iShares World Equity High Income Active UCITS ETF

A sub-fund of iShares III plc

Hedged GBP Dist

ISIN: IE000B2UB1Q3 Exchange Traded Fund (ETF)

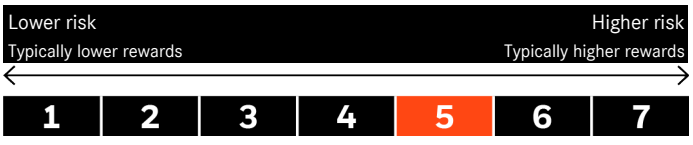

Manager: BlackRock Asset Management Ireland Limited

Objectives and Investment Policy

- The Fund is actively managed and aims to generate income and capital growth with lower volatility than developed market equities.
- In normal market conditions, the Fund will invest at least 80% of its total assets in the equity and equity-related instruments (namely, call options, futures and swaps) of developed market large and mid capitalisation companies.
- The Fund will also invest in accordance with its ESG Policy as outlined in the Fund's prospectus.
- In order to achieve its investment objective and policy, the Fund will invest in a variety of investment strategies and instruments. In particular, the Fund will use quantitative (i.e. mathematical or statistical) models in order to achieve a systematic (i.e. rule based) approach to stock selection and further the Fund will sell call options and buy futures on developed market large and mid capitalisation indices to generate income.
- The investment manager (IM) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- The Fund is actively managed, and the IM has discretion to select the Fund's investments. In doing so may take into consideration the MSCI World Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IM is not bound by the components or weighting of the Index when selecting investments. The IM may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. The Fund's portfolio holdings are expected to deviate materially from the Index.
- Recommendation: This Fund is not suitable for short term investment.
- Your shares will be distributing shares (i.e. income will be paid on the shares monthly).
- The Fund's base currency is US Dollar. Shares for this Share Class are denominated in Sterling. The performance of your shares may be affected by this currency difference.
- Your shares will be hedged with the aim of reducing the effect of exchange rate fluctuations between the denominated currency of the shares and the Fund's underlying portfolio currencies or the Fund's base currency. FDIs, including FX forward contracts, will be used for currency hedging purposes. The hedging strategy may not completely eliminate currency risk and, therefore, may affect the performance of your shares. Please see the prospectus for further details.
- The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange (s) on which the shares are traded. Indicative net asset value is published on relevant stock exchanges websites.

Risk and Reward Profile

- The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Share Class.
- The risk category shown is not guaranteed and may change over time.
- The lowest category does not mean risk free.
- The Share Class is rated five due to the nature of its investments which include the risks listed below. These factors may impact the value of the Share Class or expose the Share Class to losses.
  - The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
  - Risk to Capital Growth: The Fund may pursue investment strategies using derivatives in order to generate income which may have the effect of reducing capital and the potential for long-term capital growth as well as increasing any capital losses.
  - The Fund seeks to exclude companies engaging in certain activities inconsistent with ESG criteria. Such ESG screening may reduce the potential investment universe and this may adversely affect the value of the Fund's investments compared to a fund without such screening.
  - The Fund uses quantitative models in order to make investment decisions. As market dynamics shift over time, a quantitative model may become less efficient or may even present deficiencies under certain market conditions.
- Particular risks not adequately captured by the risk indicator include:
  - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Share Class to financial loss.

The benchmark is the intellectual property of the index provider. The Share Class is not sponsored or endorsed by the index provider. Please refer to the Fund's prospectus for full disclaimer.

Charges

The charges are used to pay the costs of running the Share Class, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

*Not applicable to secondary market investors. Investors dealing on a stock exchange will pay fees charged by their stock brokers. Such charges are publicly available on exchanges on which the shares are listed and traded, or can be obtained from stock brokers.

*Authorised participants dealing directly with the Fund will pay related transaction costs including, on redemptions, any applicable capital gains tax (CGT) and other taxes on underlying securities.

The ongoing charges figure is based on the fixed annualised fee charged to the Share Class in accordance with the Fund's prospectus. This figure excludes portfolio trade related costs, except costs paid to the depositary and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.
