

## Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### Invesco Bloomberg Commodity Carbon Tilted UCITS ETF (the "Fund") A sub-fund of Invesco Markets plc (the "Umbrella Fund") USD (ISIN: IE000CYTPBT0) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

## Objectives and Investment Policy

- The Fund is a passively-managed Exchange-Traded Fund (ETF), which aims to achieve the total return of the Bloomberg Commodity Carbon Tilted Index® (the "Index")<sup>1</sup>, less fees, expenses and transaction costs.
- To achieve the objective, the Fund will use unfunded swaps ("Swaps"). These Swaps are an agreement between the Fund and an approved counterparty to exchange one stream of cash flows, against another stream. The performance of the Index is swapped to the Fund in exchange for an agreed rate of return reflective of US Treasury Bill market rates. The Fund holds a diversified basket of US Treasury Bills and may be required to provide or receive collateral for any difference in the performance of the Index to the return of the US Treasury Bills.
- The Fund is an Article 8 Fund for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector ("SFDR").
- The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances other investors will be permitted to redeem their shares directly from Invesco Markets plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund's base currency is USD.
- **Dividend Policy:** This Fund does not pay a dividend.
- **Net Asset Value:** This is calculated daily and the Fund is open for subscriptions and redemptions on each day the United States Federal Reserve System is open. Please refer to the prospectus for further information.
- **The Index:** The Index is a variant of the Bloomberg Commodity Index (the "Parent Index") that comprises the same futures on the same component commodities as the Parent Index and seeks to incorporate a measure of the environmental costs associated with the production of the underlying commodities referenced by each futures contract. The Parent Index is designed to be a liquid and diversified benchmark for commodities, composed of commodity futures contracts. Commodities are classified into 6 groups (energy, industrial metals, precious metals, livestock, grains and softs) in the Parent Index ("Parent Index Commodity Groups") and constituents eligible for inclusion are based on four main principles: economic significance, diversification, continuity and liquidity. To group commodities with comparable production processes, the constituent commodities in the Index are reorganised into seven commodity groups (industrial metals, agriculture derived, agriculture ex-derived, livestock, precious metals, primary energy and distillates), the "Reference Index Commodity Groups", which derive from the Parent Index Commodity Groups. The Index then takes into account the Greenhouse Gas emissions ("GHG Emissions") associated with the production of the underlying commodity (referenced by the commodity futures contracts in the Parent Index) and applies tilting such that the lower GHG emitting commodities relative to their Reference Index Commodity Group are overweighted, and the higher GHG emitting commodities are underweighted, when compared to the Parent Index. The application of tilting facilitates a balanced contribution to the aggregate reduction by all groups given that the GHG emissions profile of each group varies. The Index is rebalanced on an annual basis.

## Risk and Reward Profile

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

## Other Risks

- **General Investment Risk:** The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- **Commodity Risk:** Instruments providing exposure to commodities are generally considered to be high risk which means there is a greater risk of large fluctuations in the value of the instrument.
- **GHG Emissions Risk:** The Fund may perform differently to other commodity funds, such as underperforming in comparison to other commodity funds that do not seek to weight commodity futures based on their respective GHG Emissions.
- **Risk of using Derivatives:** The Fund's ability to track the benchmark's performance is reliant on the counterparties to continuously deliver the performance of the benchmark in line with the swap agreements and would also be affected by any spread between the pricing of the swaps and the pricing of the benchmark. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- **Synthetic ETF Risk:** The fund might purchase securities that are not contained in the index and will enter into swap agreements to exchange the performance of those securities for the performance of the index.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at [etf.invesco.com](http://etf.invesco.com) (select your country and navigate to the Prospectus on the Documents section on the product page).

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	None*
Exit charge	None*
Charges taken from the Share Class over a year	
Ongoing charge	0.35%
Charges taken from the Share Class under certain specific conditions	
Performance fee	None

- \*Currently, the Fund is not exercising its entitlement to apply entry and exit charges.
- The **ongoing charge** is based on the fee paid to the Manager. The Manager is responsible for discharging from its fee, costs attributable to the Investment Manager, Administrator, Depositary as well as the Operational Expenses incurred by the Fund. It excludes portfolio transaction costs except in the case of an entry or exit charge paid by the Fund when buying or selling shares/units in another fund.
- Because the Fund is an ETF, investors will typically only be able to buy or sell shares in the secondary market. Accordingly, investors may incur brokerage and / or transaction fees in connection with their dealings. Investors may also bear the costs of "bid-ask" spreads; meaning the difference between the prices at which shares can be bought and sold. You should discuss these fees and costs with your broker before you invest, as they may reduce the amount of your initial investment and the amount you receive on disposal.
- For more information on charges, please see the relevant charges section in the Fund supplement under "General Information Relating to the Fund", which is available at [etf.invesco.com](http://etf.invesco.com) (select your country and navigate to the Documents section on the product page.)
