Invesco USD AAA CLO UCITS ETF (the "Fund")
A sub-fund of Invesco Markets II plc (the "Umbrella Fund")
GBP Hdg Dist (ISIN: IE000DZN13O8) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

Objectives and Investment Policy

- The investment objective of the Fund is to seek to provide consistent income and capital preservation over the long term. The Fund is an actively managed Exchange-Traded Fund and is not constrained by a benchmark. The Fund may use the J.P. Morgan CLOIE AAA Index (the "**Benchmark**") for performance comparison purposes.
- To achieve the investment objective, the Fund will primarily invest in AAA-rated (or equivalently rated by a nationally recognised statistical rating organisation) tranches of US Dollar denominated floating rate debt securities issued by collateralised loan obligations ("**CLOs**").
- A CLO is a structure that issues fixed- or floating-rate debt securities that are collateralised by a pool of loans and bonds, which primarily includes senior secured loans, broadly syndicated loans, floating rate notes, high yield bonds and subordinated corporate loans. Each CLO consists of rated debt tranches that pay interest, as well as a portion of equity. The CLO makes payments to the various tranches based on seniority. Each tranche has a different risk/return profile based on its priority claim on the cash flows. The more senior and higher rated the tranche, the higher its priority claim on cash flows.
- At least 80% of the CLO Debt Securities in which the Fund will invest will be AAA-rated (as rated by at least one rating agency) CLO Debt Securities. Up to 20% of the CLO Debt Securities in which the Fund will invest may be below AAA-rated subject to such CLO Debt Securities being rated investment grade and predominantly comprising AA-rated CLO Debt Securities. If a security is downgraded, the Investment Manager will take such action as required as soon as reasonably practicable, taking due account of the interests of its Shareholders.
- The Fund may also invest in "middle-market CLOs", which are CLO Debt Securities whose underlying loan collateral are substantially comprised of middle-market loans (i.e. loans with offering sizes generally below USD$250million).
- The Fund may invest up to 20% of its net assets in CLO Debt Securities that are denominated in currencies other than US dollar.
- The Fund may also invest a portion of its assets in cash or other short-term instruments for the purposes of liquidity management and managing redemptions. The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from Invesco Markets II plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund's base currency is USD.
- The Share Class currency is GBP. To minimise exposure to fluctuations in the exchange rate between the Fund's base currency and the Share Class currency, the Share Class enters into foreign exchange transactions (typically FX forwards).
- **Dividend Policy:** This share class declares and distributes a dividend on a quarterly basis.
- **Net Asset Value:** This is calculated daily and the Fund is open for subscriptions and redemptions on each day the United States Federal Reserve System is open. Please refer to the prospectus for further information.
- **The Benchmark:** The Benchmark measures the performance of US dollar-denominated, AAA rated CLO debt. The Fund will not seek to track the performance of the Benchmark.

Risk and Reward Profile

Lower Risk ← → Higher Risk

Typically lower rewards — Typically higher rewards

1	**2**	3	4	5	6	7

- The Share Class is in risk category 2 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- **General Investment Risk:** The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.
- **CLO Debt Securities Risk:** Highly rated tranches of CLO Debt Securities may be downgraded, and in stressed market environments even highly rated tranches of CLO Debt Securities may experience losses due to defaults in the underlying loan collateral, the disappearance of the subordinated/equity tranches, market anticipation of defaults, as well as negative market sentiment with respect to CLO securities as an asset class.
- **Credit Risk:** The creditworthiness of the debt the Fund is exposed to may weaken and result in fluctuations in the value of the Fund. There is no guarantee the issuers of debt will repay the interest and capital on the redemption date. The risk is higher when the Fund is exposed to high yield debt securities.
- **Currency hedging Risk:** Currency hedging between the base currency of the Fund and the currency of the share class may not completely eliminate the currency risk between those two currencies and may affect the performance of the share class.
- **Interest Rate Risk:** Changes in interest rates will result in fluctuations in the value of the Fund.
- **Liquidity Risk:** It may be difficult for the Fund to buy or sell certain instruments in stressed market conditions. Consequently, the price obtained when selling such instruments may be lower than under normal market conditions.
- For more information on risks, please see the Fund supplement and prospectus under "**Risk Factors**", which is available at http://etf.invesco.com (select your country and navigate to the Prospectus on the Documents section on the product page).
