This Fund's management company is UBS Asset Management (Europe) S.A., a subsidiary of UBS AG.

Objectives and investment policy

The Fund's primary investment objective is to seek total returns in excess of the Benchmark and to generate an income in excess of the Benchmark (after the deduction of fees and expenses).There is no guarantee that the Fund will achieve its investment objective and, subject to market conditions, outperformance of the Benchmark may be volatile at times. In order to achieve its Investment Objective, the Fund will invest directly or indirectly in equity and other equity interests of small, medium and large-cap companies in developed and emerging markets worldwide, including China. Investments will be made directly or indirectly through other collective investment schemes or financial derivative instruments ("FDI"). The Fund is actively managed in reference to a benchmark. The Investment Manager uses MSCI World Index (Net Total Return) (the "Benchmark") for performance evaluation, sustainability profile comparison and risk management purposes. The Investment Manager can build the portfolio at their discretion and, concerning the selection of instruments and their weightings, is not bound to the Benchmark. Accordingly, the portfolio may deviate from the Benchmark with regards to allocations. In addition, the Investment Manager may employ a derivatives strategy using options and/or futures. This strategy is primarily designed to generate additional income through the sale of equity call options. It may also utilise futures to help manage variations in market exposure arising from the written call options. The derivatives strategy represents an important source of the Fund's returns and may also contribute to the Fund's overall volatility.
The return of the fund depends primarily on equity market development and their exchange rate fluctuations, as well as dividend payments.
