Share Class: State Street Kempen Europe ex-UK Small Cap Active Equity UCITS ETF (Acc) (ISIN IE0009BK4OZ6)

Objectives and Investment Policy

Investment Objective The objective of the Fund is to provide a return greater than the performance of European small cap equities in developed markets excluding UK.

Investment Policy The Fund is actively managed (in reference to MSCI Europe ex-UK Small-Cap Index (the "Index")). The investment policy of the Fund is to outperform the Index (or any other index determined by the Directors from time to time to track substantially the same market as the Index) over the medium and long term while the investment policy will also involve screening out securities based on an assessment of their adherence to certain Sustainable Investment criteria defined by the Investment Manager and/or the Sub-Investment Manager.

The Sub-Investment Manager uses an active investment strategy, proprietary to the Sub-Investment Manager which applies a fundamental analysis to evaluate the attractiveness of stocks.

The Sub-Investment Manager's portfolio investment and construction process involves a disciplined end to end framework consisting of four stages. The emphasis is on in-depth fundamental analysis and engagement with securities held by the Fund.

Stage 1 covers the reduction of the extensive universe to a manageable size using a proprietary value. Stage 2 is where the Sub-Investment Manager's investment team carry out fundamental research on the remaining companies. Stage 3 is the portfolio construction phase. The Sub-Investment Manager aims to have a high conviction yet diversified portfolio across European ex UK countries and sectors. Stage 4 is portfolio monitoring and risk management with a strong focus on engagement with securities held by the Fund.

The performance of the Fund will be measured against the Index.

This Fund incorporates the responsible investing process of the Sub-Investment Manager in the investment process which is overseen by the Investment Manager. The Sub-Investment Manager's responsible investing process is based on environmental, social and governance ("ESG") investment criteria, international principles and conventions. This investment process includes exclusion, ESG integration and active ownership.

The Investment Manager will monitor the Sub-Investment Manager and ensure the responsible investing process for the Fund is implemented and in accordance with the Investment Manager's Sustainable Investment criteria.

The securities in which the Fund invests may include equities, or equity-related securities such as ADRs or GDRs. The Fund may invest up to 10% of its net assets in other regulated open-ended funds (including Money Market Funds) where the objectives of such funds are consistent with the objective of the Fund and where such funds are authorised in member states of the EEA, United Kingdom, USA, Jersey, Guernsey or the Isle of Man. The Fund may hold ancillary liquid assets such as deposits.

The Fund may use financial derivative instruments (that is, financial contracts whose prices are dependent on one or more underlying assets) in order to manage the portfolio efficiently.

The Fund does not currently engage in securities lending.

The Shares of the EUR Class are issued in Euro.

Any income earned by the Fund will be retained and reflected in an increase in the value of the shares.

Shareholders may redeem shares on any UK business day (other than days on which relevant financial markets are closed for business and/or the day preceding any such day provided that a list of such closed market days will be published for the Fund on www.ssga.com); and any other day at the Directors' discretion (acting reasonably) provided Shareholders are notified in advance of any such days.

This Fund is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium-high level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Risk and Reward Profile

Lower risk Potentially lower reward — **Higher risk** Potentially higher reward

1	2	3	4	5	**6**	7

Risk Disclaimer The risk category above is not a measure of capital loss or gains but of how significant the rises and falls in the Fund's return have been historically.

For example a fund whose return has experienced significant rises and falls will be in a higher risk category, whereas a fund whose return has experienced less significant rises and falls will be in a lower risk category.

The lowest category (i.e., category 1) does not mean that a fund is a risk free investment.

As the Fund's risk category has been calculated using historical simulated proxy data, it may not be a reliable indication of the Fund's future risk profile.

The Fund's risk category shown is not guaranteed and may change in the future.

Why is this Fund in this category? The Fund is in risk category 6 as its return has experienced very high rises and falls historically.

The following are material risks relevant to the Fund which are not adequately captured by the risk category.

Active Risk: Investment return will not normally match that of the Index. Investment decisions by the Investment Manager and/or Sub-Investment Manager to under or overweight securities in the Index or to vary the Fund's investments from the securities included in the Index, including as to specific securities or as to broader investment sectors, will affect the Fund performance versus that of the Index. In addition, the Fund performance against that of the Index will be affected by Fund expenses, the amount of cash and cash equivalents held in the Fund, and the frequency and the timing of purchases and sales of interests in the Fund.

Management Risk: The Fund is actively managed. The Investment Manager's and/or Sub-Investment Manager's evaluation of the attractiveness, relative value, or potential appreciation of a particular sector, security, commodity or investment strategy may prove to be incorrect, and may cause the Fund to incur losses. Cashflows into and out of the Fund may fluctuate causing heightened tracking error relative to the Index. There can be no assurance that the Investment Manager's and/or Sub-Investment Manager's investment techniques and decisions will produce the desired results.

Screening Risk: There is a risk that the screen provider may make errors, such as incorrect assessment of the screen criteria and/or include incorrect/exclude correct constituents in the screening process or discontinue its screening services. In such circumstances, the Company may change the screen provider although there is no guarantee that a replacement screen provided would result in a similar screening process to that intended or would be available at all.

Modelling Risk: Van Lanschot Kempen Investment Management uses quantitative models in an effort to enhance returns and manage risk. Any imperfections, errors or limitations in these models or in their programming could limit any benefit to the Fund from the use of the models, or could result in incorrect outputs or in investment outcomes different from or opposite to those expected or desired by Van Lanschot Kempen Investment Management. Such imperfections, errors or limitations might never be detected, or might be detected only after a Fund has sustained a loss (or reduced performance). Further, there can

Key Investor Information

be no assurance that the models will behave as expected in all market conditions.
ESG Integration: ESG Integration refers to the integration of qualitative and quantitative ESG information, including Sustainability Risks, in the investment processes with the objective of enhancing investment decision-making. The Investment Manager and/or Sub-Investment Manager used ESG integration with an aim to improve financial performance and/or mitigate financial risk. The Investment Manager and/or Sub-Investment Manager considers ESG factors explicitly and systematically in investment analysis and decisions to lower risk and generate returns. ESG integration is a broad tool, considering material ESG components as a driver of risk and/or return. rather than achieving particular environmental, social, or governance goals. The Investment Manager and/or Sub-Investment Manager will assess if and how financially material ESG issues are integrated into their decision-making processes, consider appropriate ESG signals and factors to mitigate risk and identify opportunities for long-term performance potential.
Liquidity Risk & ETF Liquidity Risk: Lack of a ready market or resale restrictions may limit the Fund's ability to sell a security at an advantageous time or price or at all. Illiquid securities may trade at a discount and may affect the ability to meet redemptions on a timely basis. Where the Fund invests in illiquid securities or does not trade in large volumes, the bid offer spreads may widen, the Fund may be exposed to increased valuation risk and reduced ability to trade. Shares in the Fund may also trade at prices materially different to the last available NAV.
Please refer to the Prospectus and Supplement for full details about the risks associated with this Fund.
