Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

JPMorgan ETFs (Ireland) ICAV — ISIN: IE0009TJ5T70

JPM Carbon Transition Global Equity (CTB) UCITS ETF - EUR (acc)

a Share Class of JPMorgan ETFs (Ireland) ICAV – Carbon Transition Global Equity (CTB) UCITS ETF. The management company is JPMorgan Asset Management (Europe) S.à r.l.

Objectives and Investment Policy

Investment Objective: The Sub-Fund seeks to provide returns that correspond to those of its Index.

Investment Policy: The Sub-Fund pursues a passively managed (index-tracking)strategy.

The Sub-Fund aims to track the performance of the Index as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Sub-Fund's performance and that of the Index.

The Index is comprised of large and mid-capitalisation equity securities issued in developed markets globally (the "Index Securities"). The components of the Index are selected from the components of the Solactive GBS Developed Markets Large & Mid Cap (the "Investable Universe") in accordance with the index's rules-based methodology which is summarised below. The constituents of the Index and geographical exposure of Index Securities may be subject to change over time. The Index rebalances on a quarterly basis (as referred to under "Index Tracking Risk" in the Prospectus). Further details on the Index, including its methodology, components and performance, are available at https://www.solactive.com/indices/?index=DE000SL0BE72, and further details on the Investable Universe, including its components and performance, are available at https://www.solactive.com/indices/?index=DE000SLA41D2.

The Index aims to meet the requirements for EU Climate Transition Benchmarks as defined in the EU Climate Benchmarks Regulation, and provide low carbon emission exposure relative to the Investable Universe with a view to achieving the long-term global warming objectives of the Paris Agreement. In particular, the Index aims to achieve a reduction of the greenhouse gas intensity of the Index of at least 7% on average per annum and an overall reduction of the greenhouse gas intensity of the Index compared to the Investable Universe of at least 30%. Greenhouse gas intensity means greenhouse gas emissions divided by enterprise value including cash.

The Index is designed to capture the performance of companies which have been identified through its rules-based process as best positioned to benefit from a transition to a low carbon economy by effectively managing their emissions, resources and climate-related risks. The Index applies this rules-based non-financial analysis process to all Index Securities as further described below.

Index Construction

The Index methodology applies values and norms based screening to implement exclusions on certain industries and issuers based on specific ESG criteria and/or minimum standards of business practice based on international norms. To support this screening, the Index Provider relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens.

The Index then uses a three-step, rules based approach. First, the regional and sector weights are allocated in accordance with the Investable Universe. Second, all remaining eligible companies are evaluated through the use of the Index Provider's proprietary research and third party data and allocated an aggregate score derived from the following three scores: (i) emissions score (how effectively the company is managing emissions on site, as well as through its provision of products and services), (ii) resource management score (how effectively the company is managing the resources which it consumes such as electricity, water and waste), and (iii) risk management score (how effectively the company is managing its physical risks and reputational risks). Finally, the companies are re-weighted relative to the weights that they have in the Investable Universe based on their aggregate score, leading to companies with higher scores having a higher weighting in the Index and similarly those with lower scores having a lower weighting in the Index.

The Sub-Fund has sustainable investment as its objective and invests a minimum of 80% of the Sub-Fund's Net Asset Value in securities that qualify as sustainable investments, as defined under the SFDR and based on the Investment Manager's scoring methodology.

The Sub-Fund systematically includes ESG criteria in investment analysis and investment decisions on at least 90% of securities purchased (excluding cash).

The Sub-Fund may invest in assets denominated in any currency and currency exposure will not typically be hedged.

The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.

USD is the base currency of the Sub-Fund.

It is currently anticipated that the tracking error of the Sub-Fund will be up to 100 bps under normal market conditions. The causes of tracking error can include but are not limited to the following: holdings/size of the Sub-Fund, cash flows, such as any delays in investing subscription proceeds into the Sub-Fund or realising investments to meet redemptions, fees and the frequency of rebalancing against the Index.

Redemption and Dealing: Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.

Index: Solactive J.P. Morgan Asset Management Carbon Transition Global Equity CTB Index.

Distribution Policy: This Share Class will not pay dividends.

Risk and Reward Profile

Lower risk — Potentially lower reward

Higher risk — Potentially higher reward

1	2	3	4	**5**	6	7

The above rating is based on the historic volatility of the simulated Net Asset Value of this Share Class over the last five years and may not be a reliable indication of the future risk profile of this Share Class.

The risk and reward category shown above is not guaranteed to remain unchanged and may change over time.

A Share Class with the lowest risk rating does not mean a risk-free investment.

Why is this Share Class in this category? This Share Class is classified in category 5 because its simulated Net Asset Value has shown medium to high fluctuations historically.

OTHER MATERIAL RISKS

- The value of your investment may fall as well as rise and you may get back less than you originally invested.
- The value of equities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
- Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub- Fund's portfolio and may impact the value of the Shares.
- The exclusion of companies that do not meet certain ESG criteria from the Sub-Fund's Investable Universe, through the screening performed as part of the index methodology described above, may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.
- To the extent that the Sub-Fund uses financial derivative instruments, the risk profile and the volatility of the Sub-Fund may increase. That notwithstanding, the risk profile of the Sub-Fund is not expected to significantly deviate from that of the Index as a result of its use of financial derivative instruments.
- The Sub-Fund is not expected to track the performance of the Index at all times with perfect accuracy. The Sub-Fund is, however, expected to provide investment results that, before expenses, generally correspond to the price and yield performance of the Index.
- Further information about risks can be found in the "Risk Information" section of the Prospectus.

Charges

One-off charges taken before or after you invest	
Entry charge	None
Exit charge	None

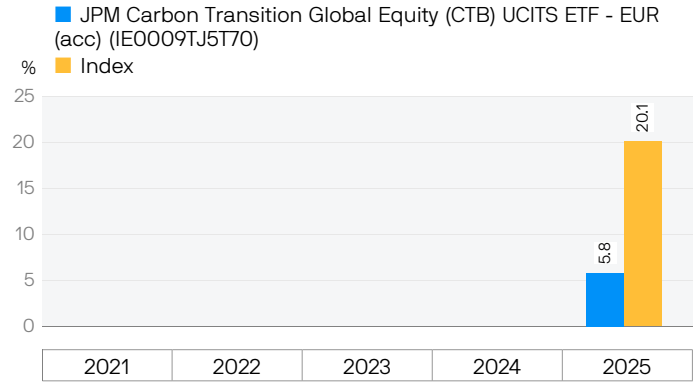

This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.

Charges taken from this Share Class over a year	
Ongoing charge	0.19%

Charges taken from this Share Class under certain specific conditions	
Performance fee	None

- Investors who are not Authorised Participants may have to pay brokerage commissions or other charges determined and imposed by their brokers when buying or selling Shares on stock exchange(s). Information on charges can be obtained from your broker. Authorised Participants dealing directly with JPMorgan ETFs (Ireland) ICAV will pay related transaction costs.
- Charges are used to pay the costs of running this Share Class, including the costs of marketing and distribution. These charges reduce the potential growth of the investment.
- The ongoing charge figure is estimated and is based on the expected total of charges. The UCITS' annual report for each financial year will include detail on the exact charges made.
- Further information about charges can be found in the "Fees and Expenses" section of the Prospectus.

Past Performance

- Past performance is not a guide to future performance.
- Performance data has been calculated including tax, ongoing charges and portfolio transaction costs and excluding entry and exit charges, in EUR.
- Where no past performance is shown there was insufficient data available in that year to provide performance.
- Sub-Fund launch date: 2020.
- Share Class launch date: 2024.

Practical Information

Depositary: The depositary is Brown Brothers Harriman Trustee Services (Ireland) Limited.
