturity (%):** The Yield to Maturity (also known as the Redemption Yield) is the aggregate of all anticipated returns on each individual bond within the portfolio expressed as an annual rate based on market value as at date shown, coupon rate and time to maturity of each bond. It is based on a snapshot of the portfolio on that date. The redemption yield is gross of the fund's charges and gross of tax.

**Effective Duration:** Duration is a measure of sensitivity of the fund value to changes in interest rates. Effective duration is a duration calculation for bonds with embedded options (such as a call or a put option). It takes into account that expected cash flows will fluctuate as interest rates change and affect a bond's price. The effective duration of a fund is calculated by a market weighted sum of the effective duration of each individual instrument. The effect of derivatives such as bond futures and interest rate swaps are included in the calculation.

**Average Credit Rating:** This is the weighted average of all the bond credit ratings in the fund, expressed using the industry standard letter system (ie AAA, BBB). It takes into account all investments in the fund, including derivatives. This measure gives an idea of how risky the fund's bonds are overall: the lower the average credit rating, the riskier the fund. With a Linear weighted average, the weight assigned to each issue is equal to its market value weight. With an Exponential weighted average, the weight gets proportionally higher for lower-quality credit. In both calculations, the final value is the S&P-equivalent rating nearest to the calculated average.

**Ongoing charges:** The ongoing charges figure represents the charges taken from the fund over a year. It is calculated at the fund's financial year end and may vary from year to year. For classes of funds with fixed ongoing charges, this may not vary from year to year. For new classes of funds or classes undergoing corporate actions (eg amendment to annual management charge), the ongoing charges figure is estimated until the criteria are met for an actual ongoing charges figure to be published. The types of charges included in the ongoing charges figure are management fees, administration fees, custodian and depository fees and transaction charges, shareholder reporting costs, regulatory registration fees, Directors fees (where applicable) and bank charges. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking. For more information about charges (including details of the fund's financial year end), please consult the charges section in the most recent Prospectus.

**SFDR Classification:** Shows the latest classification given to each fund as part of the EU Sustainable Finance Disclosure Regulation (SFDR). Article 9 funds have sustainable investment as their objective and promote environmental or social characteristics. Article 9(3) funds have a reduction in carbon emissions as their objective. Article 8 funds promote environmental or social characteristics, but do not have a sustainable investment objective. Article 6 funds integrate sustainability risks (unless specified otherwise in the prospectus) into investment analysis and decision-making, without the funds promoting environmental or social characteristics or having sustainable investments as their objective.

**Important Information**

This is a marketing communication. This information must not be reproduced or circulated without prior permission.

Fidelity only offers information on products and services and does not provide investment advice based on individual circumstances, other than when specifically stipulated by an appropriately authorised firm, in a formal communication with the client.
