Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

JPMorgan ETFs (Ireland) ICAV — ISIN: IE00081SF8K7

JPM EUR Government Bond Active UCITS ETF - EUR (dist)

a Share Class of JPMorgan ETFs (Ireland) ICAV – EUR Government Bond Active UCITS ETF. The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The objective of the Sub-Fund is to achieve a long-term return in excess of Bloomberg Euro Aggregate Treasury Total Return Index ("the Benchmark") by actively investing primarily in a portfolio of EUR denominated government and government related debt securities.

Investment Policy: The Sub-Fund pursues an actively-managed investment strategy.

The Sub-Fund aims to invest at least 67% of its assets (excluding assets held for ancillary liquidity purposes) in investment grade debt securities issued or guaranteed by EU governments including agencies and local governments that are guaranteed by such governments, and/or those issued or guaranteed by EU supranational organisations, which are denominated in EUR. The Sub-Fund may also invest in EUR denominated government and/or government related debt securities which are unrated or from emerging markets.

The Sub-Fund systematically includes ESG analysis in its investment decisions on at least 75% of non-investment grade and emerging market sovereign securities and 90% of investment grade securities purchased. Pursuant to the Sub-Fund's ESG analysis, at least 51% of the Sub-Fund's Net Asset Value is invested in issuers with positive environmental and/or social characteristics that follow good governance practices, as measured through the Investment Manager's proprietary ESG scoring methodology and/or third party data.

In addition to ESG Integration, as an SFDR Article 8 fund, the Sub-Fund promotes environmental and/or social characteristics.

The Sub-Fund invests at least 10% of its Net Asset Value in Sustainable Investments, as defined under SFDR, contributing to environmental or social objectives.

The Investment Manager evaluates and applies values and norms based screening to implement exclusions on certain industries and issuers based on specific ESG criteria and/or minimum standards of business practice based on international norms. To support this screening, the Investment Manager relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens. The list of screens applied that may result in exclusions can be found on the Website (www. jpmorganassetmanagement.ie).

The Sub-Fund will seek to outperform the Benchmark over the long-term. The Benchmark consists of fixed-rate, investment grade sovereign debt from member states of the EU that also participate in the European Monetary Union. This index currently contains EUR-denominated issues ("Benchmark Securities"). The Benchmark has been included as a point of reference against which the performance of the Sub-Fund may be measured. The Sub-Fund will resemble the composition and risk characteristics of its Benchmark; however, the Investment Manager's discretion may result in performance that differs from the Benchmark.

The Sub-Fund will not seek to track the performance of or replicate the Benchmark, rather the Sub-Fund will hold a portfolio of debt securities (which may include but will not be limited to the Benchmark Securities) which are actively selected and managed with the aim of delivering an investment performance which exceeds that of the Benchmark over the long-term. The Investment Manager aims to do this by selecting securities and obtaining exposures through the use of an integrated research driven investment process that focuses on analysing fundamental, quantitative and technical factors across countries, sectors and issuers.

The Sub-Fund will invest primarily in investment grade, fixed or floating rate, debt securities (bonds and notes) issued or guaranteed by EU governments including agencies and local governments that are guaranteed by such governments, and/or those issued or guaranteed by EU supranational organisations, which are denominated in EUR. Issuers of securities may be located in the EU, including emerging markets.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

EUR is the base currency of the Sub-Fund.

Redemption and Dealing: Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Benchmark: Bloomberg Euro Aggregate Treasury Total Return Index.

Distribution Policy: This Share Class will normally pay dividends semi-annually.

Risk and Reward Profile

Lower risk — Potentially lower reward

Higher risk — Potentially higher reward

1	2	3	**4**	5	6	7

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 4 because its simulated Net Asset Value has shown medium fluctuations historically.

OTHER MATERIAL RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- Government debt securities, including those issued by local governments and government agencies, are subject to market risk, interest rate risk and credit risk. Governments may default on their sovereign debt and holders of sovereign debt (including the Sub-Fund) may be requested to participate in the rescheduling of such debt and to extend further loans to governmental entities. There is no bankruptcy proceeding by which sovereign debt on which a government has defaulted may be collected in whole or in part. Global economies are highly dependent on one another and the consequences of the default of any sovereign state may be severe and far reaching and could result in substantial losses to the Sub-Fund.
- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. Issuers of debt securities may fail to meet payment obligations or the credit rating of debt securities may be downgraded. These risks are typically increased for below investment grade debt securities which may also be subject to higher volatility and lower liquidity than investment grade debt securities. The credit worthiness of unrated debt securities is not measured by reference to an independent credit rating agency.
- Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market and below investment grade debt securities may also be subject to higher volatility and lower liquidity than non-emerging market and investment grade debt securities respectively.
- Sustainability risk may materially negatively impact the financial condition or operating performance of an issuer and therefore the value of that investment. In addition, it may increase the Sub-Fund's volatility and/or magnify pre-existing risks to the Sub-Fund.
- The Sub-Fund seeks to provide a return above the Benchmark; however the Sub-Fund may underperform the Benchmark.
- Further information about risks can be found in the "Risk Information" section of the Prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from this Share Class over a year	
Ongoing charge	0.15%

Charges taken from this Share Class under certain specific conditions	
Performance fee	None

- Investors who are not Authorised Participants may have to pay brokerage commissions or other charges determined and imposed by their brokers when buying or selling Shares on stock exchange(s). Information on charges can be obtained from your broker. Authorised Participants dealing directly with JPMorgan ETFs (Ireland) ICAV will pay related transaction costs.
- Charges are used to pay the costs of running this Share Class, including the costs of marketing and distribution. These charges reduce the potential growth of the investment.
- The ongoing charge figure is estimated and is based on the expected total of charges. The UCITS' annual report for each financial year will include detail on the exact charges made.
- Further information about charges can be found in the "Fees and Expenses" section of the Prospectus.

Past Performance

- Past performance is not a guide to future performance.
- There is insufficient performance data available to provide a chart of annual past performance.
- Sub-Fund launch date: 2025.
- Share Class launch date: 2025.
