Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

First Trust Bloomberg Space Economy UCITS ETF

A sub-fund of First Trust Global Funds ICAV (the "ICAV")
First Trust Global Portfolios Management Limited is the manager of the ICAV (the "Manager")
ISIN: IE000ANMCD25
Share class: Class A USD ACC

Objective and Investment Policy

Objective: The Fund seeks to provide investors with investment results that correspond generally to the price and yield, before fees and expenses, of an equity index called the Bloomberg Space Economy Index (the "Index").

Investment Policy: The Fund invests primarily in equity securities that are included in the Index. The Fund attempts to replicate, before fees and expenses, the performance of the Index.

The Investment Manager will seek to do this by trying to replicate the Index by holding in similar proportions the equity securities in the Index. This Fund may, where direct investment in a constituent of the Index is not possible, invest in depository receipts to gain exposure to the security and may also invest in money market instruments, short-term instruments and other eligible Funds. The Investment Manager will regularly monitor how closely the Fund tracks the Index. It is expected that the level of tracking error will be 0-2% in normal market conditions.

The Fund is passively managed and has an index replicating objective.

For more information about the investment policy, see "Investment Policy" in the Fund's section on supplement available at www.ftglobalportfolios.com. Information on portfolio composition is, where applicable, also available through this website.

You may sell your shares usually on each business day (a day on which the London Stock Exchange is open) by sending your request to the administrator.

Income is reinvested into the Fund for this share class.

Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within the short term.

Risk and Reward Profile

1	2	3	4	5	**6**	7

Lower risk ◄——————————————► Higher risk

Potentially lower reward — Potentially higher reward

The risk category is based on simulated and historical data and may not be a reliable indicator of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

The indicator is designed to help investors understand the uncertainties for both loss and for growth that may affect their investment. The lowest category does not mean that the investment is risk free.

The Fund is ranked at 6 because Funds of this type have experienced high rises and falls in value in the past.

The following risks are materially relevant to the Fund which may not be adequately captured by the indicator:

The Fund may not achieve its investment objective and the value of shares in the Fund may fall.

The creation and utilization of space-related technologies is a business based on anticipation off future developments and is witnessing new entrants into the market. The exploitation and utilization of space is a global event with a growing number of corporate participants looking to meet the future needs of a growing global population. Technological and engineering advances may not be sufficient, or occur quickly enough, to fulfil current expectations regarding progress in space exploration and development. Other risks include obsolescence of existing systems and equipment, supply chain issues, cybersecurity incidents, government spending policies, requirements of government contracting processes, regulatory changes, geopolitical instability and shortages of skilled labour, among other things. Therefore, investments by the Fund may be riskier than traditional investments in established industry sectors and the growth of these companies may be slower and subject to setbacks as new technology advancements are made to expand into space. These investment risks are not purported to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisors before making an application for Shares. Investment in the Fund is not for investors who cannot afford to lose all or a significant part of their investment.

There is no assurance that the Index will continue to be calculated and published on the basis described in the Prospectus. In addition, the Fund's return may not match the return of the Index.

See also the description of the risks applicable to the Fund in "Risk Factors" in the Fund's Prospectus and supplement thereto.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None*
Exit charge	None*
This is the maximum that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	0.65%
Charges taken from the Fund under certain specific conditions	
Performance fee	None

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.
*Authorised participants dealing directly with the Fund will pay related transaction costs. Authorised participants switching between the Fund and other sub-funds within the ICAV will be subject to a switching fee of up to 3% of the Net Asset Value per share.

Any entry and exit charges shown are maximum figures, and in some cases investors may pay less. You can find out the actual charges from your financial adviser or distributor.

A switching charge of up to 3% may be payable for switching shares (except in the case of an entry/exit charge paid by the Fund when buying or selling units in another sub-fund).

In the event that the Fund's operational expenses exceed the stated ongoing charges figure of 0.65%, the Investment Manager shall discharge any excess out of its own assets.

The ongoing charges figure is based on the Fund's annual management fee, whereby the Investment Manager shall be responsible for the Fund's operational expenses.

For more information about charges, please see "Fees, Costs and Expenses" in the Prospectus.
