To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the

primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage (calculated under the commitment approach as set out in the "Risk Management" section below) will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

Instruments shall be listed and/or traded on the exchanges and markets set out in Appendix II of the Prospectus.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The RMP was prepared and submitted to the Central Bank in accordance with the Central Bank requirements.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.
For purposes of this section, the Equity Participation Ratio does not include equity participations, which are lent out via securities lending program as set out in the Prospectus.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index and the Index Provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the Fund's resulting ESG rating will be higher than the ESG rating of a Fund tracking a standard index.

The Fund does not benefit from a French SRI label.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

To the extent that hedging is successful, the performance of the Class is likely to move in line with the performance of the underlying assets and Shareholders in the Class will not benefit if the currency of the Class falls against the Base Currency.

SECURITIES LENDING

The Company will not enter into any securities lending agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI Japan Climate Paris Aligned PAB Index (Net Total Return) and is not a complete description of the Index.

General

The Index is a sub-set of the MSCI Japan Index (the "**Parent Index**"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in JPY. The Index aims to provide exposure to opportunities arising from the transition to a lower-carbon economy, reduce exposure to transition and physical climate risks, while aligning with requirements of the Paris Agreement. The Index includes large and mid-cap securities of the Japanese equity markets.

The Index methodology aims to achieve a maximum implied temperature rise defined by the Paris Agreement using aggregated cumulative projected emissions. Eligibility is influenced by the MSCI Low Carbon Transition Risk assessment and MSCI Climate Value-at-Risk.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, trend, and industry-adjusted scores with preference given to those demonstrating positive ESG momentum. The Index targets an increase in aggregate weight of Companies Setting Targets, weighted-average Low Carbon Transition Score and weighted-average Green Revenue relative to the Parent Index.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessment which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons are excluded. Also excluded are constituents involved in the development or production of nuclear weapons. The Index also excludes issuers assessed to be failing the MSCI Environmental Controversy assessment.

Depending on the activity, issuers deriving revenues from, or involved in business activities related to tobacco, oil and gas, thermal coal mining, adult entertainment, alcohol, gambling, civilian firearms, electricity generation through thermal coal, liquid fuel, or natural gas are excluded. Thresholds may range from any revenue to more than 10% revenue exposure, except for electricity generation through thermal coal, liquid fuel, or natural gas which are excluded at 50% revenue exposure ("**Climate Criteria"**).

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a semi-annual basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (ticker no. 735593) is available on the MSCI internet website:

https://www.msci.com/index-methodology

Additional information about the Index can be found under:

https://www.msci.com/esg/climate-paris-aligned-indexes

Index Factsheet

The Index Factsheet is available on the MSCI internet website:

https://www.msci.com/equity-fact-sheet-search

Publication of the Index Value

The closing price of the Index is available on the MSCI internet website:

https://app2.msci.com/eqb/custom_indexes/custom_performance.html

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting "Japan Climate Paris Aligned Index" in the tab:

https://www.msci.com/constituents

RISK MANAGEMENT / LEVERAGE

Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index. While the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market

disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Climate-Focused Investing Risk

The Fund is subject to the risk that its climate-focused investment strategy may select or exclude securities of certain issuers for reasons other than investment performance considerations. As a result, the Fund may underperform funds that do not utilise a climate focused investment strategy. Certain climate-focused investments may be dependent on government policies and subsidies, which are subject to change or elimination. Successful application of the Fund's climate-focused investment strategy will depend on the success of the Index Provider's "Climate Criteria" in its construction of the Index properly identifying and analysing material climate-related issues and related business practices, and there can be no assurance that the strategy or techniques employed will be successful.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of companies of the Japanese equity market under the climate criteria outlined in this Supplement and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

Accumulating Share Classes:

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- JPY acc;
- ir-hUSD acc;
- ir-hCHF acc;
- ir-hEUR acc;
- ir-hGBP acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

Distributing Share Classes:

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- JPY dis;
- JPY UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
JPY acc	up to 0.12% per annum of the Net Asset Value of the Class
JPY dis	up to 0.12% per annum of the Net Asset Value of the Class
JPY UKdis	up to 0.12% per annum of the Net Asset Value of the Class
ir-hUSD acc	up to 0.15% per annum of the Net Asset Value of the Class
ir-hCHF acc	up to 0.15% per annum of the Net Asset Value of the Class
ir-hEUR acc	up to 0.15% per annum of the Net Asset Value of the Class
ir-hGBP acc	up to 0.15% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- JPY dis
- JPY acc
- JPY UKdis
- ir-hUSD acc
- ir-hCHF acc
- ir-hEUR acc
- ir-hGBP acc

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	**Initial Offer Price**
JPY dis	Index value / 1
JPY acc	N/A
JPY UKdis	Index value / 1
ir-hUSD acc	Index value / 100
ir-hCHF acc	Index value / 100
ir-hEUR acc	N/A
ir-hGBP acc	Index value / 100

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1,984.16 at 31 January 2020, Shares in JPY dis would be issued at an Initial Offer Price per Share of JPY 1,984.16. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE

DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX III

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS MSCI Japan Climate Paris Aligned UCITS ETF	549300KQSLW5EXIH2V11

Sustainable investment objective

Does this financial product have a sustainable investment objective?

	●● ☒ Yes		**●● ☐ No**
☒	It will make a minimum of **sustainable investments with an environmental objective:** 20 %	☐	It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___ % of sustainable investments
	☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy		☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
	☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy		☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
			☐ with a social objective
☐	It will make a minimum of **sustainable investments with a social objective:** ___ %	☐	It promotes E/S characteristics, but **will not make any sustainable investments**

objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

What is the sustainable investment objective of this financial product?

This financial product has a reduction in carbon emissions as its sustainable investment objective in view of achieving the long- term global warming objectives of the Paris Agreement. The financial product contributes to this by tracking, before expenses, the price and income performance of the MSCI Japan Climate Paris Aligned PAB Index (Net Total Return) (the "Index"). The attainment of the sustainable investment objective is measured using the following ESG characteristics respectively:

- tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the MSCI Japan Index (the "**Parent Index**") sustainability profile
- a Carbon Intensity (1, 2) emissions indicator lower than Parent Index (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI Japan Climate Paris Aligned PAB Index (Net Total Return).

- ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

The objective is measured using the following indicators respectively:
• The MSCI ESG Score
MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Index.
• Weighted average carbon intensity (Scope 1+2) MSCI
The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.
MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices.
The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.
The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products.
The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms.
MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.
The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.
The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/ or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such a investment objectives an risk tolerance

This financial product seeks the objective(s) described in this annex through Index selection and passive asset management.
This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability objectives and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability objectives and risks of the constituents of the Index can be found on the website of the index provider.

- ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The following binding element(s) of the investment strategy are used to select the investments to attain the objective sought by this financial product:
1):

- A sustainability profile (MSCI ESG Score) that is higher than the Parent Index's sustainability profile

2):

- Carbon Intensity (1 and 2) emissions indicator that is lower than Parent Index (MSCI)

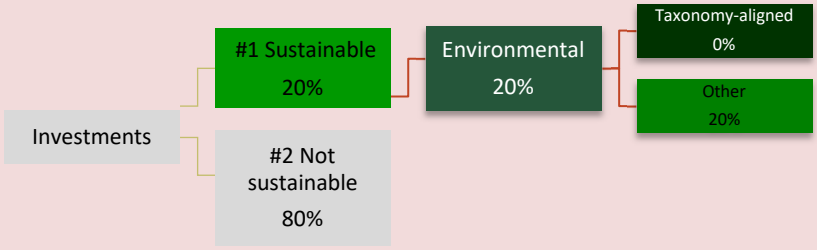
This financial product seeks to achieve a higher MSCI ESG Score and low Carbon Intensity emissions indicator than the Parent Index by tracking the performance and ESG profile of the Index. As set out in the section of the Supplement entitled "Description of the Index" in more detail, the Index is designed to align itself with the de-carbonisation pathways required to deliver the global 1.5 degrees Celsius increase targeted by the Paris Agreement. The Index Provider seeks to achieve this alignment by overweighting companies on a credible path to de-carbonisation or offering green solutions, while in contrast underweighting those poorly positioned for the transition to a lower-carbon economy and by limiting exposure to the growing physical risks.
The calculations do not take account of cash, derivatives, and unrated investment instruments.

The above (s) and the minimum proportion of sustainable investments are calculated at quarter end using the average of all of business days' values in the quarter.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance practices of the investee companies is performed by the index provider.
MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.



What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

The minimum proportion of the investments of the financial product used to meet the sustainable investment objective is 20%, with the exception of any investments used for hedging or relating to cash held as ancillary liquidity.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

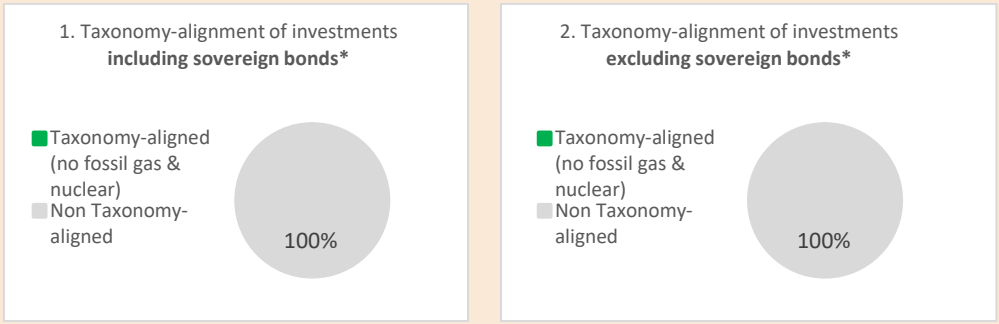
#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments.

- ***How does the use of derivatives attain the sustainable investment objective?***

The financial product tracks an ESG index and may replicate the performance of the Index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments Index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged Index, or b) to generate efficiencies in gaining exposure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.
The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.



- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

☐ Yes:
☐ In fossil gas ☐ In nuclear energy
☒ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules. **Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.

What is the minimum share of sustainable investments with a social objective?

The financial product targets a minimum share of socially sustainable investments greater than 0%.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

The Reference Benchmark designated for the purpose of attaining the sustainable objective of the financial product is the MSCI Japan Climate Paris Aligned PAB Index (Net Total Return).

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the sustainable objective it seeks to achieve. The Index rebalances on a semi-annual basis, more details on the index methodology applied by the Index provider can be found below. It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible.

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

whether the financial product attains the sustainable investment objective.

	• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
	The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the Index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of the fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the investment objective it seeks to achieve. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
	• ***How does the designated index differ from a relevant broad market index?***
	The Index (MSCI Japan Climate Paris Aligned PAB Index (Net Total Return)) is part of the MSCI Climate Paris Aligned Index series. The Index draws its constituents from the Parent Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation Japanese companies.
	• ***Where can the methodology used for the calculation of the designated index be found?***
	The methodology of the construction of the Index can be found in the fund supplement. https://www.msci.com/eqb/methodology/meth_docs/MSCI_GIMIMethodology_Nov2022.pdf https://www.msci.com/eqb/methodology/meth_docs/MSCI_IndexCalcMethodology_July2022.pdf https://www.msci.com/eqb/methodology/meth_docs/MSCI_Climate_Paris_Aligned_Indexes.pdf

UBS MSCI ACWI Climate Paris Aligned UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 36
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI ACWI Climate Paris Aligned UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	USD.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	Save for USD acc shares 19 November 2026 or such earlier or later date as the Directors and/or the Manager may determine and notify to the Central Bank.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
EU Climate Regulations	Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 as amended by Regulation (EU) 2019/2089 of the European Parliament and of the Council of 27 November 2019 amending Regulation (EU) 2016/1011 as regards EU Climate Transition Benchmarks, EU Paris-aligned Benchmarks and sustainability-related disclosures for benchmarks and as supplemented by Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks as may be amended, supplemented, consolidated, substituted in any form or otherwise modified from time to time;
Index	MSCI ACWI Climate Paris Aligned PAB Index (Net Total Return).
Index Provider	MSCI.

Initial Offer Period	Save for USD acc shares 9:00 am (Irish time) on 20 May 2026 to 4:30pm (Irish time) on the Closing Date.

Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Paris Agreement	a legally binding international treaty on climate change, adopted in Paris on 12 December 2015 and entered into force on 4 November 2016. Its goal is to limit global warming to below 2 degrees Celsius, preferably to 1.5 degrees Celsius, compared to pre-industrial levels. To achieve this long-term temperature goal, countries aim to reach global peaking of greenhouse gas emissions as soon as possible to achieve a climate neutral world by mid-century.
Settlement Date	At the latest, on the second Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
TCFD	Task Force on Climate-related Financial Disclosures, an organisation formed by the Financial Stability Board for the purposes of developing voluntary, consistent disclosure recommendations for the provision of information to investors, about climate-related financial risks.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI ACWI Climate Paris Aligned UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to reduce their exposure to transition and physical climate risks and to invest into opportunities arising from the transition to a lower-carbon economy in alignment with the Paris Agreement requirements via a diversified global portfolio of securities as described below in the "*Investment Objective and Strategy*" section. After incorporating the recommendations of the TCFD, the Fund's investment universe will exclude at least 20% of the least well-rated securities as against the standard index universe, being the Parent Index. The Fund does not benefit from an SRI label.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;
- hCHF acc;
- hEUR acc;
- hGBP acc;
- hUSD acc;
- hAUD acc;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will generally only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity market performance of global companies which form part of the Index with a focus on reduction in carbon emissions considerations defined by the Paris Agreement and specific exclusions of companies involved in controversial weapons, environmental, social and governance ("ESG") controversies, tobacco, environmental harm, thermal coal mining, oil & gas related activities and power generation.

Investment Policy

In order to achieve the objective, the investment policy of the Fund is to seek to track the performance of the MSCI ACWI Climate Paris Aligned PAB Index (Net Total Return), (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI ACWI Climate Paris Aligned PAB Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**")), as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

The Fund seeks to achieve the objective by tracking the Index and, with regard to the climate criteria, giving exposure to global companies which are meeting or working towards the climate goals recommended by the TCFD on carbon reduction and transition objectives towards a more sustainable and lower carbon economy while aligning with the Paris Agreement requirements.

The Fund seeks to invest all of its total net assets in securities that are constituents of the Index and the Index Provider constructs the Index on the basis of the Climate Criteria as defined in the section entitled "Description of the Index" below. The Index will eliminate securities as against the standard (parent) index universe based on their exposure to controversial weapons, ESG controversies, tobacco, environmental harm, thermal coal mining, oil & gas related activities and power generation. It is, therefore, expected that the Fund's exposure to the Climate Criteria will be higher than that of a Fund tracking a standard index.

The Fund is passively managed.

By pursuing the investment objective and seeking exposure to the Climate Criteria, the Fund complies with Article 9(3) of SFDR and is deemed to have sustainable investments as defined in Article 2, point (17) SFDR as its objective. Information related to sustainable investment is available in an annex to this document (SFDR RTS Art. 18(2)).

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval or the provision of reasonable notice to Shareholders (as applicable) and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

There are also currency versions of the Index which are denominated in a currency other than USD and hedged, including currency versions (only developed market currencies) denominated in AUD, EUR, GBP, USD, CHF, SGD, CAD,JPY and SEK (each a "**Hedged Currency Version**"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a USD denominated asset in a currency other than USD. For those Share Classes with "hedged" in their name, this is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a USD denominated asset in a currency other than USD. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging.

Share Class	Index Currency Version
hCHF acc	MSCI ACWI Climate Paris Aligned PAB with Developed Markets 100% Hedged to CHF Index (Net Total Return)
hEUR acc	MSCI ACWI Climate Paris Aligned PAB with Developed Markets 100% Hedged to EUR Index (Net Total Return)
hGBP acc	MSCI ACWI Climate Paris Aligned PAB with Developed Markets 100% Hedged to GBP Index (Net Total Return)
hUSD acc	MSCI ACWI Climate Paris Aligned PAB with Developed Markets 100% Hedged to USD Index (Net Total Return)
hAUD acc	MSCI ACWI Climate Paris Aligned PAB with Developed Markets 100% Hedged to AUD Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the exposure to the Climate Criteria generated by these selected securities cannot be guaranteed. The Fund, for the purposes of assisting in tracking the Index, may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities satisfy the Climate Criteria and may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set out above utilises the Replication Strategy in order to track the Index, accordingly investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy in order to track the Index, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the

historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage (calculated under the commitment approach as set out in the "Risk Management" section below) will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

Instruments shall be listed and/or traded on the exchanges and markets set out in Appendix II of the Prospectus.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The RMP was prepared and submitted to the Central Bank in accordance with the Central Bank requirements.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index and the Index Provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the Fund's resulting ESG rating will be higher than the ESG rating of a Fund tracking a standard index.

The Fund does not benefit from a French SRI label.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING

The Company will not enter into any securities lending agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI ACWI Climate Paris Aligned PAB Index (Net Total Return) and is not a complete description of the Index.

General

The Index is a sub-set of the MSCI ACWI Index (the "**Parent Index**"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index aims to provide exposure to opportunities arising from the transition to a lower-carbon economy, reduce exposure to transition and physical climate risks, while aligning with requirements of the Paris Agreement. The Index includes large and mid-cap securities worldwide across both developed markets and emerging market countries as further described in the Parent Index factsheet, available at https://www.msci.com/acwi.

The Index methodology aims to achieve a maximum implied temperature rise defined by the Paris Agreement using aggregated cumulative projected emissions. Eligibility is influenced by the MSCI Low Carbon Transition Risk assessment and MSCI Climate Value-at-Risk.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, trend, and industry-adjusted scores with preference given to those demonstrating positive ESG momentum. The Index targets an increase in aggregate weight of Companies Setting Targets, weighted-average Low Carbon Transition Score and weighted-average Green Revenue relative to the Parent Index.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessment which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons are excluded. Also excluded are constituents involved in the development or production of nuclear weapons. The Index also excludes issuers assessed to be failing the MSCI Environmental Controversy assessment.

Depending on the activity, issuers deriving revenues from, or involved in business activities related to tobacco, oil and gas, thermal coal mining, adult entertainment, alcohol, gambling, civilian firearms, electricity generation through thermal coal, liquid fuel, or natural gas are excluded. Thresholds may range from any revenue to more than 10% revenue exposure, except for electricity generation through thermal coal, liquid fuel, or natural gas which are excluded at 50% revenue exposure ("**Climate Criteria**").

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a semi-annual basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (ticker no. 735617) is available on the MSCI internet website:

https://www.msci.com/index-methodology

Additional information about the Index can be found under:

https://www.msci.com/esg/climate-paris-aligned-indexes

Index Factsheet

The Index Factsheet is available on the MSCI internet website:

https://www.msci.com/equity-fact-sheet-search

Publication of the Index Value

The closing price of the Index is available on the MSCI internet website:

https://app2.msci.com/eqb/custom_indexes/custom_performance.html

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting "ACWI Climate Paris Aligned Index" in the tab:

https://www.msci.com/constituents

RISK MANAGEMENT / LEVERAGE

Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index. While the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market

disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Climate-Focused Investing Risk

The Fund is subject to the risk that its climate-focused investment strategy may select or exclude securities of certain issuers for reasons other than investment performance considerations. As a result, the Fund may underperform funds that do not utilise a climate focused investment strategy. Certain climate-focused investments may be dependent on government policies and subsidies, which are subject to change or elimination. Successful application of the Fund's climate-focused investment strategy will depend on the success of the Index Provider's "Climate Criteria" in its construction of the Index properly identifying and analysing material climate-related issues and related business practices, and there can be no assurance that the strategy or techniques employed will be successful.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of companies of the global equity market under the climate criteria outlined in this Supplement and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

Accumulating Share Classes:

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hCHF acc;
- hEUR acc;
- hGBP acc;
- hUSD acc;
- hAUD acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

Distributing Share Classes:

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.18% per annum of the Net Asset Value of the Class
USD dis	up to 0.18% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.18% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.21% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.21% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.21% per annum of the Net Asset Value of the Class
hUSD acc	up to 0.21% per annum of the Net Asset Value of the Class
hAUD acc	up to 0.21% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD Ukdis
- hCHF acc
- hEUR acc
- hGBP acc
- hUSD acc
- hAUD acc

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 120
USD acc	Index value / 120
USD UKdis	Index value / 120
hCHF acc	Index value / 400
hEUR acc	Index value / 400
hGBP acc	Index value / 400
hUSD acc	Index value / 400
hAUD acc	Index value / 400

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1,984.16 at 31 January 2020, Shares in USD dis would be issued at an Initial Offer Price per Share of USD 16.535. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within two Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX III

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS MSCI ACWI Climate Paris Aligned UCITS ETF	549300IKZXPOBK5SRK11

Sustainable investment objective

Does this financial product have a sustainable investment objective?

●● ☒ **Yes**	●● ☐ **No**
☒ It will make a minimum of **sustainable investments with an environmental objective:** 20 %	☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___ % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

objective might be aligned with the Taxonomy or not.

	**What is the sustainable investment objective of this financial product?**
	This financial product has a reduction in carbon emissions as its sustainable investment objective in view of achieving the long- term global warming objectives of the Paris Agreement. The financial product contributes to this by tracking, before expenses, the price and income performance of the MSCI ACWI Climate Paris Aligned PAB Index (Net Total Return) (the "Index"). The attainment of the sustainable investment objective is measured using the following ESG characteristics respectively: - tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the MSCI ACWI Index (the "**Parent Index**") sustainability profile - a Carbon Intensity (1, 2) emissions indicator lower than Parent Index (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI ACWI Climate Paris Aligned PAB Index (Net Total Return).
	• ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***
	The objective is measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Index. • Weighted average carbon intensity (Scope 1+2) MSCI The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.
MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices.
The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.
The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products.
The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.
https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controveroversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms.
MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.
The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.
The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/ or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such a investment objectives an risk tolerance

This financial product seeks the objective(s) described in this annex through Index selection and passive asset management.
This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability objectives and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability objectives and risks of the constituents of the Index can be found on the website of the index provider.

- ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The following binding element(s) of the investment strategy are used to select the investments to attain the objective sought by this financial product:
1):

- A sustainability profile (MSCI ESG Score) that is higher than the Parent Index's sustainability profile

2):

- Carbon Intensity (1 and 2) emissions indicator that is lower than Parent Index (MSCI)

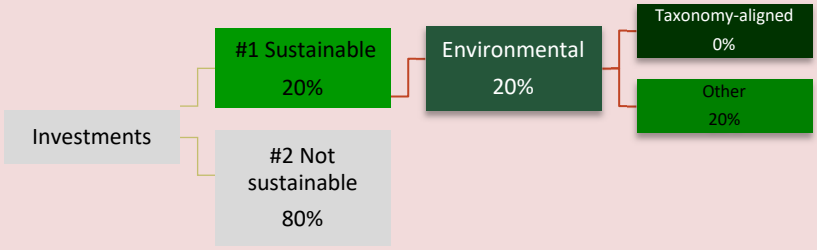
This financial product seeks to achieve a higher MSCI ESG Score and low Carbon Intensity emissions indicator than the Parent Index by tracking the performance and ESG profile of the Index. As set out in the section of the Supplement entitled "Description of the Index" in more detail, the Index is designed to align itself with the de-carbonisation pathways required to deliver the global 1.5 degrees Celsius increase targeted by the Paris Agreement. The Index Provider seeks to achieve this alignment by overweighting companies on a credible path to de-carbonisation or offering green solutions, while in contrast underweighting those poorly positioned for the transition to a lower-carbon economy and by limiting exposure to the growing physical risks.
The calculations do not take account of cash, derivatives, and unrated investment instruments.

The above (s) and the minimum proportion of sustainable investments are calculated at quarter end using the average of all of business days' values in the quarter.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance practices of the investee companies is performed by the index provider.
MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.



What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

The minimum proportion of the investments of the financial product used to meet the sustainable investment objective is 20%, with the exception of any investments used for hedging or relating to cash held as ancillary liquidity.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments.

- ***How does the use of derivatives attain the sustainable investment objective?***

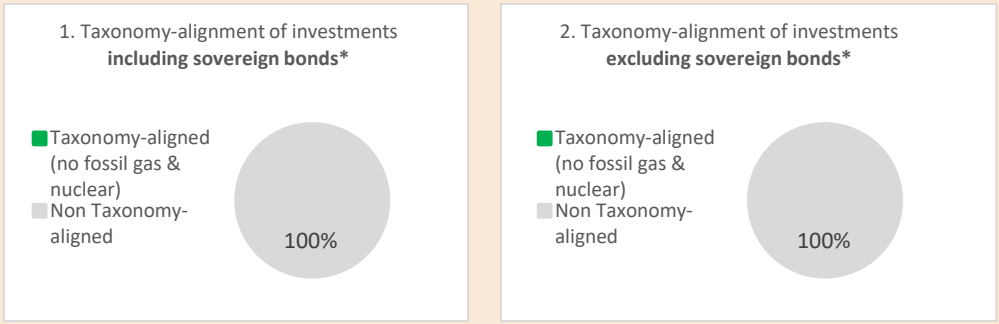
The financial product tracks an ESG index and may replicate the performance of the Index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments Index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged Index, or b) to generate efficiencies in gaining exposure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.
The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

☐ Yes:
☐ In fossil gas ☐ In nuclear energy
☒ No



[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission leels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.

What is the minimum share of sustainable investments with a social objective?

The financial product targets a minimum share of socially sustainable investments greater than 0%.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

The Reference Benchmark designated for the purpose of attaining the sustainable objective of the financial product is the MSCI ACWI Climate Paris Aligned PAB Index (Net Total Return).

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the sustainable objective it seeks to achieve. The Index rebalances on a semi-annual basis, more details on the index methodology applied by the Index provider can be found below. It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible.

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the Index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of the fund.
The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the investment objective it seeks to achieve.
The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.
The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

The Index (MSCI ACWI Climate Paris Aligned PAB Index (Net Total Return)) is part of the MSCI Climate Paris Aligned Index series. The Index draws its constituents from the Parent Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation global companies.

- ***Where can the methodology used for the calculation of the designated index be found?***

The methodology of the construction of the Index can be found in the fund supplement.

UBS MSCI EM Climate Paris Aligned UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 37
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI EM Climate Paris Aligned UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund. An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	USD.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine and notify to the Central Bank.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
EU Climate Regulations	Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 as amended by Regulation (EU) 2019/2089 of the European Parliament and of the Council of 27 November 2019 amending Regulation (EU) 2016/1011 as regards EU Climate Transition Benchmarks, EU Paris-aligned Benchmarks and sustainability-related disclosures for benchmarks and as supplemented by Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 as regards minimum standards for EU Climate Transition Benchmarks and EU Paris-aligned Benchmarks as may be amended, supplemented, consolidated, substituted in any form or otherwise modified from time to time;
Index	MSCI Emerging Markets Climate Paris Aligned PAB Index (Net Total Return).

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI EM Climate Paris Aligned UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to reduce their exposure to transition and physical climate risks and to invest into opportunities arising from the transition to a lower-carbon economy in alignment with the Paris Agreement requirements via a diversified global portfolio of securities across emerging markets (EM) as described below in the "*Investment Objective and Strategy*" section. After incorporating the recommendations of the TCFD, the Fund's investment universe will exclude at least 20% of the least well-rated securities as against the standard index universe, being the Parent Index. The Fund does not benefit from an SRI label.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will generally only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity market performance of global emerging markets companies which form part of the Index with a focus on reduction in carbon emissions considerations defined by the Paris Agreement and specific exclusions of companies involved in controversial weapons, environmental, social and governance ("ESG") controversies, tobacco, environmental harm, thermal coal mining, oil & gas related activities and power generation.

Investment Policy

In order to achieve the objective, the investment policy of the Fund is to seek to track the performance of the MSCI Emerging Markets Climate Paris Aligned PAB Index (Net Total Return), (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI Emerging Markets Climate Paris Aligned PAB Index (Net Total Return) and which is considered by the

Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**")), as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

The Fund seeks to achieve the objective by tracking the Index and, with regard to the climate criteria, giving exposure to global Emerging Markets companies which are meeting or working towards the climate goals recommended by the TCFD on carbon reduction and transition objectives towards a more sustainable and lower carbon economy while aligning with the Paris Agreement requirements.

The Fund seeks to invest all of its total net assets in securities that are constituents of the Index and the Index Provider constructs the Index on the basis of the Climate Criteria as defined in the section entitled "Description of the Index" below. The Index will eliminate securities as against the standard (parent) index universe based on their exposure to controversial weapons, ESG controversies, tobacco, environmental harm, thermal coal mining, oil & gas related activities and power generation. It is, therefore, expected that the Fund's exposure to the Climate Criteria will be higher than that of a Fund tracking a standard index.

The Fund is passively managed.

By pursuing the investment objective and seeking exposure to the Climate Criteria, the Fund complies with Article 9(3) of SFDR and is deemed to have sustainable investments as defined in Article 2, point (17) SFDR as its objective. Information related to sustainable investment is available in an annex to this document (SFDR RTS Art. 18(2)).

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval or the provision of reasonable notice to Shareholders (as applicable) and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

There are also currency versions of the Index which are denominated in a currency other than USD and hedged, including currency versions denominated in EUR, GBP, USD, CHF, SGD, CAD,JPY and SEK (each a "**Hedged Currency Version**"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a USD denominated asset in a currency other than USD. For those Share Classes with "hedged" in their name, this is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a USD denominated asset in a currency other than USD. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging.

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the exposure to the Climate Criteria generated by these selected securities cannot be guaranteed. The Fund, for the purposes of assisting in tracking the Index, may also invest in securities which are not constituents of the Index where the Investment Manager

considers that such securities satisfy the Climate Criteria and may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set out above utilises the Replication Strategy in order to track the Index, accordingly investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy in order to track the Index, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage (calculated under the commitment approach as set out in the "Risk Management" section below) will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

Instruments shall be listed and/or traded on the exchanges and markets set out in Appendix II of the Prospectus.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with

FDI and the Fund will employ only FDIs which are described in the RMP. The RMP was prepared and submitted to the Central Bank in accordance with the Central Bank requirements.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index and the Index Provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the Fund's resulting ESG rating will be higher than the ESG rating of a Fund tracking a standard index.

The Fund does not benefit from a French SRI label.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING

The Company will not enter into any securities lending agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI Emerging Markets Climate Paris Aligned PAB Index (Net Total Return) and is not a complete description of the Index.

General

The Index is a sub-set of the MSCI Emerging Markets Index (the "**Parent Index**"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index aims to provide exposure to opportunities arising from the transition to a lower-carbon economy, reduce exposure to transition and physical climate risks, while aligning with requirements of the Paris Agreement. The Index includes large and mid-cap securities worldwide across both developed markets and emerging market countries as further described in the Parent Index factsheet, available at https://www.msci.com/emergingmarkets.

The Index methodology aims to achieve a maximum implied temperature rise defined by the Paris Agreement using aggregated cumulative projected emissions. Eligibility is influenced by the MSCI Low Carbon Transition Risk assessment and MSCI Climate Value-at-Risk.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, trend, and industry-adjusted scores with preference given to those demonstrating positive ESG momentum. The Index targets an increase in aggregate weight of Companies Setting Targets, weighted-average Low Carbon Transition Score and weighted-average Green Revenue relative to the Parent Index.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessment which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons are excluded. Also excluded are constituents involved in the development or production of

nuclear weapons. The Index also excludes issuers assessed to be failing the MSCI Environmental Controversy assessment.

Depending on the activity, issuers deriving revenues from, or involved in business activities related to tobacco, oil and gas, thermal coal mining, adult entertainment, alcohol, gambling, civilian firearms, electricity generation through thermal coal, liquid fuel, or natural gas are excluded. Thresholds may range from any revenue to more than 10% revenue exposure, except for electricity generation through thermal coal, liquid fuel, or natural gas which are excluded at 50% revenue exposure ("**Climate Criteria**").

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a semi-annual basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the investment restrictions, the Investment Manager will seek to either unwind that particular position or becomes aware that the weighting of any particular stock in the Index exceeds the permitted monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting "Emerging Markets Climate Paris Aligned Index" in the tab:

https://www.msci.com/constituents

RISK MANAGEMENT / LEVERAGE

Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index. While the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may

reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Climate-Focused Investing Risk

The Fund is subject to the risk that its climate-focused investment strategy may select or exclude securities of certain issuers for reasons other than investment performance considerations. As a result, the Fund may underperform funds that do not utilise a climate focused investment strategy. Certain climate-focused investments may be dependent on government policies and subsidies, which are subject to change or elimination. Successful application of the Fund's climate-focused investment strategy will depend on the success of the Index Provider's "Climate Criteria" in its construction of the Index properly identifying and analysing material climate-related issues and related business practices, and there can be no assurance that the strategy or techniques employed will be successful.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of companies of the global emerging market equity market under the climate criteria outlined in this Supplement and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

Accumulating Share Classes:

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

Distributing Share Classes:

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.16% per annum of the Net Asset Value of the Class
USD dis	up to 0.16% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.16% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD UKdis

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 120
USD acc	Index value / 120
USD UKdis	Index value / 120

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1,984.16 at 31 January 2020, Shares in USD dis would be issued at an Initial Offer Price per Share of USD 16.535. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within second Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET

MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX III

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS MSCI EM Climate Paris Aligned UCITS ETF	549300ZN4D3CW49NK075

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Does this financial product have a sustainable investment objective?

●● ☒ **Yes**	●● ☐ **No**
☒ It will make a minimum of **sustainable investments with an environmental objective:** 20 %	☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___ % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

What is the sustainable investment objective of this financial product?

This financial product has a reduction in carbon emissions as its sustainable investment objective in view of achieving the long- term global warming objectives of the Paris Agreement. The financial product contributes to this by tracking, before expenses, the price and income performance of the MSCI Emerging Markets Climate Paris Aligned PAB Index (Net Total Return) (the "Index"). The attainment of the sustainable investment objective is measured using the following ESG characteristics respectively:

- tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the MSCI Emerging Markets Index (the "**Parent Index**") sustainability profile
- a Carbon Intensity (1, 2) emissions indicator lower than Parent Index (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI Emerging Markets Climate Paris Aligned PAB Index (Net Total Return).

- ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

The objective is measured using the following indicators respectively:
• The MSCI ESG Score
MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Index.
• Weighted average carbon intensity (Scope 1+2) MSCI
The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

The financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.
MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.
The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products.
The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.
https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controveroversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms.
MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.
The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.
The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/ or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such a investment objectives an risk tolerance

This financial product seeks the objective(s) described in this annex through Index selection and passive asset management.
This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability objectives and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability objectives and risks of the constituents of the Index can be found on the website of the index provider.

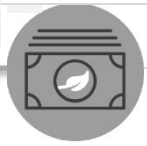
- ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The following binding element(s) of the investment strategy are used to select the investments to attain the objective sought by this financial product:
1):

- A sustainability profile (MSCI ESG Score) that is higher than the Parent Index's sustainability profile

2):

- Carbon Intensity (1 and 2) emissions indicator that is lower than Parent Index (MSCI)



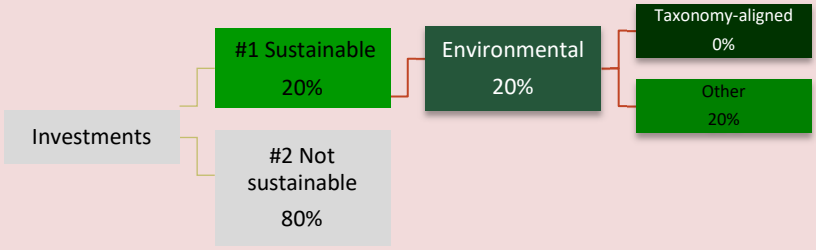
This financial product seeks to achieve a higher MSCI ESG Score and low Carbon Intensity emissions indicator than the Parent Index by tracking the performance and ESG profile of the Index. As set out in the section of the Supplement entitled "Description of the Index" in more detail, the Index is designed to align itself with the de-carbonisation pathways required to deliver the global 1.5 degrees Celsius increase targeted by the Paris Agreement. The Index Provider seeks to achieve this alignment by overweighting companies on a credible path to de-carbonisation or offering green solutions, while in contrast underweighting those poorly positioned for the transition to a lower-carbon economy and by limiting exposure to the growing physical risks.
The calculations do not take account of cash, derivatives, and unrated investment instruments.

The above (s) and the minimum proportion of sustainable investments are calculated at quarter end using the average of all of business days' values in the quarter.

- ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance practices of the investee companies is performed by the index provider.
MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.



What is the asset allocation and the minimum share of sustainable investments?

Asset allocation describes the share of investments in specific assets.

The minimum proportion of the investments of the financial product used to meet the sustainable investment objective is 20%, with the exception of any investments used for hedging or relating to cash held as ancillary liquidity.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Sustainable covers sustainable investments with environmental or social objectives.
#2 Not sustainable includes investments which do not qualify as sustainable investments.

- ***How does the use of derivatives attain the sustainable investment objective?***

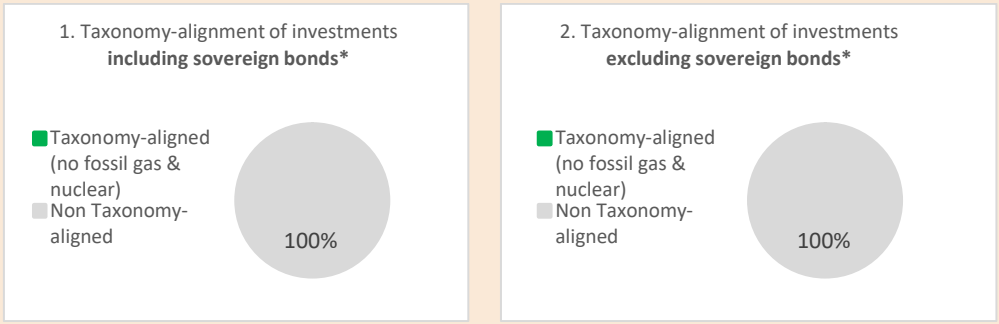
The financial product tracks an ESG index and may replicate the performance of the Index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments Index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged Index, or b) to generate efficiencies in gaining exposure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.
The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

☐ Yes:
☐ In fossil gas ☐ In nuclear energy
☒ No



[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission leels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.

What is the minimum share of sustainable investments with a social objective?

The financial product targets a minimum share of socially sustainable investments greater than 0%.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

The Reference Benchmark designated for the purpose of attaining the sustainable objective of the financial product is the MSCI Emerging Markets Climate Paris Aligned PAB Index (Net Total Return).

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the sustainable objective it seeks to achieve. The Index rebalances on a semi-annual basis, more details on the index methodology applied by the Index provider can be found below. It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible.

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the Index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of the fund.
The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the investment objective it seeks to achieve.
The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.
The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

The Index (MSCI Emerging Markets Climate Paris Aligned PAB Index (Net Total Return)) is part of the MSCI Climate Paris Aligned Index series. The Index draws its constituents from the Parent Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-capitalisation global emerging markets companies.

- ***Where can the methodology used for the calculation of the designated index be found?***

The methodology of the construction of the Index can be found in the fund supplement.

UBS MSCI World Small Cap Socially Responsible UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 38
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI World Small Cap Socially Responsible UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	USD.	
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.	
Closing Date	For USD dis, USD acc and hEUR acc 12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine and notify to the Central Bank.	
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.	
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI World Small Cap Socially Responsible UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking exposure to best-in-class environmental, social and governance ("**ESG**") global small cap companies (while avoiding those with low ESG characteristics) via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section. Therefore, this best in class approach excludes at least 20% of the least well-rated securities as against the standard index universe. The Fund does not benefit from an SRI label.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;
- hEUR dis;

- hEUR acc;
- hGBP dis;
- hGBP acc;
- hUSD dis;
- hUSD acc;
- hCHF dis;
- hCHF acc;
- hSGD dis;
- hSGD acc;
- hCAD dis;
- hCAD acc;
- hJPY dis;
- hJPY acc;
- hSEK dis; and
- hSEK acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will generally only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of global small cap companies which focus on Environmental, Social and Governance ("ESG") considerations and which would specifically exclude companies involved in nuclear power, tobacco, alcohol, gambling, military weapons, civilian firearms and genetically modified organisms.

Investment Policy

In order to achieve the objective, the investment policy of the Fund is to seek to track the performance of the MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return), (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**")), as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index. The Fund seeks to achieve the objective by tracking the Index and, with regard to ESG criteria, giving exposure to global companies with high ESG ratings and to exclude the ones with negative social or environmental impact.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval or the provision of reasonable notice to Shareholders (as applicable) and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

There are also currency versions of the Index which are denominated in a currency other than USD and hedged, including currency versions denominated in EUR, GBP, USD, CHF, SGD, CAD, JPY and SEK (each a "**Hedged Currency Version**"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a USD denominated asset in a currency other than USD. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a USD denominated asset in a currency other than USD. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging.

Share Class	Index Currency Version
hEUR dis hEUR acc	MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped 100% hedged to EUR Index (Net Total Return)
hGBP dis hGBP acc	MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped 100% hedged to GBP Index (Net Total Return)
hUSD dis hUSD acc	MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped 100% hedged to USD Index (Net Total Return)
hCHF dis hCHF acc	MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped 100% hedged to CHF Index (Net Total Return)
hSGD dis hSGD acc	MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped 100% hedged to SGD Index (Net Total Return)
hCAD dis hCAD acc	MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped 100% hedged to CAD Index (Net Total Return)
hJPY dis hJPY acc	MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped 100% hedged to JPY Index (Net Total Return)
hSEK dis hSEK acc	MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped 100% hedged to SEK Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of an ESG rating to these selected securities cannot be guaranteed. The Fund, for the purposes of assisting in tracking the Index, may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set out above utilises the Replication Strategy in order to track the Index, accordingly investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy in order to track the Index, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return

varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage (calculated under the commitment approach as set out in the "Risk Management" section below) will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

Instruments shall be listed and/or traded on the exchanges and markets set out in Appendix II of the Prospectus.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The RMP was prepared and submitted to the Central Bank in accordance with the Central Bank requirements.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index and the Index Provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the Fund's resulting ESG rating will be higher than the ESG rating of a Fund tracking a standard index.

The Fund does not benefit from a French SRI label.

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("AMF Rules"), the Fund will adopt a binding and significant approach to sustainable investing. The

investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING

The Company will not enter into any securities lending agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index is a sub-set of the MSCI World Small Cap Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. It tracks the net total return dividend performance of small-cap global stocks across developed market countries.

The Index aims to provide exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to the MSCI World Small Cap Index (the "**Parent Index**")) an ability to better manage ESG risks and opportunities, and retain a lower carbon profile, while maintaining broad and diversified representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 25% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 25% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% security cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenues from, or involved in business activities related to tobacco, oil and gas, fossil fuel extraction, thermal coal mining or distribution, fossil fuel reserves ownership, alcohol, adult entertainment, gambling, civilian firearms, conventional weapons, genetically modified organisms, predatory lending, electricity generation through thermal coal, nuclear power, oil or gas are excluded. Thresholds for exclusion typically range from any revenue to 15% revenue exposure, except for gas activities which are excluded at 50% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted

investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website by entering "SRI Low Carbon" in the search field and selecting MSCI SRI Low Carbon Select Indexes Methodology.

RISK MANAGEMENT / LEVERAGE

Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index. While the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in

deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of best in class ESG companies of the global equity market and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

Accumulating Share Classes:

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hGBP acc;
- hUSD acc;
- hCHF acc;
- hSGD acc;
- hCAD acc;
- hJPY acc; and
- hSEK acc.

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

Distributing Share Classes:

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;
- hEUR dis;
- hGBP dis;
- hUSD dis;
- hCHF dis;

- hSGD dis;
- hCAD dis;
- hJPY dis; and
- hSEK dis.

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.23% per annum of the Net Asset Value of the Class
USD dis	up to 0.23% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.23% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.26% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.26% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.26% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.26% per annum of the Net Asset Value of the Class
hUSD acc	up to 0.26% per annum of the Net Asset Value of the Class
hUSD dis	up to 0.26% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.26% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.26% per annum of the Net Asset Value of the Class
hCAD acc	up to 0.26% per annum of the Net Asset Value of the Class
hCAD dis	up to 0.26% per annum of the Net Asset Value of the Class

Share Class	Flat Fee
hSGD dis	up to 0.26% per annum of the Net Asset Value of the Class
hSGD acc	up to 0.26% per annum of the Net Asset Value of the Class
hJPY dis	up to 0.26% per annum of the Net Asset Value of the Class
hJPY acc	up to 0.26% per annum of the Net Asset Value of the Class
hSEK dis	up to 0.26% per annum of the Net Asset Value of the Class
hSEK acc	up to 0.26% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD UKdis
- hEUR dis
- hEUR acc
- hGBP dis
- hGBP acc
- hUSD dis
- hUSD acc
- hCHF dis
- hCHF acc
- hSGD dis
- hSGD acc
- hCAD dis
- hCAD acc
- hJPY dis
- hJPY acc
- hSEK dis
- hSEK acc

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 200

USD acc	Index value / 200
USD UKdis	Index value / 200
hEUR dis	Index value / 200
hEUR acc	Index value / 200
hGBP dis	Index value / 200
hGBP acc	Index value / 200
hUSD dis	Index value / 200
hUSD acc	Index value / 200
hCHF dis	Index value / 200
hCHF acc	Index value / 200
hSGD dis	Index value / 200
hSGD acc	Index value / 200
hCAD dis	Index value / 200
hCAD acc	Index value / 200
hJPY dis	Index value / 200
hJPY acc	Index value / 200
hSEK dis	Index value / 200
hSEK acc	Index value / 200

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1,786.76 at 06 April 2021, Shares in USD dis would be issued at an Initial Offer Price per Share of USD 8.9338. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is

received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS MSCI World Small Cap Socially Responsible UCITS ETF	5493000S1XKEF0WZNP58

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective:**

_____ %

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product:

• tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the parent benchmark's sustainability profile

• a Carbon Intensity (1, 2) emissions indicator lower than parent benchmark (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped Total Return Index.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The characteristics are measured using the following indicators respectively:

• The MSCI ESG Score

MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.

• Weighted average carbon intensity (Scope 1+2) MSCI

The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI World Small Cap SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?
		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a “Red” MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score

		measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, chemical weapons or in companies involved in the activities listed at Article 12(a)-(c) of Regulation (EU) 2020/1818.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd16

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

		**Does this financial product consider principal adverse impacts on sustainability factors?**
		☒ Yes
		Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red"

		MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, chemical weapons or in companies involved in the activities listed at Article 12(a)-(c) of Regulation (EU) 2020/1818.
		☐ No
		**What investment strategy does this financial product follow?**
The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.		This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management. This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent bench-mark's sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than parent benchmark (MSCI) The calculations do not take account of cash, derivatives and unrated investment instruments.

The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

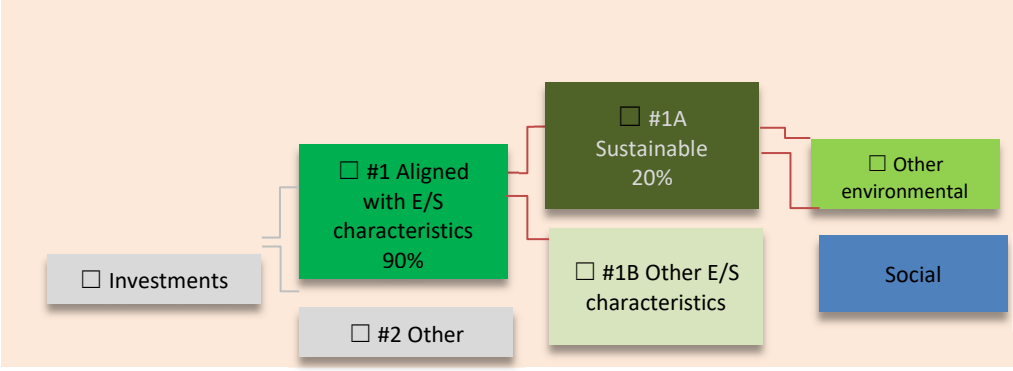
This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.

- ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Assessment of good governance practices of the investee companies is performed by the index provider.

MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.



What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

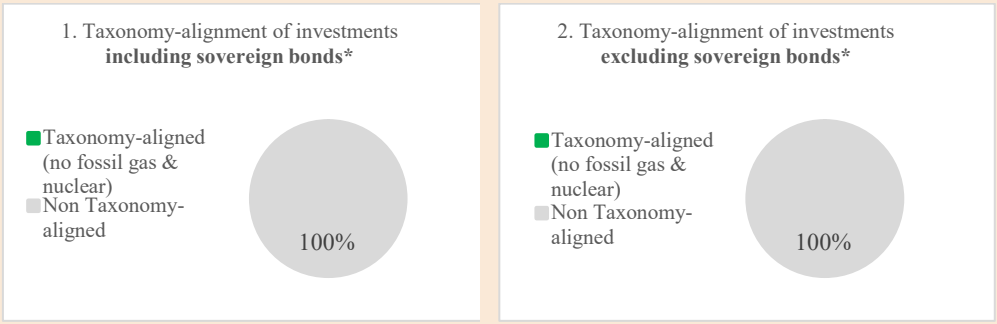
Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities

of investee companies - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*		**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. The category **#1 Aligned with E/S characteristics** covers: -The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

		• ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**
		The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers. The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.
		**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**
		The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
		• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
		☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.

What is the minimum share of socially sustainable investments?

The financial product targets a minimum share of socially sustainableinvestments greater than 0%.

		**What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?**
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.
Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**
		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI World Small Cap SRI Low Carbon Select 5% Issuer Capped Total Return Index.
		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The Index is a sub-set of the MSCI World Small Cap Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. It tracks the net total return dividend performance of small-cap global stocks across developed markets countries.

		The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using best in class approach from the Parent Index. The Index is constructed in two stages. First, securities of companies involved in nuclear power, tobacco, alcohol, gambling, military weapons, civilian firearms, genetically modified organisms and adult entertainment are excluded. Then, MSCI's best-in-class selection process is applied to the remaining universe of securities in the Parent Index to target the top 25% companies in each sector according to their ESG ratings (thus eliminating 75% of the least well-rated securities. These ESG ratings are provided by the MSCI (the "MSCI ESG Ratings"). The companies must have the following MSCI ESG Ratings: i) an MSCI ESG rating above 'BBB' and ii) the MSCI ESG controversies score greater than 3 to be considered as a high ESG ratings companies. The MSCI ESG Rating calculates a weighted average key issue score for each company based on the risks, opportunities and controversies identified for the company. The weights of selected key issues are determined by the industry's impact on environmental and social factors and the expected timeframe for risks and opportunities to materialize. Each company's final industry-adjusted score corresponds to a rating between best (AAA) and worst (CCC). The factors used to rate a company are, amongst others, carbon emissions, water stress, biodiversity and land use, labor management, human capital development, board diversity, etc. (non-exhaustive list).
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS MSCI USA Universal UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 40
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI USA Universal UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	Save for USD acc shares 12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI USA Universal Low Carbon Select 5% issuer capped Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	Save for USD acc shares 9.00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE00BNC0M467 USD acc IE00BNC0M350 USD UKdis IE00BNC0M574

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI USA Universal UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in US companies that demonstrate a robust ESG characteristics via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities

affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI USA Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI USA Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund seeks to promote environmental characteristics under Article 8 of the Disclosure Regulations.

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in USD, EUR, GBP, CHF, SGD, CAD and JPY (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securities cannot be guaranteed. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct

exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Fund may use participation notes ("**P-Notes**") or warrants in exceptional circumstances to trade in otherwise restricted markets such as India. Indian companies may be constituents of the Index and it may not be possible due to market restrictions for the Fund to purchase stocks of such companies directly. P-Notes may also be constituents of the Index. P-Notes are typically used in certain restricted markets by registered foreign institutional investors which issue them to overseas investors wishing to invest in restricted markets. P-Notes are generally not rated and are designed to provide a return which is directly linked to the performance of a particular equity security or basket of equity securities. The P-Notes are generally in the form of debt securities from the issuer agreeing to provide a return corresponding to that on the underlying equity securities. Brokers buy stocks and issue P-Notes that represent ownership of the underlying stock. Any dividends or capital gains collected from the underlying securities go back to the investors. While they do mimic the cash flows of a swap, they are not FDI. The P-Notes which the Fund may invest in may not embed derivatives or leverage.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an

"Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant ESG optimisation approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI USA Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return)) and the index provider applies ESG Ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

By adopting the ESG methodology of the Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non-financial indicator value. The weighted average environmental indicator (Carbon Intensity (1 and 2) emissions indicator of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% lower than the weighted average environmental indicator of the Parent Index (as defined below) based on a reduction of carbon emission intensity.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which

a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI USA Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index draws its constituents from the MSCI USA Index (the "**Parent Index**"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the net total return dividend performance of large and mid-capitalisation US companies.

The Index aims to provide exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to the Parent Index) an ability to better manage ESG risks and opportunities, retain a lower carbon profile, while maintaining broad and diversified market representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index’s market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% issuer cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies’ involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, civilian firearms, conventional weapons, electricity generation through thermal coal are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website.

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses

which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of US companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.07% per annum of the Net Asset Value of the Class
USD dis	up to 0.07% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.07% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD UKdis

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 200
USD acc	Index value / 200
USD UKdis	Index value / 200

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 2,500.765 at 10 March, 2021, Shares in USD dis would be issued at an Initial Offer Price per Share of USD 12.5038. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY

FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

549300K06DSGTS5FBI97

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective:**

_____ %

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.		**What environmental and/or social characteristics are promoted by this financial product?**
		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the parent benchmark's sustainability profile • a Carbon Intensity (1, 2) emissions indicator lower than parent benchmark (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the MSCI USA Universal Low Carbon Select 5% Issuer Capped Net Total Return Index.
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.

		• Weighted average carbon intensity (Scope 1+2) MSCI The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI USA Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights,		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

anti-corruption and anti-bribery matters.		*How have the indicators for adverse impacts on sustainability factors been taken into account?*
		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's in-volvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd10

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

(Mod)

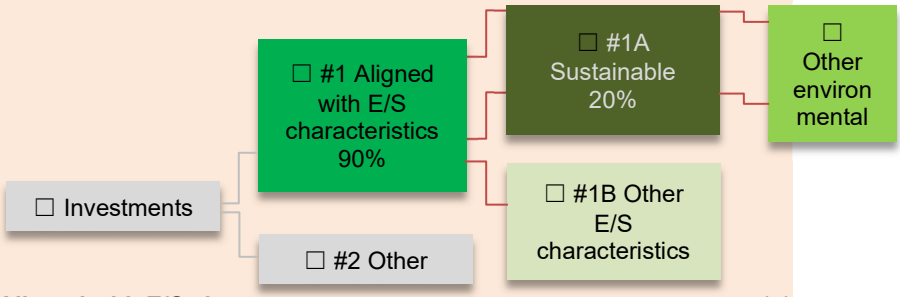
What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection

		process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than parent bench-mark (MSCI) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.
		• ***What is the policy to assess good governance practices of the investee companies?***
Good governance practices include sound management		Assessment of good governance practices of the investee companies is performed by the index provider.



structures, employee relations, remuneration of staff and tax compliance.

MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

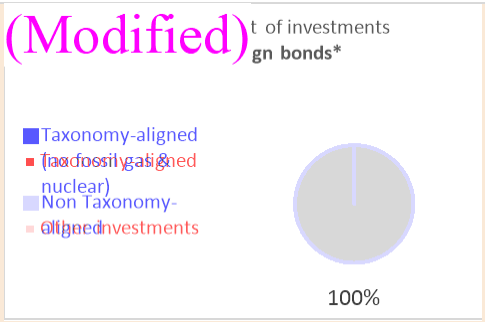
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

Taxonomy-aligned activities are expressed as a share of:

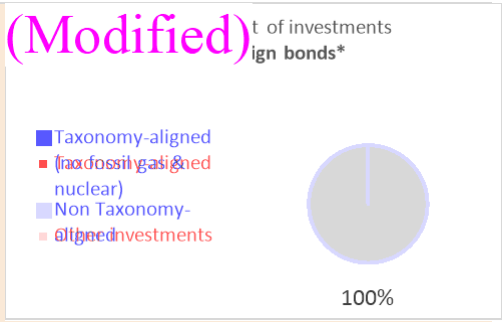
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

		The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers. The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.
		**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**
		The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
		• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
		☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



*To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.*



The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities *directly enable other activities to make a substantial contribution to an environmental objective.*

Transitional activities are *activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.*

* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.		• ***What is the minimum share of investments in transitional and enabling activities?***
		Not applicable
		What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?
		The financial product targets a minimum proportion of sustainable investments as stated in the asset allocation of this annex.
		What is the minimum share of socially sustainable investments?
		The financial product targets a minimum share of socially sustainable investments greater than 0%.
		What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the

benchmark weighting. This category may also include securities for which relevant data is not available.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI USA Universal Low Carbon Select 5% Issuer Capped Net Total Return Index.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no long-er in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the net total return dividend performance of large and mid-capitalisation US companies.

		The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index. The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies facing controversies (MSCI Red Flag, being an indication of at least one very severe controversy), companies which have a poor ESG Rating (rating of CCC), companies which have revenues in certain business activities (controversial weapons, nuclear weapons, civilian firearms, tobacco, thermal coal, fossil fuel extraction), as well as the top 5% companies by number based on carbon emission intensity levels (being scope 1 and 2 emissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less than 30% of the weight of that sector in the Parent Index. The index also selects companies with low exposure to fossil fuel reserves and ranks the Parent Index constituents in descending order of the potential carbon emissions per dollar of the market capitalization of the company. Securities are than excluded until the cumulative potential carbon emission of the excluded securities reaches 50% of the sum of the potential carbon emission of the constituents of the Parent Index. The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement.

		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS MSCI EMU Universal UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 42
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI EMU Universal UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	EUR.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	Save for EUR acc shares 4 September 2026 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the relevant Dealing Day.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI EMU Universal UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in companies in the EMU (European Economic and Monetary Union) that demonstrate a robust ESG characteristics via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- EUR dis;
- EUR acc;
- EUR UKdis;
- hCHF acc;
- hGBP acc;
- hUSD acc;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled

"Primary Market" and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI EMU Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI EMU Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than Euro and hedged, including currency versions denominated in USD, GBP, CHF, SGD, CAD and JPY (each a "**Hedged Currency Version**"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a Euro denominated asset in a currency other than Euro. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a Euro denominated asset in a currency other than Euro. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Index Currency Version
hCHF acc	MSCI EMU Universal Low Carbon Select 5% Issuer Capped hedged to CHF Index (Net Total Return)
hGBP acc	MSCI EMU Universal Low Carbon Select 5% Issuer Capped hedged to GBP Index (Net Total Return)
hUSD acc	MSCI EMU Universal Low Carbon Select 5% Issuer Capped hedged to USD Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securities cannot be guaranteed. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Fund may use participation notes ("**P-Notes**") or warrants in exceptional circumstances to trade in otherwise restricted markets such as India. Indian companies may be constituents of the Index and it may not be possible due to market restrictions for the Fund to purchase stocks of such companies directly. P-Notes may also be constituents of the Index. P-Notes are typically used in certain restricted markets by registered foreign institutional investors which issue them to overseas investors wishing to invest in restricted markets. P-Notes are generally not rated and are designed to provide a return which is directly linked to the performance of a particular equity security or basket of equity securities. The P-Notes are generally in the form of debt securities from the issuer agreeing to provide a return corresponding to that on the underlying equity securities. Brokers buy stocks and issue P-Notes that represent ownership of the underlying stock. Any dividends or capital gains collected from the underlying securities go back to the investors. While they do mimic the cash flows of a swap, they are not FDI. The P-Notes which the Fund may invest in may not embed derivatives or leverage.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with

FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant ESG optimisation approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI EMU Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return)) and the index provider applies ESG Ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

By adopting the ESG methodology of the Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non-financial indicator value. The weighted average environmental indicator (Carbon Intensity (1 and 2) emissions indicator of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% lower than the weighted average environmental indicator of the Parent Index (as defined below) based on a reduction of carbon emission intensity.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a “notional amount,” e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a “basket” of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI EMU Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index draws its constituents from the MSCI EMU Index (the "**Parent Index**"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in Euro. The Index tracks the net total return dividend performance of large and mid-capitalisation companies across developed market countries of the EMU as further described at https://www.msci.com/documents/10199/7395c222-b136-4372-baa7-a4480d7d003c.

The Index aims to provide exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to the Parent Index) an ability to better manage ESG risks and opportunities, retain a lower carbon profile, while maintaining broad and diversified market

representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% issuer cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, civilian firearms, conventional weapons, electricity generation through thermal coal are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website.

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may

reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of EMU companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- EUR acc;
- hCHF acc;
- hGBP acc;
- hUSD acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- EUR dis;
- EUR UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
EUR acc	up to 0.12% per annum of the Net Asset Value of the Class
EUR dis	up to 0.12% per annum of the Net Asset Value of the Class
EUR UKdis	up to 0.12% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.15% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.15% per annum of the Net Asset Value of the Class
hUSD acc	up to 0.15% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- EUR dis
- EUR acc
- EUR UKdis
- hCHF acc
- hGBP acc
- hUSD acc

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
EUR dis	Index value / 100
EUR UKdis	Index value / 100
hCHF acc	Index value / 300
hGBP acc	Index value / 300
hUSD acc	Index value / 300

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1,501.406 at 10 March, 2021, Shares in EUR dis would be issued at an Initial Offer Price per Share of EUR 15.0141. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

Stock Connect Risks

Through seeking to track the performance of the Index, and notwithstanding that the maximum weight of any issuer of the Parent Index is then capped at 5% in order to construct the Index, the Fund may invest in certain eligible securities listed and traded on the Shanghai Stock Exchange ("**Stock Connect Securities**"), through the securities trading and clearing programme developed by The Stock Exchange of Hong Kong Limited ("**SEHK**"), the Shanghai Stock Exchange ("**SSE**"), Hong Kong Securities Clearing Company Limited ("**HKSCC**") and China Securities Depository and Clearing Corporation Limited ("**ChinaClear**") for the establishment of mutual market access between SEHK and SSE (together, the "**Stock Connect**"). The Fund may trade and settle select securities listed on the SSE through the SEHK and HKSCC trading link (such trading can be termed "**Northbound**").

No individual investment quotas apply to investors in Stock Connect Securities through Stock Connect. In addition, there are no lock-up periods or restrictions on the repatriation of principal and profits.

Nonetheless, trading through Stock Connect is subject to a number of restrictions which may impact the Fund's investments. In particular, it should be noted that Stock Connect is in its initial stages. Further developments are likely and there is no assurance as to whether or how such developments may restrict or affect the Fund's investments.

In addition, the application and interpretation of the laws and regulations of Hong Kong and the People's Republic of China ("**PRC**") and the rules, policies or guidelines published or applied by any regulator which regulates Stock Connect and activities relating to Stock Connect (including without limitation, the China Securities Regulatory Commission ("**CSRC**"), the People's Bank of China, the State Administration of Foreign Exchange, the Securities and Futures Commission, the Hong Kong Monetary Authority or any other regulator, agency or authority with jurisdiction, authority or responsibility in respect of Stock Connect), or any exchange, clearing system or other entity which provides services relating to Stock Connect (including without limitation, the SEHK and any relevant subsidiary, HKSCC, SSE or ChinaClear) ("**Stock Connect Rules**") from time to time in respect of Stock Connect or any activities arising from Stock Connect is untested and there is uncertainty as to how they will be applied.

Home Market Rules

A fundamental principle of trading securities through Stock Connect is that the laws and rules of the home market of the applicable securities shall apply to investors in such securities. In respect of Stock Connect Securities, Mainland China is the home market and thus investors in Stock Connect Securities should observe Mainland China securities regulations, SSE listing rules and other rules and regulations. If SSE rules or other PRC law requirements are breached, SSE has the power to carry out an investigation, and may, through SEHK exchange participants, require such exchange participants to provide information about investors, which may include the Fund, and assist in investigations.

Nevertheless, certain Hong Kong legal and regulatory requirements will also continue to apply to the trading of Stock Connect Securities.

Suspension, Restriction and Cessation of Operation of Stock Connect

SEHK (or any relevant subsidiary) may, under certain circumstances as specified in the SEHK rules, temporarily suspend or restrict all or part of the order-routing and related supporting services with regard to all or any Northbound trading of Stock Connect Securities, and for such duration and frequency as SEHK may consider appropriate. SEHK has absolute discretion to change the operational hours and arrangements of Stock Connect at any time and without advance notice, whether on a temporary or permanent basis, due to operational needs, inclement weather, under emergency situations or otherwise. Moreover, SEHK (or any relevant subsidiary) may cease the provision of the Stock Connect Northbound trading service permanently.

Suspension of Trading on A-Shares and H-Shares

The SEHK rules state that where any H-Shares with corresponding A-Shares accepted as Stock Connect Securities are suspended from trading on SEHK but the Stock Connect Securities are not suspended from trading on the SSE, the service for routing the Stock Connect Securities sell orders

and Stock Connect Securities buy orders for such Stock Connect Securities to the SSE for execution will normally remain available. However, SEHK may, in its discretion, restrict or suspend such service without prior notice.

Ownership

Hong Kong law recognises the proprietary interest of investors in shares held for them by their broker or custodian in the Central Clearing and Settlement System. Such recognition should apply equally to Stock Connect Securities held for Hong Kong and overseas investors by the relevant Clearing Participant through HKSCC. In addition, in the PRC (where Stock Connect Securities are registered in a securities account opened with ChinaClear in the name of HKSCC), it is expressly stipulated in the "Several Provisions on the Pilot Program of Shanghai-Hong Kong Stock Market Connect" (as promulgated by CSRC to prescribe the launch and operation of the Stock Connect) that HKSCC acts as the nominee holder and the Hong Kong and overseas investors own the rights and interests with respect to the Stock Connect Securities. Accordingly, the regulatory intention appears to be that Hong Kong and overseas investors (including the Fund) should also have proprietary rights over Stock Connect Securities under PRC laws, although this cannot be guaranteed.

However, as Stock Connect is a recent initiative there may be some uncertainty surrounding such arrangements. In addition, while Hong Kong and overseas investors (including the relevant Funds) may have proprietary rights over Stock Connect Securities, they must act through HKSCC as nominee in order to enforce such rights in accordance with its rules.

In the event HKSCC is insolvent, the Stock Connect Securities should not form the bankruptcy estate of HKSCC. Insolvency proceedings will be governed by Hong Kong laws, and it is expected (but is not entirely certain) that ChinaClear and PRC courts will recognise the power of the liquidator duly appointed under Hong Kong law in relation to the Stock Connect Securities.

Foreign Ownership Limits

Under PRC laws, there is a limit to how many shares a single foreign investor is permitted to hold in a single PRC-listed company, and also a limit to the maximum combined holdings of all foreign investors in a single PRC-listed company. Such foreign ownership limits may be applied on an aggregate basis (i.e. across both domestically and overseas issued shares of the same listed company, whether the relevant holdings are through Northbound trading or other investment channels). The single foreign investor limit is currently set at ten per cent of the shares of a PRC-listed company and the aggregate foreign investor limit is currently set at 30 per cent of the shares of a PRC-listed company. Such limits are subject to change from time to time.

If the foreign ownership limits are breached, SSE will notify SEHK and, on a last-in-first-out basis, SEHK will identify the relevant trades involved and require the relevant exchange participants to require the investors concerned (which could include a Fund) to sell the shares within the timeframe stipulated by SEHK. If the relevant investors fail to sell their shares, exchange participants are required to force-sell the shares for the relevant investors in accordance with the Stock Connect Rules.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED

BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

UBS MSCI EMU Universal UCITS ETF

Legal entity identifier:

54930055FKHVZKFY4J22

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective? *[tick and fill in as relevant, the percentage figure represents the minimum commitment to sustainable investments].*

●● ☐ **Yes**

☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective:**

_____ %

●○ ☒ **No**

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product:

• tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the parent benchmark's sustainability profile

• a Carbon Intensity (1, 2) emissions indicator lower than parent benchmark (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the MSCI EMU Universal Low Carbon Select 5% Issuer Capped Total Return Index.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The characteristics are measured using the following indicators respectively:

• The MSCI ESG Score

MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.

• Weighted average carbon intensity (Scope 1+2) MSCI

The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market

		and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI EMU Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?
		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's in-volvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd7

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

		The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.
		☐ No
		**What investment strategy does this financial product follow?**
The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.		This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent bench-mark's sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than parent benchmark (MSCI)

The calculations do not take account of cash, derivatives and unrated investment instruments.

The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

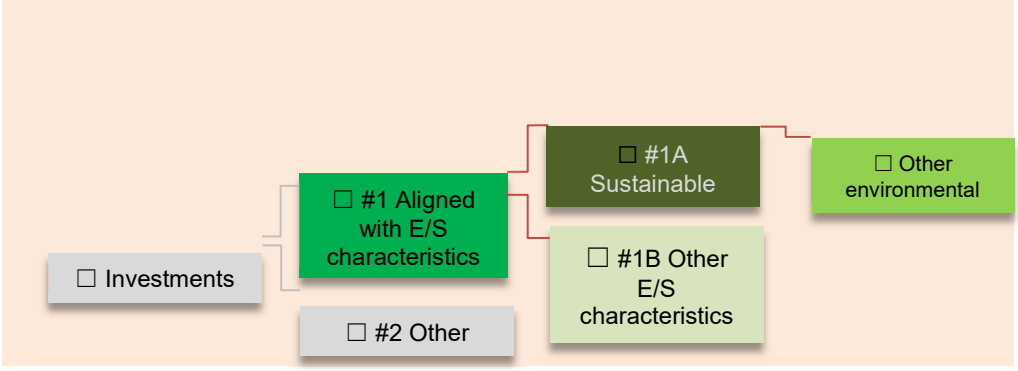
This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. It is, therefore, expected that this financial product's result-ing ESG rating will be higher than the ESG rating of a financial product tracking a standard index.

- ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Assessment of good governance practices of the investee companies is performed by the index provider.

MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.



What is the asset allocation planned for this financial product?

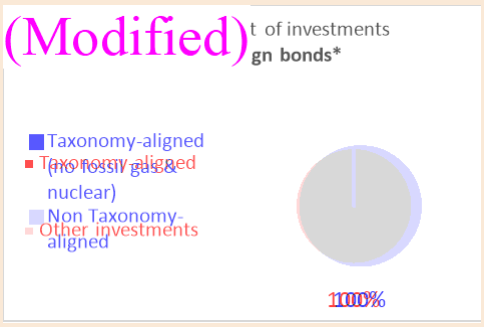
The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Asset allocation describes the share of investments in specific assets.

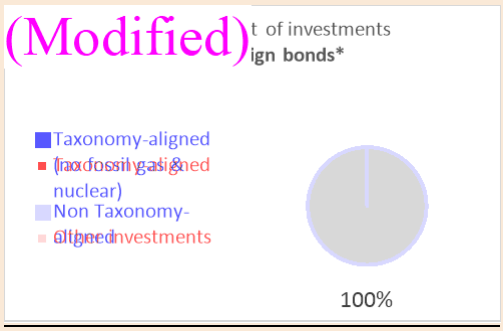
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue

from green activities of investee companies - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*		**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. The category **#1 Aligned with E/S characteristics** covers: -The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

		• ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**
		The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers. The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.
		**To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?**
		The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
		• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
		☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.

What is the minimum share of socially sustainable investments?

The financial product targets a minimum share of socially sustainable investments greater than 0%.

		**What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?**
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.
Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**
		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI EMU Universal Low Carbon Select 5% Issuer Capped Total Return Index.
		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no long-er in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The Index draws its constituents from the MSCI EMU Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in Euro. The Index tracks the net total return dividend performance of large and mid-capitalisation companies across 10 Developed Markets (DM) in the EMU.

		The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index. The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies facing controversies (MSCI Red Flag, being an indication of at least one very severe controversy), companies which have a poor ESG Rating (rating of CCC), companies which have revenues in certain business activities (controversial weapons, nuclear weapons, civilian firearms, tobacco, thermal coal, fossil fuel extraction), as well as the top 5% companies by number based on carbon emission intensity levels (being scope 1 and 2 emissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less than 30% of the weight of that sector in the Parent Index. The index also selects companies with low exposure to fossil fuel reserves and ranks the Parent Index constituents in descending order of the potential carbon emissions per dollar of the market capitalization of the company. Securities are than excluded until the cumulative potential carbon emission of the excluded securities reaches 50% of the sum of the potential carbon emission of the constituents of the Parent Index. The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS MSCI Japan Universal UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 43
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI Japan Universal UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	JPY.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	Save for JPY acc shares 12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI Japan Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	Save for JPY acc shares 9.00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	JPY dis IE00BNC0MF79 JPY acc IE00BNC0MD55 JPY UKdis IE00BNC0MG86

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI Japan Universal UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in Japanese companies that demonstrate a robust ESG characteristics via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- JPY dis;
- JPY acc;
- JPY UKdis;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities

affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI Japan Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI Japan Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than JPY and hedged, including currency versions denominated in USD, EUR, GBP, CHF, SGD and CAD (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a JPY denominated asset in a currency other than JPY. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a JPY denominated asset in a currency other than JPY. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securities cannot be guaranteed. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the

Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Fund may use participation notes ("**P-Notes**") or warrants in exceptional circumstances to trade in otherwise restricted markets such as India. Indian companies may be constituents of the Index and it may not be possible due to market restrictions for the Fund to purchase stocks of such companies directly. P-Notes may also be constituents of the Index. P-Notes are typically used in certain restricted markets by registered foreign institutional investors which issue them to overseas investors wishing to invest in restricted markets. P-Notes are generally not rated and are designed to provide a return which is directly linked to the performance of a particular equity security or basket of equity securities. The P-Notes are generally in the form of debt securities from the issuer agreeing to provide a return corresponding to that on the underlying equity securities. Brokers buy stocks and issue P-Notes that represent ownership of the underlying stock. Any dividends or capital gains collected from the underlying securities go back to the investors. While they do mimic the cash flows of a swap, they are not FDI. The P-Notes which the Fund may invest in may not embed derivatives or leverage.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant ESG optimisation approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI Japan Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return)) and the index provider applies ESG Ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

By adopting the ESG methodology of the Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non-financial indicator value. The weighted average environmental indicator (Carbon Intensity (1 and 2) emissions indicator of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% lower than the weighted average environmental indicator of the Parent Index (as defined in the annex) based on a reduction of carbon emission intensity.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI Japan Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index draws its constituents from the MSCI Japan Index (the "**Parent Index**"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in JPY. The Index tracks the net total return dividend performance of large and mid-capitalisation Japanese companies.

The Index aims to provide exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to the Parent Index) an ability to better manage ESG risks and opportunities, retain a lower carbon profile, while maintaining broad and diversified market representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index’s market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% issuer cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments

which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, civilian firearms, conventional weapons, electricity generation through thermal coal are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static. It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website.
http://www.msci.com/products/indexes/esg/methodology.html

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying index in the tab:
https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of Japanese companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- JPY acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- JPY dis;

- JPY UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
JPY acc	up to 0.15% per annum of the Net Asset Value of the Class
JPY dis	up to 0.15% per annum of the Net Asset Value of the Class
JPY UKdis	up to 0.15% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- JPY dis
- JPY acc
- JPY UKdis

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price

JPY dis	Index value / 2
JPY acc	Index value / 2
JPY UKdis	Index value / 2

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1,879.415 at 10 March, 2021, Shares in JPY dis would be issued at an Initial Offer Price per Share of JPY 939.7075. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions

of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER

PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:	**Legal entity identifier:**
UBS MSCI Japan Universal UCITS ETF	5493004NQHLNGZKSW481

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes** ●○ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective:**

_____ %

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product:

• tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the parent benchmark's sustainability profile

• a Carbon Intensity (1, 2) emissions indicator lower than parent benchmark (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristic pro-moted by the financial product is the MSCI Japan Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return).

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The characteristics are measured using the following indicators respectively:

• The MSCI ESG Score

MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.

• Weighted average carbon intensity (Scope 1+2) MSCI

The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI Japan Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenar-io analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?
		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

		MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's in-volvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd9

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

		**Does this financial product consider principal adverse impacts on sustainability factors?**
		☒ Yes
		Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red"

		MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel, landmines, nuclear weapons, biological weapons, or chemical weapons.
		☐ No
	(Mod) 	**What investment strategy does this financial product follow?**
The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.		This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than parent benchmark (MSCI) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or

social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.

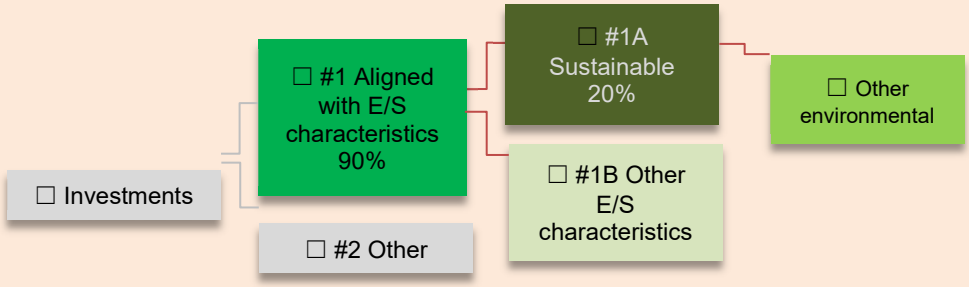
- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.

- ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

Assessment of good governance practices of the investee companies is performed by the index provider.



MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the

green investments made by investee companies, e.g. for a transition to a green economy.

- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers.
The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.

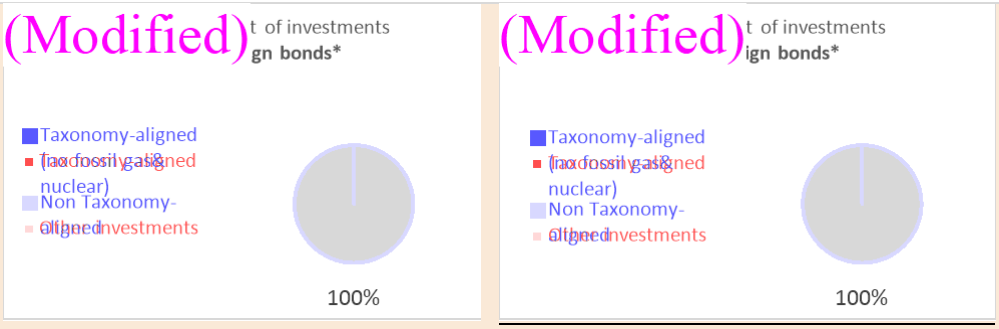
To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

☐ Yes:
☐ In fossil gas ☐ In nuclear energy
☒ No

To comply with the EU Taxonomy, the criteria for ***fossil gas*** *include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For* ***nuclear energy****, the criteria include*



The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

comprehensive safety and waste management rules.

Enabling activities *directly enable other activities to make a substantial contribution to an environmental objective.*

Transitional activities are *activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.*

* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.		• ***What is the minimum share of investments in transitional and enabling activities?***
		Not applicable
		What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?
		The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.
		What is the minimum share of socially sustainable investments?
		The financial product targets a minimum share of socially sustainable investments greater than 0%.
		What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**
		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI Japan Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return).
		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The Index draws its constituents from the MSCI Japan Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in JPY. The Index tracks the net total retur dividend performance of large and mid-capitalisation Japanese companies. The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index. The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies facing controversies (MSCI Red Flag, being an indication of at least one very severe controversy), companies which have a poor ESG Rating (rating of CCC),

		companies which have revenues in certain business activities (controversial weapons, nuclear weapons, civilian firearms, tobacco, thermal coal, fossil fuel extraction), as well as the top 5% companies by number based on carbon emission intensity levels (being scope 1 and 2 emissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less than 30% of the weight of that sector in the Parent Index. The index also selects companies with low exposure to fossil fuel reserves and ranks the Parent Index constituents in descending order of the potential carbon emissions per dollar of the market capitalization of the company. Securities are than excluded until the cumulative potential carbon emission of the excluded securities reaches 50% of the sum of the potential carbon emission of the constituents of the Parent Index. The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS MSCI EM ex China Socially Responsible UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 44
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI EM ex China Socially Responsible UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	9.00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI EM ex China Socially Responsible UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in global Emerging Markets (excluding China) companies that demonstrate a robust ESG characteristics via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Therefore, this best in class approach excludes at least 20% of the least well-rated securities as against the standard index universe. The Fund does not benefit from an SRI label.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;
- hUSD dis;
- hUSD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc;

- hGBP dis;
- hGBP acc;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in USD, EUR, GBP, and CHF (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Hedged Currency Version
hUSD dis hUSD acc	MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped 100% hedged to USD Index (Net Total Return)
hEUR dis hEUR acc	MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped 100% hedged to EUR Index (Net Total Return)
hCHF dis hCHF acc	MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped 100% hedged to CHF Index (Net Total Return)
hGBP dis hGBP acc	MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped 100% hedged to GBP Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securities cannot be guaranteed. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Fund may use participation notes ("**P-Notes**") or warrants in exceptional circumstances to trade in otherwise restricted markets such as India. Indian companies may be constituents of the Index and it may not be possible due to market restrictions for the Fund to purchase stocks of such companies directly. P-Notes may also be constituents of the Index. P-Notes are typically used in certain restricted markets by registered foreign institutional investors which issue them to overseas investors wishing to invest in restricted markets. P-Notes are generally not rated and are designed to provide a return which is directly linked to the performance of a particular equity security or basket of equity securities. The P-Notes are generally in the form of debt securities from the issuer agreeing to provide a return corresponding to that on the underlying equity securities. Brokers buy stocks and issue P-Notes that represent ownership of the underlying stock. Any dividends or capital gains collected from the underlying securities go back to the investors. While they do mimic the cash flows of a swap, they are not FDI. The P-Notes which the Fund may invest in may not embed derivatives or leverage.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant ESG optimisation approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return)) and the index provider applies ESG Ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

By adopting the ESG methodology of the Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non-financial indicator value. The weighted average environmental indicator (Carbon Intensity (1 and 2) emissions indicator of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% lower than the weighted average environmental indicator of the Parent Index (as defined below) based on a reduction of carbon emission intensity.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index is a sub-set of the MSCI Global Socially Responsible (SRI) Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. It tracks the net total return dividend performance of large and mid-capitalisation companies in global emerging market countries (excluding China).

The Index aims to provide exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to the MSCI Emerging Markets ex China Index (the "**Parent Index**")) an ability to better manage ESG risks and opportunities, and retain a lower carbon profile, while maintaining broad and diversified representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 25% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 25% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% security cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenues from, or involved in business activities related to tobacco, oil and gas, fossil fuel extraction, thermal coal mining or distribution, fossil fuel reserves ownership, alcohol, adult entertainment, gambling, civilian firearms, conventional weapons, genetically modified organisms, predatory lending, electricity generation through thermal coal, nuclear power, oil or gas are excluded. Thresholds for exclusion typically range from any revenue to 15% revenue exposure, except for gas activities which are excluded at 50% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website.

http://www.msci.com/products/indexes/esg/methodology.html

Additional information about the Index can be found under:

http://www.msci.com/products/indexes

Index Factsheet

The Index Factsheet is available on the MSCI internet website:

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying index https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of global Emerging Markets (excluding China) companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hUSD acc;
- hEUR acc;

- hCHF acc; and
- hGBP acc.

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;
- hUSD dis;
- hEUR dis;
- hCHF dis; and
- hGBP dis

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.20% per annum of the Net Asset Value of the Class
USD dis	up to 0.20% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.20% per annum of the Net Asset Value of the Class
hUSD dis	up to 0.23% per annum of the Net Asset Value of the Class
hUSD acc	up to 0.23% per annum of the Net Asset Value of the Class

Share Class	Flat Fee
hEUR dis	up to 0.23% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.23% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.23% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.23% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.23% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.23% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD UKdis
- hUSD dis
- hUSD acc
- hEUR dis
- hEUR acc
- hCHF dis
- hCHF acc
- hGBP dis
- hGBP acc

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 250
USD acc	Index value / 250
USD UKdis	Index value / 250
hUSD dis	Index value / 250
hUSD acc	Index value / 250
hEUR dis	Index value / 250
hEUR acc	Index value / 250

hCHF dis	Index value / 250
hCHF acc	Index value / 250
hGBP dis	Index value / 250
hGBP acc	Index value / 250

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index Value" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1'115.576 at 24 August, 2023, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 4.4623. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

UBS MSCI EM ex China Socially Responsible UCITS ETF

Legal entity identifier:

549300W3UUYPCGWCMZ84

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective:**

_____ %

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.		**What environmental and/or social characteristics are promoted by this financial product?**
		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's sustainability profile • a Carbon Intensity (1, 2) emissions indicator lower than parent benchmark (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped.
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark. • Weighted average carbon intensity (Scope 1+2) MSCI The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

		The financial product intends invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 10%. MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?
		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms, as further detailed below. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1 out of 9) is excluded from Sustainability indices. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster

		munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, chemical weapons or in companies involved in the activities listed at Article 12(a)-(c) of Regulation (EU) 2020/1818.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd6

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

		Does this financial product consider principal adverse impacts on sustainability factors?
		☒ Yes
		Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1 out of 9) is excluded from Sustainability indices. The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products,

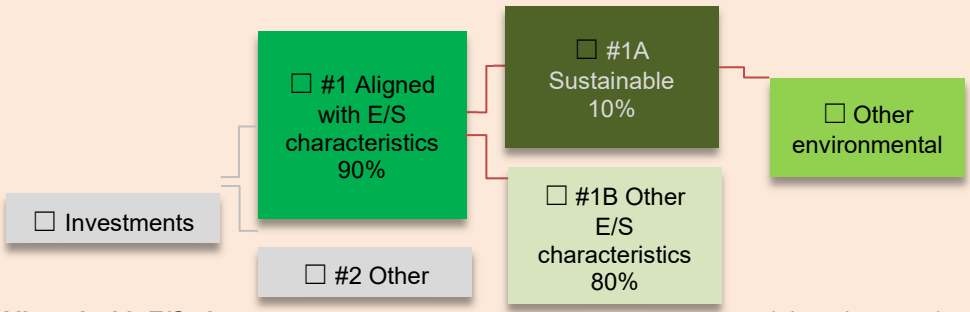
		possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, chemical weapons or in companies involved in the activities listed at Article 12(a)-(c) of Regulation (EU) 2020/1818.
		☐ No
		**What investment strategy does this financial product follow?**
The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.		This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than parent benchmark (MSCI) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG

Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.

- ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance practices of the investee companies is performed by the index provider.

MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.



What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 10%.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers.

The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

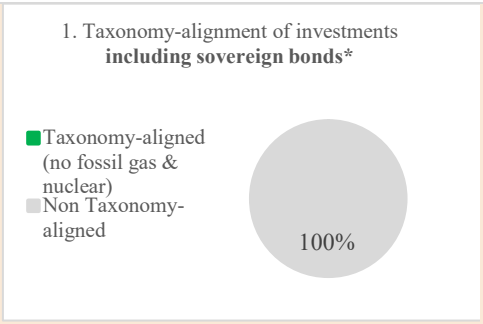
The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

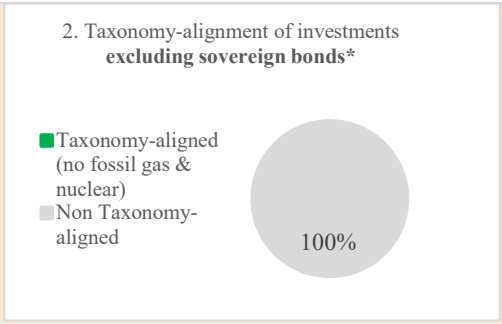
☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No



*To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.*



***Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.*

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Transitional activities are *activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.*

* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.

What is the minimum share of socially sustainable investments?

The financial product targets a minimum share of socially sustainable investments greater than 0%.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The Index draws its constituents from the MSCI Emerging Markets ex China Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the total return net dividend performance of large and mid-cap securities across 23 out of 24 Emerging Markets (EM) countries. The MSCI Emerging Markets ex China SRI Low Carbon Select 5% Issuer Capped Index is a free float-adjusted market capitalization index with a weighting cap of 5 percent. The Index excludes companies that are inconsistent with specific values based criteria such as religious beliefs, moral standards or ethical views, and targets companies with high ESG ratings relative to their sector peers. The Index is constructed in two stages. First, securities of companies involved in nuclear power, tobacco, alcohol, gambling, military weapons, civilian firearms, genetically modified organisms and adult entertainment are excluded. Then, MSCI's best-in-class selection process is applied to the remaining universe of securities in the principal parent index, being the MSCI Emerging Markets ex China Index, to target the top 25% companies in each sector according to their ESG ratings (thus eliminating 75% of the least wellrated securities). These ESG ratings are provided by the MSCI (the "MSCI ESG Ratings"). The companies must have the following MSCI ESG Ratings: i) an MSCI ESG rating above 'BBB' and ii) the MSCI ESG controversies score greater than 3 to be considered as a high ESG ratings companies. The MSCI ESG Rating calculates a weighted average key issue score for each company based on the risks, opportunities and controversies identified for the company. The weights of selected key issues are determined by the industry's impact on environmental and social factors and the expected timeframe for risks and opportunities to materialise. Each company's final industry-adjusted score corresponds to a rating between best (AAA) and worst (CCC). The factors used to rate a company are, amongst others, carbon emissions, water

		stress, biodiversity and land use, labour management, human capital development, board diversity, etc. (non-exhaustive list). At least 90% of the securities have an ESG rating. As the investment policy of the UBS MSCI EM ex China Socially Responsible UCITS ETF sub-fund is to track the Index, the portfolio management of the sub-fund is passive. As a result, the approach taken in relation to the consideration of ESG criteria is the one taken by MSCI and therefore dependent on the approach and methodology defined by a third party. The consideration of ESG criteria varies from one asset to the other because material key issues are industry-specific and do not affect all the assets equally. Consequently, MSCI sets the weights that determine each key issue's contribution to the overall ESG rating, based on the level of contribution of the industry to environmental or social impact and the expected time frame for risk/opportunity to materialise. Securities are free float adjusted, classified in accordance with the Global Industry Classification Standard (GICS®), and screened by size, liquidity and minimum free float. The index is rebalanced on a quarterly basis and may also be rebalanced at other times in order to comply with applicable investment restrictions or to reflect corporate activity such as mergers and acquisitions.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**
		www.ubs.com/etf

UBS MSCI Pacific ex Japan IMI Socially Responsible UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 45
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI Pacific ex Japan IMI Socially Responsible UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	USD
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI Pacific ex Japan IMI Extended SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	9:00 am (Irish time) on 13 May 2025 to 4:30pm (Irish time) on the Closing Date. The Initial Offer Period for all other Classes has now closed.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE000E8493H8 USD acc IE000BKMMHF9 USD UKdis IE00005FFYS9 hEUR acc IE000BAF6X29
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.

Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI Pacific ex Japan IMI Socially Responsible UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking exposure to best-in-class environmental, social and governance ("**ESG**") Pacific excluding Japanese (Pacific ex Japan) companies (while avoiding those with low ESG characteristics) via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section. By tracking the Index, the Fund excludes at least 20% of the least well-rated securities as against the standard index universe (i.e., the Parent Index). The Fund does not benefit from an SRI label in France.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis; and
- hEUR acc;

Description of Share Classes:

- Shares in Classes with an "A" in their name may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being

offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI Pacific ex Japan IMI Extended SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI Pacific ex Japan IMI Extended SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions of the Index which are denominated in a currency other than USD and hedged, including currency versions denominated in EUR (a "**Hedged Currency Version**"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an GBP denominated asset in a currency other than GBP. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a GBP denominated asset in a currency other than USD. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Hedged Currency Version
hEUR acc	MSCI Pacific ex Japan IMI Extended SRI Low Carbon Select 5% Issuer Capped 100% hedged to EUR Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securites cannot be guaranteed. The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain

securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity

participations (the “Equity Participation Ratio”). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an “Equity fund” within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index and the Index Provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the Fund's resulting ESG rating will be higher than the ESG rating of a Fund tracking a standard index.

The Fund does not benefit from a French SRI label.

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 (“AMF Rules”), the Fund will adopt a binding and significant approach to sustainable investing. The investment strategy of the Fund is to track the Index’s return and its characteristics, including ESG characteristics, as closely as reasonably possible.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund’s market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a “notional amount,” e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a “basket” of securities representing a particular index.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.
Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING

The Company will not enter into any securities lending agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI Pacific ex Japan IMI Extended SRI Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the net total return dividend performance of small, mid and large capitalization companies of the Pacific ex Japan market.

The Index is part of the MSCI Global Socially Responsible (SRI) Index series. The constituent selection is made from the principal index, being the MSCI Pacific ex Japan IMI Index (the "**Parent Index**").

The Index aims to provide exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to the Parent Index) an ability to better manage ESG risks and opportunities, and retain a lower carbon profile, while maintaining broad and diversified representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 25% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 25% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% security cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons are excluded. Also excluded are constituents involved in the development or production of nuclear weapons.

Depending on the activity, issuers deriving revenues from, or involved in business activities related to tobacco, oil and gas, fossil fuel extraction, thermal coal mining or distribution, fossil fuel reserves ownership, alcohol, adult entertainment, gambling, civilian firearms, conventional weapons, genetically modified organisms, predatory lending, electricity generation through thermal coal, nuclear power, oil or gas are excluded. Thresholds for exclusion typically range from any revenue to 15% revenue exposure, except for gas activities which are excluded at 50% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria the Fund documents will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website at the following link:

https://www.msci.com/eqb/methodology/meth_docs/MSCI_SRI%20Low_Carbon_Select_Methodology_Mar2022.pdf

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting "PAC ex JP IMI EXT SRI LC SEL 5% ISS CAP" in the tab:

https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index

returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of best-in-class ESG companies of the Pacific ex Japan and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc; and
- hEUR acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or
(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis; and

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

• **Share Class**	• **Flat Fee**
• USD acc	• up to 0.19% per annum of the Net Asset Value of the Class
• USD dis	up to 0.19% per annum of the Net Asset Value of the Class
• USD UKdis	up to 0.22% per annum of the Net Asset Value of the Class
• hEUR acc	• up to 0.22% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD UKdis
- hEUR acc

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

• **Share Class**	• **Initial Offer Price**
• USD dis	• Index value / 100
• USD acc	• Index value / 100
• USD UKdis	• Index value / 100
• hEUR acc	• Index value / 100

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 5,250 at 25 May 2022, Shares in USD dis would be issued at an Initial Offer Price per Share of USD 525. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS MSCI Pacific ex Japan IMI Socially Responsible UCITS ETF	5493004L4CSU71PS5S70

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 30% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.		**What environmental and/or social characteristics are promoted by this financial product?**
		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the parent benchmark's sustainability profile • a Carbon Intensity (1, 2) emissions indicator lower than parent benchmark (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the MSCI Pacific ex Japan IMI Extended SRI Low Carbon Select 5% Issuer Capped Index.
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark. • Weighted average carbon intensity (Scope 1+2) MSCI The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

		The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI Pacific ex Japan IMI Extended SRI Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		● ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?
		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a “Red” MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer’s involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, chemical weapons or in companies involved in the activities listed at Article 12(a)-(c) of Regulation (EU) 2020/1818.

		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd13

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

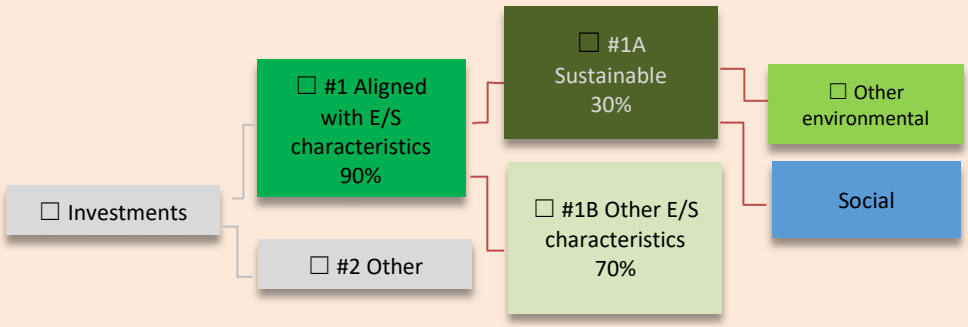
Any other sustainable investments must also not significantly harm any environmental or social objectives.

		Does this financial product consider principal adverse impacts on sustainability factors?
		☒ Yes
		Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological

		weapons, chemical weapons or in companies involved in the activities listed at Article 12(a)-(c) of Regulation (EU) 2020/1818.
		☐ No
		**What investment strategy does this financial product follow?**
The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.		This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent bench-mark's sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than parent benchmark (MSCI) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.

- ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.



Assessment of good governance practices of the investee companies is performed by the index provider.

MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 30%.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

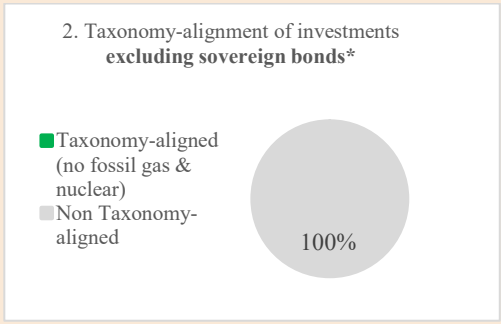
-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular

		where there are legal or practical obstacles to gaining direct access to a market to which the index refers. The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.
		To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?
		The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
		• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
		☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

[1] [1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.		• ***What is the minimum share of investments in transitional and enabling activities?***
		Not applicable
		**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**
		The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.
		**What is the minimum share of socially sustainable investments?**
		The financial product targets a minimum share of sociallysustainable investmentsgreater than 0%.
		**What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?**
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.
Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**
		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI Pacific ex Japan IMI Extended SRI Low Carbon Select 5% Issuer Capped Index.
		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the net total return dividend performance of small, mid and large capitalization companies of the Pacific ex Japan market. The Index is a benchmark for investors seeking exposure to best-in-class ESG Pacific ex Japan companies while avoiding products whose social or environmental impact is considered to be negative by investors. The Index is part of the MSCI Global Socially Responsible (SRI) Index series. The constituent selection is made from the principal index, being the MSCI Pacific ex Japan IMI Index (the "Parent Index"). The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using best in class approach from the Parent Index. The Index is constructed in two stages. First, securities of companies involved in nuclear power, tobacco, alcohol, gambling, military weapons, civilian firearms, genetically modified organisms and adult entertainment are excluded. Then, MSCI's best-in-class selection process is applied to the remaining universe of securities in the Parent Index to target the top 25% companies in each sector according to their ESG ratings (thus eliminating 75% of the least well-rated securities. These ESG ratings are provided by the MSCI (the "MSCI ESG Ratings"). The companies must have the following MSCI ESG Ratings: i) an MSCI ESG rating above 'BBB' and ii) the MSCI ESG controversies score greater than 3 to be considered as a high ESG ratings companies. The MSCI ESG Rating calculates a weighted average key issue score for each company based on the risks, opportunities and controversies identified for the company. The weights of selected key issues are determined by the industry's impact on environmental and social factors and the expected timeframe for risks and opportunities to materialize. Each company's final industry-adjusted score corresponds to a rating between best (AAA) and worst (CCC). The factors used to rate a company are, amongst others, carbon emissions, water stress, biodiversity and land use, labor management, human capital development, board diversity, etc. (non-exhaustive list).
		• ***Where can the methodology used for the calculation of the designated index be found?***

		The methodology of the construction of the Index can be found in the fund supplement.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS MSCI Australia Universal UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations)

Supplement No. 46
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI Australia Universal UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	AUD.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI Australia Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	9.00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	AUD dis IE000QDKL7G0 AUD acc IE000XN05VU8 AUD UKdis IE000I5ECR91

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI Australia Universal UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in Australian companies that demonstrate robust ESG characteristics via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section. By tracking the Index, the Fund eliminates the top 5% of securities (by number) ranked by the company's carbon emission intensity, as against the standard index universe (i.e., the Parent Index).

Share Classes

To date, the following Classes of Shares are available:

- AUD dis;
- AUD acc;
- AUD UKdis;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are

subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI Australia Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI Australia Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than AUD and hedged, including currency versions denominated in EUR, GBP, CHF, SGD, USD, CAD and JPY (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an AUD denominated asset in a currency other than AUD. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securities cannot be guaranteed. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that

situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, where applicable, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant ESG optimisation approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI Australia Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return)) and the index provider applies ESG Ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

By adopting the ESG methodology of the Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non-financial indicator value. The weighted average environmental indicator (Carbon Intensity (1 and 2) emissions indicator of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% lower than the weighted average environmental indicator of the Parent Index (as defined below) based on a reduction of carbon emission intensity.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI Australia Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index draws its constituents from the MSCI Australia Index (the "**Parent Index**"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in AUD. The Index tracks the net total return dividend performance of large and mid-capitalisation companies in Australia.

The Index aims to provide exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to the Parent Index) an ability to better manage ESG risks and opportunities, retain a lower carbon profile, while maintaining broad and diversified market representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% issuer cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, civilian firearms, conventional weapons, electricity generation through thermal coal are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website.

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market

disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of Australian companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- AUD acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- AUD dis;
- AUD UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
AUD acc	up to 0.43% per annum of the Net Asset Value of the Class
AUD dis	up to 0.43% per annum of the Net Asset Value of the Class
AUD UKdis	up to 0.43% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- AUD dis
- AUD acc
- AUD UKdis

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
AUD dis	Index value / 100
AUD acc	Index value / 100
AUD UKdis	Index value / 100

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1,411.963 at 20 January 2023. Shares in AUD acc would be issued at an Initial Offer Price per Share of AUD 14.1196. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

UBS MSCI Australia Universal UCITS ETF

Legal entity identifier:

391200BNU5P71KHCZ250

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
● ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	● ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
● ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	● ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	● ☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product:

• tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the Parent Benchmark's sustainability profile

• a Carbon Intensity (1, 2) emissions indicator lower than Parent Index (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI Australia Universal Low Carbon Select 5% Issuer Capped (Net Total Return) Index.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The characteristics are measured using the following indicators respectively:

• The MSCI ESG Score

MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.

• Weighted average carbon intensity (Scope 1+2) MSCI

The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI Australia Universal Low Carbon Select 5% Issuer Capped Index aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

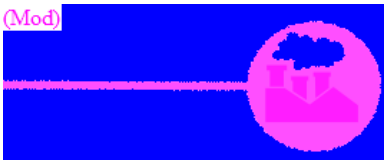
The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.



https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

(Mod)

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms related to a company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly inthe use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product:

Characteristic 1):

A sustainability profile (MSCI ESG Score) that is higher than the Parent Index's (MSCI Australia Index) sustainability profile

Characteristic 2):

A Carbon Intensity (1 and 2) emissions indicator that is lower than the Parent Index (MSCI)

The calculations do not take account of cash, derivatives and unrated investment instruments.

The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

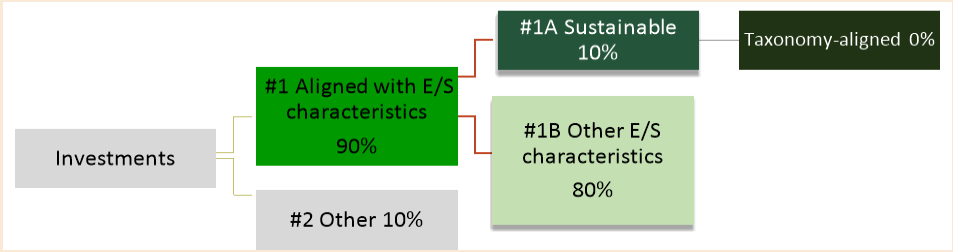
The Index Provider commits to eliminating the top 5% of companies of the Parent Index by number based on carbon emmission intensity levels (being scope 1 and 2 emmissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less than 30% of the weight of that section in the Parent Index.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance practices of the investee companies is performed by the index provider.

MSCI ESG Ratings analysis begins with an evaluation of each company's corporate governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.



Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 10%.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining expo-sure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.

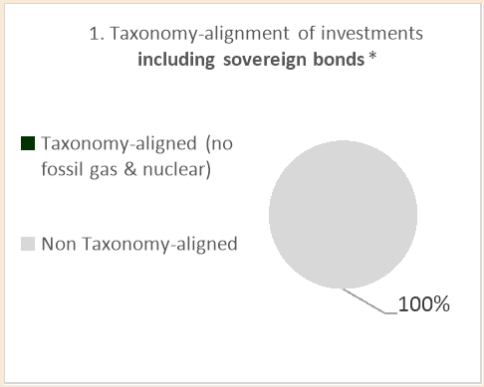
The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

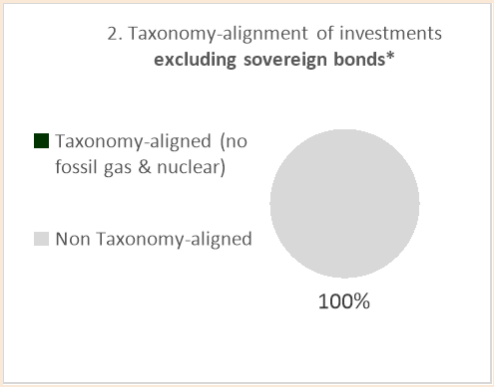
The minimum extent that the investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

  ☐ Yes:
  ☐ In fossil gas ☐ In nuclear energy
  ☐ No



[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

Not applicable

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.

What is the minimum share of socially sustainable investments?

The financial product targets a minimum share of socially sustainable investments greater than 0%.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI Australia Universal Low Carbon Select 5% Issuer Capped (Net Total Return) Index.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the Index methodology applied by the index provider can be found below.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

  The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

  The investment strategy of the fund is to track the Reference Benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

  The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

  The Index draws its constituents from the MSCI Australia Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in AUD. The Index tracks the net total return dividend performance of large and mid-capitalisation companies in Australia.

  The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

  The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies facing controversies (MSCI Red Flag, being an indication of at least one very severe controversy), companies which have a poor ESG Rating (rating of CCC), companies which have revenues in certain business activities (controversial weapons, nuclear weapons, civilian firearms, tobacco, thermal coal, fossil fuel extraction), as well as the top 5% companies by number based on carbon emission intensity levels (being scope 1 and 2 emissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less than 30% of the weight of that sector in the Parent Index. The index also selects companies with low exposure to fossil fuel reserves and ranks the Parent Index constituents in descending order of the potential carbon emissions per dollar of the market capitalization of the company. Securities are than excluded until the cumulative potential carbon emission of the excluded securities reaches 50% of the sum of the potential carbon emission of the constituents of the Parent Index.

  The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index.

- ***Where can the methodology used for the calculation of the designated index be found?***

  The methodology of the construction of the Index can be found in the fund supplement.

Where can I find more product specific information online?

More product-specific information can be found on the website:

www.ubs.com/etf

UBS MSCI AC Asia ex Japan Selection UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 47

17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI AC Asia ex Japan Selection UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	USD.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI AC Asia ex Japan Selection Low Carbon Select 5% Issuer Capped Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	9:00 am (Irish time) on 13 May 2025 to 4:30pm (Irish time) on the Closing Date. The Initial Offer Period for all other Classes has now closed.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE000ZI36XJ7 USD acc IE0003VC1PW8 USD UKdis IE000N9C40O8
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.

Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Taxonomy	Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, and amending the Disclosure Regulation.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI AC Asia ex Japan Selection UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking exposure to best-in-class companies across developed and emerging market countries in Asia excluding Japan (AC Asia ex Japan) with high environmental, social and governance ("**ESG**") performance relative to their sector peers, (while avoiding those with low ESG characteristics) via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section. By tracking the Index, the Fund excludes at least 20% of the least well-rated securities as against the standard index universe (i.e., the Parent Index). The Fund does not benefit from an SRI label in France.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc; and
- USD UKdis;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent

required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI AC Asia ex Japan Selection Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI AC Asia ex Japan Selection Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions of the Index which are denominated in a currency other than USD and hedged, including currency versions denominated in EUR (a "**Hedged Currency Version**"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an GBP denominated asset in a currency other than GBP. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a GBP denominated asset in a currency other than USD. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of an ESG rating to these selected securites cannot be guaranteed. The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy

accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an

"Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant ESG optimisation approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI AC Asia ex Japan Selection Low Carbon Select 5% Issuer Capped Index (Net Total Return)) and the index provider applies ESG Ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

By adopting the ESG methodology of the Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non-financial indicator value. The weighted average environmental indicator (Carbon Intensity (1 and 2) emissions indicator of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% lower than the weighted average environmental indicator of the Parent Index (as defined below) based on a reduction of carbon emission intensity.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING

The Company will not enter into any securities lending agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI AC Asia ex Japan Selection Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the net total return dividend performance of large and mid-capitalization companies of the AC Asia ex Japan market as further describe in the Index factsheet.

The Index is a benchmark for investors seeking exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to MSCI AC Asia ex Japan Index (the "**Parent Index**")) an ability to better manage ESG risks and opportunities, and retain a lower carbon profile, while maintaining broad and diversified market representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

The Index is part of the MSCI Global Selection Index series. The constituent selection is made from the principal index, being the Parent Index.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% issuer cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments

which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, alcohol, gambling, civilian firearms, conventional weapons, electricity generation through thermal coal or nuclear power are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behaviour, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website at the following link:

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the

performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of best-in-class ESG companies of the AC Asia ex Japan and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losse

attributable to the following Share Classes:

- USD dis; and

- USD UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.30% per annum of the Net Asset Value of the Class
USD dis	up to 0.30% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.30% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD UKdis

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Share Class	Initial Offer Price
USD dis	Index value / 100
USD acc	Index value / 100
USD UKdis	Index value / 100

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1,315.975 at 20 January 2023. Shares in USD acc would be issued at an Initial Offer Price per Share of USD 13.1597. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and

the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

UBS MSCI AC Asia ex Japan Selection UCITS ETF

Legal entity identifier:

391200FS8UJO91KIQ073

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product:

• tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the Parent Index's sustainability profile

• a Carbon Intensity (1, 2) emissions indicator lower than the Parent Index (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI AC Asia ex Japan Selection Low Carbon Select 5% Issuer Capped Index (Net Total Return).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The characteristics are measured using the following indicators respectively:

• The MSCI ESG Score

MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.

• Weighted average carbon intensity (Scope 1+2) MSCI

The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. MSCI AC Asia ex Japan Selection Low Carbon Select 5% Issuer Capped Index (Net Total Return) aims to represent the performance of an investment strategy that by

re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a “Red” MSCI ESG Controversies Score (score less than 1) is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer’s involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy.

https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms related to a company's operations and/or products, possible breaches of international

norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a “Red” MSCI ESG Controversies Score (score less than 1) is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer’s involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly inthe use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

  The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product:

  Characteristic 1):

  A sustainability profile (MSCI ESG Score) that is higher than the Parent Index’s (MSCI AC Asia ex Japan Index) sustainability profile

  Characteristic 2):

  A Carbon Intensity (1 and 2) emissions indicator that is lower than the Parent Index (MSCI)

  The calculations do not take account of cash, derivatives and unrated investment instruments.

The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

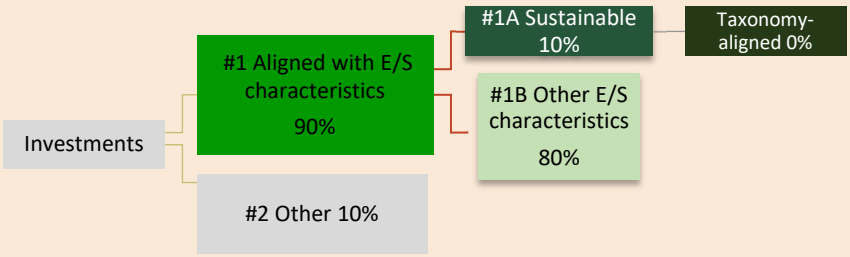
This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. The Index eliminates at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

Assessment of good governance practices of the investee companies is performed by the index provider.

MSCI ESG Ratings analysis begins with an evaluation of each company's corporate governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.



Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 10%.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining expo-sure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.

The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

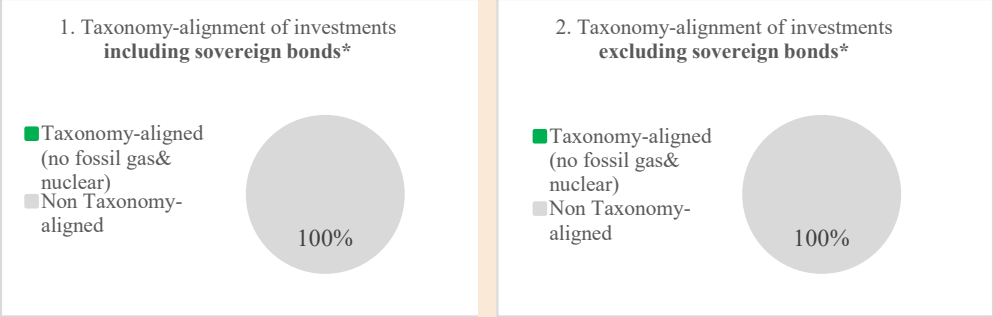
The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.



Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

What is the minimum share of investments in transitional and enabling activities?

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.

What is the minimum share of socially sustainable investments?

The financial product targets a minimum proportion of sustainable investment as stated in the asset allocation of this annex.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI AC Asia ex Japan Selection Low Carbon Select 5% Issuer Capped Index (Net Total Return).

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the Index methodology applied by the index provider can be found below.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the index provider rebalances the Index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

  The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the Reference Benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

The Index draws its constituents from the MSCI AC Asia ex Japan Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the net total return dividend performance of large and mid-capitalization companies of the AC Asia ex Japan market.

The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index.

The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies facing controversies (MSCI Red Flag, being an indication of at least one very severe controversy), companies which have a poor ESG Rating (rating of CCC), companies which have revenues in certain business activities (controversial weapons, nuclear weapons, civilian firearms, tobacco, thermal coal, fossil fuel extraction), as well as the top 5% companies by number based on carbon emission intensity levels (being scope 1 and 2 emissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less than 30% of the weight of that sector in the Parent Index. The index also selects companies with low exposure to fossil fuel reserves and ranks the Parent Index constituents in descending order of the potential carbon emissions per dollar of the market capitalization of the company. Securities are than excluded until the cumulative potential carbon emission of the excluded securities reaches 50% of the sum of the potential carbon emission of the constituents of the Parent Index.

The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index.

- ***Where can the methodology used for the calculation of the designated index be found?***

The methodology of the construction of the Index can be found in the fund supplement.

Where can I find more product specific information online?

More product-specific information can be found on the website:

UBS S&P USA Dividend Aristocrats ESG Elite UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 48
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to the UBS S&P USA Dividend Aristocrats ESG Elite UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Investment Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Disclosure Regulation	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector as may be amended, supplemented, consolidated, substituted in any form or otherwise modified from time to time.
Index	S&P ESG Elite High Yield Dividend Aristocrats Index (Net Total Return).
Index Provider	S&P Dow Jones Indices.

THE FUND AND SHARE CLASSES

The Fund

UBS S&P USA Dividend Aristocrats ESG Elite UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the medium term through exposure to the stock performance of USA leading dividend-paying companies which meet certain ESG-based criteria (while avoiding those with low ESG characteristics) via a diversified portfolio of securities as described below in the "Investment Objective and Strategy" section. The Fund does not benefit from an SRI label.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;
- hEUR dis;
- hEUR acc;

- hGBP dis;
- hGBP acc;
- hCHF dis;
- hCHF acc;
- hSGD dis;
- hSGD acc;
- hCAD dis;
- hCAD acc;
- hSEK dis;
- hSEK acc;
- hJPY dis; and
- hJPY acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the U.S. equity market performance of high dividend yielding / ESG-scoring companies that meet certain sustainability criteria.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the S&P ESG Elite High Yield Dividend Aristocrats Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the S&P ESG Elite High Yield Dividend Aristocrats Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index. The Fund seeks to achieve the objective by tracking the Index and, with regard to ESG criteria, giving exposure to global companies with high ESG ratings and to exclude the ones with negative social or environmental impact.

Any determination by the Directors that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking an ESG Index, the Fund promotes environmental and/or social characteristics under Article 8 of the Disclosure Regulations.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, GBP, CHF, SGD, CAD, JPY and SEK (each a "**Hedged Currency Version**"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "*Investment Objectives, Policy and Strategy*" section of the Prospectus.

Share Class	Index Currency Version
hEUR dis hEUR acc	S&P ESG Elite High Yield Dividend Aristocrats hedged to EUR Index (Net Total Return)

Share Class	Index Currency Version
hGBP dis hGBP acc	S&P ESG Elite High Yield Dividend Aristocrats hedged to GBP Index (Net Total Return)
hCHF dis hCHF acc	S&P ESG Elite High Yield Dividend Aristocrats hedged to CHF Index (Net Total Return)
hSGD dis hSGD acc	S&P ESG Elite High Yield Dividend Aristocrats hedged to SGD Index (Net Total Return)
hCAD dis hCAD acc	S&P ESG Elite High Yield Dividend Aristocrats hedged to CAD Index (Net Total Return)
hSEK dis hSEK acc	S&P ESG Elite High Yield Dividend Aristocrats hedged to SEK Index (Net Total Return)
hJPY dis hJPY acc	S&P ESG Elite High Yield Dividend Aristocrats hedged to JPY Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securites cannot be guaranteed. The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled *"Tracking Accuracy"*.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable.

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the

historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 70% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index and the Index Provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the Fund's resulting ESG rating will be higher than the ESG rating of a Fund tracking a standard index.

The Fund does not benefit from a French SRI label.

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("AMF Rules"), the Fund will adopt a binding and significant approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible**.**

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "*notional amount*," *e.g.*, the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "*basket*" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.
Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the S&P ESG Elite High Yield Dividend Aristocrats Index and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier S&P Dow Jones Indices and is denominated in USD. It measures the performance of large and mid-capitalised high dividend yielding/ ESG-scoring companies across the U.S. that meet sustainability criteria as defined in this methodology and meet the eligibility criteria defined in the S&P High Yield Dividend Aristocrats Index.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. The selection process targets approximately 25% of the market capitalization of the constituents of the S&P Composite 1500 (the "**Broad Market Index**") that have followed a managed-dividends policy of increasing or maintaining dividends for at least 20 consecutive years, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 25% coverage by cumulative free float-adjusted market capitalization is reached.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises. These norms are reflected using assessments by Sustainalytics. In addition, the Index Provider uses RepRisk to screen for ESG risk incidents and controversial activities.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, arctic oil & gas, oil sands, thermal coal mining, alcohol, adult entertainment, gambling, small arms, military contracting, genetically modified plants, palm oil, predatory lending, electricity generation through thermal coal, nuclear or shale, are excluded. Thresholds for exclusion typically range from any revenue to 10% revenue exposure, except for power generation, oil and gas activities which are excluded at 50% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's website set out below. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on an annual basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (ticker no. SPEEHDUN) is available on the S&P Dow Jones Indices internet website by selecting the S&P ESG Elite High Yield Dividend Aristocrats Index from the list of indices and by completing the relevant form on:

http://supplemental.spindices.com/supplemental-data/europe

Additional information about the Index can be found under:

http://supplemental.spindices.com/supplemental-data/europe

Index Factsheet

The Index Factsheet is available on the S&P Dow Jones Indices internet website by selecting the S&P ESG Elite High Yield Dividend Aristocrats Index from the list of indices and by completing the relevant form on:

http://supplemental.spindices.com/supplemental-data/europe

Publication of the Index Value

The closing price, an additional factsheet and the composition of the Index is available on the S&P Dow Jones Indices internet website by selecting the S&P ESG Elite High Yield Dividend Aristocrats Index from the list of indices and by completing the relevant form on:

http://supplemental.spindices.com/supplemental-data/europe

Publication of the Index Composition

The closing price, an additional factsheet and the composition of the Index is available on the S&P Dow Jones Indices internet website by selecting the S&P ESG Elite High Yield Dividend Aristocrats Index from the list of indices and by completing the relevant form on:

http://supplemental.spindices.com/supplemental-data/europe

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or

economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who

want to take an exposure to the equity market performance of small, mid, and large capitalisation companies globally and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

Accumulating Share Classes

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hGBP acc;
- hCHF acc;
- hSGD acc;
- hCAD acc;
- hSEK acc; and
- hJPY acc.

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

Distributing Share Classes

The Directors intend to declare dividends out of:

- net income; and/or
- realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;
- hEUR dis;
- hGBP dis;
- hCHF dis;
- hSGD dis;
- hCAD dis;

- hSEK dis; and
- hJPY dis.

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.20% per annum of the Net Asset Value of the Class
USD acc	up to 0.20% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.20% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.23% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.23% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.23% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.23% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.23% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.23% per annum of the Net Asset Value of the Class
hSGD dis	up to 0.23% per annum of the Net Asset Value of the Class
hSGD acc	up to 0.23% per annum of the Net Asset Value of the Class
hCAD dis	up to 0.23% per annum of the Net Asset Value of the Class
hCAD acc	up to 0.23% per annum of the Net Asset Value of the Class

Share Class	Flat Fee
hSEK dis	up to 0.23% per annum of the Net Asset Value of the Class
hSEK acc	up to 0.23% per annum of the Net Asset Value of the Class
hJPY dis	up to 0.23% per annum of the Net Asset Value of the Class
hJPY acc	up to 0.23% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- USD UKdis;
- hEUR dis;
- hEUR acc;
- hGBP dis;
- hGBP acc;
- hCHF dis;
- hCHF acc;
- hSGD dis;
- hSGD acc;
- hCAD dis;
- hCAD acc;
- hSEK dis;
- hSEK acc;

- hJPY dis; and
- hJPY acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The following Classes will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Period
USD acc;	Index value / 100
USD UKdis	Index value / 100
hEUR dis	Index value / 100
hEUR acc	Index value / 100
hGBP dis	Index value / 100
hGBP acc	Index value / 100
hCHF dis	Index value / 100
hCHF acc	Index value / 100
hSGD dis	Index value / 100
hSGD acc	Index value / 100
hCAD dis	Index value / 100
hCAD acc	Index value / 100
hSEK dis	Index value / 100
hSEK acc	Index value / 100
hJPY dis	Index value / 100
hJPY acc	Index value / 100

The closing Index value which will be published on the S&P DJ website at the web address set out in section entitled *"Publication of the Index"* will be used to calculate the Initial Offer Price. For example, where the Index Value was 380.99 at 2 June 2023, Shares in USD dis would be issued at an Initial Offer Price per Share of USD 3.8099. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

a) properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and

b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the

Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituent may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY S&P Dow Jones Indices. ("**S&P DJ**"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER

THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY S&P DJ INDEX (COLLECTIVELY, THE "**S&P DJ PARTIES**"). THE S&P DJ INDEXES ARE THE EXCLUSIVE PROPERTY OF S&P DJ. S&P DJ AND THE S&P DJ INDEX NAMES ARE SERVICE MARK(S) OF S&P DJ OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE S&P DJ PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY S&P DJ INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. S&P DJ OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE S&P DJ INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY S&P DJ WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE S&P DJ PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE S&P DJ INDEXES. NONE OF THE S&P DJ PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE S&P DJ PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH S&P DJ SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE S&P DJ INDEXES FROM SOURCES THAT S&P DJ CONSIDERS RELIABLE, NONE OF THE S&P DJ PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY S&P DJ INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE S&P DJ PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY S&P DJ INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE S&P DJ PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY S&P DJ INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE S&P DJ PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE S&P DJ PARITES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH S&P DJ INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE S&P DJ PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY S&P DJ TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING S&P DJ TO DETERMINE WHETHER S&P DJ PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH S&P DJ WITHOUT THE PRIOR WRITTEN PERMISSION.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS S&P USA Dividend Aristocrats ESG Elite UCITS ETF	39120075RPT4LW5WTX50

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product:

• tracks/tracking of a benchmark, and accordingly producing a portfolio, with a sustainability profile (MSCI ESG Score) that is higher than the S&P Composite

1500's (the "Broad Market Index/Parent Benchmark") sustainability profile. As described in greater detail below, the MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of key environmental (climate change, natural capital, pollution & waste and environmental opportunities), social (human capital, product liability, stakeholder opposition and social opportunities) and governance (corporate governance and corporate behavior) themes (the "Key ESG Themes").

• a Carbon Intensity (1, 2) emissions indicator lower than the Parent Benchmark (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the S&P ESG Elite High Yield Dividend Aristocrats Net Total Return.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The above ESG characteristics are measured using the following indicators respectively:

• The MSCI ESG Score

MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.

• Weighted average carbon intensity (Scope 1+2) MSCI

The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight

into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

Please note that while the Reference Benchmark and Parent Benchmark are provided by Standard & Poor's, the Investment Manager will rely on data provided by MSCI to calculate the MSCI ESG Score and the weighted average carbon intensity (Scope 1+2) of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Benchmark provider.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index. The objective of the sustainable investments is to produce a portfolio with a higher MSCI ESG Score and a lower Carbon Intensity (1, 2) emissions indicator than the Broad Market Index.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for Index inclusion. Companies without Sustainalytics coverage, are also ineligible for Index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the activities listed at Article 12(a)-(g) of Regulation (EU) 2020/1818 or the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands, Shale Energy, Artic Oil & Gas Exploration, Oil & Gas, Small Arms, Adult Entertainment, Alcohol, Gambling, Genetically Modified Plants and Seeds, Nuclear Power, Predatory Lending and Palm Oil. By excluding those mentioned business activities, especially those which are considered as climate related (Thermal Coal, Oil Sands, Shale Energy, Artic Oil & Gas

Exploration and Oil & Gas), the Index's carbon emission is signifcantly reduced.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

This financial product is passively managed and tracks an Index. The Index provider implements the screens and exclusions set out above to ensure that the remaining portion of the Index which are sustainable investments do not cause significant harm. As outlined above, the GSS monitors companies to ensure that they are aligned with the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, the value-based exclusions mentioned in the previous response consider sustainability indicators listed in Table 1 of Annex 1 of Regulation (EU) 2022/1288, such as GHG emissions, Carbon footprint, Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and exposure to controversial weapons.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

  Indicators for adverse impacts on sustainability factors mentioned in Table 1 of Annex 1 of Regulation (EU) 2022/1288 are taken into account by the Index provider when applying value-based and norms-based exclusions as set out in the Index methodology and below.

  The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

  GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for Index inclusion. Companies without Sustainalytics coverage, are also ineligible for Index inclusion until they receive such coverage.

  The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on

Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the activities listed at Article 12(a)-(g) of Regulation (EU) 2020/1818 or the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands, Shale Energy, Artic Oil & Gas Exploration, Oil & Gas, Small Arms, Adult Entertainment, Alcohol, Gambling, Genetically Modified Plants and Seeds, Nuclear Power, Predatory Lending and Palm Oil.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.
The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.
Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors mentioned in Table 1 of Annex 1 of Regulation (EU) 2022/1288 are taken into account by the Index provider when applying value-based and norms-based exclusions as set out in the Index methodology and below.

Information regarding how the Fund's environmental or social characteristics are met will be included with the Fund's annual report.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the Index provider to be screened against environmental, social or governance criteria and any methodology used by the Index provider to assess sustainability characteristics and risks of the constituents of the Index can be found on the website of the Index provider.

Information on the ESG profile of the Index is available on the S&P Dow Jones Indices internet website by selecting the S&P ESG Elite High Yield Dividend Aristocrats Index from the list of indices and by completing the relevant form on:

http://supplemental.spindices.com/supplemental-data/europe

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

As described above, the following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product.

The passive investment strategy employed by this financial product will select investments based on its ability to generate:

Characteristic 1):

A sustainability profile (MSCI ESG Score) that is higher than the Broad Market Index's (S&P Composite 1500) sustainability profile

Characteristic 2):

A Carbon Intensity (1 and 2) emissions indicator that is lower than the Parent Benchmark (MSCI)

The calculations do not take account of cash, derivatives and unrated investment instruments.

The binding element(s) are calculated at quarter end using the average of all of business days' values in the quarter.

Please note that while the Reference Benchmark and Parent Benchmark are provided by Standard & Poor's, the Investment Manager will rely on data provided by MSCI to calculate the MSCI ESG Score and the weighted average carbon intensity (Scope 1+2) of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Benchmark provider.

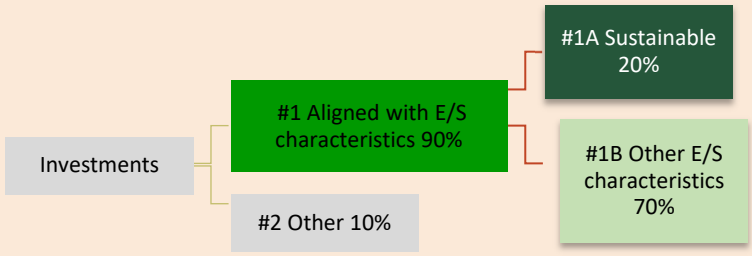
- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard Index universe. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.

- ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance practices of the investee companies are performed by the Index provider.

Sustainalytics assess a company's corporate governance structures, practices and behaviors along six pillars that are deemed crucial for good governance: Board Integrity & Quality, Board Structure, Remuneration, Shareholder Rights, Financial Reporting and Stakeholder Governance.



Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The financial product tracks an ESG index and may replicate the performance of the Index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments in Index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.

The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

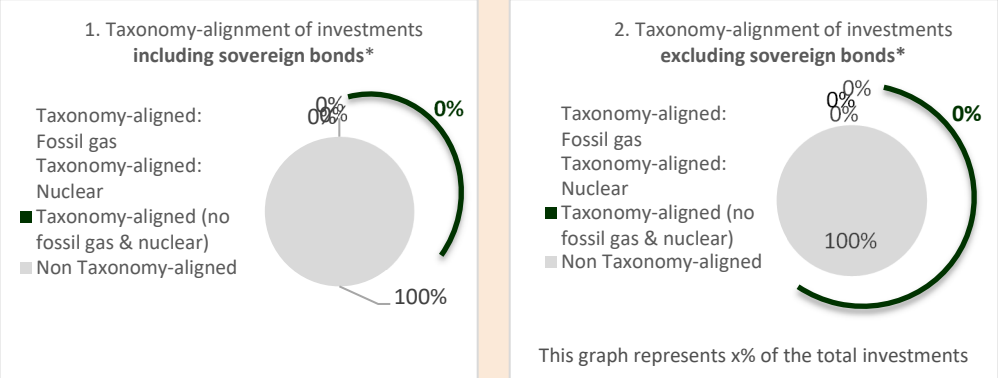
The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.



Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission leels corresponding to the best performance.

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What is the minimum share of investments in transitional and enabling activities?

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentaly sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of 20% sustainable investment as stated in the asset allocation of this annex.

What is the minimum share of socially sustainable investments?

The financial product targets a minimum proportion of sustainable investment, these investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Reference Benchmark designated for the purpose of attaining the sustainable objective of the financial product is the S&P ESG Elite High Yield Dividend Aristocrats Net Total Return.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on an annual basis. More details on the index methodology applied by the Index provider can be found below.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the Index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the Index and to minimize the tracking error. The investment manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

The Broad Market Index is the S&P Composite 1500. The Index is an equity index calculated, maintained and published by international index supplier S&P Dow Jones Indices and is denominated in USD. It measures the performance of large and midcapitalised U.S. companies.

The Index measures the performance of high dividend yielding / ESG-scoring companies that meet sustainability criteria as defined in this methodology, and meet the eligibility criteria defined in the S&P High Yield Dividend Aristocrats Index. Constituents are selected from eligible companies in the S&P Composite 1500 that have followed a managed-dividends policy of increasing or maintaining dividends for at least 20 consecutive years. Constituents are weighted by indicated dividend yield.

- ***Where can the methodology used for the calculation of the designated index be found?***

The methodology of the construction of the Index can be found in the fund supplement.

UBS EUR Ultra-Short Bond Screened UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 49
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS EUR Ultra-Short Bond Screened UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	EUR
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 2.00 pm (Dublin time) on the relevant Dealing Day. For redemptions: 2.00 pm (Dublin time) on the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return).
Index Provider	Solactive AG.
Initial Offer Period	9.00 am (Irish time) on 13 May 2025 to 2.00 pm (Irish time) on the Closing Date. The initial offer period for all other Classes has now closed.
Investment Manager	UBS Asset Management Switzerland AG, Zurich.
Investment Management Agreement	The agreement made between the Manager and the Investment Manager dated 26 February 2024, as may be amended, supplemented or otherwise modified from time to time in accordance with the requirements of the Central Bank;
IOP	Initial Offer Period.
IOP Settlement Date	The second Business Day after the Closing Date.
ISIN	EUR dis IE000YKKGVQ5 EUR acc IE000RW7V8Q4

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the second Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS EUR Ultra-Short Bond Screened UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking exposure to environmental, social and governance ("**ESG**") EMU Government, agencies and supranational bonds via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- EUR dis
- EUR acc

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as Solactive EUR Ultra-Short diversified Bond ESG Index (Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.

Information related to environmental and/or social characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

The Fund seeks to hold a representative selection of components comprising the underlying Index selected by the Investment Manager using a Sampling Strategy. To this end, the Fund invests in a representative sample of components of the underlying index selected by the Investment Manager using a "portfolio optimisation" technique. For each security, therefore, a decision is made based on its investment characteristics as to whether it should be considered for inclusion in the Fund replicating the Index. The proportionate exposure by the Fund to the component securities will be substantially achieved either through direct investment or through the use of derivatives or through a combination of both techniques. The Fund may further hold securities which are not comprised in its Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index and believes this to be appropriate considering the Fund's investment objective and the investment restrictions or other factors.

The Fund will invest its net assets predominantly in bonds, transferable securities, money market instruments, units of collective investment schemes, deposits with credit institutions, structured notes listed or dealt in on a regulated market and other assets eligible under the rules set forth in the chapter "Investment Restrictions" of this prospectus.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Company's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return

varies from the Index's return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

AMF DISCLOSURE

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index and the Index Provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the Fund's resulting ESG rating will be higher than the ESG rating of a Fund tracking a standard index.

The Fund does not benefit from a French SRI label.

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("AMF Rules"), the Fund will adopt a binding and significant approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures & Index Futures

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as over the counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return) and is not a complete description of the Index.

General

The Index aims to track the performance of eligible fixed-rate, EUR-denominated government, quasi sovereign and supra-national bank bonds and commercial papers maturing within the next 6 months. The issuer of the securities must be domiciled in a member state of the European Monetary Union.

The Index is a subset of the Solactive EMU Sovereign Bond TR Index (SOLEMUS). The Index invests in sovereign, supranational and agency bonds, bills, commercial paper and certificate of deposits denominated in Euro. Bonds, bills and commercial papers will only be included if Sustainalytics Country Risk Ratings or respective ESG risk ratings are available for the issues.

In identifying securities for inclusion in the Index, the Index Provider will only select securities which have a maximum time to maturity from selection day of 6 months from the relevant rebalance day.

For sovereign bonds and bills, the Index selects the top 50% of bonds of the SOLEMUS by market value weights, ordered by best to worst country risk ratings and the bottom 50% will be removed. For supranational and agency bonds, the Index selects the top 80% of which are computed with ESG risk ratings tilted market value weights and the bottom 20% ESG laggards will be removed. Securities that rank within the lowest 30 percentile based on ESG (Environmental, Social, and Governance) risk ratings within the supranational and agency bond universe are excluded except such bonds which already form part of the Index.

The final Index is composed of 70% sovereign bonds and bills and of 30% of supranational and agencies.

The Index is rebalanced on a monthly basis.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted

investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the Solactive internet website:

https://www.solactive.com/indices/?se=1&index=DE000SL0DSM5

Index Factsheet

The Index Factsheet is available on the Solactive internet website:

https://www.solactive.com/indices/?se=1&index=DE000SL0DSM5

Publication of the Index Value

https://www.solactive.com/indices/?se=1&index=DE000SL0DSM5

Publication of the Index Composition

The composition of the Index is available on the Solactive internet website by selecting the underlying index:

https://www.solactive.com/indices/?se=1&index=DE000SL0DSM5

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in bonds markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

Sovereign Single Issuer Risk

Certain Funds are allowed to track the performance of an index composed of bonds issued by one single sovereign issuer. While the legal risk spreading rules allow such investments provided that securities are diversified with respect to at least 6 different issues, it is likely that if the sovereign issuer defaults under one issue of bonds, it will also be defaulting on other issues of bonds, thus causing the total loss of the investment of the relevant Fund.

Government Bonds

Although a government bond fund will invest in government bonds that invest and trade in the secondary market, the secondary market for inflation linked bonds can become illiquid and therefore it may be more difficult to achieve fair value on purchase and sale transactions. The price of bonds will generally be affected by changing interest rates. In periods of low inflation the positive growth of a government bond sub-fund may be limited.

Sovereign Debt

The governmental entity that controls the repayment of sovereign debt may not be able or willing to repay the principal and/or interest when due in accordance with the terms of such debt. A governmental entity's ability to repay principal and interest due in a timely manner may be affected by, among other factors, its cash flow, the extent of its foreign reserves, the availability of sufficient foreign exchange on the date a payment is due, the state of its country's economy, the relative size of the debt service burden to the economy as a whole, restrictions on its ability to raise more cash, the governmental entity's policy towards the International Monetary Fund and the political constraints to which a governmental entity may be subject. Governmental entities may also be dependent on expected disbursements from foreign governments, multilateral agencies and others abroad to reduce principal and interest arrearage on their debt. The commitment on the part of these governments, agencies and others to make such disbursements may be conditioned on a governmental entity's implementation of economic reforms and/or economic performance and the timely service of such debtor's obligations. Failure to implement such reforms, achieve such levels of economic performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds to the governmental entity, which may further impair such debtor's ability to service its debt on a timely basis. Consequently, governmental entities may default on their sovereign debt. Holders of sovereign debt, including a sub-fund, may be requested to participate in the rescheduling of such debt and to extend further loans to governmental entities. There is no bankruptcy proceeding by which sovereign debt may be collected in whole or in part. Banks, governments and companies (including within the EEA) invest in each other so if one Member State performs poorly, the other countries could be impacted. If one country defaults on its debt obligations, other countries could be at risk.

Interest and Exchange Rate Fluctuation Risk

The value of fixed-income securities will change in response to changes in interest rates and currency exchange rates. Except to the extent that values are independently affected by currency exchange rate changes, when interest rates decline, the value of fixed-income securities generally can be expected to rise. Conversely, when interest rates rise, the value of fixed-income securities generally can be expected to decline. The performance of investments in fixed-income securities denominated in a specific currency will also depend on the interest rate environment in the country issuing the currency. A Fund which holds securities denominated in a non-base currency will be at risk of a decline in value of that currency. A rise in interest rates or decline in the value of non-base currencies relative to the base currency generally can be expected to depress the value of the Fund's non-base currency investments. Additionally, a fund with a predominant exposure to fixed income securities will only receive a nominal fixed return, in times of high or rising inflation investors may make a real loss through such returns real value being eroded by the inflation of real prices.

Illiquidity of Bonds Close to Maturity

In addition to the liquidity risks of bonds already described above, there is a risk that bonds which are nearing maturity may become illiquid. In such cases, it may become more difficult to achieve fair value on the purchase and sale thereof.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to take an exposure to the fixed income market performance of ESG screened global issuers and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- EUR acc

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- EUR dis

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
EUR dis	up to 0.08% per annum of the Net Asset Value of the Class

Share Class	Flat Fee
EUR acc	up to 0.08% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- EUR dis
- EUR acc

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
EUR dis	Index value / 5 EUR
EUR acc	Index value / 5 EUR

The closing Index value which will be published on the Solactive website at the web address set out in section entitled *"Publication of the Index"* will be used to calculate the Initial Offer Price. For example, where the Index Value was 200 at 26 August, 2024, Shares in EUR acc would be issued at an Initial Offer Price per Share of EUR 40. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior

to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within two Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

INVESTMENT MANAGER

The Manager has appointed UBS Asset Management Switzerland AG, as investment manager with discretionary powers in respect of the Fund pursuant to the Investment Management Agreement. Under the terms of the Investment Management Agreement, the Investment Manager is responsible, subject to the overall supervision and control of the Manager, for managing the assets and investments of the Fund in accordance with the investment objective and policies.

UBS Asset Management Switzerland AG was incorporated on 30 November 2018, went operational on 17 June 2019, and is authorised and regulated in Switzerland by the Swiss Financial Market Supervisory Authority.

The principal activity of the Investment Manager is the provision of investment management services.

The Investment Management Agreement may be terminated by either party on 6 months' written notice or forthwith by notice in writing in certain circumstances such as the insolvency of either party or remedied breach after notice. The Investment Manager has the power to delegate its duties with the prior approval of the Central Bank. The Investment Management Agreement provides that where they are the defaulting party, the Manager and the Investment Manager shall indemnify against and hold harmless the other in case of any loss, damage, costs and liabilities incurred by the other as a result of the defaulting party's negligence, wilful default or fraud.

INDEX DISCLAIMERS

This Fund is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the Index and/or Index trademark or the Index Price at any time or in any other respect. The Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return) is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the Index is calculated correctly. Irrespective of its obligations towards the Issuer, Solactive AG has no obligation to point out errors in the Index to third parties including but not limited to investors and/or financial intermediaries of the financial instrument. Neither publication of the Index by Solactive AG nor the licensing of the Index or Index trademark for the purpose of use in connection with the financial instrument constitutes a recommendation by Solactive AG to invest capital in said financial instrument nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in this financial instrument.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS EUR Ultra-Short Bond Screened UCITS ETF	3912001O6FYVTYZ8IK41

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product:

• tracks/tracking of a benchmark, and accordingly producing a portfolio, with a sustainability profile (ESG Score) that is higher than the sustainability profile of the Solactive EMU Sovereign Bond TR Index (the "Parent Benchmark"). As described in greater detail below, the MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of key environmental (climate change, natural capital, pollution & waste and environmental opportunities), social (human capital, product liability, stakeholder opposition and social opportunities) and governance (corporate governance and corporate behavior) themes (the "Key ESG Themes").

The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return).

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The above ESG characteristics are measured using the following indicators respectively:

• The ESG Score

The ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The ESG Score is based on the issuer's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. The ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The ESG Score measures the most financially significant environmental, social and governance risks and opportunities of issuers on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Issuers with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each security in the product's portfolio will produce a score which will contribute to the overall ESG Score of the product's portfolio. The product's ESG Score will be higher than that of the Parent Benchmark.

Please note that while the Reference Benchmark and Parent Benchmark are provided by Solactive, the Investment Manager will rely on data provided by MSCI to calculate the ESG Score of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Benchmark provider.

- ***What are the objectives of the sustainable investments that the financial***

	product partially intends to make and how does the sustainable investment contribute to such objectives?
	The objectives of the sustainable investments that the financial product partially intends to make, is to contribute to environmental and/or social objectives. This financial product invests at least 80% of its total net assets in issuers that are constituents of the Index or securities which are not comprised in its Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index and believes this to be appropriate considering the Fund's investment objective and the investment restrictions or other factors and the Index provider applies ESG Ratings on all of the Index constituents with a commitment to a minimum proportion of sustainable investments of 10%. The Index applies an Environmental, Social and Governance (ESG) scoring and screening methodology to tilt toward issuers ranked higher on ESG criteria and green bond issues, and to underweight or remove issuers that rank lower. The Index incorporates the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles. GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, issuers classified as Non-Compliant, according to Sustainalytics, are ineligible for Index inclusion. Issuers without Sustainalytics coverage, are also ineligible for Index inclusion until they receive such coverage. GSS monitors involvement in notable ESG controversies related to an issuer's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles. The index is based on two segments, a) market cap weighted Government Bonds with a target weight of 70% and b) equal weighted supranational & agencies with a target weight of 30%. In segment a) 50% of the ESG laggards will be removed, in segment b) 20% of the ESG laggards will be removed.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

This financial product is passively managed and tracks an Index. Indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family. The Index provider implements the screens and exclusions set out above to ensure that the remaining portion of the Index which are sustainable investments do not cause significant harm. As outlined above, the GSS monitors issuers to ensure that they are aligned with the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, the value-based exclusions mentioned in the previous response consider sustainability indicators listed in Table 1 of Annex 1 of Regulation (EU) 2022/1288, such as GHG emissions, Carbon footprint, Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and exposure to controversial weapons.

How have the indicators for adverse impacts on sustainability factors been taken into account?

When calculating the Sustainalytics ESG scores, indicators for adverse impacts on sustainability factors are taken into account by Sustainalyitcs.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

Issuers identified as violating Freedom House principles will be removed from the Index. When calculating the Sustainalytics ESG scores, indicators Un Guiding Principles factors are taken into account by Sustainalyitcs.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

This financial product is passively managed and tracks an Index and, therefore, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family, as follows:

The Index applies Sustainalyitics issuer scores to adjust the market value of index constituents from the respective baseline indices.

The index is based on two segments, a) market cap weighted Government Bonds with a target weight of 70% and b) equal weighted supranational & agencies with a target weight of 30%. In segment a) 50% of the ESG laggards will be removed, in segment b) 20% of the ESG laggards will be removed.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the Index Provider.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product.

The passive investment strategy employed by this financial product will select investments based on its ability to generate:

Characteristic 1):

- A sustainability profile (ESG Score) that is higher than the Parent Benchmark's sustainability profile.

The calculations do not take account of cash, derivatives and unrated investment instruments.

The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.

Please note that while the Reference Benchmark and Parent Benchmark are provided by Solactive, the Investment Manager will rely on data provided by MSCI to calculate the ESG Score of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Benchmark provider.

- ***What is the committed minimum rate to reduce the scope of the investments***

considered prior to the application of that investment strategy?

This financial product does not have a committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

This financial product invests at least 80% of its total net assets in issuers that are constituents of the Index or securities which are not comprised in its Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index and believes this to be appropriate considering the Fund's investment objective and the investment restrictions or other factors and the Index provider applies ESG Ratings on all of the Index constituents.

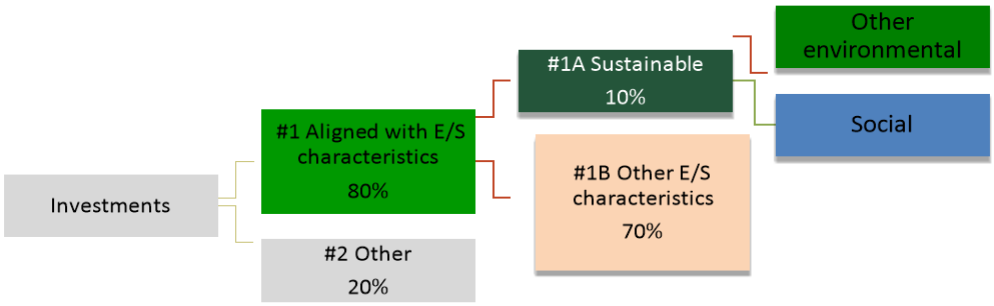
The Index provider applies ESG Ratings on all of the Index constituents. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.

Due to stratified sampling approach, slight deviations from the index may occur, on a temporary basis, while keeping the overall objective of the fund in line with the Index.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

The methodology considers the issuer countries management of natural capital, produced capital, human capital and institutional capital. Countries are assessed on their ESG risks affecting the value of each of the capitals according to criteria corresponding to various risk factors expected to impact natural and produced capital, human capital and institutional capital. In addition, ESG trends will be considered which capture whether ESG Performance is improving or deteriorating. The ESG trend score measures the improvement in a country's performance on a given indicator relative to its 5-year average. Assessment of good governance practices of the investee companies are performed by the index provider.



What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 80%. The minimum proportion of sustainable investments of the financial product is 10%.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

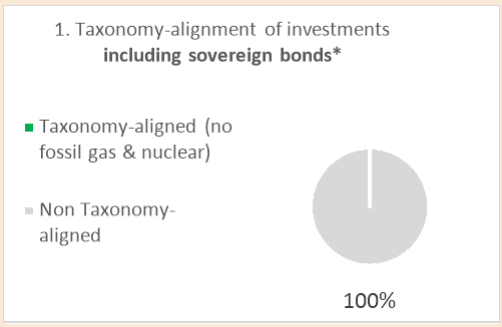
Derivatives are not used for the attainment of the characteristics promoted by this financial product. Derivatives will be primarily used for hedging and liquidity management purposes.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

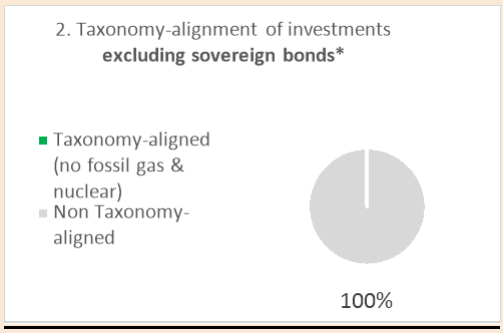
The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

☐ Yes:
☐ In fossil gas ☐ In nuclear energy
☒ No



[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.



To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets sustainable investments that are not aligned with the EU Taxonomy of 10%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.

What is the minimum share of socially sustainable investments?

The financial product targets a minimum proportion of sustainable investment of 10%, these investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, for example where securities are not comprised in its Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index and believes this to be appropriate considering the Fund's investment objective and the investment restrictions or other factors.

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return). Issues from the Reference Benchmark as well as issuers that are constituents of the Reference Benchmark are eligible for aligned with the environmental and/or social characteristics.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a monthly basis. More details on the index methodology applied by the index provider can be found below.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment manager tracks the Index in line with the limits set out in the investment policy of Fund.
The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.
The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The investment strategy is to replicate the index by applying stratified sampling managing the tracking error.
The Investment manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

The Solactive EUR Ultra-Short Diversified Bond ESG Index (Total Return) aims to track the performance of eligible fixed-rate, EUR-denominated government, quasi sovereign and supra-national bank bonds and commercial papers maturing within the next 6 months. The issuer of the securities must be domiciled in a member state of the European Monetary Union. The index exposure to government bonds is limited to 50% of the market cap of the index. The Index is based on the composition of the broad market index, the Solactive EMU Sovereign Bond Index, and a subset of it. The index is rebalanced on a monthly basis. The index further applies an environmental, social and governance (ESG) scoring and screening methodology of the issuer countries.
The index is based on two segments, a) market cap weighted Government Bonds with a target weight of 70% and b) equal weighted supranational & agencies with a target weight of 30%. In segment a) 50% of the ESG laggards will be removed, in segment b) 20% of the ESG laggards will be removed.
The Index differs from the relevant broad market index in that ESG laggards are excluded and substituted with higher ESG rated supranational and agencies.
The index is rebalanced on a monthly basis.

- ***Where can the methodology used for the calculation of the designated index be found?***

The methodology of the construction of the Index can be found in the section of the fund supplement entitled "Description of the Index".

UBS S&P 500 Climate Transition ESG UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 50
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS S&P 500 Climate Transition ESG UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025, or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
EU Climate Regulations	Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 as amended by Regulation (EU) 2019/2089 of the European Parliament and of the Council of 27 November 2019 amending Regulation (EU) 2016/1011 as regards EU Climate Transition Benchmarks, EU Paris-aligned Benchmarks and sustainability-related disclosures for benchmarks and as supplemented by Commission Delegated Regulation (EU) 2020/1818 of 17 July 2020 as regards minimum standards for EU Climate Transition Benchmarks and EU Paris aligned Benchmarks as may be amended, supplemented, consolidated, substituted in any form or otherwise modified from time to time.
Index	The S&P 500 Climate Transition Base ESG Index (Net Total Return).
Index Provider	S&P Dow Jones Indices.

Initial Offer Period	9:00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE000T6ORZM0 USD acc IE000S4A5WE2 hCHF dis IE000BLXO5I9 hCHF acc IE000ULBKME7 hEUR dis IE000F585NQ3 hEUR acc IE0009WWNY77 hGBP dis IE00049BN7O1 hGBP acc IE000PIECUW9 USD UKdis IE00022S4NJ9
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Paris Agreement	a legally binding international treaty on climate change, adopted in Paris on 12 December 2015 and entered into force on 4 November 2016. Its goal is to limit global warming to below 2 degrees Celsius, preferably to 1.5 degrees Celsius, compared to pre-industrial levels. To achieve this long-term temperature goal, countries aim to reach global peaking of greenhouse gas emissions as soon as possible to achieve a climate neutral world by mid-century.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
TCFD	Task Force on Climate-related Financial Disclosures, an organization formed by the Financial Stability Board for the purposes of developing voluntary, consistent disclosure recommendations for the provision of information to investors, about climate-related financial risks.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.standardandpoors.com/indices.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS S&P 500 Climate Transition ESG UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the medium term through exposure to the equity market performance of the US market to reduce their exposure to transition and physical climate risks and to invest into opportunities arising from the transition to a lower carbon economy in alignment with the Paris Agreement requirements via a diversified portfolio of best-in-class environmental, social and governance ("**ESG**") securities (while avoiding those with low ESG characteristics) as described below in the *"Investment Objective and Strategy"* section. This best in class approach excludes at least 20% of the least well-rated securities as against the standard index universe, being the Parent Index. The Fund will align with the EU Climate Regulations.

Share Classes

To date, the following Classes of Shares are available:

- USD dis
- USD acc
- hCHF dis
- hCHF acc
- hEUR dis
- hEUR acc
- hGBP dis
- hGBP acc and
- USD UKdis

Description of Shares:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity market performance of the Index, with a focus on sustainable investment considerations in alignment with the EU Climate Regulations.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the S&P 500 Climate Transition Base ESG Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the S&P 500 Climate Transition Base ESG Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

The Fund seeks to achieve the objective by tracking the Index and, with regard to the climate criteria, giving exposure to US companies which are meeting or working towards the climate goals recommended by the TCFD on carbon reduction and transition objectives towards a more sustainable and lower carbon economy while aligning with the requirements of the Paris Agreement.

The Fund seeks to invest all of its total net assets in securities that are constituents of the Index and the Index Provider constructs the Index on the basis of the Climate Criteria as defined in the section entitled "Description of the Index" below. The Index will eliminate securities as against the standard (parent) index universe based on their exposure to specific business activities (as determined by the Index Provider) including controversial weapons, tobacco, thermal coal, oil sands extraction, small arms activities and military contracting. It is, therefore, expected that the Fund's exposure to the Climate Criteria will be higher than that of a Fund tracking a standard index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval or the provision of reasonable notice to Shareholders (as applicable) and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly. The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

(i) The Fund is passively managed. By pursuing the investment objective and seeking exposure to the Climate Criteria, the Fund has carbon emission reduction as its objective and complies with Article 9.3 of SFDR. Information related to sustainable investment is available in an annex to this document (SFDR RTS Art. 18(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, GBP, CHF, (each a "**Hedged Currency Version**"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the

Replication Strategy are disclosed in the "*Investment Objectives, Policy and Strategy*" section of the Prospectus.

Share Class	Index Currency Version
hCHF dis hCHF acc	The S&P 500 Climate Transition Base ESG hedged to CHF Index (Net Total Return).
hEUR dis hEUR acc	The S&P 500 Climate Transition Base ESG hedged to EUR Index (Net Total Return).
hGBP dis hGBP acc	The S&P 500 Climate Transition Base ESG hedged to GBP Index (Net Total Return).

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of an ESG score and exposure to the Climate Criteria generated to these selected securites cannot be guaranteed. The Fund, for the purposes of assisting in replicating the Index, may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities satisfy the Climate Criteria and may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "*Tracking Accuracy*".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the

primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage (calculated under the commitment approach as set out in the "Risk Management" section below) will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The RMP was prepared and submitted to the Central Bank in accordance with the Central Bank requirements.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index and the Index Provider applies ESG Ratings on all of the Index constituents. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the Fund's resulting ESG rating will be higher than the ESG rating of a Fund tracking a standard index.

The Fund does not benefit from a French SRI label.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in
respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the S&P 500 Climate Transition Base ESG Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier S&P Dow Jones Indices and is denominated in USD. It is a broad-based, market-cap-weighted index that is designed to measure the performance of securities meeting sustainability criteria, while maintaining similar overall industry group weights as the S&P 500 Index (the "**Parent Index**"), being the 500 leading companies listed on markets in the USA but available to investors globally.

The Index aims to provide exposure to securities selected and weighted to be a collectively compatible transition to a lower-carbon economy while aligning with requirements of the Paris Agreement. The Index aims for lower total emissions from all scopes by at least 30% compared to the Parent Index and

reduction in total scope 1, 2, 3 of the Index by at least 7% on an annual basis. The Index additionally aims for a better ESG score than the Parent Index. The methodology also aims for the Index to align with a 1.5°C climate scenario using aggregated cumulative projected emissions. Eligibility is influenced by Trucost's Transition Pathway Model.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. The weighted-average S&P Global ESG Score must be at least as high as the underlying index after removing the lowest 20% of ESG scoring stocks. The Index applies constituent-level weight capping to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises. These norms are reflected using assessments by Sustainalytics. In addition, the Index Provider uses RepRisk to screen for ESG risk incidents and controversial activities.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, oil sands, thermal coal, small arms, military contracting, electricity generation through thermal coal are excluded. Thresholds for exclusion typically range from any revenue to 25% revenue exposure.
For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances quarterly, effective after the close of the third Friday of March, June, September, and December. The rebalancing reference date for each rebalance is the third Friday of the prior month. As part of the rebalancing process, constituent stock weights are updated. Weights calculated as a result of the reference date data are implemented in the indices using closing prices seven business days prior to the rebalancing effective date. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the S&P Indices internet website by selecting the S&P 500 Climate Transition Base ESG Index (Net Total Return) from the list of indices and by completing the relevant form on:

https://www.spglobal.com/spdji/en/indices/esg/sp-500-climate-transition-base-esg-index/#data

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal

inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Climate-Focused Investing Risk

The Fund is subject to the risk that its climate-focused investment strategy may select or exclude securities of certain issuers for reasons other than investment performance considerations. As a result, the Fund may underperform funds that do not utilise a climate focused investment strategy. Certain climate-focused investments may be dependent on government policies and subsidies, which are subject to change or elimination. Successful application of the Fund's climate-focused investment strategy will depend on the success of the Index Provider's "Climate Criteria" in its construction of the Index properly identifying and analysing material climate-related issues and related business practices, and there can be no assurance that the strategy or techniques employed will be successful.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of the 500 leading companies in the USA and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hCHF acc;
- hEUR acc; and
- (hedged to GBP) A-ACC;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of the these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- hCHF dis;
- hEUR dis;
- hGBP dis;
- USD UKdis.

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.07% per annum of the Net Asset Value of the Class
USD acc	up to 0.07% per annum of the Net Asset Value of the Class
hCHF dis	up to 0. 10% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.10% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.10% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.10% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.10% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.10% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.07% per annum of the Net Asset Value of the Class

The establishment costs of the Fund, shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following fourteen Classes:

- USD dis
- USD acc
- hCHF dis
- hCHF acc
- hEUR dis
- hEUR acc
- hGBP dis
- hGBP acc
- USD UKdis

Applications will be made for certain Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Share Class	(ii) **Initial Offer Price**
USD dis	(iii) Index value /400
USD acc	Index value /400
hCHF dis	Index value /400
hCHF acc	Index value /400
hEUR dis	Index value /400
hEUR acc	Index value /400
hGBP dis	Index value /400
hGBP acc	Index value /400
USD UKdis	Index value /400

The closing Index value which will be published on the S&P website at the web address set out in section entitled *"Publication of the Index"* will be used to calculate the Initial Offer Price. For example, where the Index Value was 2291.42 at 4 December, 2023, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 5.73. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.
Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

INDEX DISCLAIMERS

THERE ARE NO THIRD PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND **UBS ASSET MANAGEMENT SWITZERLAND AG,** OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.

ANNEX III

Pre-contractual disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS S&P 500 Climate Transition ESG UCITS ETF	391200L92SK9497WSV13

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Does this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It will make a minimum of **sustainable investments with an environmental objective:** 20 %	☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of ___ % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** ___ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

What is the sustainable investment objective of this financial product?

This financial product has a reduction in carbon emissions as its sustainable investment objective in view of achieving the long-term global warming objectives of the Paris Agreement. The financial product contributes to this by tracking, before expenses, the price and income performance of the S&P 500 Climate Transition Base Index (Net Return) (the "Index"). The attainment of the sustainable investment objective is measured using the following ESG characteristics respectively:

- tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the Parent Index's sustainability profile
- a Carbon Intensity (1, 2) emissions indicator lower than Parent Index (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the S&P 500 Climate Transition Base ESG Index (Net Total Return).

- ***What sustainability indicators are used to measure the attainment of the sustainable investment objective of this financial product?***

The objective is measured using the following indicators respectively:

• The MSCI ESG Score

MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Index.

• Weighted average carbon intensity (Scope 1+2) MSCI

The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

Please note that while the Reference Benchmark and Parent Index are provided by Standard & Poor's, the Investment Manager will rely on data provided by MSCI to calculate the MSCI ESG Score and the weighted average carbon intensity (Scope 1+2) of the financial product and the Parent Index. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Index provider.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do sustainable investments not cause significant harm to any environmental or social sustainable investment objective?***

This financial product is passively managed and tracks an Index and, therefore, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands, Shale Energy, Artic Oil & Gas Exploration, Oil & Gas, Small Arms, Adult Entertainment, Alcohol, Gambling, Genetically Modified Plants and Seeds, Nuclear Power, Predatory Lending and Palm Oil.

How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products.

The Sustainalytics' Global Standards Screening (GSS) provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in Sustainalytics' Global Standards Screening (GSS) is designed to monitor company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for index inclusion. Companies without Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies involved directly or indirectly in the following business activities: Controversial Weapons, Military Contracting, Thermal Coal, Tobacco, Oil Sands and Small Arms.

☐ No

(Mod)

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk

This financial product seeks the objective(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability objectives and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability objectives and risks of the constituents of the Index can be found on the website of the index provider.

- ***What are the binding elements of the investment strategy used to select the investments to attain the sustainable investment objective?***

The following binding element(s) of the investment strategy are used to select the investments to attain the objective sought by this financial product:

1) The MSCI ESG Score

- A sustainability profile (MSCI ESG Score) that is higher than the Parent Index's (S&P 500 Index) sustainability profile

2) Weighted average carbon intensity (Scope 1+2) MSCI

- Carbon Intensity (1 and 2) emissions indicator that is lower than Parent Index (MSCI)

The calculations do not take account of cash, derivatives, and unrated investment instruments.

The above (s) and the minimum proportion of sustainable investments are calculated at quarter end using the average of all of business days' values in the quarter.

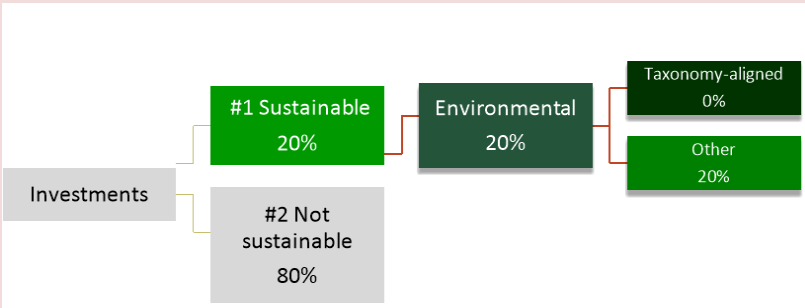
Please note that while the Reference Benchmark and Parent Index are provided by Standard & Poor's, the Investment Manager will rely on data provided by MSCI to calculate the MSCI ESG Score and the weighted average carbon intensity (Scope 1+2) of the financial product and the Parent Index. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Index provider.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance practices of the investee companies are performed by the index provider.

Sustainalytics assess a company's corporate governance structures, practices and behaviors along six pillars that are deemed crucial for good governance: Board Integrity & Quality, Board Structure, Remuneration, Shareholder Rights, Financial Reporting and Stakeholder Governance.



Asset allocation describes the share of investments in specific assets.

What is the asset allocation and the minimum share of sustainable investments?

The minimum proportion of the investments of the financial product used to meet the sustainable investment objective is 20%, with the exception of any investments used for hedging or relating to cash held as ancillary liquidity.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

- ***How does the use of derivatives attain the sustainable investment objective?***

The financial product tracks an ESG index and may replicate the performance of the Index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments Index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged Index, or b) to generate efficiencies in gaining exposure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.

The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

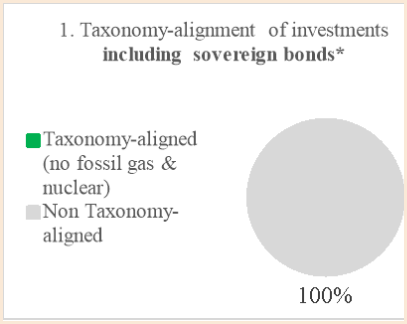
The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

☐ Yes:

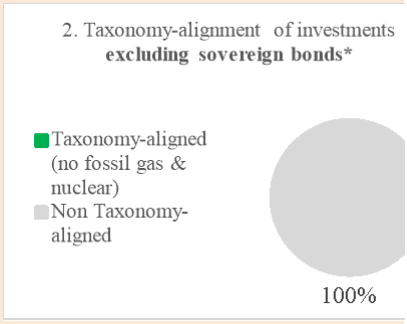
☐ In fossil gas ☐ In nuclear energy

☒ No



[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.



Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission leels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

(v)

(vi)

(vii) ****For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investments with an environmental objective that are not aligned with the EU taxonomy of 20%.

What is the minimum share of sustainable investments with a social objective?

The financial product targets a minimum share of socially sustainable investments greater than 0%.

What investments are included under "#2 Not sustainable", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Not sustainable" are cash, cash equivalents, money market instruments and derivatives or other instruments used for ancillary liquidity or hedging purposes.

Is a specific index designated as a reference benchmark to meet the sustainable investment objective?

The Reference Benchmark designated for the purpose of attaining objectives promoted by the financial product is the S&P 500 Climate Aware Base ESG IndexTotal Return Net.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How does the reference benchmark take into account sustainability factors in a way that is continuously aligned with the sustainable investment objective?***

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it

	seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.
	• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
	The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the Index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of the fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the investment objective it seeks to achieve. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
	• ***How does the designated index differ from a relevant broad market index?***
	The S&P Climate Transition Base Index Series measures the performance of eligible equity securities from an underlying parent index selected and weighted to be collectively compatible with the transition to a low-carbon and climate resilient economy. The indices apply exclusions based on companies' involvement in specific business activities, violations of the principles of the United Nations' Global Compact (UNGC), and involvement in relevant ESG controversies, all outlined in Eligibility Criteria.
	• ***Where can the methodology used for the calculation of the designated index be found?***
	The methodology of the construction of the Index can be found in the section of the fund supplement entitled "Description of the Index". www.spglobal.com/spdji. https://supplemental.spindices.com/supplemental-data/europe https://us.spindices.
	**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS MSCI Canada Universal UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 51
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI Canada Universal UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	Canada Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI Canada Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	9.00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	CAD dis IE000GITNH14 CAD acc IE0004YRJHW4 CAD UKdis IE00017P3RS3

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI Canada Universal UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in Canadian companies that demonstrate a robust ESG characteristics via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- CAD dis;
- CAD acc;
- CAD UKdis;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities

affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI Canada Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI Canada Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. By tracking the Index, the Fund seeks to promote environmental characteristics under Article 8 of the Disclosure Regulations.

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than Canadian Dollars and hedged, including currency versions denominated in USD, EUR, GBP, CHF, SGD, and JPY (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a Canadian Dollar denominated asset in a currency other than Canadian Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a Canadian Dollar denominated asset in a currency other than Canadian Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securities cannot be guaranteed. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct

exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, i.e., the risk that the Fund return varies from the Index's return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant ESG optimisation approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI Canada Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return)) and the index provider applies ESG Ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

By adopting the ESG methodology of the Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non-financial indicator value. The weighted average environmental indicator (Carbon Intensity (1 and 2) emissions indicator of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% lower than the weighted average environmental indicator of the Parent Index (as defined below) based on a reduction of carbon emission intensity.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI Canada Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index draws its constituents from the MSCI Canada Index (the "**Parent Index**"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in CAD. The Index tracks the net total return dividend performance of large and mid-capitalisation Canadian companies.

The Index aims to provide exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to the Parent Index) an ability to better manage ESG risks and opportunities, retain a lower carbon profile, while maintaining broad and diversified market representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% issuer cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, civilian firearms, conventional weapons, electricity generation through thermal coal are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website.

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the “Collateral Policy” section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of US companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- CAD acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- CAD dis;
- CAD UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
CAD acc	up to 0.33% per annum of the Net Asset Value of the Class
CAD dis	up to 0.33% per annum of the Net Asset Value of the Class
CAD UKdis	up to 0.33% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- CAD dis
- CAD acc
- CAD UKdis

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
CAD dis	Index value / 300
CAD acc	Index value / 300
CAD UKdis	Index value / 300

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 2'367.235 at 02 February 2024, Shares in CAD acc would be issued at an Initial Offer Price per Share of CAD 7.8908. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

UBS MSCI Canada Universal UCITS ETF

Legal entity identifier:

391200B191K2E0543U31

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It will make a minimum of **sustainable investments with a social objective:**

_____ %

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators

What environmental and/or social characteristics are promoted by this financial product?

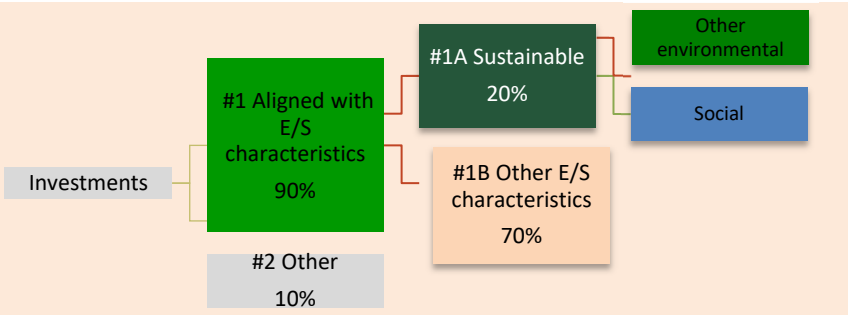
measure how the sustainable objectives of this financial product are attained.		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the sustainability profile of MSCI Canada Index (the "Parent Index") • a Carbon Intensity (1, 2) emissions indicator lower than Parent Index (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristic pro-moted by the financial product is the MSCI Canada Universal Low Carbon Select 5% Issuer Capped Total Return Index.
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Index. • Weighted average carbon intensity (Scope 1+2) MSCI The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory

		risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI Canada Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent Index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?

		Indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family. The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's in-volvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controveroversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.



Any other sustainable investments must also not significantly harm any environmental or social objectives.

		**Does this financial product consider principal adverse impacts on sustainability factors?**
		☒ Yes
		This financial product is passively managed and tracks an Index and, therefore, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family as follows: The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.
		☐ No
		**What investment strategy does this financial product follow?**
The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.		This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.

		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the Parent Index's sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than Parent Index (MSCI) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This financial product does not have a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.
		• ***What is the policy to assess good governance practices of the investee companies?***
Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.		Assessment of good governance practices of the investee companies is performed by the index provider. MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.
		**What is the asset allocation planned for this financial product?**
		The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial

		product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

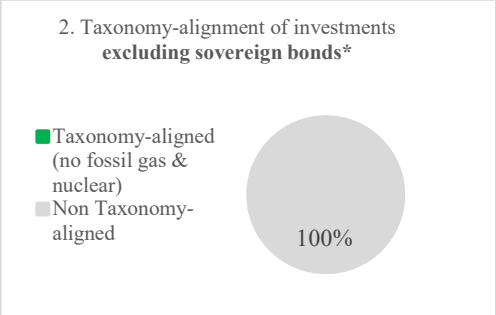
-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers.

The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.

		To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?
		The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
		• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
		☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



*To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.*

***Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.*

***Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.*

The two graphs below show in green the minimum percentage of investments that are aligned wit the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment o sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investment of the financial product including sovereign bonds, while the second graph shows the Taxonom alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.		• ***What is the minimum share of investments in transitional and enabling activities?***
		Not applicable
		**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
		**What is the minimum share of socially sustainable investments?**
		The financial product targets a minimum proportion of sustainable investment of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
		**What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?**
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index.
Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**
		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI Canada Universal Low Carbon Select 5% Issuer Capped Total Return Index.
		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The Index draws its constituents from the MSCI Canada Index Parent Index, being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in CAD. The Index tracks the net total return dividend performance of large and mid-capitalisation Canadian companies. The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index. The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies facing controversies (MSCI Red Flag, being an indication of at least one very severe controversy), companies which have a poor ESG Rating (rating of CCC), companies which have revenues in certain business activities (controversial weapons, nuclear weapons, civilian firearms, tobacco, thermal coal, fossil fuel extraction), as well as the top 5% companies by number based on carbon emission intensity levels (being scope 1 and 2 emissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less

		than 30% of the weight of that sector in the Parent Index. The index also selects companies with low exposure to fossil fuel reserves and ranks the Parent Index constituents in descending order of the potential carbon emissions per dollar of the market capitalization of the company. Securities are than excluded until the cumulative potential carbon emission of the excluded securities reaches 50% of the sum of the potential carbon emission of the constituents of the Parent Index. The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the section of the fund supplement entitled “Description of the Index”.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS FTSE EPRA Nareit Developed Green UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 52
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS FTSE EPRA Nareit Developed Green UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	FTSE EPRA Nareit Developed Green Index (Net Total Return).
Index Provider	FTSE International Limited
Initial Offer Period	Save for USD dis, 9.00 am (Irish time) on 13 May 2025 (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE000H3AH951 USD acc IE000B6E1304 hEUR dis IE000NBDAEM0 hEUR acc IE00082RJ7R0 hCHF dis IE000C8O4252 hCHF acc IE000LPJ7D21

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS FTSE EPRA Nareit Developed Green UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in global companies that demonstrate a robust ESG profile via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the FTSE EPRA Nareit Developed Green Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the FTSE EPRA Nareit Developed Green Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with article 8 of SFDR. By tracking the Index, the Fund promotes achieving a higher sustainability profile (ESG Score) than the Parent Index and a lower Carbon Intensity (1,2) emissions than the Parent Benchmark.

Information related to these characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR and CHF (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Index Currency Version
hEUR acc; hEUR dis;	FTSE EPRA Nareit Developed Green hedged to EUR Index (Net Total Return)
hCHF dis; hCHF acc;	FTSE EPRA Nareit Developed Green hedged to CHF Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may in exceptional circumstances also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index or where there are considerable costs or difficulties associated with purchasing the Index constituent and the Investment Manager identifies securities whose risk and return characteristics closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole. In such case, the relevant securities shall not have received an ESG rating from the Index Provider. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. When the Fund uses the Replication Strategy, the Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy". For the avoidance of doubt, where the Fund does not use a full Replication Strategy, it will not be permitted to avail of the higher investment limits as described at paragraph 4.2 of the section of the Prospectus headed “Investment Restrictions”.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index’s return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund’s total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

INVESTMENT RESTRICTIONS

The Fund is considered as an “other fund” within the meaning of the German Investment Tax Act. Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund’s market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a “notional amount,” e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a “basket” of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the FTSE EPRA Nareit Developed Green Index (Net Total Return) and is not a complete description of the Index.

General

The Index is comprised of constituents of the FTSE EPRA Nareit Developed Index (the "**Parent Index**" or "**Parent Benchmark**") and incorporates Real Estate Investment Trusts (REITs) and real estate holding and development companies.

The Index aims to provide exposure to constituents of the Parent Index tilted based on green building certification and energy usage. Sector-regional neutrality constraints are applied to the Index in order to reduce tracking error.

Eligible issuers must meet minimum rating thresholds as defined by the Index Provider. Metrics such as green certification, energy usage, TPI (Transition Pathway Initiative), carbon emission intensity data are normalized cross-sectionally to create scores that influence the weighting of the Index constituents.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using assessments by Sustainalytics.

Exclusion requirements of the Paris-aligned Benchmarks (PAB) set out in the EU Benchmark Regulation are applied by the Index.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index is rebalanced on an annual basis in September. Additions to the Index in between subsequent annual reviews will not be accepted, while deletions from the Parent Index will be concurrently reflected in the Index, with the weight of the deleted security being redistributed pro-rata amongst the remaining constituents of the Index. The Index may also be rebalanced at other times, e.g. in order to reflect corporate activity such as mergers and acquisitions, as provided for in the Index rules and as will be published on the Index Provider's website detailed below. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static. It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Where the Investment Manager becomes aware that the weighting of any particular component in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to amend the Fund's investment exposure to ensure the Fund operates within the permitted investment restrictions, while keeping the best interests of the Shareholders in consideration.

Index Methodology

The methodology of the construction of the Index is available on the FTSE internet website:

https://www.lseg.com/en/ftse-russell/indices/epra-nareit-green#t-methodology.html

Additional information about the Index can be found under:

Publication of the Index Composition

The composition of the Index is available on the FTSE internet website by selecting the underlying index:

https://www.lseg.com/en/ftse-russell/index-resources/constituent-weights

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of global companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hCHF acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- hEUR dis;
- hCHF dis

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.25% per annum of the Net Asset Value of the Class
USD acc	up to 0.25% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.28% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.28% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.28% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.28% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD acc	Index value / 200
hEUR dis	Index value / 200
hEUR acc	Index value / 200
hCHF dis	Index value / 200
hCHF acc	Index value / 200

The closing Index value which will be published on the FTSE website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 1’276.44 at 24 January 2024, Shares in USD dis would be issued at an Initial Offer Price per Share of USD 6.3822. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Risks Relating to REITs and other Property-Related Companies

The prices of equity REITs and other property-related companies are affected by changes in the value of the underlying property owned by the REITs/property-related companies and changes in capital markets and interest rates. The prices of mortgage REITs and other property-related companies are affected by the quality of any credit they extend, the creditworthiness of the mortgages they hold, as well as by the value of the property that secures the mortgages.

Under certain tax legislation, REITs and other property-related companies may avoid tax on the income they distribute if certain conditions are made. For example, under the U.S. Internal Revenue Code of 1986, as amended (the "**Code**"), a U.S. REITs is not taxed in the U.S. on income it distributes to its shareholders if it complies with several requirements relating to its organisation, ownership, assets and income and a requirement that it generally distribute to its shareholders at least 90 per cent. of its taxable income (other than net capital gains) for each taxable year. However, the REITs/property-related company could fail to qualify for tax-free pass-through of income under, for example, the Code. Such a failure would result in the taxation of income of a disqualified REITs/property- related company's distributed income at the REITs/property-related company level.

While the Fund will not invest in real property directly, the Fund may be subject to risks similar to those associated with the direct ownership of real property (in addition to securities market risks) because of its policy of concentrating its investments in the real estate industry.

In addition to these risks, equity REITs and other property- related companies may be affected by changes in the value of the underlying property owned by the trusts, while mortgage REITs and other property-related companies may be affected by the quality of any credit they extend. Further, REITs and other property-related companies are dependent upon management skills and generally may not be diversified. REITs and other property-related companies are also subject to heavy cash flow dependency, defaults by borrowers and self-liquidation. There is also the risk that borrowers under mortgages held by a REITs/property-related company or lessees of a property that a REITs/property-related company owns may be unable to meet their obligations to the REITs/property-related company. In the event of a default by a borrower or lessee, the REITs/property- related company may experience delays in enforcing its rights as a mortgagee or lessor and may incur substantial costs associated with protecting its investments. In addition to the foregoing risks, certain "special purpose" REITs/property-related companies in which a Fund may invest may have their assets in specific real property sectors, such as hotel REITs/property- related companies, nursing home REITs/property-related companies or warehouse REITs/property-related companies and are therefore subject to the risks associated with adverse developments in these sectors.

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result, a risk of an intra-month under- or over-hedging may arise. Consequently, the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

UBS FTSE EPRA Nareit Developed Green is not in any way sponsored, endorsed, sold or promoted by FTSE International Limited ("**FTSE**"), by the London Stock Exchange Group companies ("**LSEG**"), or by Research Affiliates LLC ("**RA**") (collectively the "**Licensor Parties**"), and none of the Licensor Parties make any warranty or representation whatsoever, expressly or impliedly, either as to the results to be obtained from the use of the FTSE EPRA Nareit Developed Green Index (Net Total Return) (the "**Index**") and/or the figure at which the said Index stands at any particular time on any particular day or otherwise. The Reference Index is compiled and calculated by FTSE in conjunction with RA. None of the Licensor Parties shall be liable (whether in negligence or otherwise) to any person for any error in the Reference Index and none of the Licensor Parties shall be under any obligation to advise any person of any error therein. FTSE® is a trade mark of

LSEG. EPRA® is a trade mark of European Public Real Estate Association and Nareit® is a trade mark of National Association of Real Estate Investment Trusts.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

UBS FTSE EPRA Nareit Developed Green UCITS ETF

Legal entity identifier:

391200VOHMTVV2DORW72

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.		**What environmental and/or social characteristics are promoted by this financial product?**
		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's sustainability profile • a Carbon Intensity (1, 2) emissions indicator lower than parent benchmark (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the FTSE EPRA Nareit Developed Green Index (Net Total Return).
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark. • Weighted average carbon intensity (Scope 1+2) MSCI The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-

		carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales). Please note that while the Reference Benchmark and Parent Benchmark are provided by FTSE International Limited, the Investment Manager will rely on data provided by MSCI to calculate the MSCI ESG Score and the weighted average carbon intensity (Scope 1+2) of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Benchmark provider.
		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index with a minimum proportion of 20% of sustainable investments. The objective of the sustainable investments is to produce a portfolio with a higher MSCI ESG Score and a lower Carbon Intensity (1, 2) emissions indicator than the Broad Market Index. The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles. GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for Index inclusion. Companies without Sustainalytics coverage, are also ineligible for Index inclusion until they receive such coverage. The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles. Furthermore, the financial product excludes investments in companies involved directly or indirectly in the activities listed at Article 12(a)-(g) of Regulation (EU) 2020/1818 or the following business activities: Controversial Weapons, Thermal Coal and Tobacco.
Principal adverse impacts are the most significant negative impacts		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?
		Indicators for adverse impacts on sustainability factors mentioned in Table 1 of Annex 1 of Regulation (EU) 2022/1288 are taken into account by the Index provider when applying value-based and norms-based exclusions as set out in the Index methodology and below. The indices incorporate the Sustainalytics' Global Standards Screening (GSS), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles. GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Sustainalytics, are ineligible for Index inclusion. Companies without Sustainalytics coverage, are also ineligible for Index inclusion until they receive such coverage. The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles. Furthermore, the financial product excludes investments in companies involved directly or indirectly in the activities listed at Article 12(a)-(g) of Regulation (EU) 2020/1818 or the following business activities: Controversial Weapons, Thermal Coal and Tobacco.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for

Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors mentioned in Table 1 of Annex 1 of Regulation (EU) 2022/1288 are taken into account by the Index provider when applying value-based and norms-based exclusions as set out in the Index methodology.

In addition, the Investment Manager applies the exclusions of SVVK-ASIR.

Information regarding how the Fund's environmental or social characteristics are met, will be included with the Fund's annual report.

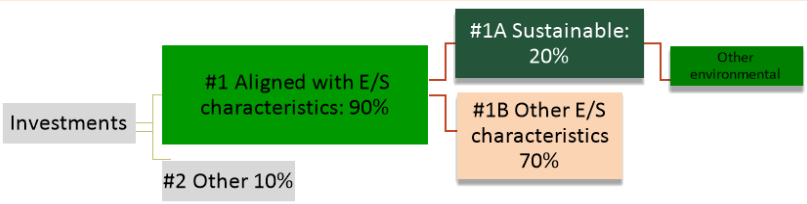
☐ No

(Mod)

What investment strategy does this financial product follow?

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.



The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's (FTSE EPRA Nareit Developed) sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than parent benchmark (FTSE EPRA Nareit Developed) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter. Please note that while the Reference Benchmark and Parent Benchmark are provided by FTSE International Limited, the Investment Manager will rely on data provided by MSCI to calculate the MSCI ESG Score and the weighted average carbon intensity (Scope 1+2) of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Benchmark provider.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This Fund does not have a commitment to reduce the scope of investments by a minimum rate.
		• ***What is the policy to assess good governance practices of the investee companies?***
Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.		Assessment of good governance practices of the investee companies is performed by the index provider. Sustainalytics assess a company's corporate governance structures, practices and behaviors along six pillars that are deemed crucial for good governance: Board Integrity & Quality, Board Structure, Remuneration, Shareholder Rights, Financial Reporting and Stakeholder Governance. The Investment Manager applies the conduct-based exclusions of SVVK-ASIR.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

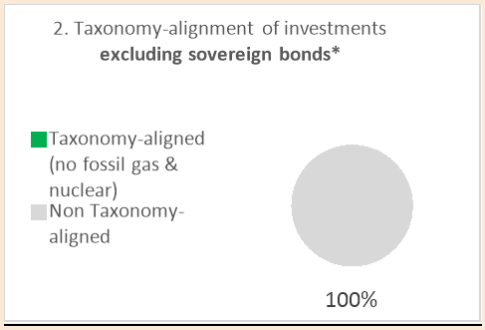
-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers.

		The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.
		To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?
		The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
		• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
		☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



*To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.*

***Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.*

***Transitional activities are** activities for which low-carbon alternatives are not yet available*

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

and among others have greenhouse gas emission levels corresponding to the best performance.		

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.		• ***What is the minimum share of investments in transitional and enabling activities?***
		Not applicable
		**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
		**What is the minimum share of socially sustainable investments?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
		**What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?**
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available.
Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**
		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the FTSE EPRA Nareit Developed Index (Net Total Return).

		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The Index draws its constituents from the FTSE EPRA Nareit Developed Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier FTSE and denominated in USD. The Index Provider constructs the Index by applying two types of sustainability metrics against the constituents of the Parent Index: (i) Green Certifications (GC) defined as the share of total net leasable area owned and/or managed by a constituent and certified as part of an eligible green certification scheme; and (ii) Energy Usage (EU) defined as the average modelled energy consumption per square meter of net leasable area owned and/or managed by a constituent. GC and EU scores are calculated and applied to constituent weights, resulting in a tilt towards green certifications and away from energy used, as previously defined. The resulting weights are rescaled to match the respective sector and regional weights of the Parent Index. The Index methodology is not based on exclusion criteria, however certain securities might be excluded based on involvement in a range of product and business activities, as well as violations of international norms and standards, as detailed at Par.8 of the "Guide to the Construction and

		Maintenance of Exclusion Lists used in FTSE Russel Indices" publicly available at www.lseg.com/en/ftse-russell.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement. https://www.lseg.com/en/ftse-russell/indices/epra-nareit-green#t-methodology
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS MSCI USA Selection UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 53
6 October 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI USA Selection UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	7 April 2027 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI USA Selection Index (Net Total Return)
Index Provider	MSCI.
Initial Offer Period	Save for USD acc and hEUR acc, 9.00 am (Irish time) on 7 October 2026to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE000N41FIV5 USD acc IE00063GNWK1 hEUR dis IE000MZV4MM9 hEUR acc IE000SWSI2U4 hCHF dis IE000EH4KV61 hCHF acc IE000ZGVIK60

	CHF L acc IE000PVNUT27
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI USA Selection UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in US companies that demonstrate a robust ESG profile via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc;
- CHF L acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled

"Primary Market" and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

Share Class Restrictions

Share Classes with “L” in their name are accumulating Share Classes and are intended to have a higher initial Net Asset Value per Share than other Classes of the Fund by applying a multiplier to the relevant Index value for the purpose of calculating the Initial Offer Price.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI USA Selection Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI USA Selection Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with Article 8 of SFDR. By tracking the Index, the Fund promotes achieving a higher sustainability profile (ESG Score) than the Parent Index and a lower Carbon Intensity (1,2) emissions than the Parent Benchmark.

Information related to these characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR and CHF (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Index Currency Version
hEUR acc; hEUR dis;	MSCI USA Selection 100% hedged to EUR Index (Net Total Return)
hCHF dis; hCHF acc;	MSCI USA Selection 100% hedged to CHF Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may in exceptional circumstances also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index or where there are considerable costs or difficulties associated with purchasing the Index constituent and the Investment Manager identifies securities whose risk and return characteristics closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole. In such case, the relevant securities shall not have received an ESG rating from the Index Provider. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. When the Fund uses the Replication Strategy, the Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set out above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference are set out in the section of the Prospectus entitled "Tracking Accuracy". For the avoidance of doubt, where the Fund does not use a full Replication Strategy, it will not be permitted to avail of the higher investment limits as described at paragraph 4.2 of the section of the Prospectus headed “Investment Restrictions”.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, i.e., the risk that the Fund return varies from the Index’s return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund’s total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

INVESTMENT RESTRICTIONS

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI USA Selection Index (Net Total Return) and the Index Provider applies ESG Ratings on all of the index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the sub-fund's resulting ESG rating will be higher than the ESG rating of a sub-fund tracking a standard index.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.
Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI USA Selection Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the net total return dividend performance of large and mid-capitalization US companies as further describe in the Index factsheet.

The Index is a benchmark for investors seeking exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate an ability to better manage ESG risks and opportunities relative to the MSCI USA Index (the "**Parent Index**"), while maintaining broad market representation.

The Index is part of the MSCI Selection Index series. The constituent selection is made from the principal index, being the Parent Index.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based

on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, alcohol, gambling, civilian firearms, conventional weapons, electricity generation through thermal coal or nuclear power are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behaviour, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static. It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website:

http://www.msci.com/products/indexes/esg/methodology.html

Additional information about the Index can be found under:

http://www.msci.com/products/indexes

Index Factsheet

The Index Factsheet is available on the MSCI internet website:

Publication of the Index Value

The closing price and the composition of the Index is available on the MSCI internet website by selecting the underlying index:

https://app2.msci.com/eqb/custom_indexes/custom_performance.html

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying index:

https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the

performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of US companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hCHF acc;
- CHF L acc.

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- hEUR dis;
- hCHF dis.

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.15% per annum of the Net Asset Value of the Class
USD dis	up to 0.15% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.18% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.18% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.18% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.18% per annum of the Net Asset Value of the Class
CHF L acc	up to 0.15% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc;
- CHF L acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 200
hEUR dis	Index value / 200
hEUR acc	Index value / 200
hCHF dis	Index value / 200
hCHF acc	Index value / 200
CHF L acc	Index value x 75

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 530.7510 at 18 January, 2024, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 2.6538. For Shares in CHF L acc, the Initial Offer Price will be calculated by multiplying the relevant closing Index value by the multiplier set out in the table above. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS MSCI USA Selection UCITS ETF

Legal entity identifier: 391200FU71LHSLI65N39

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualif as environmentally sustainable unde the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product:

• tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the Parent Index's sustainability profile

• a Carbon Intensity (1, 2) emissions indicator lower than the Parent Index (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI USA Selection Index (Net Total Return).

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The characteristics are measured using the following indicators respectively:

• The MSCI ESG Score

MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and governance pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.

• Weighted average carbon intensity (Scope 1+2) MSCI

The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

The financial product intends to invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI USA Selection Index (Net

Total Return) aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria.

The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family.

The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms.

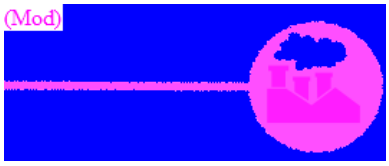
MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a MSCI ESG Controversies Score less than 3 is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer

or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.

– *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:*

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy. [Companies must have an MSCI ESG Controversies score of 3 or above to be eligible for the Index.]



https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by whic Taxonomy-aligned investments should not significantly harm EU Taxonom objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlyin the financial product that take into account the EU criteria for environmentall sustainable economic activities. The investments underlying the remaining portio of this financial product do not take into account the EU criteria fo environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm an environmental or social objectives.

(Mod)

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

This financial product is passively managed and tracks an Index and, therefore, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family, as follows.

The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms related to a company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a MSCI ESG Controversies Score less than 3 is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

In addition, the Investment Manager applies the exclusions of SVVK-ASIR.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

  The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product:

  Characteristic 1):

A sustainability profile (MSCI ESG Score) that is higher than the Parent Index's (MSCI USA Index) sustainability profile

Characteristic 2):

A Carbon Intensity (1 and 2) emissions indicator that is lower than the Parent Index (MSCI)

The calculations do not take account of cash, derivatives and unrated investment instruments.

The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.

What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?

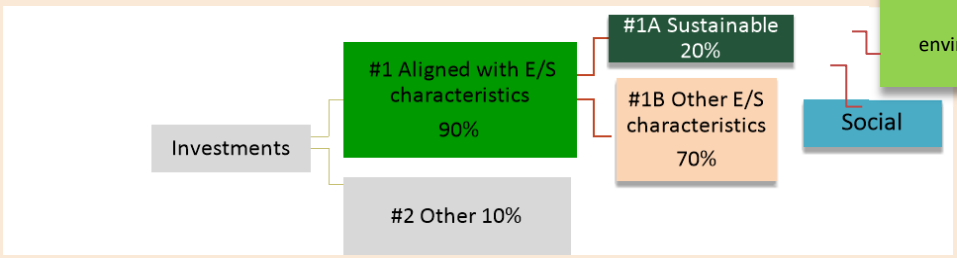
This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. The Index eliminates at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

What is the policy to assess good governance practices of the investee companies?

Assessment of good governance practices of the investee companies is performed by the index provider. The Investment Manager applies the conduct-based exclusions of SVVK-ASIR.

MSCI ESG Ratings analysis begins with an evaluation of each company's corporate governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.



Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining expo-sure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.

The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, options, warrants and foreign exchange contracts) in order to replicate the Index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

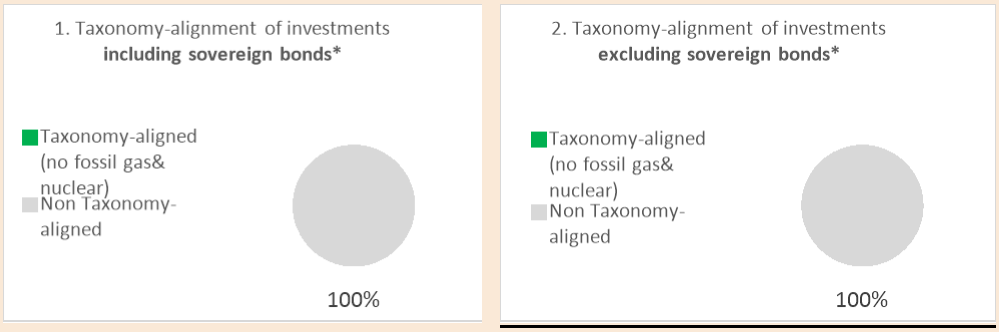
The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.



Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

**** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

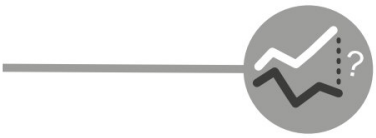
What is the minimum share of investments in transitional and enabling activities?

Not applicable

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.



What is the minimum share of socially sustainable investments?

The financial product targets a minimum proportion of sustainable investment of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI USA Selection Index (Net Total Return).

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the Index methodology applied by the index provider can be found below.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the index provider rebalances the Index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of Fund.

  The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the Reference Benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

The MSCI USA Selection Index draws its constituents from the MSCI USA Index (the "Parent Index") and is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using certain exclusions from the Parent Index.

The MSCI USA Selection Index is part of the MSCI Selection Index series and is designed to represent the performance of large and mid cap US companies that have high Environmental, Social and Governance ("ESG") ratings relative to their sector peers. The index excludes constituents based on involvement in specific business activities, as well as ESG ratings and exposure to ESG controversies. The indexes target a 50% sector representation compared to the parent index, aiming to include companies with the highest MSCI ESG Ratings in each sector. The constituent selection is made from the principal index, being the MSCI USA Index (the "Parent Index").

First, the indexes use MSCI ESG Controversies Scores to identify companies that are involved in very serious controversies involving the environmental, social, or governance impact of their operations and/or products and services. Companies are required to have an MSCI ESG Controversies Score of 3 or above to be eligible for inclusion in the index. Second, the index excludes based on MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics companies that are involved in the following business activities: controversial weapons, nuclear weapons, civilian firearms, tobacco, alcohol, gambling, conventional weapons, nuclear power, fossil fuel extraction and thermal coal power generation.

- ***Where can the methodology used for the calculation of the designated index be found?***

The methodology of the construction of the Index can be found in the fund supplement.

Where can I find more product specific information online?

More product-specific information can be found on the website:

www.ubs.com/etf by entering your domicile and role and searching for the name of the Fund in the search bar provided.

UBS MSCI USA Small Cap Selection UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 54
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI USA Small Cap Selection UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI USA Small Cap Selection Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	Save for USD acc shares 9.00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE0000YZQDA5 USD acc IE000XFXBGR0 hEUR dis IE00085DBED9 hEUR acc IE000WUK4XN0 hCHF dis IE00005PP999 hCHF acc IE000BWKWHX0

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI USA Small Cap SelectionUCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in US companies that demonstrate a robust ESG profile via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI USA Small Cap Selection Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI USA Small Cap Selection Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with article 8 of SFDR. By tracking the Index, the Fund promotes achieving a higher sustainability profile (ESG Score) than the Parent Index and a lower Carbon Intensity (1,2) emissions than the Parent Benchmark.

Information related to these characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, and CHF (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Index Currency Version
hEUR acc; hEUR dis;	MSCI USA Small Cap Selection 100% hedged to EUR Index (Net Total Return)
hCHF dis; hCHF acc;	MSCI USA Small Cap Selection 100% hedged to CHF Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may in exceptional circumstances also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index or where there are considerable costs or difficulties associated with purchasing the Index constituent and the Investment Manager identifies securities whose risk and return characteristics closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole. In such case, the relevant securities shall not have received an ESG rating from the Index Provider. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. When the Fund uses the Replication Strategy, the Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy". For the avoidance of doubt, where the Fund does not use a full Replication Strategy, it will not be permitted to avail of the higher investment limits as described at paragraph 4.2 of the section of the Prospectus headed “Investment Restrictions”.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, i.e., the risk that the Fund return varies from the Index’s return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund’s total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

INVESTMENT RESTRICTIONS

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere

to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the “Equity Participation Ratio”). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an “Equity fund” within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 (“**AMF Rules**”), the Fund will adopt a binding and significant approach to sustainable investing. The investment strategy of the Fund is to track the Index’s return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI USA Small Cap Selection Index (Net Total Return)) and the Index Provider applies ESG Ratings on all of the index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the sub-fund's resulting ESG rating will be higher than the ESG rating of a sub-fund tracking a standard index.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund’s market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a “notional amount,” e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a “basket” of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI USA Small Cap Selection Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the net total return dividend performance of small capitalization US companies as further described in the Index factsheet.

The Index is a benchmark for investors seeking exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate an ability to better manage ESG risks and opportunities relative to the MSCI USA Small Cap Index (the "**Parent Index**"), while maintaining broad market representation.

The Index is part of the MSCI Selection Index series. The constituent selection is made from the principal index, being the Parent Index.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based

on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded. Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, alcohol, gambling, civilian firearms, conventional weapons, electricity generation through thermal coal or nuclear power are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behaviour, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website:

http://www.msci.com/products/indexes/esg/methodology.html

Additional information about the Index can be found under:

http://www.msci.com/products/indexes

Publication of the Index Value

The closing price and the composition of the Index is available on the MSCI internet website by selecting the underlying index:

https://app2.msci.com/eqb/custom_indexes/custom_performance.html

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying index:

https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed

using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of US companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hCHF acc.

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- hEUR dis;
- hCHF dis.

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.20% per annum of the Net Asset Value of the Class
USD dis	up to 0.20% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.23% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.23% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.23% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.23% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	**Initial Offer Price**
USD dis	Index value / 200
hEUR dis	Index value / 200
hEUR acc	Index value / 200
hCHF dis	Index value / 200
hCHF acc	Index value / 200

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 530.7510 at 18 January, 2024, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 2.6538. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior

to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY

MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:	**Legal entity identifier:**
UBS MSCI USA Small Cap Selection UCITS ETF	391200K036Y1TO9Y3I79

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.		**What environmental and/or social characteristics are promoted by this financial product?**
		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the Parent Index's sustainability profile • a Carbon Intensity (1, 2) emissions indicator lower than the Parent Index (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the MSCI USA Small Cap Selection Index (Net Total Return).
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark. • Weighted average carbon intensity (Scope 1+2) MSCI The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to

		face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends to invest at least 90% of its total net assets in securities that are constituents of the Index with a commitement to a minimum proportion of sustainable investments of 20%. MSCI USA Small Cap Selection Index (Net Total Return) aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent Index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?

		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a MSCI ESG Controversies Score less than 3 is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy. Companies must have an MSCI ESG Controversies score of 3 or above to be eligible for the Index. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

This financial product is passively managed and tracks an Index and, therefore, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family, as follows.

The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms related to a company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a MSCI ESG Controversies Score less than 3 is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

In addition, the Investment Manager applies the exclusions of SVVK-ASIR.

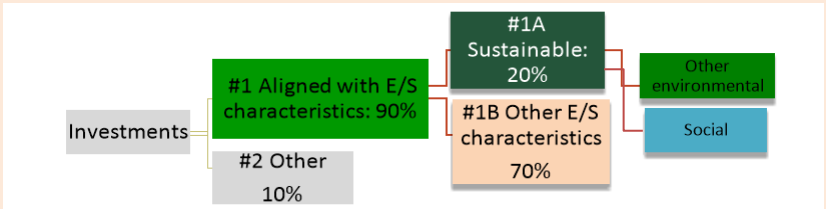
The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.		This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management. This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's (MSCI USA Small Cap) sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than the parent benchmark's (MSCI USA Small Cap) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. The Index eliminates at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.
		• ***What is the policy to assess good governance practices of the investee companies?***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.



Assessment of good governance practices of the investee companies is performed by the index provider. The Investment Manager applies the conduct-based exclusions of SVVK-ASIR.

MSCI ESG Ratings analysis begins with an evaluation of each company's corporate governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

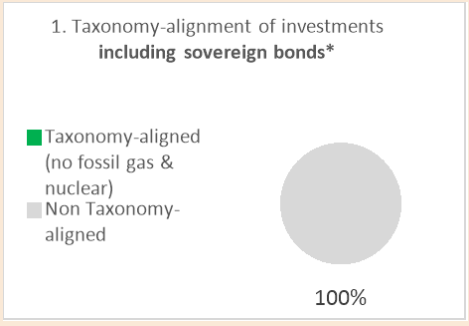
- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.

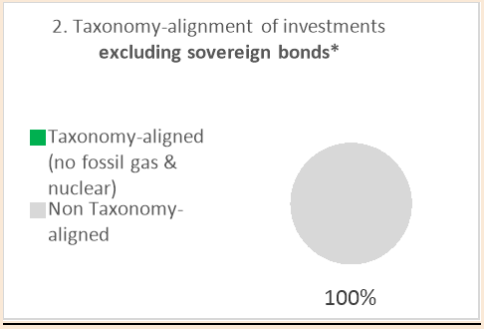
The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.



- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**



☐ Yes:
☐ In fossil gas ☐ In nuclear energy
☒ No

*To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.*

***Enabling activities** directly enable other activities to make a*

The two graphs below show in green the minimum percentage of investments that are aligned wit the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment o sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investment of the financial product including sovereign bonds, while the second graph shows the Taxonom alignment only in relation to the investments of the financial product other than sovereign bonds.

* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

substantial contribution to an environmental objective. ***Transitional activities are*** *activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.*		

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.		• ***What is the minimum share of investments in transitional and enabling activities?***
		Not applicable
		**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
		**What is the minimum share of socially sustainable investments?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
		**What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?**
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Invetsment manager considers may provide a similar return to securities included in the Index.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI USA Small Cap Selection Index (Net Total Return).

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the Index methodology applied by the index provider can be found below.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the Index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote.

The investment strategy of the fund is to track the Reference Benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

The MSCI USA Small Cap Selection Index draws its constituents from the MSCI USA Small Cap Index (the "Parent Index") and is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using certain exclusions from the Parent Index.

The MSCI USA Small Cap Selection Index is part of the MSCI Selection Index series and is designed to represent the performance of small cap US companies that have high Environmental, Social and Governance ("ESG") ratings relative to their sector peers. The index excludes constituents based on

		involvement in specific business activities, as well as ESG ratings and exposure to ESG controversies. The indexes target a 50% sector representation compared to the parent index, aiming to include companies with the highest MSCI ESG Ratings in each sector. The constituent selection is made from the principal index, being the MSCI USA Small Cap Index (the "Parent Index"). First, the indexes use MSCI ESG Controversies Scores to identify companies that are involved in very serious controversies involving the environmental, social, or governance impact of their operations and/or products and services. Companies are required to have an MSCI ESG Controversies Score of 3 or above to be eligible for inclusion in the index. Second, the index excludes based on MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics companies that are involved in the following business activities: controversial weapons, nuclear weapons, civilian firearms, tobacco, alcohol, gambling, conventional weapons, nuclear power, fossil fuel extraction and thermal coal power generation.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**
		www.ubs.com/etf by entering your domicile and role and searching for the name of the Fund in the search bar provided.

UBS MSCI USA Tech 125 Universal UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 55
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI USA Tech 125 Universal UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI USA Tech 125 Universal Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	Save for USD acc shares, 9.00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE000P9Y6UY5 USD acc IE0003B4BV34 hEUR dis; IE000X4FF531 hEUR acc; IE000XL0TO83 hCHF dis; IE000LQAZCX6 hCHF acc. IE000TPPDYE0

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI USA Tech 125 Universal UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in US companies that demonstrate a robust ESG profile via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI USA Tech 125 Universal Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI USA Tech 125 Universal Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with article 8 of SFDR. By tracking the Index, the Fund promotes achieving a higher sustainability profile (ESG Score) than the Parent Index and a lower Carbon Intensity (1,2) emissions than the Parent Benchmark.

Information related to these characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR and CHF (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Index Currency Version
hEUR acc; hEUR dis;	MSCI USA Tech 125 Universal 100% hedged to EUR Index (Net Total Return)
hCHF dis; hCHF acc;	MSCI USA Tech 125 Universal 100% hedged to CHF Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may in exceptional circumstances also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index or where there are considerable costs or difficulties associated with purchasing the Index constituent and the Investment Manager identifies securities whose risk and return characteristics closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole. In such case, the relevant securities shall not have received an ESG rating from the Index Provider. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. When the Fund uses the Replication Strategy, the Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy". For the avoidance of doubt, where the Fund does not use a full Replication Strategy, it will not be permitted to avail of the higher investment limits as described at paragraph 4.2 of the section of the Prospectus headed “Investment Restrictions”.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index’s return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund’s total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

INVESTMENT RESTRICTIONS

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI USA Tech 125 Universal Index (Net Total Return) and is not a complete description of the Index.

General

The MSCI USA Tech 125 Universal Index is based on the MSCI USA Index (the "**Parent Index**") and includes large and mid-cap securities of the U.S. equity markets. The Index aims to provide exposure to issuers that demonstrate (relative to the Parent Index) an ESG profile with a positive trend while applying certain exclusionary criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, trend, and industry-adjusted scores with preference given to those demonstrating positive ESG momentum.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded. Activity-based exclusions are not applied by the index.

For details on parameters applied to sector, behaviour, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances in full on a semi-annual basis. Additionally, on a quarterly basis, the Index goes through a full review of controversies, as set out above. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment

restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website:

http://www.msci.com/products/indexes/esg/methodology.html

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying index:

https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance

will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is

no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the “Collateral Policy” section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of US companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hCHF acc.

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- hEUR dis;
- hCHF dis.

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.18% per annum of the Net Asset Value of the Class
USD dis	up to 0.18% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.21% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.21% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.21% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.21% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 200
hEUR dis	Index value / 200
hEUR acc	Index value / 200
hCHF dis	Index value / 200
hCHF acc	Index value / 200

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 5'502.1139 at 29 December, 2023, Shares in USD dis would be issued at an Initial Offer Price per Share of 27.5106. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result, a risk of an intra-month under- or over-hedging may arise. Consequently, the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY

FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:

UBS MSCI USA Tech 125 Universal UCITS ETF

Legal entity identifier:

3912001G50M74O9YC160

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.		**What environmental and/or social characteristics are promoted by this financial product?**
		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the parent benchmark's sustainability profile • a Carbon Intensity (1, 2) emissions indicator lower than parent benchmark (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the MSCI USA Tech 125 Universal Index (Net Total Return).
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark. • Weighted average carbon intensity (Scope 1+2) MSCI The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to

		face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI USA Tech 125 Universal Index (Net Total Return) aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?

		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of controversial weapons (i.e. cluster munitions, landmines, depleted uranium weapons, biological/chemical weapons, blinding lasers, non-detectable fragments and incendiary weapons).
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd10

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

This financial product is passively managed and tracks an Index and, therefore, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family, as follows.

The indices incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a “Red” MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer’s involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company’s operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

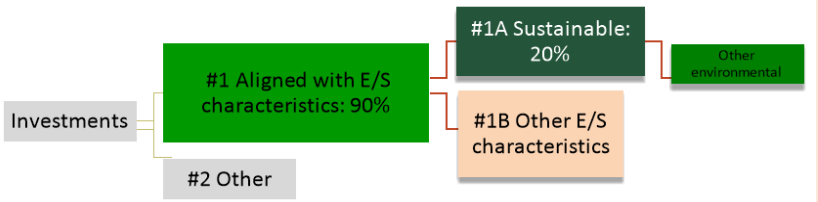
In addition, the Investment Manager applies the exclusions of SVVK-ASIR.The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

What investment strategy does this financial product follow?

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.



The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's (MSCI USA) sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than parent benchmark (MSCI USA) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.
		• ***What is the policy to assess good governance practices of the investee companies?***
Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.		Assessment of good governance practices of the investee companies is performed by the index provider. The Investment Manager applies the conduct-based exclusions of SVVK-ASIR. MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

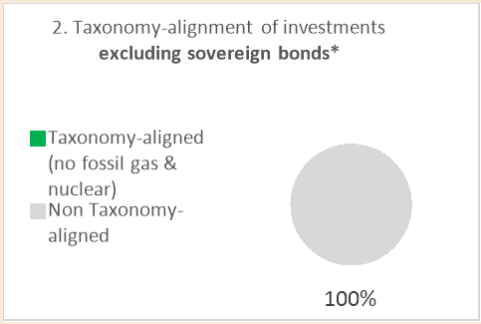
-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers.

		The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.
		To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?
		The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
		• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
		☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



*To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.*

***Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.*

***Transitional activities are** activities for which low-carbon alternatives are not yet available and among others have*

The two graphs below show in green the minimum percentage of investments that are aligned wit the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment o sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investment of the financial product including sovereign bonds, while the second graph shows the Taxonom alignment only in relation to the investments of the financial product other than sovereign bonds.

* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

greenhouse gas emission levels corresponding to the best performance.		
are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.		• ***What is the minimum share of investments in transitional and enabling activities?***
		Not applicable
		**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
		**What is the minimum share of socially sustainable investments?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives, however there are no specific minimum proportions for each of these categories.
		**What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?**
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Invetsment manager considers may provide a similar return to securities included in the Index.
Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**
		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI USA Tech 125 Universal Index (Net Total Return).

		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a semi-annual basis. More details on the index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The Index draws its constituents from the MSCI USA Index (the "Parent Index"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the net total return dividend performance of large and mid-capitalisation US companies. The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using minimal exclusions from the Parent Index. The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies having involvement in ESG controversies that are classified as Red Flags (MSCI ESG Controversy Score of 0). A Red Flag indicates an ongoing Very Severe ESG controversy implicating a company directly through its actions, products, or operations. And companies involved in

		Controversial Weapons (i.e. cluster munitions, landmines, depleted uranium weapons, biological/chemical weapons, blinding lasers, non-detectable fragments and incendiary weapons), are also excluded. The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**
		www.ubs.com/etf by entering your domicile and role and searching for the name of the Fund in the search bar provided.

UBS MSCI World Selection UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 56
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to the UBS MSCI World Selection UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI World Selection Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	Save for USD acc, hEUR acc and hCHF acc shares, 9.00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE000E02IQ21 USD acc IE000TG1LGI4 hEUR dis IE000V6KDJC9 hEUR acc IE0009W21NT4 hCHF dis IE000S89SZQ0 hCHF acc IE000F0DNOJ1

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI World Selection UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in companies globally that demonstrate a robust ESG profile via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI World Selection Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI World Selection Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with article 8 of SFDR. By tracking the Index, the Fund promotes achieving a higher sustainability profile (ESG Score) than the Parent Index and a lower Carbon Intensity (1,2) emissions than the Parent Benchmark.

Information related to these characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, and CHF (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Index Currency Version
hEUR acc; hEUR dis;	MSCI World Selection 100% hedged to EUR Index (Net Total Return)
hCHF dis; hCHF acc;	MSCI World Selection 100% hedged to CHF Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may in exceptional circumstances also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index or where there are considerable costs or difficulties associated with purchasing the Index constituent and the Investment Manager identifies securities whose risk and return characteristics closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole. In such case, the relevant securities shall not have received an ESG rating from the Index Provider. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. When the Fund uses the Replication Strategy, the Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy". For the avoidance of doubt, where the Fund does not use a full Replication Strategy, it will not be permitted to avail of the higher investment limits as described at paragraph 4.2 of the section of the Prospectus headed “Investment Restrictions”.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, i.e., the risk that the Fund return varies from the Index’s return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund’s total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

INVESTMENT RESTRICTIONS

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.
The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI World Selection Index (Net Total Return)) and the Index Provider applies ESG Ratings on all of the index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the sub-fund's resulting ESG rating will be higher than the ESG rating of a sub-fund tracking a standard index.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI World Selection Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the net total return dividend performance of large and mid-capitalization global companies as further describe in the Index factsheet.

The Index is a benchmark for investors seeking exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate an ability to better manage ESG risks and opportunities relative to the MSCI World Index (the "**Parent Index**"), while maintaining broad market representation.

The Index is part of the MSCI Selection Index series. The constituent selection is made from the principal index, being the Parent Index.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index's market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments

which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded. Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, alcohol, gambling, civilian firearms, conventional weapons, electricity generation through thermal coal or nuclear power are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behaviour, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website:

http://www.msci.com/products/indexes/esg/methodology.html

Additional information about the Index can be found under:

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying index:

https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the

performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of companies globally and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hCHF acc.

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- hEUR dis;
- hCHF dis.

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.15% per annum of the Net Asset Value of the Class
USD dis	up to 0.15 % per annum of the Net Asset Value of the Class
hEUR dis	up to 0.18% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.18% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.18% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.18% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 200
hEUR dis	Index value / 200
hCHF dis	Index value / 200

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 530.7510 at 18 January, 2024, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 2.6538. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result, a risk of an intra-month under- or over-hedging may arise. Consequently, the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE

NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

Product name:

UBS MSCI World Selection UCITS ETF

Legal entity identifier:

3912002MGNAYM97BF249

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**

●○ ☒ **No**

☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %

- ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It will make a minimum of **sustainable investments with a social objective:**

_____ %

☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments

- ☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
- ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☒ with a social objective

☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.		**What environmental and/or social characteristics are promoted by this financial product?**
		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the Parent Index's sustainability profile • a Carbon Intensity (1, 2) emissions indicator lower than Parent Index (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI World Selection Index (Net Total Return).
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark. • Weighted average carbon intensity (Scope 1+2) MSCI

		The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI World Selection Index (Net Total Return) aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?
		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family. The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a MSCI ESG Controversies Score less than 3 is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy. Companies must have an MSCI ESG Controversies score of 3 or above to be eligible for the Index. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Met

hodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

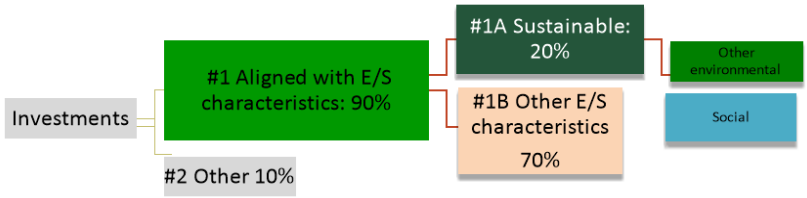
This financial product is passively managed and tracks an Index and, therefore, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family, as follows.

The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms related to a company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a MSCI ESG Controversies Score less than 3 is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

In addition, the Investment Manager applies the exclusions of SVVK-ASIR.The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No



What investment strategy does this financial product follow?

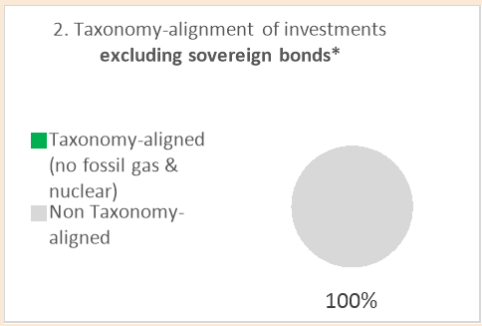
The investment strategy guides investment

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management.

decisions based on factors such as investment objectives and risk tolerance.		This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's (MSCI World) sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than parent benchmark (MSCI World) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. The Index eliminates at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.
		• ***What is the policy to assess good governance practices of the investee companies?***
Good governance practices include sound management structures, employee relations,		Assessment of good governance practices of the investee companies is performed by the index provider. The Investment Manager applies the conduct-based exclusions of SVVK-ASIR. MSCI ESG Ratings analysis begins with an evaluation of each company's corporate governance, taking into consideration the

remuneration of staff and tax compliance.		company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.
		**What is the asset allocation planned for this financial product?**
		The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.
Asset allocation describes the share of investments in specific assets.		
Taxonomy-aligned activities are expressed as a share of: - **turnover** reflecting the share of revenue from green activities of investee companies - **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*		**#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product. **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. The category **#1 Aligned with E/S characteristics** covers: -The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives. -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments
		• ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***
		Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the Index, in particular where there are

		legal or practical obstacles to gaining direct access to a market to which the Index refers. The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, options, warrants and foreign exchange contracts) in order to replicate the Index.
		To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?
		The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
		• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
		☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



*To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.*

***Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.*

***Transitional activities are** activities for which low-*

The two graphs below show in green the minimum percentage of investments that are aligned wit the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment o sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investment of the financial product including sovereign bonds, while the second graph shows the Taxonom alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.		
 are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.		• ***What is the minimum share of investments in transitional and enabling activities?***
		Not applicable
		**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
		**What is the minimum share of socially sustainable investments?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives, however there are no specific minimum proportions for each of these categories.
		**What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?**
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Invetsment manager considers may provide a similar return to securities included in the Index.
Reference benchmarks are indexes to measure whether the		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

financial product attains the sustainable investment objective.		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI World Selection Index (Net Total Return).
		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
		The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the Index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the Reference Benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The MSCI World Index draws its constituents from the MSCI World Index (the "Parent Index") and is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using certain exclusions from the Parent Index. The MSCI World Selection Index is part of the MSCI Selection Index series and is designed to represent the performance of large and mid cap companies globally that have high Environmental, Social and Governance ("ESG") ratings relative to their sector peers. The index excludes constituents based on involvement in specific business activities, as well as ESG ratings and exposure to ESG controversies. The indexes target a 50% sector representation compared to the parent index, aiming to include companies with the highest MSCI ESG Ratings (BB or above) in each sector. The constituent selection

		is made from the principal index, being the MSCI World Index (the "Parent Index"). First, the indexes use MSCI ESG Controversies Scores to identify companies that are involved in very serious controversies involving the environmental, social, or governance impact of their operations and/or products and services. Companies are required to have an MSCI ESG Controversies Score of 3 or above to be eligible for inclusion in the index. Second, the index excludes based on MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics companies that are involved in the following business activities: controversial weapons, nuclear weapons, civilian firearms, tobacco, alcohol, gambling, conventional weapons, nuclear power, fossil fuel extraction and thermal coal power generation.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS MSCI USA NSL UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 57
6 October 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to the UBS MSCI USA NSL UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	7 April 2027 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI USA Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	Save for USD acc, 9.00 am (Irish time) on 7 October 2026 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE000R904VR3 USD acc IE000OULL4R4 hEUR dis IE0006TR6GM1 hEUR acc IE000F9T8ED7 hCHF dis IE000UYX29M4 hCHF acc IE000OIUUW54 CHF L acc IE000EI7OT25
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.

Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI USA NSL UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the medium term through exposure to the equity market performance of the US market via a diversified portfolio of securities as described below in the *"Investment Objective and Strategy"* section.

The Fund shall not engage in securities lending arrangements, as indicated by the term “NSL” in the name of the Fund.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc;
- CHF L acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

Share Class Restrictions

Share Classes with "L" in their name are intended to have a higher Net Asset Value per Share compared to other Classes of the Fund by applying a multiplier to the relevant Index value for the purpose of calculating the Initial Offer Price.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity market performance of the US market.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI USA Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI USA Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index. Any determination by the Directors that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly. The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed.

The Fund complies with Article 6 of SFDR. As such it does not consider principal adverse impacts on sustainability factors due to its investment strategy and the nature of the underlying investments (SFDR Art. 7(2)). The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities (TR Art. 7).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR and CHF (each a "**Hedged Currency Version**"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "*Investment Objectives, Policy and Strategy*" section of the Prospectus.

Share Class	Index Currency Version
hEUR acc; hEUR dis;	MSCI USA 100% hedged to EUR Index (Net Total Return)
hCHF dis; hCHF acc;	MSCI USA 100% hedged to CHF Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may in exceptional circumstances also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index or where there are considerable costs or difficulties associated with purchasing the Index constituent and the Investment Manager identifies securities whose risk and return characteristics closely resemble the risk and return characteristics of constituents of the Index or of the

Index as a whole. In such case, the relevant securities shall not have received an ESG rating from the Index Provider. Solely for the purposes of assisting in replicating the Index, The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set out above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference are set out in the section of the Prospectus entitled "*Tracking Accuracy*". For the avoidance of doubt, where the Fund does not use a full Replication Strategy, it will not be permitted to avail of the higher investment limits as described at paragraph 4.2 of the section of the Prospectus headed “Investment Restrictions”.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager’s RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, i.e., the risk that the Fund return varies from the Index’s return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund’s volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund’s total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with

FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

INVESTMENT RESTRICTIONS

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

For Classes whose reference currencies are not identical to the currency of account of the Fund, and which have "hedged" in their name, the fluctuation risk of the reference currency price for those Classes is hedged against the currency of account of the Fund. These Classes follow monthly hedged methodology defined in the index methodology of the Class. Any such hedging will endeavour to hedge no less than 95% of the portion of the Net Asset Value of the relevant Class which is to be hedged against currency risk. Due to matters outside the control of the Company, currency exposure may be over or under hedged but over hedged positions will not be permitted to exceed 105% of the Net Asset Value of the relevant Class. Hedged positions will be kept under review on an ongoing basis, at least at the same valuation frequency of the Fund, to ensure that over hedged or under hedged positions do not exceed/fall short of the permitted levels disclosed above. Such review will incorporate a procedure to rebalance the hedging arrangements on a regular basis to ensure that any such position stays within the permitted position levels disclosed above and is not carried forward from month to month. Changes in the market value of the portfolio, as well as subscriptions and redemptions of share classes in foreign currencies, can result in the hedging temporarily surpassing the aforementioned range. The hedging described has no effect on possible currency risks resulting from investments denominated in a currency other than the Fund's currency of account.

As outlined above, the Investment Manager and/or Sub-Investment Manager will seek to achieve hedging in respect of the "hedged" Classes by using derivative instruments, such as forward foreign exchange contracts and currency futures, within the condition and limits imposed by the Central Bank. The conditions in relation to the use of such hedging strategies are described in the section of the Prospectus entitled "Use of Currency Forwards and Futures". Investors' attention is also drawn to the risks relating to the adoption of unit class currency hedging strategies, which are described in the section of the Prospectus entitled "Currency Risk".

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI USA Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the movements of mid and large capitalisation companies across all industrial sectors which are listed on markets in the USA but available to investors globally.

The stocks comprising the Index are screened by size, liquidity and free float (meaning the proportion of shares outstanding that is deemed to be available for purchase in the public equity markets by international investors).

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the index sponsor should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website:

https://www.msci.com/index-methodology

Additional information about the Index can be found under:

https://www.msci.com/indexes

Index Factsheet

The Index Factsheet is available on the MSCI internet website:

Publication of the Index Value

The closing price and the composition of the Index is available on the MSCI internet website by selecting the underlying index:

https://www.msci.com/end-of-day-data-search

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underyling index:

https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund’s global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or

inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of mid and large capitalisation companies in the USA and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hCHF acc;
- CHF L acc.

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- hEUR dis;
- hCHF dis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.
Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.09% per annum of the Net Asset Value of the Class
USD acc	up to 0.09% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.12% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.12% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.12% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.12% per annum of the Net Asset Value of the Class
CHF L acc	up to 0.09% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc;
- CHF L acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 70
hEUR dis	Index value / 70
hEUR acc	Index value / 70
hCHF dis	Index value / 70
hCHF acc	Index value / 70
CHF L acc	Index value x 13

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index Value" will be used to calculate the Initial Offer Price. For example, where the Index Value was 13'580.570 at 18 January, 2024, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 71.4739. For Shares in CHF L acc, the Initial Offer Price will be calculated by multiplying the relevant closing Index value by the multiplier set out in the table above. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and

the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result, a risk of an intra-month under- or over-hedging may arise. Consequently, the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

ESG Integration

The Fund is passively managed and seeks to track the performance of the Index. Sustainability risks are not considered as part of the index selection process. Therefore, sustainability risks are not systematically integrated due to the nature of the investment objective of the Fund and the Investment Manager aims to track the Index in line with the limits set out in the investment policy of the Fund.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY

REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

UBS Factor MSCI World Selection Minimum Volatility UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 58
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS Factor MSCI World Selection Minimum Volatility UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI World Selection Minimum Volatility Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	Save for USD acc shares 9.00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE0002H2RTO1 USD acc IE000EJ2EHO7 hEUR dis IE000FMUAAP8 hEUR acc IE00065HE200 hCHF dis IE000OTSPR00 hCHF acc IE000BWKC9E6
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.

Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS Factor MSCI World Selection Minimum Volatility UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by investment in mid and large capitalisation companies globally that demonstrate a robust ESG profile via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are

subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI World Selection Minimum Volatility Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI World Selection Minimum Volatility Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with article 8 of SFDR. By tracking the Index, the Fund promotes achieving a higher sustainability profile (ESG Score) than the Parent Index and a lower Carbon Intensity (1,2) emissions than the Parent Benchmark.

Information related to these characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, and CHF (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Index Currency Version
hEUR acc; hEUR dis;	MSCI World Selection Minimum Volatility 100% hedged to EUR Index (Net Total Return)
hCHF dis; hCHF acc;	MSCI World Selection Minimum Volatility 100% hedged to CHF Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may in exceptional circumstances also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index or where there are considerable costs or difficulties associated with purchasing the Index constituent and the Investment Manager identifies securities whose risk and return characteristics closely resemble the risk and return characteristics of constituents of the Index or of the Index as a whole. In such case, the relevant securities shall not have received an ESG rating from the Index Provider. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. When the Fund uses the Replication Strategy, the Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy". For the avoidance of doubt, where the Fund does not use a full Replication Strategy, it will not be permitted to avail of the higher investment limits as described at paragraph 4.2 of the section of the Prospectus headed “Investment Restrictions”.

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, i.e., the risk that the Fund return varies from the Index’s return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund’s total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

INVESTMENT RESTRICTIONS

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the Fund will adopt a binding and significant approach to sustainable investing. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI World Selection Minimum Volatility Index (Net Total Return)) and the Index Provider applies ESG Ratings on all of the index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that the sub-fund's resulting ESG rating will be higher than the ESG rating of a sub-fund tracking a standard index.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI World Selection Minimum Volatility Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the net total return dividend performance of large and mid-capitalisation global companies and reflects the performance characteristics of a minimum variance strategy as further described in the Index factsheet.

The Index is a benchmark for investors seeking exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate an ability to better manage ESG risks and opportunities relative to the MSCI World Index (the "**Parent Index**"), while maintaining broad market representation.

The Index is part of the MSCI Selection Index series. The constituent selection is made from the principal index, being the Parent Index.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index’s market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights,

and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies' involvement in environmental, social, or governance controversies based on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded. Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, alcohol, gambling, civilian firearms, conventional weapons, electricity generation through thermal coal or nuclear power are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behaviour, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a semi-annual basis and may also be rebalanced at other times, e.g., in order to reflect corporate activity such as mergers and acquisitions, as provided for in the Index rules and as will be published on the Index Provider's website. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website:

http://www.msci.com/products/indexes/esg/methodology.html

Additional information about the Index can be found under:

http://www.msci.com/products/indexes

Index Factsheet

The Index Factsheet is available on the MSCI internet website:

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying index:

https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of mid and large capitalisation companies globally and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hCHF acc.

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- hEUR dis;
- hCHF dis.

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.25% per annum of the Net Asset Value of the Class
USD dis	up to 0.25% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.28% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.28% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.28% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.28% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hEUR dis;
- hEUR acc;
- hCHF dis;
- hCHF acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 200
hEUR dis	Index value / 200
hEUR acc	Index value / 200
hCHF dis	Index value / 200
hCHF acc	Index value / 200

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 530.7510 at 18 January, 2024, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 2.6538. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be affected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result, a risk of an intra-month under- or over-hedging may arise. Consequently, the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY

OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: UBS Factor MSCI World Selection Minimum Volatility UCITS ETF

Legal entity identifier: 391200FHQH3Y2WXA1786

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.		**What environmental and/or social characteristics are promoted by this financial product?**
		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the Parent Index's sustainability profile • a Carbon Intensity (1, 2) emissions indicator lower than the Parent Index (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI World Selection Minimum Volatility Index (Net Total Return).
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark. • Weighted average carbon intensity (Scope 1+2) MSCI The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are

		likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends to make sustainable investment by investing at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI World Selection Minimum Volatility Index (Net Total Return) aims to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics seeks to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?

		Indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index family. The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a MSCI ESG Controversies Score less than 3 is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products. The MSCI ESG Controversies provides assessments of controversies concerning the negative environmental, social, and/or governance impact of a company's operations, products and services. The evaluation framework used in MSCI ESG Controversies is designed to be consistent with international norms represented by the UN Declaration of Human Rights, the International Labour Organisation Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact. MSCI ESG Controversies Score falls on a 0-10 scale, with "0" being the most severe controversy. Companies must have an MSCI ESG Controversies score of 3 or above to be eligible for the Index. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4
		The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria. *The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments*

underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and, therefore, tracks an Index, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index family, as follows.

The Index incorporates the MSCI ESG Controversies Score, screening out on a timely basis any issuers in significant breach of ESG norms related to a company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a MSCI ESG Controversies Score less than 3 is excluded from sustainability indices. The MSCI ESG Controversies Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

In addition, the Investment Manager applies the exclusions of SVVK-ASIR.

The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability

		characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product: Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's (MSCI World) sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than the parent benchmark's (MSCI World) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This financial product invests at least 90% of its total net assets in securities that are constituents of the Index and the Index provider applies ESG Ratings on all of the Index constituents. The Index eliminates at least 20% of the least well-rated securities as against the standard index universe. It is, therefore, expected that this financial product's resulting ESG rating will be higher than the ESG rating of a financial product tracking a standard index.
		• ***What is the policy to assess good governance practices of the investee companies?***
Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.		Assessment of good governance practices of the investee companies is performed by the index provider. The Investment Manager applies the conduct-based exclusions of SVVK-ASIR. MSCI ESG Ratings analysis begins with an evaluation of each company's corporate governance, taking into consideration the company's ownership and control structures, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate behavior is also monitored, including any controversies that

might have a significant negative impact on the company's value.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

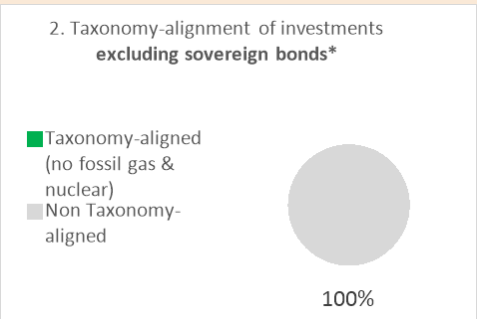
-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?***

Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.

		The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.
		To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?
		The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
		• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
		☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



*To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.*

***Enabling activities** directly enable other activities to make a substantial contribution to an environmental objective.*

***Transitional activities are** activities for which low-carbon*

The two graphs below show in green the minimum percentage of investments that are aligned wit the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment o sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investment of the financial product including sovereign bonds, while the second graph shows the Taxonom alignment only in relation to the investments of the financial product other than sovereign bonds.

* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.		
 are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.		• ***What is the minimum share of investments in transitional and enabling activities?***
		Not applicable
		**What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?**
		The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives, however there are no specific minimum proportions for each of these categories.
		**What is the minimum share of socially sustainable investments?**
		The financial product targets a minimum proportion of sustainable investment of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
		**What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?**
		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data is not available, including securities which are expected to shortly be included in the Index or securities which the Invetsment manager considers may provide a similar return to securities included in the Index.
Reference benchmarks are indexes to measure whether the		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**

financial product attains the sustainable investment objective.		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI World Selection Minimum Volatility (Net Total Return).
		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
		The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a semi-annual basis. More details on the Index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the Reference Benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The MSCI World Selection Minimum Volatility Index draws its constituents from the MSCI World Index (the "Parent Index") and is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those companies demonstrating both a robust Environmental, Social and Governance (ESG) profile as well as a positive trend in improving that profile, using certain exclusions from the Parent Index. The index is calculated by optimizing the MSCI World Selection Index for the lowest absolute risk (within a given set of constraints). The MSCI World Selection Minimum Volatility Leaders Index is part of the MSCI Selection Index series and is designed to represent the performance of mid and large capitalisation companies globally that have high Environmental, Social and Governance ("ESG") ratings relative to their sector peers. The index excludes constituents based on involvement in specific business activities, as well as ESG ratings and exposure to ESG controversies. The indexes target a 50% sector

		representation compared to the parent index, aiming to include companies with the highest MSCI ESG Ratings in each sector. The constituent selection is made from the principal index, being the MSCI World Index (the "Parent Index"). First, the indexes use MSCI ESG Controversies Scores to identify companies that are involved in very serious controversies involving the environmental, social, or governance impact of their operations and/or products and services. Companies are required to have an MSCI ESG Controversies Score of 3 or above to be eligible for inclusion in the index. Second, the index excludes based on MSCI ESG Business Involvement Screening Research and MSCI Climate Change Metrics companies that are involved in the following business activities: controversial weapons, nuclear weapons, civilian firearms, tobacco, alcohol, gambling, conventional weapons, nuclear power, fossil fuel extraction and thermal coal power generation.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the fund supplement.
		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**
		www.ubs.com/etf by entering your domicile and role and searching for the name of the Fund in the search bar provided.

UBS MSCI India Universal UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 59
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI India Universal UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Investors should read the section "Risk Factors" before investing in the Fund. An investment in the Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI India Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	13 May 2025 to 4.30pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Day after the Closing Date.
ISIN	USD dis IE000MZFIJ99 USD acc IE000H8VJ804 USD UKdis IE0004YI27U6
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.

Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI India Universal UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking to integrate environmental, social and governance ("**ESG**") factors into their investment process. The Fund seeks to achieve such ESG exposure by tracking the Index and investing in Indian companies that meet the ESG profile and requirements as set out in the "Description of the Index" (as determined by the Index Provider) via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities

affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI India Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI India Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with article 8 of SFDR by tracking the Index which has a higher sustainability profile (ESG Score) than the Parent Index and has lower Carbon Intensity (1,2) emissions than the Parent Index.

Information related to these characteristics is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions (only developed market currencies) of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in CAD, EUR, GBP, CHF, SGD, and JPY (each a "Hedged Currency Version"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securities cannot be guaranteed. Solely for the purposes of assisting in replicating the Index, the Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription

rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, i.e., the risk that the Fund return varies from the Index's return. Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged (calculated under the commitment approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

While the Fund will primarily generate exposure to Indian companies directly (see *"Direct Investment in India"* below), the Fund may also use participation notes ("P-Notes") or warrants to trade in India due to registration requirements for direct investment as further described below. Indian companies may be constituents of the Index and it may not be possible due to market restrictions for the Fund to purchase stocks of such companies directly. P-Notes may also be constituents of the Index. P-Notes are typically used in certain restricted markets by registered foreign institutional investors which issue them to overseas investors wishing to invest in restricted markets. P-Notes are generally not rated and are designed to provide a return which is directly linked to the performance of a particular equity security or basket of equity securities. The P-Notes are in the form of debt securities from the issuer agreeing to provide a return corresponding to that on the underlying equity securities. Brokers buy stocks and issue P-Notes that represent ownership of the underlying stock. Any dividends or capital gains collected from the underlying securities go back to the investors. While they do mimic the cash flows of a swap, they are not FDI. The P-Notes which the Fund may invest in may not embed derivatives or leverage. It is not anticipated that the Fund's use of P-Notes will exceed 10% of the Net Asset Value of the Fund.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity

participations (the “Equity Participation Ratio”). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an “Equity fund” within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 (“**AMF Rules**”), the Fund will adopt a binding and significant approach to sustainable investing. The investment strategy of the Fund is to track the Index’s return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index (MSCI India Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return)) and the index provider applies ESG Ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

By adopting the ESG methodology of the Index, the Fund applies the extra-financial indicator upgrade approach for the purposes of the AMF Rules, aiming for a better non-financial indicator value. The weighted average environmental indicator (Carbon Intensity (1 and 2) emissions indicator of the Fund as the relevant extra-financial indicator of the Fund will be at least 20% lower than the weighted average environmental indicator of the Parent Index (as defined below) based on a reduction of carbon emission intensity.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund’s market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a “notional amount,” e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a “basket” of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI India Universal Low Carbon Select 5% Issuer Capped Index (Net Total Return) and is not a complete description of the Index.

General

The Index draws its constituents from the MSCI India Index (the "**Parent Index**"), being an equity index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the net total return dividend performance of large and mid-capitalisation India companies.

The Index aims to provide exposure to issuers with specific environmental and social characteristics by selecting constituents that demonstrate (relative to the Parent Index) an ability to better manage ESG risks and opportunities, retain a lower carbon profile, while maintaining broad and diversified market representation. Constituents are assessed independently on meeting both broader ESG and low carbon criteria.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. Within each sector, securities are ranked based on ESG performance indicators including rating level, and industry-adjusted scores. The selection process targets approximately 50% of the Parent Index’s market capitalization, emphasizing sector-relative leaders. For each sector, eligible securities are selected until the target 50% coverage by cumulative free float-adjusted market capitalization is reached. The Index also applies a 5% issuer cap to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, UN Guiding Principles on Business and Human Rights, and ILO Core Conventions. These norms are reflected using MSCI ESG Controversies assessments which evaluates companies’ involvement in environmental, social, or governance controversies based

on their consistency with these global frameworks. Issuers with any revenues derived from controversial weapons and constituents involved in the development or production of nuclear weapons are excluded.

Depending on the activity, issuers deriving revenue from or involved in business activities related to tobacco, fossil fuel extraction, civilian firearms, conventional weapons, electricity generation through thermal coal are excluded. Thresholds for exclusion typically range from 5% to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index is available on the MSCI internet website:

http://www.msci.com/products/indexes/esg/methodology.html

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying index:

https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the

performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Securities Lending Risk", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

ESG Integration

The Investment Manager aims to achieve the investment objective of the Fund while incorporating sustainability risk into the investment process. The Investment Manager defines sustainability as the ability to leverage the Environmental, Social and Governance (ESG) factors of business practices seeking to generate opportunities and mitigate risks that contribute to the long-term performance of issuers ("Sustainability"). ESG integration can also identify opportunities for engagement to improve the company's ESG risk profile and thereby mitigate the potential negative impact of ESG issues on the company's financial performance.

The Fund is passively managed and seeks to track the performance of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the Index Provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the Index Provider.

Investors should therefore make their own ethical assessment of the extent of ESG-related screening undertaken by the Index Provider prior to investing in the Fund.

The Investment Manager will track the Index in line with the limits set out in the investment policy of the Fund. The Investment Manager will use full replication based on the characteristics of the Index, the size of the portfolio sub-fund and the required tracking accuracy.

The results of the assessment of the likely impacts of the integration of these sustainable and ESG characteristics or risks on the returns of the Fund are that the Index methodology described herein are likely to dimmish the impact of these sustainable and ESG risks on the returns, and improve the overall risk profile, of the Funds.

Neither the Investment Manager nor the Manager monitors the screening criteria applied by the Index Provider or assesses the accuracy of the ESG-related ratings attributed by the Index Provider to each constituent.

Sustainability Risks

A 'sustainability risk' means an ESG event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment. If a sustainability risk associated with an investment materialises, it could lead to the loss in value of an investment.

Investments in India

Direct Investments in India

In addition to the Indian distribution and registration restrictions set out on the cover page to the Prospectus, direct investments made in India are subject to the Fund obtaining a certificate of registration as "Foreign Portfolio Investor" ("FPI") (registration as Category I FPI) from a Designated Depository Participant ("DDP") on behalf of the Securities and Exchange Board of India ("SEBI"). In addition, the Fund shall obtain a Permanent Account Number (PAN) card from the Income Tax Department of India. The FPI Regulations set various limits for investments by FPIs and impose various obligations on the FPIs. All investments made directly in India will be subject to FPI Regulations prevailing at the time of the investment. Investors should note that the registration of the relevant Fund as a FPI is a condition precedent to any direct investments by this Fund in the Indian market.

The FPI registration of the Fund can be suspended or withdrawn by the SEBI in case of non-compliance with the SEBI's requirements, or in case of any acts or omissions in relation to compliance with any Indian regulations, including applicable laws and regulations relating to anti-money laundering and counter terrorism financing. No assurance can be given that the FPI registration will be maintained for the whole duration of the Fund. Consequently, investors should note that a suspension or a withdrawal of the FPI registration of the Fund may lead to a deterioration of the performance of the Fund, which as a consequence, could have a negative impact on the value of the investors' participation depending on the prevailing market conditions at that time.

Investors should also note that the Prevention of Money Laundering Act, 2002 ("PMLA") and the rules framed thereunder in relation to the prevention and control of activities concerning money laundering and confiscation of property derived or involved in money laundering in India require, inter-alia, certain entities such as banks, financial institutions and intermediaries dealing in securities (including FPIs) to conduct client identification procedures and to establish the beneficial owner of the assets ("Client ID") and to maintain a record of Client ID and certain kinds of transactions, such as cash transactions exceeding certain thresholds, suspicious transactions (whether or not made in cash and including credits or debits into or from non-monetary accounts such as security accounts). Accordingly, the FPI regulations have the ability to seek information from the FPI holder on the identity of beneficial owners of the Fund, hence information regarding investors and beneficial owners of the Fund may be required for disclosure to local supervisory authorities.

As far as permitted under Irish law, information and personal data regarding the investors and beneficial owners of the Fund investing in the Indian market (including but not limited to any documentation submitted as part of the identification procedure prescribed in relation to their investment in the Fund) may be disclosed to the DDP, to governmental or regulatory authorities in India upon their request. In particular, investors shall note that, in order to enable the Fund to comply with the Indian laws and regulations, any natural person who, whether acting alone or together, or through one or more juridical person, exercises control through ownership or who ultimately has a controlling ownership interest above 10% of the Fund's assets, is required to disclose its identity to the DDP.

Indirect Investments in India

In addition, the Funds may seek to get exposure to the Indian market by investing indirectly in Indian assets through derivative instruments or structured products. Accordingly, investors shall note that, in line with Indian laws and regulations on anti-money laundering, indirect investments made in India may require to disclose information pertaining to the Fund, to the investors and beneficial owners of the Fund to the relevant Indian supervisory authorities through the counterparty to the derivative instrument or structured product.

Therefore, as far as permitted under Irish law, information and personal data regarding the investors and beneficial owners of the Fund investing indirectly in the Indian market (including but not limited to any documentation submitted as part of the identification procedure prescribed in relation to their investment in the Fund) may be disclosed to the counterparty to the derivative instrument or structured product and to governmental or regulatory authorities in India upon their request. In particular, investors shall note that, in order to enable the Fund to comply with the Indian laws and regulations, any natural person who, whether acting alone or together, or through one or more juridical persons, exercises control through ownership or who ultimately has a controlling ownership interest above 10% of the Fund's assets is required to disclose its identity to the relevant counterparty to the derivative instrument or structured product and to the local supervisory authorities.

P-Notes

P-Notes are financial instruments which may be used by the Fund to gain indirect exposure to Indian equity markets. Purchasing P-Notes from brokerage firms or banks will give a Fund indirect access to equity securities. This allows a Fund to gain exposure to equities in markets which may not be accessed directly without potentially triggering registration requirements. While P-Notes are often listed on an exchange, they are usually traded on an OTC basis with the issuing broker or bank. P-Notes on equities usually provide exposure to the underlying equity on a 1:1 basis (i.e., delta 1), they are not bought on margin and they do not embed any derivative elements. Such P-Notes may meet the criteria for transferable securities under Regulations and will then be treated as such and will not be subject to the rules for FDI.

Indian Stock Market

The Indian stock markets are undergoing a period of growth and change, which may lead to greater volatility and difficulties in the settlement and recording of transactions and in interpreting and applying the relevant regulations, in comparison to developed countries. The Indian stock market has previously experienced substantial fluctuations in the prices of listed securities and no assurance can be given that such volatility will not occur in the future.

Indian Political and Economic Risks

The Government of India has traditionally exercised, and continues to exercise, a significant influence over many aspects of the economy. Since 1991, successive Indian governments have pursued policies of economic liberalisation and financial sector reforms. The current Government of Indoa has announced its general intention to continue India’s current economic and financial sector liberalisation and deregulation policies. However there can be no assurance that such policies will be continued and a significant change in the government’s policies in the future could affect business and economic conditions in India. Any political instability in India may adversely affect the Indian securities markets in general, which could also adversely affect the trading price of the Indian securities.

Political, economic, and social factors, changes in Indian law or regulations and the status of India’s relations with other countries may adversely affect the value of the Fund’s assets. In addition, the Indian economy may differ favourably or unfavourably from other economies in several respects, including the rate of growth of GDP, the rate of inflation, currency fluctuation, resource self-sufficiency and balance of payments position. The Fund does not intend to obtain political risk insurance. The Government of India has traditionally exercised and continues to exercise a significant influence over many aspects of the Indian economy. Further actions or changes in policy (including taxation) of the Indian Central Government or the respective Indian State Governments could have a significant effect on the Indian

economy, which could adversely affect private sector companies, market conditions and prices and yields of the Fund's investments.

Certain developments, beyond the control of the Fund, such as the possibility of nationalisation, expropriations, or confiscatory taxation, political changes, government regulation, social instability, diplomatic disputes, or other similar developments could adversely affect the Fund's assets. Thus, there can be no assurance that the government policies will continue and any significant change in the Indian government's future policies could affect general business and economic conditions in India and could also affect the Fund's operations and investments. In addition, any political instability in India could adversely affect the Indian economy in general, which could also affect the value of the investments of the Fund. India has in the past experienced periods of political instability and, in some cases, civil unrest and clashes.

Severe monsoons or drought conditions could hurt India's agricultural production and impact momentum in some sectors of the Indian economy, which could adversely affect the performance of the companies in whose securities the Fund invests. The liquidity of the assets and their value may be affected generally by changes in Indian government policy, interest rates and taxation, social and religious instability and political, economic or other developments in or affecting India.

Indian regulatory standards and disclosure standards may be less stringent than standards in developed countries, and there may therefore be less publicly available information about Indian companies than is regularly available about companies located in developed countries. Securities law and regulations in India are still evolving.

Further changes in the market, business, and economic conditions, including, for example, interest rates, foreign exchange rates, inflation rates, industry conditions, competition, technological developments, political and diplomatic events and trends, tax laws and numerous other factors, can affect substantially and adversely the performance of and the development to be undertaken by an Indian company in which the Fund may have invested. None of these conditions will be within the control of the Fund, Index Provider or Investment Manager.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to integrate ESG factors into their investment process through exposure to the equity market performance of Indian companies and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;

- USD UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.35% per annum of the Net Asset Value of the Class
USD dis	up to 0.35% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.35% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD UKdis

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 250
USD acc	Index value / 250
USD UKdis	Index value / 250

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 2'367.235 at 02 February 2024, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 9.469. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by

the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD. ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO

BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

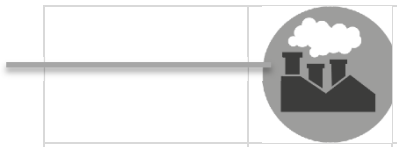
Product name:	**Legal entity identifier:**
UBS MSCI India Universal UCITS ETF	391200B69D2QK84UQ884

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.



Sustainability indicators measure how the sustainable objectives of this financial product are attained.		**What environmental and/or social characteristics are promoted by this financial product?**
		This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristics are promoted by the financial product: • tracks/tracking of a benchmark with a sustainability profile (ESG Score) that is higher than the sustainability profile of MSCI India Index (the "Parent Index") • a Carbon Intensity (1, 2) emissions indicator lower than Parent Index (MSCI) The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the MSCI India Universal Low Carbon Select 5% Issuer Capped Total Return Index.
		● ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***
		The characteristics are measured using the following indicators respectively: • The MSCI ESG Score MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Index. • Weighted average carbon intensity (Scope 1+2) MSCI

		The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher carbon intensity are likely to face more exposure to carbon related market and regulatory risks. It's the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).
		• ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
		The financial product intends invest at least 90% of its total net assets in securities that are constituents of the Index with a commitment to a minimum proportion of sustainable investments of 20%. MSCI India Universal Low Carbon Select Indices aim to represent the performance of an investment strategy that by re-weighting free-float market cap weights based upon certain ESG metrics of the Index Provider seeks to increase exposure to those companies meeting the ESG profile and requirements as set out in the "Description of the Index" section of the Supplement (as determined by the Index Provider) as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. The financial product seeks to achieve a higher MSCI ESG Score than the Parent Index. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction. The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities. The financial product also seeks to achieve a lower carbon intensity (1 and 2) emissions indicator than that of the Parent Index. MSCI Climate Change Metrics provides climate data & tools to support investors integrating climate risk & opportunities into their investment strategy and processes. It supports investors seeking to achieve a range of objectives, including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes, in particular through climate scenario analysis for both transition and physical risks.
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability		• ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***
		This financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors

factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.		are taken into account by the Index provider as appropriate to the Index family.
		How have the indicators for adverse impacts on sustainability factors been taken into account?
		Indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index. The Index incorporates the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms. MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red Flag" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles. The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons or chemical weapons, conventional weapons, nuclear weapons, civilian firearms, tobacco, fossil fuel extraction (thermal coal mining and unconventional oil & gas extraction) and thermal coal-based power generation.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles. https://www.msci.com/documents/1296102/14524248/MSCI+ESG+Research+Controveroversies+Executive+Summary+Methodology+-++July+2020.pdf/b0a2bb88-2360-1728-b70e-2f0a889b6bd4
		The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria. *The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take*

into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

This financial product is passively managed and tracks an Index and, therefore, indicators for adverse impacts on sustainability factors are taken into account by the Index Provider as appropriate to the Index as follows:

The Index incorporate the MSCI ESG Controversies score, screening out on a timely basis any issuers in significant breach of ESG norms.

MSCI ESG Controversies are designed to provide timely and consistent assessments of ESG controversies involving issuers. Any issuer with a "Red" MSCI ESG Controversies Score (score less than 1) is excluded from Sustainability indices. The Controversy Score measures an issuer's involvement in major ESG controversies and how well the issuer adheres to international norms and principles.

The MSCI ESG Controversies tool monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, and performance with respect to these norms and principles.

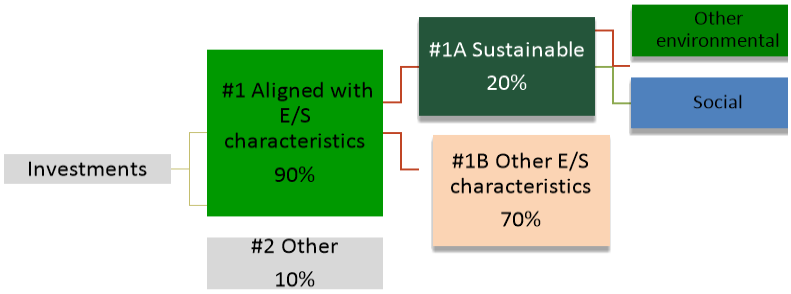
The financial product excludes investments in companies involved directly in the use, development, manufacturing, stockpiling, transfer or trade of cluster munitions and/or anti-personnel landmines, nuclear weapons, biological weapons, or chemical weapons.

The annual report will include information on the principal adverse impacts on sustainability factors.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.		This financial product seeks to promote the characteristic(s) described in this annex through Index selection and passive asset management This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.
		• ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***
		The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product (measured at portfolio level): Characteristic 1): A sustainability profile (MSCI ESG Score) that is higher than the Parent Index's sustainability profile Characteristic 2): A Carbon Intensity (1 and 2) emissions indicator that is lower than Parent Index (MSCI) The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.
		• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
		This financial product does not have a committed minimum rate to reduce the scope of investments considered prior to the application of the investment strategy.
		• ***What is the policy to assess good governance practices of the investee companies?***
Good governance practices include sound management structures, employee		Assessment of good governance practices of the investee companies is performed by the index provider. MSCI ESG Ratings analysis begins with an evaluation of each company's Corporate Governance, taking into consideration the company's ownership and control structures with respect to



relations, remuneration of staff and tax compliance.

good governance, the composition and effectiveness of its board, the effectiveness of its incentive practices and the integrity of its accounting. Corporate Behavior is also monitored, including any controversies that might have a significant negative impact on the company's value.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%. These sustainable investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.

Asset allocation describes the share of investments in specific assets.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index

components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers.

The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the index.

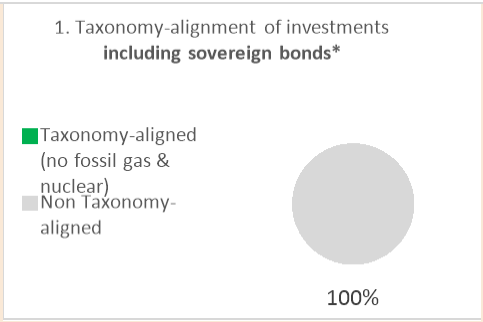
Where the financial product uses derivatives to gain exposure to the constituents of the Index, any ESG rating or analysis as set out in the "Description of the Index" will apply to the underlying investment in attainment of the environmental or social characteristics promoted by the financial product.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

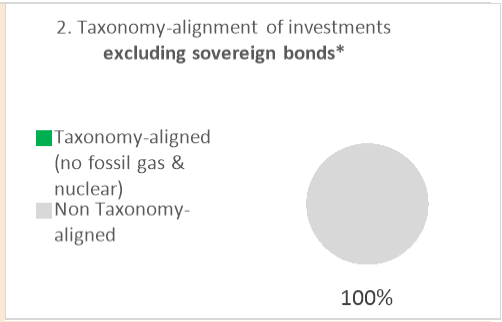
The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**

☐ Yes:
☐ In fossil gas ☐ In nuclear energy
☒ No



*To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.*



The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities *directly enable other activities to make a substantial contribution to an environmental objective.*

Transitional activities are *activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.*

* ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.

What is the minimum share of socially sustainable investments?

The financial product targets a minimum proportion of sustainable investment of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

		Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data, being data used by the Index Provider to assess and score investee companies, is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index for the purpose of achieving the financial product's investment objective. Investments included in "#2 Other" are not considered against minimum environmental or social safeguards.
Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.		**Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?**
		The Reference Benchmark designated for the purpose of attaining the characteristics promoted by the financial product is the MSCI India Universal Low Carbon Select 5% Issuer Capped Total Return Index.
		• ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***
		The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.
		• ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***
		The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will track the Index in line with the limits set out in the investment policy of Fund. The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristics it seeks to promote. The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible. The Investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.
		• ***How does the designated index differ from a relevant broad market index?***
		The Index draws its constituents from the MSCI India Index Parent Index, being an equity index calculated, maintained and

		published by international index supplier MSCI® and denominated in USD. The Index is designed to measure the performance of the large and mid cap segments of the Indian market. The Index is designed to reflect the performance of an investment strategy that, by tilting away from free-float market cap weights, seeks to gain exposure to those those companies meeting the ESG profile and requirements as set out in the "Description of the Index" section of the Supplement (as determined by the Index Provider) as well as a positive trend in improving that profile, while excluding companies based on various ESG and climate change criteria. The Index constituent selection is based on research provided by MSCI ESG Research which provides research, ratings and analysis of ESG-related business practice. The Index Provider excludes companies facing controversies (MSCI Red Flag, being an indication of at least one very severe controversy), companies which have an ESG Rating of CCC, companies which have revenues in certain business activities (controversial weapons, nuclear weapons, civilian firearms, tobacco, thermal coal, fossil fuel extraction), as well as the top 5% companies by number based on carbon emission intensity levels (being scope 1 and 2 emissions as categorised by the Greenhouse Gas Protocol) up to a cumulative weight of less than 30% of the weight of that sector in the Parent Index. The index also selects companies with low exposure to fossil fuel reserves and ranks the Parent Index constituents in descending order of the potential carbon emissions per dollar of the market capitalization of the company. Securities are than excluded until the cumulative potential carbon emission of the excluded securities reaches 50% of the sum of the potential carbon emission of the constituents of the Parent Index. The free-float adjusted market cap weight is adjusted by a "Combined ESG score" that is a combined product of an "ESG rating score" based on the MSCI ESG Research rating (i.e. 1.5 (AAA, AA), 1 (A, BBB, BB) or 0.5 (B)) and a "ESG Rating trend score" based on the change in a company's ESG rating score against the previous assessment carried out by the Index Provider (i.e.1.2 for an increased rating, 1.0 for a neutral rating and 0.8 for a decreased rating). The Combined ESG Score of a company is determined by multiplying the ESG Rating Score by the ESG Rating Trend Score. This Combined ESG Score is used to re-weight the constituent from the Parent Index by multiplying the Combined ESG Score by the market capitalisation weight of the security in the Parent Index. The maximum weight of any issuer of the Parent Index is capped at 5% in order to construct the Index.
		• ***Where can the methodology used for the calculation of the designated index be found?***
		The methodology of the construction of the Index can be found in the section of the fund supplement entitled "Description of the Index".

		**Where can I find more product specific information online?** **More product-specific information can be found on the website:**

UBS Solactive US Listed Gold & Silver Miners UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 61
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS Solactive US Listed Gold & Silver Miners UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	12 November 2025 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
French SRI Label	A Socially Responsible Investment (SRI) label as created by the French Ministry of the Economy and Finance to assist retail investors in choosing sustainable and responsible investments. The detailed requirements and criteria to obtain a French SRI Label are set out at https://www.lelabelisr.fr/label-isr/criteres-attribution/.

THE FUND AND SHARE CLASSES

The Fund

UBS Solactive US Listed Gold & Silver Miners UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the long term through companies which are active in the Gold and Silver Mining industry, operating in accordance with established norms and good governance as described below in the "Investment Objective and Strategy" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;
- hEUR dis;
- hEUR acc;
- hGBP dis;
- hGBP acc;
- hCHF dis;

- hCHF acc;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The investment objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the Solactive Gold & Silver Miners US Listings Carbon Tilted Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the Solactive Gold & Silver Miners US Listings Carbon Tilted Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index. The Fund seeks to achieve the objective by tracking the Index which, with regard to the ESG-related exclusions disclosed in the section of the Supplement entitled "Description of the Index", gives exposure to global companies with lower carbon intensity and excluding the ones with negative social, governmental and environmental impact.

Any determination by the Directors (e.g. where the Fund's size is close to the Index liquidity capacity) that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with article 8 of SFDR by tracking the Index which has a lower Carbon Intensity (1,2) emissions than the Parent Benchmark.

Information related to this characteristic is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, at least 90% of the Fund's net assets in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, GBP, and CHF (each a "**Hedged Currency Version**"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "*Investment Objectives, Policy and Strategy*" section of the Prospectus.

Share Class	**Index Currency Version**
hEUR dis hEUR acc	Solactive Gold & Silver Miners US Listings Carbon Tilted Index hedged to EUR (Net Total Return)

Share Class	Index Currency Version
hGBP dis hGBP acc	Solactive Gold & Silver Miners US Listings Carbon Tilted Index hedged to GBP (Net Total Return)
hCHF dis hCHF acc	Solactive Gold & Silver Miners US Listings Carbon Tilted Index hedged to CHF (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of ESG rating to these selected securites cannot be guaranteed. The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable.

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI

which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 70% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("**AMF Rules**"), the approach adopted by the Fund is based on a commitment in that it provides measurable objectives for the consideration of non-financial criteria. The Carbon Intensity (1, 2) emissions indicator of the Fund is lower than the Parent Benchmark. The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund does not benefit from a French SRI Label.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index, and the Index Provider applies ESG ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "*notional amount*," *e.g.*, the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "*basket*" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for

payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the Solactive Gold & Silver Miners US Listings Carbon Tilted Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier Solactive, and is denominated in USD. It measures the performance of US listed (domestic and international) Gold and Silver mining companies that meet ESG criteria as defined in this methodology. The parent benchmark is the Solactive Gold & Silver Miners US Listings Index (Net Total Return) (the "**Parent Benchmark**").

The Index aims to provide exposure to issuers evaluated for specific ESG criteria and lower carbon emissions scope 1 and 2 compared to the Parent Benchmark.

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. At rebalance, Index components are assigned weights according to a carbon intensity-tilted free-float market capitalization, favoring companies with lower carbon emissions.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises and UN Guiding Principles on Business and Human Rights. Companies with verified ongoing involvement in controversial weapons are also excluded. These norms are reflected using assessments by ISS.

Depending on the activity, issuers deriving revenue or involved in business activities related to tobacco, alcohol, armaments are excluded. Thresholds for exclusion typically range from 10% to 30% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behavior, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis on the first Wednesday in February, May, August and November. If that day is not an eligible rebalance day, the Index will be rebalanced on the immediately following eligible rebalance day.

The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (SOLGSMUN) is available on the Solactive internet website by selecting the Solactive Gold & Silver Miners US Listings Carbon Tilted Index (Net Total Return) from the list of indices:

https://www.solactive.com/indices/

Index Factsheet

The Index Factsheet is available on the Solactive internet website by selecting the Solactive Gold & Silver Miners US Listings Carbon Tilted Index (Net Total Return) from the list of indices:

https://www.solactive.com/indices/

Publication of the Index Value

The closing price, an additional factsheet and the composition of the Index is available on the Solactive internet website by selecting the Solactive Gold & Silver Miners US Listings Carbon Tilted Index (Net Total Return) from the list of indices:

https://www.solactive.com/indices/

Publication of the Index Composition

The closing price, an additional factsheet and the composition of the Index is available on the Solactive internet website by selecting the Solactive Gold & Silver Miners US Listings Carbon Tilted Index (Net Total Return) from the list of indices:

https://www.solactive.com/indices/?index=DE000SL0KD72#composition

The weighting of each Index component is set out in the Index Factsheet.

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Risk of Investing in the Mining Industry

As the Fund may invest in stocks of U.S. and non-U.S, companies that are involved in mining, the Fund is subject to certain risks associated with such mining companies. Investments in mining companies may be speculative. Competitive pressures may have a significant effect on the financial condition of such companies. Mining companies are highly dependent on the price of the underlying metal or element. These prices may fluctuate substantially over short periods of time so the Fund's Share price may be more volatile than other types of investments. In particular, a drop in the price of coal, gold, silver bullion, steel or rare earth/strategic metals would particularly adversely affect the profitability of small- and medium-capitalisation mining companies and their ability to secure financing. Furthermore, companies that are only in the exploration stage are typically unable to adopt specific strategies for controlling the impact of such price changes.

Some of the companies in the Index may be early stage mining companies that are in the exploration stage only or that hold properties that might not ultimately produce these metals. Exploration and development involves significant financial risks over a significant period of time which even a combination of careful evaluation, experience and knowledge may not eliminate. Few properties which are explored are ultimately developed into producing mines. Major expenditures may be required to establish reserves by drilling and to construct mining and processing facilities at a site. In addition, many early stage miners operate at a loss and are dependent on securing equity and/or debt financing, which might be more difficult to secure for an early stage mining company than for a more established counterpart.

ESG Integration

The Investment Manager aims to achieve the investment objective of the Fund while incorporating sustainability risk into the investment process. A 'sustainability risk' means an ESG event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment. If a sustainability risk associated with an investment materialises, it could lead to the loss in value of an investment.

The Investment Manager defines ESG integration as the ability to leverage the Environmental, Social and Governance (ESG) factors of business practices seeking to generate opportunities and mitigate sustainability risks that contribute to the long-term performance of issuers. ESG integration can also identify opportunities for engagement to improve the company's ESG risk profile and thereby mitigate the potential negative impact of ESG issues on the company's financial performance.

The Fund is passively managed and seeks to track the performance of the Index. Sustainability risks are considered as part of the Index selection process. The Index which is stated by the Index Provider to be

screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the Index Provider.

Investors should therefore make their own ethical assessment of the extent of ESG-related screening undertaken by the Index Provider prior to investing in the Fund.

The Investment Manager will track the Index in line with the limits set out in the investment policy of the Fund. The Investment Manager will use full replication based on the characteristics of the Index, the size of the portfolio sub-fund and the required tracking accuracy.

The results of the assessment of the likely impacts of the integration of sustainability risks on the returns of the Fund are that the Index methodology described herein are likely to dimmish the impact of these sustainability risks on the returns, and improve the overall risk profile, of the Funds.

Neither the Investment Manager nor the Manager monitors the screening criteria applied by the Index Provider or assesses the accuracy of the ESG-related ratings attributed by the Index Provider to each constituent.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to take an exposure to the equity market performance of companies which generate at least 90% of their revenues from gold and silver mining and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

Accumulating Share Classes

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hGBP acc; and
- hCHF acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

Distributing Share Classes

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;

- USD UKdis;
- hEUR dis;
- hGBP dis; and
- hCHF dis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.36% per annum of the Net Asset Value of the Class
USD acc	up to 0.36% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.36% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.39% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.39% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.39% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.39% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.39% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.39% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- USD UKdis;
- hEUR dis;
- hEUR acc;
- hGBP dis;
- hGBP acc;
- hCHF dis;
- hCHF acc;

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The following Classes will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Period may be extended in respect of a Class provided that no subscriptions have been received at the date of the proposed extension and in accordance with the Central Bank requirement. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Period
USD dis	Index value / 100
USD acc	Index value / 100
USD UKdis	Index value / 100
hEUR dis	Index value / 100
hEUR acc	Index value / 100
hGBP dis	Index value / 100
hGBP acc	Index value / 100
hCHF dis	Index value / 100
hCHF acc	Index value / 100

The closing Index value which will be published on the Solactive website at the web address set out in section entitled *"Publication of the Index"* will be used to calculate the Initial Offer Price. For example, where the Index Value was 1'234.5254 on 17 September 2024, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 12.3453. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

a) properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituent may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, PROMOTED, SOLD OR SUPPORTED IN ANY OTHER MANNER BY SOLACTIVE AG NOR DOES SOLACTIVE AG OFFER ANY EXPRESS OR IMPLICIT GUARANTEE OR ASSURANCE EITHER WITH REGARD TO THE RESULTS OF USING THE INDEX AND/OR INDEX TRADE MARK OR THE INDEX PRICE AT ANY TIME OR IN ANY OTHER RESPECT. THE INDEX IS CALCULATED AND PUBLISHED BY SOLACTIVE AG. SOLACTIVE AG USES ITS BEST EFFORTS TO ENSURE THAT THE INDEX IS CALCULATED CORRECTLY. IRRESPECTIVE OF ITS OBLIGATIONS TOWARDS THE ISSUER, SOLACTIVE AG HAS NO OBLIGATION TO POINT OUT ERRORS IN THE INDEX TO THIRD PARTIES INCLUDING BUT NOT LIMITED TO INVESTORS AND/OR FINANCIAL INTERMEDIARIES OF THE FINANCIAL INSTRUMENT. NEITHER PUBLICATION OF THE INDEX BY SOLACTIVE AG NOR THE LICENSING OF THE INDEX OR INDEX TRADE MARK FOR THE PURPOSE OF USE IN CONNECTION WITH THE FINANCIAL INSTRUMENT CONSTITUTES A RECOMMENDATION BY SOLACTIVE AG TO INVEST CAPITAL IN SAID FINANCIAL INSTRUMENT NOR DOES IT IN ANY WAY REPRESENT AN ASSURANCE OR OPINION OF SOLACTIVE AG WITH REGARD TO ANY INVESTMENT IN THIS FINANCIAL INSTRUMENT.

Template pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS Solactive US Listed Gold & Silver Miners UCITS ETF	549300FW3O0MEE9WMH73

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

●● ☐ **Yes**	●○ ☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☐ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 0% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☒ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristic is promoted by the financial product:

• a Carbon Intensity (1, 2) emissions indicator lower than the Parent Benchmark (MSCI)

The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the Solactive Gold & Silver Miners US Listings Index (Net Total Return) (the "**Parent Benchmark**").

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?

The above ESG characteristic is measured using the following indicators respectively:

• Weighted average carbon intensity (Scope 1+2) MSCI

The weighted average carbon intensity ("WACI") measures a portfolio's exposure to carbon-intensive companies. The WACI metric provides insight into potential risks related to the transition to a lower-carbon economy because companies with higher WACI are likely to face more exposure to carbon related market and regulatory risks. WACI is the sum product of the portfolio weights and individual carbon intensities (carbon emissions scope 1+2 / USDm sales).

Please note that while the Reference Benchmark and Parent Benchmark are provided by Solactive, the Investment Manager will rely on data provided by MSCI to calculate the WACI of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Parent Benchmark provider.

What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?

Not applicable. While the financial product promotes the E/S Characteristic set out above, it does not commit to making sustainable investments within the meaning of SFDR.

How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?

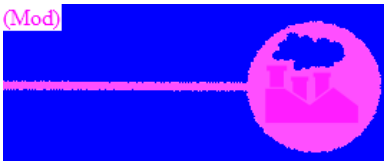
Not applicable. While the financial product promotes the E/S Characteristic set out above, it does not commit to making sustainable investments within the meaning of SFDR.

- *How have the indicators for adverse impacts on sustainability factors been taken into account?*

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Indicators for adverse impacts on sustainability factors mentioned in Table 1 of Annex 1 of Regulation (EU) 2022/1288 are taken into account by the Index provider when applying norms-based exclusions as set out in the Index methodology and below.

The Index incorporates the ISS ESG Norms-Based Research screening out on each rebalancing date any issuers violating the international norms and standards. The basis of the ISS ESG's assessments are the United Nations (UN) Global Compact Principles, OECD Guidelines for Multinational Enterprises and the United Nations (UN) Guiding Principles on Business and Human Rights. Norms-Based Research is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as verified ongoing failure to respect established norms, according to ISS ESG, are ineligible for Index inclusion. Companies without ISS ESG coverage, are also ineligible for Index inclusion until they receive such coverage.



Furthermore, the financial product excludes investments in companies involved directly or indirectly in Controversial Weapons or cannabis, companies deriving 10% or more revenue from Conventional Weapons, companies deriving 5% or more revenue from Tobacco, companies deriving 30% or more revenue from Thermal Coal.

- *How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?*

Not applicable. While the financial product promotes the E/S Characteristic set out above, it does not commit to making sustainable investments within the meaning of SFDR.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.
The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.
Any other sustainable investments must also not significantly harm any environmental or social objectives.

(Mod)

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Yes, this financial product is passively managed and tracks an Index, indicators for adverse impacts on sustainability factors mentioned in Table 1 of Annex 1 of Regulation (EU) 2022/1288 are taken into account by the Index provider when applying ISS ESG Norms-Based Research as set out in the Index methodology and above.

Information regarding how the Fund's environmental or social characteristic is met will be included with the Fund's annual report.

The annual report will include information on the principal adverse impacts on sustainability factors.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

This financial product seeks to promote the characteristic described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the Index provider to be screened against environmental, social or governance criteria and any methodology used by the Index provider to assess sustainability characteristics and risks of the constituents of the Index can be found on the website of the Index provider.

Information on the ESG profile of the Index is available on Solactive internet website by selecting the Solactive Gold & Silver Miners US Listings Carbon Tilted Index (Net Total Return) from the list of indices and by completing the relevant form on:

https://www.solactive.com/indices/

What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

As described above, the following binding element of the investment strategy is used to select the investments to attain the characteristic promoted by this financial product.

The passive investment strategy employed by this financial product will select investments based on its ability to generate:

Characteristic 1):

A WACI that is lower than the Parent Benchmark (MSCI)

The calculations do not take account of cash, derivatives (other than derivatives used to gain exposure to the constituents of the Index) and unrated investment instruments further detailed under "#2 Other" below.

The binding element is calculated at quarter end using the average of all of business days' values in the quarter.

Please note that while the Reference Benchmark and Parent Benchmark are provided by Solactive, the Investment Manager will rely on data provided by MSCI to calculate the WACI of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Parent Benchmark provider.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***

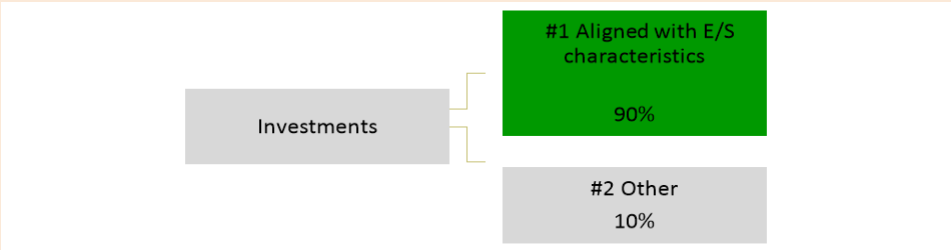
N/A

- ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance practices of the investee companies are performed by the Index Provider.

The index methodology of the Reference Benchmark includes good governance criteria whereby companies are assessed against indicators such as sound management structures, employee relations, remuneration of staff and tax compliance. Companies that are deemed not to meet good governance practices according to the methodology of the Reference Index will be excluded.

Where, in exceptional circumstances, the financial product holds securities which are not comprised in the Index, the Investment Manager will apply the same good governance criteria as are applied by the Index Provider as descrived above.



Asset allocation describes the share of investments in specific assets.

What is the asset allocation planned for this financial product?

The minimum proportion of the investments used to meet the environmental and/or social characteristic promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 0%.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

How does the use of derivatives attain the environmental or social characteristics promoted by the financial product?

The financial product tracks an ESG index and may replicate the performance of the Index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments in Index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the Index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the Index refers.

The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

Where the financial product uses derivatives to gain exposure to the constituents of the Index, any ESG rating or analysis as set out in the "Description of the Index" will apply to the underlying investment in attainment of the environmental or social characteristics promoted by the financial product.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

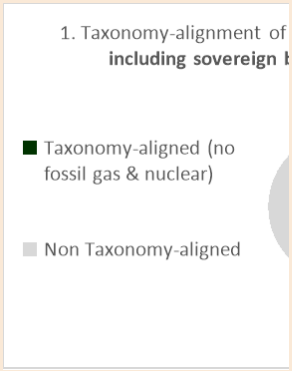
The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.

Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

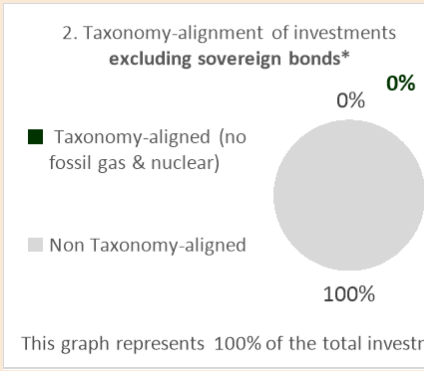
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.



Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission leels corresponding to the best performance.

☐ Yes:



☐ In fossil gas ☐ In nuclear energy

☒ No

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

2.

3.

4. * ***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures***

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentaly sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The financial product does not seek to make sustainable investments within the meaning of SFDR.

What is the minimum share of socially sustainable investments?

The financial product does not seek to make sustainable investments within the meaning of SFDR.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Other" are cash, derivatives (other than derivatives used to gain exposure to the constituents of the Index) and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data, being data used by the Index Provider to assess and score investee companies, is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index for the purpose of achieving the financial product's investment objective.

Investments included in "#2 Other" are not considered against minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

The Reference Benchmark designated for the purpose of attaining the sustainable objective of the financial product is the Solactive Gold & Silver Miners US Listings Carbon Tilted Index (Net Total Return).

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

  The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristic it seeks to promote. The Index rebalances on a quarterly basis. More details on the index methodology applied by the Index provider can be found below.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

  The alignment of the investment strategy with the methodology of the Index is ensured on a continuous basis as the Index provider rebalances the Index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

  The financial product has initially selected the Reference Benchmark for its relevance to its investment strategy and the attainment of the characteristic it seeks to promote.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment strategy is to fully replicate the Index and to minimize the tracking error. The investment manager reviews the Index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

The Reference Benchmark differs from a broad market index (Parent Benchmark) because it seeks to increase overall exposure to companies with a lower WACI relative to a broad market index. In contrast to the broad market index, the Reference Benchmark excludes companies which violating international norms (UNGC and/or OECD) and those involved directly or indirectly in Controversial Weapons or cannabis, companies deriving 10% or more revenue from Conventional Weapons, companies deriving 5% or more revenue from Tobacco, companies deriving 30% or more revenue from Thermal Coal. Furthermore, each security in the Reference Benchmark is assigned a weight according to its carbon intensity tilted free-float market capitalization while the broad market index considers only free-float market capitalization weighting of its components.

- ***Where can the methodology used for the calculation of the designated index be found?***

The methodology of the construction of the Index can be found in section of the fund supplement entitled "Description of the Index".

UBS Nasdaq-100 ESG Enhanced UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 62

17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS Nasdaq-100 ESG Enhanced UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.	
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.	
Closing Date	12 November 2025, or such earlier or later date as the Directors and/or the Manager may determine.	
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.	
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Dealing Day.	
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.	
Index	Nasdaq-100 Sustainable ESG Select Notional Index (Net Total Return).	
Index Provider	Nasdaq, Inc.	
Initial Offer Period	9:00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.	
Investment Manager	UBS Asset Management (UK) Ltd.	
IOP	Initial Offer Period.	
IOP Settlement Date	The third Business Day after the Closing Date.	
ISIN	USD dis USD acc USD UKdis hCHF dis hCHF acc hEUR dis hEUR acc hGBP dis hGBP acc	IE00085TI022 IE000PWGE381 IE000HX2GUZ0 IE0007ZM6O87 IE000H8HO5U9 IE000CYHQZK1 IE000PVPOJX4 IE000BRCWC03 IE000L2CFR55

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Morningstar Sustainalytics	An independent ESG and corporate governance research, ratings and analytics firm.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on https://indexes.nasdaqomx.com/Index/Directory.

THE FUND AND SHARE CLASSES

The Fund

UBS Nasdaq-100 ESG Enhanced UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the medium term through exposure to the stock performance of US and global non-financial companies listed on the Nasdaq Stock Market which meet certain ESG-based criteria as set out in the Description of the Index below via a diversified portfolio of securities as described below in the "Investment Objective and Strategy" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis;

- hGBP acc;

Description of Shares:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The investment objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the Nasdaq-100 Sustainable ESG Select Notional Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the Nasdaq-100 Sustainable ESG Select Notional Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval or the provision of reasonable notice to Shareholders (as applicable), and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with Article 8 of SFDR by tracking the Index which has a higher sustainability profile (MSCI ESG Score) than the Parent Benchmark (as defined below).

Information related to that characteristic is available in an annex to this document (SFDR RTS Art. 14(2)).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in CHF, EUR and GBP (each a "**Hedged Currency Version**"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "*Investment Objectives, Policy and Strategy*" section of the Prospectus.

Share Class	Index Currency Version
hCHF dis hCHF acc	Nasdaq-100 Sustainable ESG Select Notional Index hedged to CHF (Net Total Return)
hEUR dis hEUR acc	Nasdaq-100 Sustainable ESG Select Notional Index hedged to EUR (Net Total Return)
hGBP dis hGBP acc	Nasdaq-100 Sustainable ESG Select Notional Index hedged to GBP (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. In such case, the application of an ESG rating to these selected securities cannot be guaranteed. The Fund, for the purposes of assisting in replicating the Index, may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. When the Fund uses the Replication Strategy, the Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply, for example if there is an increased allocation of an issuer within an Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. For the avoidance of doubt, where the Fund does not use a full Replication Strategy, it will not be permitted to avail of the higher investment limits as described at paragraph 4.2 of the section of the Prospectus headed “Investment Restrictions”. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "*Tracking Accuracy*".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager’s RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index’s return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund’s volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage (calculated under the commitment approach as set out in the "Risk Management" section below) will not exceed 100% of the Fund’s total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed

date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The RMP was prepared and submitted to the Central Bank in accordance with the Central Bank requirements.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

AMF DISCLOSURE

For the purposes of complying with AMF ESG Rules AMF Position/Recommendation DOC-2020-03 ("AMF Rules"), the approach adopted by the Fund is based on a commitment in that it provides measurable objectives for the consideration of non-financial criteria. The sustainability profile (MSCI ESG Score) of the Fund is higher than the sustainability profile of NASDAQ-100 Notional Index® (Net Total Return). The investment strategy of the Fund is to track the Index's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The Fund does not benefit from a French SRI Label.

The Fund invests at least 90% of its total net assets in securities that are constituents of the Index, and the Index Provider applies ESG ratings on all of the Index constituents. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates

of return) calculated with respect to a “notional amount,” e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a “basket” of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the Nasdaq-100 Sustainable ESG Select Notional Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier Nasdaq, Inc. and is denominated in USD. It measures the performance of the largest domestic and international Nasdaq-listed non-financial companies that meet ESG criteria as defined in this below. The parent benchmark is the NASDAQ-100 Index® (Net Total Return) (the “**Parent Benchmark**”).

The Index aims to provide exposure to issuers selected and weighted to collectively result in a lower portfolio-weighted ESG Risk Score (relative to the Parent Benchmark).

Eligible issuers must meet minimum thresholds for ESG Ratings and Controversy Scores, as defined by the Index Provider. The methodology aims to have at least a 10% improvement in ESG Risk Score compared to the Parent Benchmark at each semi-annual review. The Index applies constituent-level weight capping to limit concentration risk.

The Index methodology excludes issuers assessed to be failing standards of the UN Global Compact, OECD Guidelines for Multinational Enterprises, and UN Guiding Principles on Business and Human

Rights. These norms are reflected using assessments by Sustainalytics. Issuers with any revenues derived from controversial weapons are excluded.

Depending on the activity, issuers deriving revenues from tobacco, oil and gas, oil sands, arctic oil and gas exploration, fossil fuels, thermal coal, gambling, small arms, military weapons, alcohol, adult entertainment, cannabis, pesticides, nuclear power are excluded. Thresholds for exclusion typically range from any revenue to 15% revenue exposure.

For details on revenue thresholds and other parameters applied to sector, behaviour, or norms-based exclusions as well as any relevant ownership ties or additional criteria in relation to controversial weapons, please refer to the Index Provider's methodology website. Adjustments to the constituents of the Index will be reflected in the Fund in line with the rebalancing of the Index. In case of changes in the Index methodology or criteria this Supplement will be updated accordingly.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the

performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

ESG Integration

The Investment Manager aims to achieve the investment objective of the Fund while incorporating sustainability risk into the investment process. A 'sustainability risk' means an ESG event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment. If a sustainability risk associated with an investment materialises, it could lead to the loss in value of an investment.

The Investment Manager defines ESG integration as the ability to leverage the ESG factors of business practices seeking to generate opportunities and mitigate sustainability risks that contribute to the long-term performance of issuers. ESG integration can also identify opportunities for engagement to improve the company's ESG risk profile and thereby mitigate the potential negative impact of ESG issues on the company's financial performance.

The Fund is passively managed and seeks to track the performance of the Index. Sustainability risks are considered as part of the Index selection process. The Index which is stated by the Index Provider to be screened against environmental, social or governance criteria and any methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the Index Provider.

Investors should therefore make their own ethical assessment of the extent of ESG-related screening undertaken by the Index Provider prior to investing in the Fund.

The Investment Manager will track the Index in line with the limits set out in the investment policy of the Fund. The Investment Manager will use full replication based on the characteristics of the Index, the size of the portfolio sub-fund and the required tracking accuracy.

The results of the assessment of the likely impacts of the integration of sustainability risks on the returns of the Fund are that the Index methodology described herein are likely to dimmish the impact of these sustainability risks on the returns, and improve the overall risk profile, of the Funds.

Neither the Investment Manager nor the Manager monitors the screening criteria applied by the Index Provider or assesses the accuracy of the ESG-related ratings attributed by the Index Provider to each constituent.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of companies which meet the ESG criteria defined above and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hCHF acc;
- hEUR acc; and
- hGBP acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of the these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;
- hCHF dis;
- hEUR dis; and
- hGBP dis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.
The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.20% per annum of the Net Asset Value of the Class
USD acc	up to 0.20% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.20% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.23% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.23% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.23% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.23% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.23% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.23% per annum of the Net Asset Value of the Class

The establishment costs of the Fund, shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following fourteen Classes:

- USD dis;
- USD acc;
- USD UKdis;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis;

- hGBP acc;

Applications will be made for certain Classes to be listed on Listing Stock Exchanges.

The following Classes will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Period may be extended in respect of a Class provided that no subscriptions have been received at the date of the proposed extension and in accordance with the Central Bank requirement. The Initial Offer Price may be calculated based on the related Index variant as follows:

Share Class	2. **Initial Offer Price**
USD dis	3. Index value / 100
USD acc	Index value / 100
USD UKdis	Index value / 100
hCHF dis	Index value / 100
hCHF acc	Index value / 100
hEUR dis	Index value / 100
hEUR acc	Index value / 100
hGBP dis	Index value / 100
hGBP acc	Index value / 100

The closing Index value which will be published on the Nasdaq website at the web address set out in section entitled *"Publication of the Index"* will be used to calculate the Initial Offer Price. For example, where the Index Value was 1'233.73 at 23 September 2024, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 12.3373. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

The UBS Nasdaq-100 ESG Enhanced UCITS ETF is not sponsored, endorsed, sold or promoted by Nasdaq, Inc. or its affiliates (Nasdaq, with its affiliates, are referred to as the “Corporations”). The

Corporations have not passed on the legality or suitability of, or the accuracy or adequacy of descriptions and disclosures relating to, the Product. The Corporations make no representation or warranty, express or implied to the owners of the Product or any member of the public regarding the advisability of investing in securities generally or in the Product particularly, or the ability of the Nasdaq-100 Sustainable ESG Select Notional Index (Net Total Return) to track general stock market performance. The Corporations' only relationship to UBS Asset Management AG ("Licensee") is in the licensing of the Nasdaq®, and certain trade names of the Corporations and the use of the Nasdaq-100 Sustainable ESG Select Notional Index (Net Total Return) which is determined, composed and calculated by Nasdaq without regard to Licensee or the Product. Nasdaq has no obligation to take the needs of the Licensee or the owners of the Product into consideration in determining, composing or calculating the Nasdaq-100 Sustainable ESG Select Notional Index (Net Total Return). The Corporations are not responsible for and have not participated in the determination of the timing of, prices at, or quantities of the Product to be issued or in the determination or calculation of the equation by which the Product is to be converted into cash. The Corporations have no liability in connection with the administration, marketing or trading of the Product.

THE CORPORATIONS DO NOT GUARANTEE THE ACCURACY AND/OR UNINTERRUPTED CALCULATION OF NASDAQ-100 SUSTAINABLE ESG SELECT NOTIONAL INDEX (NET TOTAL RETURN) OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY LICENSEE, OWNERS OF THE PRODUCT, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE NASDAQ-100 SUSTAINABLE ESG SELECT NOTIONAL INDEX (NET TOTAL RETURN) OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE NASDAQ-100 SUSTAINABLE ESG SELECT NOTIONAL INDEX (NET TOTAL RETURN) OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE CORPORATIONS HAVE ANY LIABILITY FOR ANY LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name:	**Legal entity identifier:**
UBS Nasdaq-100 ESG Enhanced UCITS ETF	391200YOS3F8FP94OX06

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 20% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the sustainable objectives of this financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

This financial product is passively managed and tracks an index ("Index/Reference Benchmark"). The following characteristic is promoted by the financial product:

• a sustainability profile (MSCI ESG Score) that is higher than the sustainability profile of NASDAQ-100 Index® (Net Total Return) (the "Parent Benchmark")

The Reference Benchmark designated for the purpose of attaining the characteristic promoted by the financial product is the Nasdaq-100 Sustainable ESG Select Notional Index (Net Total Return).

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The above ESG characteristic is measured using the following indicators respectively:

- The MSCI ESG Score

MSCI ESG Scores are provided by MSCI ESG Research and are measured on a scale from 0 (lowest/worst score) to 10 (highest/best score). The MSCI ESG Score is based on the underlying company's exposure to industry-specific ESG risks and their ability to mitigate those risks relative to their peers. MSCI ESG Scores are also shown as a breakdown of the E, S and G scores, in reference to the different components that are considered for the environmental, social and government pillars. The components are also rated on a scale of 0-10. Based on the individual E, S and G values, a weighted average can be calculated. This is dynamic and takes into account the direct changes of all underlying results, which affect the individual E, S and G values. The MSCI ESG Score measures the most financially significant environmental, social and governance risks and opportunities of companies on the basis of the Key ESG themes. In addition, sectoral differences are taken into account through identifying key industry specific ESG issues relevant to each Key ESG Theme. This assessment of risk and opportunity makes the MSCI ESG Score a rather static measure, as the relative valuation of a sector remains constant over a longer period of time. Companies with the highest ratings are those assessed as best managing their exposures to the above mentioned Key ESG Themes and the associated issues. Each company in the product's portfolio will produce a score which will contribute to the overall MSCI ESG Score of the product's portfolio. The product's MSCI ESG Score will be higher than that of the Parent Benchmark.

Please note that while the Reference Benchmark and Parent Benchmark are provided by Nasdaq, Inc., the Investment Manager will rely on data provided by MSCI to calculate the MSCI ESG Score of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Benchmark provider.

- ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***

The financial product intends to invest at least 90% of its total net assets in securities that are constituents of the Index with a commitement to a minimum proportion of sustainable investments of 20%. The Index aims to represent the

performance of an investment strategy that, by re-weighting free-float market cap weights based upon certain ESG metrics of the Index Provider, seeks to increase exposure to those companies meeting the ESG profile and requirements as set out in the "Description of the Index" section of the Supplement (as determined by the Index Provider), while excluding companies based on various ESG criteria.

The financial product seeks to achieve a higher MSCI ESG Score than the Parent Benchmark. MSCI ESG Ratings are designed to help investors identify the environmental, social and governance (ESG) risks and opportunities of their investments and to integrate these factors into their portfolio construction.

The MSCI ESG Rating includes environmental and social pillars such as climate change, natural capital, pollution & waste, environmental opportunities, human capital, product liability, stakeholder opposition & social opportunities.

The Index incorporates the Morningstar Sustainalytics' Global Standards Screening ("**GSS**"), screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies, being incidents with negative ESG implications, involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Morningstar Sustainalytics, are ineligible for index inclusion. Companies without Morningstar Sustainalytics coverage are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies engaged (subject to revenue thresholds/additional constraints as defined by the Index Provider using data provided by Morningstar Sustainalytics and as further set out on https://indexes.nasdaqomx.com/) in any of the following business activities: adult entertainment, alcohol, arctic oil and gas exploration, cannabis, controversial weapons, fossil fuels, gambling, military weapons, nuclear power, oil and gas, oil sands, pesticides, riot control, shale energy, small arms, thermal coal and tobacco.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti‑corruption and anti‑bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

This financial product is passively managed and tracks an Index. The Index Provider implements the screens and exclusions set out above to ensure that the portion of the Index which are sustainable investments do not cause significant harm. As outlined above, the GSS monitors companies to ensure that they are aligned with the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. In addition, the value-based exclusions mentioned in the previous response consider sustainability indicators listed in Table 1 of Annex 1 of Regulation (EU) 2022/1288, such as GHG emissions, Carbon footprint, Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and exposure to controversial weapons.

		How have the indicators for adverse impacts on sustainability factors been taken into account?
		Indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index. The Index incorporate the GSS, screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles. GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Morningstar Sustainalytics, are ineligible for index inclusion. Companies without Morningstar Sustainalytics coverage are also ineligible for index inclusion until they receive such coverage. The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles. Furthermore, the financial product excludes investments in companies engaged (subject to revenue thresholds/additional constraints as defined by the Index Provider using data provided by Morningstar Sustainalytics and as further set out on https://indexes.nasdaqomx.com/) in any of the following business activities: adult entertainment, alcohol, arctic oil and gas exploration, cannabis, controversial weapons, fossil fuels, gambling, military weapons, nuclear power, oil and gas, oil sands, pesticides, riot control, shale energy, small arms, thermal coal and tobacco.
		How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
		The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

The EU Taxonomy sets out a ''do not significant harm'' principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The ''do no significant harm'' principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

This financial product is passively managed and tracks an Index and, therefore, indicators for adverse impacts on sustainability factors are taken into account by the Index provider as appropriate to the Index, as follows:

The Index incorporate the GSS, screening out on a timely basis any issuers violating the international norms and standards. The basis of the GSS assessments is the United Nations (UN) Global Compact Principles.

GSS is designed to provide timely and consistent assessments of ESG controversies involving issuers. As of each rebalancing reference date, companies classified as Non-Compliant, according to Morningstar Sustainalytics, are ineligible for index inclusion. Companies without Morningstar Sustainalytics coverage, are also ineligible for index inclusion until they receive such coverage.

The GSS monitors company involvement in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles.

Furthermore, the financial product excludes investments in companies engaged (subject to revenue thresholds/additional constraints as defined by the Index Provider using data provided by Morningstar Sustainalytics and as further set out on https://indexes.nasdaqomx.com/) in any of the following business activities: adult entertainment, alcohol, arctic oil and gas exploration, cannabis, controversial weapons, fossil fuels, gambling, military weapons, nuclear power, oil and gas, oil sands, pesticides, riot control, shale energy, small arms, thermal coal and tobacco.

☐ No

What investment strategy does this financial product follow?

This financial product promotes the characteristic(s) described in this annex through Index selection and passive asset management.

This financial product is passively managed and seeks to track the performance and the ESG profile of the Index. Sustainability characteristics and risks are considered as part of the Index selection process. The Index which is stated by the index provider to be screened against environmental, social or governance criteria and any

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

methodology used by the index provider to assess sustainability characteristics and risks of the constituents of the index can be found on the website of the index provider.

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The investment strategy of the financial product is to track the Index. The following binding element of the investment strategy is used to select the Index to attain the characteristic(s) promoted by this financial product:

Characteristic 1):

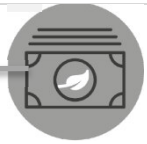
A sustainability profile (MSCI ESG Score) that is higher than the parent benchmark's sustainability profile

The calculations do not take account of cash, derivatives and unrated investment instruments.

The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all of business days' values in the quarter.

Please note that while the Reference Benchmark and Parent Benchmark are provided by Nasdaq, Inc., the Investment Manager will rely on data provided by MSCI to calculate the MSCI ESG Score of the financial product and the Parent Benchmark. As a result, there might be a discrepancy between the figures disclosed by the Investment Manager and the Reference Benchmark / Parent Benchmark provider.

- ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***



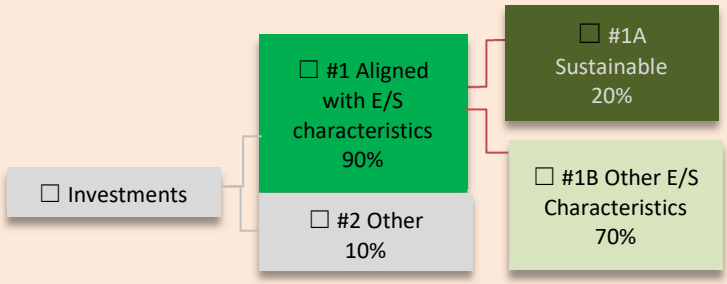
This financial product does not have a committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy.

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

- ***What is the policy to assess good governance practices of the investee companies?***

Assessment of good governance practices of the investee companies are performed by the Index Provider.

The Index Provider relies on Morningstar Sustainalytics which assess a company's corporate governance structures, practices and behaviors along six pillars that are deemed crucial for good governance, namely: Board Integrity & Quality, Board Structure, Remuneration, Shareholder Rights, Financial Reporting and Stakeholder Governance. Please refer to the "Description of the Index" section of the Supplement for further detail in respect of Morningstar Sustainalytics assessment and criteria as set out on the weblink provided under the sub-section "Index Methodology".



What is the asset allocation planned for this financial product?

Asset allocation describes the share of investments in specific assets.

The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 90%. The minimum proportion of sustainable investments of the financial product is 20%. These

sustainable investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

-The sub-category **#1A Sustainable** covers sustainable investments with environmental or social objectives.

-The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

The financial product tracks an ESG index and may replicate the performance of the index by the use of derivatives. Derivatives will only be used in case that a) the investment objective cannot be achieved by investments index components, in particular in order to reflect the performance of a currency hedge where a sub-fund replicates a currency-hedged index, or b) to generate efficiencies in gaining exposure to the constituents of the index, in particular where there are legal or practical obstacles to gaining direct access to a market to which the index refers.

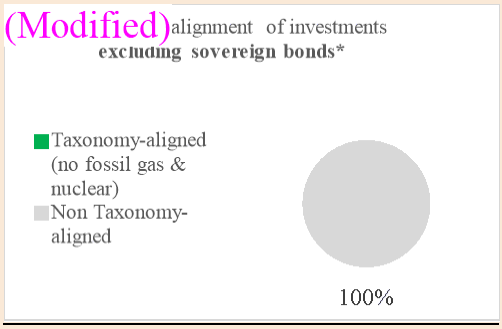
The financial product may namely enter into a range of index related swaps (excluding funded swaps) and derivative instruments (futures, forwards, currency swaps, p-notes, options, warrants and foreign exchange contracts) in order to replicate the Index.

Where the financial product uses derivatives to gain exposure to the constituents of the Index, any ESG rating or analysis as set out in the "Description of the Index" will apply to the underlying investment in attainment of the environmental or social characteristics promoted by the financial product.

To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

	The minimum extent that investments underlying this financial product are sustainable investments with an environmental objective aligned with the EU Taxonomy is 0%.
	• **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[1]?**
	☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.



Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

	• ***What is the minimum share of investments in transitional and enabling activities?***
	Not applicable
	What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?
	The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.
	What is the minimum share of socially sustainable investments?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The financial product targets a minimum proportion of sustainable investments that are not aligned with the EU Taxonomy of 20%. These investments have both environmental and social objectives however there are no specific minimum proportions for each of these categories.

What investments are included under "#2 Other", what is their purpose and are there any minimum environmental or social safeguards?

Included in "#2 Other" are cash and unrated instruments for the purpose of liquidity and portfolio risk management relative to the benchmark weighting. This category may also include securities for which relevant data, being data used by the Index Provider to assess and score investee companies, is not available, including securities which are expected to shortly be included in the Index or securities which the Investment Manager considers may provide a similar return to securities included in the Index for the purpose of achieving the financial product's investment objective.

Investments included in "#2 Other" are not considered against minimum environmental or social safeguards.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the sustainable investment objective.

The Reference Benchmark designated for the purpose of attaining characteristics promoted by the financial product is the Nasdaq-100 Sustainable ESG Select Notional Index (Net Total Return).

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristic it promotes. The Index rebalances on a quarterly basis. More details on the index methodology applied by the index provider can be found below.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

The alignment of the investment strategy with the methodology of the index is ensured on a continuous basis as the index provider rebalances the index on a regular basis and the Investment Manager will tracks the Index in line with the limits set out in the investment policy of Fund.

The financial product has initially selected the reference benchmark for its relevance to its investment strategy and the attainment of the characteristic it promotes.

The investment strategy of the fund is to track the benchmark's return and its characteristics, including ESG characteristics, as closely as reasonably possible.

The investment Manager reviews the index methodology when the product is set up and the Index provider may be contacted if the Index methodology is no longer in line with the investment strategy of the financial product.

- ***How does the designated index differ from a relevant broad market index?***

	In contrast to the broad market index, the Reference Benchmark excludes companies in notable ESG controversies related to the company's operations and/or products, possible breaches of international norms and principles such as the UN Global Compact, Organization for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights, with respect to these norms and principles and those companies engaged (subject to revenue thresholds/additional constraints as defined by the Index Provider using data provided by Morningstar Sustainalytics and as further set out on https://indexes.nasdaqomx.com/) in any of the following business activities: adult entertainment, alcohol, arctic oil and gas exploration, cannabis, controversial weapons, fossil fuels, gambling, military weapons, nuclear power, oil and gas, oil sands, pesticides, riot control, shale energy, small arms, thermal coal and tobacco. Furthermore, each security in the Reference Benchmark is assigned a weight according to its ESG Risk Score-adjusted free-float market capitalization while the broad market index considers only free-float market capitalization weighting of its components. At each semi-annual index review, one main constraint of the Reference Benchmark is to provide at least a 10% lower Portfolio-Weighted ESG Risk Score than the broad market index.
	• ***Where can the methodology used for the calculation of the designated index be found?***
	The methodology of the construction of the Index can be found in the fund supplement. https://indexes.nasdaqomx.com/Index/Overview/NDXSESN

UBS Nasdaq-100 UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 63

17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS Nasdaq-100 UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.	
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.	
Closing Date	12 November 2025, or such earlier date as the Directors and/or the Manager may determine.	
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.	
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Dealing Day.	
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.	
Index	Nasdaq-100 Notional (Net Total Return).	
Index Provider	Nasdaq, Inc.	
Initial Offer Period	9:00 am (Irish time) on 13 May 2025 to 4.30pm (Irish time) on the Closing Date.	
Investment Manager	UBS Asset Management (UK) Ltd.	
IOP	Initial Offer Period.	
IOP Settlement Date	The third Business Day after the Closing Date.	
ISIN	USD dis USD acc USD UKdis hCHF dis hCHF acc hEUR dis hEUR acc hGBP dis hGBP acc	IE0003RQ9F90 IE000SB4G4I4 IE000MRR7UQ2 IE000MNKAFF3 IE0008NJMGB5 IE0002NYMR99 IE000B3F8TI5 IE00085P9MZ3 IE000G6J9EE6

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on https://indexes.nasdaqomx.com/.
Valuation Point	10.30 pm (Dublin time) on each Business Day.

THE FUND AND SHARE CLASSES

The Fund

UBS Nasdaq-100 UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the medium term through exposure to the stock performance of US and global non-financial companies listed on the Nasdaq Stock Market via a diversified portfolio of securities as described below in the "Investment Objective and Strategy" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis;
- hGBP acc;

Description of Shares:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The investment objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the Nasdaq-100 Notional Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the Nasdaq-100 Notional Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval or the provision of reasonable notice to Shareholders (as applicable), and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed. The Fund complies with Article 6 of SFDR. As such it considers principal adverse impacts ("**PAI**") on sustainability factors due to its investment strategy and the nature of the underlying investments (SFDR Art. 7(2)). The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities (TR Art. 7).

PAI are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. The Investment Manager integrates PAI indicators in its Index selection process.

At present, the following PAI indicator is considered as part of the Index selection process:

1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":

By tracking the Index, the Investment Manager does not invest in companies involved in cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons. A company is considered to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

The annual report of the Company will include information on the principal adverse impacts on sustainability factors.

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in CHF, EUR and GBP (each a "Hedged Currency Version"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a US Dollar denominated asset in a currency other than US Dollars.

This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	Index Currency Version
hCHF dis hCHF acc	Nasdaq-100 Notional Index hedged to CHF (Net Total Return)
hEUR dis hEUR acc	Nasdaq-100 Notional Index hedged to EUR (Net Total Return)
hGBP dis hGBP acc	Nasdaq-100 Notional Index hedged to GBP (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. The Fund, for the purposes of assisting in replicating the Index, may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed “Investment Restrictions”. These limits may be availed of where exceptional market conditions apply, for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. As set out above, the Fund utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "*Tracking Accuracy*".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager’s RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index’s return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund’s volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an

investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage (calculated under the commitment approach as set out in the "Risk Management" section below) will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The RMP was prepared and submitted to the Central Bank in accordance with the Central Bank requirements.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket"

of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resold for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the Nasdaq-100 Notional Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier Nasdaq, Inc. and is denominated in USD. It includes 100 of the largest US and global non-financial companies listed on the Nasdaq Stock Market based on market capitalization. The Index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. It does not contain securities of financial companies including investment companies.

The stocks comprising the Index are screened by security type, market capitalization, industry, primary listing, liquidity and free float (meaning the proportion of shares outstanding that is deemed to be available for purchase in the public equity markets by international investors).

Index reviews

The Index reconstitutes annually (effective at market open on the first trading day following the third Friday in December) and rebalances quarterly (effective at market open on the first trading day following the third Friday in March, June, September, and December). The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index Provider should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (XNDXNNR) is available on the Nasdaq, Inc. website by selecting the Nasdaq-100 Notional Index (Net Total Return) from the list of indices:

https://www.nasdaq.com/solutions/nasdaq-global-index-policies

Publication of the Index Composition

The closing price, an additional factsheet and the composition of the Index is available on the Nasdaq, Inc. internet website by selecting the Nasdaq-100 Notional Index (Net Total Return) from the list of indices:

https://www.nasdaq.com/solutions/global-indexes/policies

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund’s global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of the 100 largest US and global non-financial companies listed on the Nasdaq Stock Market, and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hCHF acc;
- hEUR acc; and
- hGBP acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;
- hCHF dis;
- hEUR dis; and
- hGBP dis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.13% per annum of the Net Asset Value of the Class
USD acc	up to 0.13% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.13% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.16% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.16% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.16% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.16% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.16% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.16% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following fourteen Classes:

- USD dis;
- USD acc;
- USD UKdis;

- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis;
- hGBP acc;

Applications will be made for certain Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Period may be extended in respect of a Class provided that no subscriptions have been received at the date of the proposed extension. The Initial Offer Price may be calculated based on the related Index variant as follows:

Share Class	**Initial Offer Price**
USD dis	Index value / 1000
USD acc	Index value / 1000
USD UKdis	Index value / 1000
hCHF dis	Index value / 100
hCHF acc	Index value / 100
hEUR dis	Index value / 100
hEUR acc	Index value / 100
hGBP dis	Index value / 100
hGBP acc	Index value / 100

The closing Index value which will be published on the Nasdaq website at the web address set out in section entitled *"Publication of the Index"* will be used to calculate the Initial Offer Price. For example, where the Index Value was 20'351.07 at 28 October 2024, Shares in USD dis would be issued at an Initial Offer Price per Share of USD 20.3511. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.
Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "*Conversions*" in the "*Purchase and Sale*" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the

performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

The UBS Nasdaq-100 UCITS ETF is not sponsored, endorsed, sold or promoted by Nasdaq, Inc. or its affiliates (Nasdaq, with its affiliates, are referred to as the “Corporations”). The Corporations have not passed on the legality or suitability of, or the accuracy or adequacy of descriptions and disclosures relating to, the Product. The Corporations make no representation or warranty, express or implied to the owners of the Product or any member of the public regarding the advisability of investing in securities generally or in the Product particularly, or the ability of the Nasdaq-100 Notional Index (Net Total Return) to track general stock market performance. The Corporations' only relationship to UBS Asset Management AG (“Licensee”) is in the licensing of the Nasdaq®, and certain trade names of the Corporations and the use of the Nasdaq-100 Notional Index (Net Total Return) which is determined, composed and calculated by Nasdaq without regard to Licensee or the Product. Nasdaq has no obligation to take the needs of the Licensee or the owners of the Product into consideration in determining, composing or calculating the Nasdaq-100 Notional Index (Net Total Return). The Corporations are not responsible for and have not participated in the determination of the timing of, prices at, or quantities of the Product to be issued or in the determination or calculation of the equation by which the Product is to be converted into cash. The Corporations have no liability in connection with the administration, marketing or trading of the Product.

THE CORPORATIONS DO NOT GUARANTEE THE ACCURACY AND/OR UNINTERRUPTED CALCULATION OF NASDAQ-100 NOTIONAL INDEX (NET TOTAL RETURN) OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY LICENSEE, OWNERS OF THE PRODUCT, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE NASDAQ-100 NOTIONAL INDEX (NET TOTAL RETURN) OR ANY DATA INCLUDED THEREIN. THE CORPORATIONS MAKE NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE WITH RESPECT TO THE NASDAQ-100 NOTIONAL INDEX (NET TOTAL RETURN) OR ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL THE CORPORATIONS HAVE ANY LIABILITY FOR ANY LOST PROFITS OR SPECIAL, INCIDENTAL, PUNITIVE, INDIRECT, OR CONSEQUENTIAL DAMAGES, EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

UBS MSCI USA ex Mega Cap UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 64
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to the UBS MSCI USA ex Mega Cap UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	For USD Acc Shares, 14 January 2026 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	The MSCI USA Ex Mega Cap Specified Index
Index Provider	MSCI.
Initial Offer Period	For USD Acc 9.00 am (Irish time) on 15 July 2025 to 4.30 pm (Irish time) on the Closing Date. The Initial Offer Period for all other Classes is not open.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Period	The third Business Day after the Closing Date.
ISIN	USD dis IE000NPF9FB6 USD acc IE0004993469 hCHF dis IE000EJMOXG6 hCHF acc IE000PL6PKC6 hEUR dis IE000JYT5081 hEUR acc IE000T87BFL1 hGBP dis IE000DH5ADC5

	hGBP acc IE000Q6U0II1
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI USA ex Mega Cap UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the medium term through exposure to the equity market performance in the US market (excluding very large US market capitalization companies) via a diversified portfolio of securities as described below in the *"Investment Objective and Strategy"* section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis; and
- hGBP acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity market performance in the US market (excluding very large US market capitalization companies).

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI USA Ex Mega Cap Specified Index (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI USA Ex Mega Cap Specified Index and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed.

The Fund complies with Article 6 of SFDR. The Fund considers principal adverse impacts on sustainability factors due to its investment strategy and the nature of underlying investments.

Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. The Investment Manager integrates PAI indicators in its Index selection process.

At present, the following PAI indicator is considered as part of the Index selection process:
1.14 “Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)”:

By tracking the Index, the Investment Manager does not invest in companies involved in cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons. A company is considered to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

The annual report of the Company will include information on the principal adverse impacts on sustainability factors.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities (TR Art. 7).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using, at its sole discretion, either the Replication Strategy or the Sampling Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. The Replication Strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. The Sampling Strategy seeks to build a representative portfolio that provides a return comparable to that of the Index and will be used where the Investment Manager believes that the Index is too broad to replicate (i.e. the Index contains too many securities for the Fund to be able to purchase them all efficiently) and/or which contain securities which are difficult to purchase in the open markets. Consequently, where this strategy is used the Fund will typically hold only a subset of the securities which comprise the Index. The Investment Manager will seek to use the Replication Strategy where possible, depending on the characteristics of the Index and the size of the Fund. For example, it is expected that the Sampling Strategy may be used following the Fund's launch but the Investment Manager would switch to the Replication Strategy as soon as it judges that the Fund's assets have increased to a sufficient extent to make the use of the Replication Strategy viable in an efficient manner. For the avoidance of doubt, the Replication Strategy or the Sampling Strategy are mutually exclusive and the Investment Manager will use only one of them at any one time.

There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, GBP and CHF (each a "**Hedged Currency Version**") as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy and Sampling Strategy are disclosed in the "*Investment Objectives, Policy and Strategy*" section of the Prospectus.

Share Class	Index Currency Version
hCHF dis hCHF acc	MSCI USA Ex Mega Cap Specified 100% hedged to CHF Index (Net Total Return)
hEUR dis hEUR acc	MSCI USA Ex Mega Cap Specified 100% hedged to EUR Index (Net Total Return)
hGBP dis hGBP acc	MSCI USA Ex Mega Cap Specified 100% hedged to GBP Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises either the Replication Strategy or the Sampling Strategy accordingly, investment in the Fund should be considered to provide a direct

exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "*Tracking Accuracy*".
As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable.

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, i.e. the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI USA Ex Mega Cap Specified Index and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the movements of US companies excluding the largest capitalisation of US companies (consisting of the 40% largest capitalization companies within the MSCI USA Ex Mega Cap Specified Indexacross all industrial sectors which are listed on US markets.

The stocks comprising the Index are screened by size, liquidity and free float (meaning the proportion of shares outstanding that is deemed to be available for purchase in the public equity markets by international investors).

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the index sponsor should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (ticker no. 761937) is available on the MSCI internet website: https://www.msci.com/index-methodology

Additional information about the Index can be found under:

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying Index:
https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.
In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or

inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of US companies excluding the largest capitalisation of US companies (consisting of the 40% largest capitalization companies within the MSCI USA Ex Mega Cap Specified Index in the US market and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the USD acc Shares or (hedged to EUR, CHF or GBP) acc Shares. The net income attributable to the USD acc Shares and (hedged to EUR, CHF or GBP) acc Shares shall be retained within the Fund and the value of the USD acc Shares and (hedged to EUR, CHF or GBP) acc shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the USD dis Shares and (hedged to EUR, CHF or GBP) A-dis Shares in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.
Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

• Share Class	• Flat Fee
• USD dis	• up to 0.12% per annum of the Net Asset Value of the Class
• USD acc	up to 0.12% per annum of the Net Asset Value of the Class
• hCHF dis	up to 0.15% per annum of the Net Asset Value of the Class
• hCHF acc	up to 0.15% per annum of the Net Asset Value of the Class
• hEUR dis	up to 0.15% per annum of the Net Asset Value of the Class
• hEUR acc	up to 0.15% per annum of the Net Asset Value of the Class
• hGBP dis	up to 0.15% per annum of the Net Asset Value of the Class
• hGBP acc	up to 0.15% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis; and
- hGBP acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The following Classes will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 800
USD acc	Index value / 800
hCHF dis	Index value / 800
hCHF acc	Index value / 800

hEUR dis	Index value / 800
hEUR acc	Index value / 800
hGBP dis	Index value / 800
hGBP acc	Index value / 800

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 6881.29 at 4 July 2025, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 8.6016. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

a) properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares, subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituent may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

ESG Integration

The Fund is passively managed and seeks to track the performance of the Index. Sustainability risks are not considered as part of the index selection process. Therefore, sustainability risks are not systematically integrated due to the nature of the investment objective of the Fund and the Investment Manager aims to track the Index in line with the limits set out in the investment policy of the Fund.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY

AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

UBS MSCI USA Mega Cap UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 65
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to the UBS MSCI USA Mega Cap UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	For USD Acc Shares, 14 January 2026 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	The MSCI USA Mega Cap 18% Capped Specified Index.
Index Provider	MSCI.
Initial Offer Period	For USD Acc 9.00 am (Irish time) on 15 July 2025 to 4.30 pm (Irish time) on the Closing Date. The Initial Offer Period for all other Classes is not open.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Period	The third Business Day after the Closing Date.
ISIN	USD dis IE000GQ7UU06 USD acc IE000YCD1TY0 hCHF dis IE000AM1E889 hCHF acc IE000HNM1IK9 hEUR dis IE000UW4LUY3 hEUR acc IE000Y7X33M4 hGBP dis IE000YW5RWH4

	hGBP acc IE000SG69105
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI USA Mega Cap UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the medium term through exposure to the equity market performance in the US market via a diversified portfolio of securities as described below in the *"Investment Objective and Strategy"* section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis; and
- hGBP acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity market performance in the US market.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI USA Mega Cap 18% Capped Specified Index (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI USA Mega Cap 18% Capped Specified Index and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index. Any determination by the Directors that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly. The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed.

The Fund complies with Article 6 of SFDR. The Fund considers principal adverse impacts on sustainability factors due to its investment strategy and the nature of underlying investments.

Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. The Investment Manager integrates PAI indicators in its Index selection process.

At present, the following PAI indicator is considered as part of the Index selection process:
1.14 “Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)”:

By tracking the Index, the Investment Manager does not invest in companies involved in cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons. A company is considered to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

The annual report of the Company will include information on the principal adverse impacts on sustainability factors.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities (TR Art. 7).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using, at its sole discretion, either the Replication Strategy or the Sampling Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment

Restrictions set forth in the Prospectus. The Replication Strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. The Sampling Strategy seeks to build a representative portfolio that provides a return comparable to that of the Index and will be used where the Investment Manager believes that the Index is too broad to replicate (i.e. the Index contains too many securities for the Fund to be able to purchase them all efficiently) and/or which contain securities which are difficult to purchase in the open markets. Consequently, where this strategy is used the Fund will typically hold only a subset of the securities which comprise the Index. The Investment Manager will seek to use the Replication Strategy where possible, depending on the characteristics of the Index and the size of the Fund. For example, it is expected that the Sampling Strategy may be used following the Fund's launch but the Investment Manager would switch to the Replication Strategy as soon as it judges that the Fund's assets have increased to a sufficient extent to make the use of the Replication Strategy viable in an efficient manner. For the avoidance of doubt, the Replication Strategy or the Sampling Strategy are mutually exclusive and the Investment Manager will use only one of them at any one time.

There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, GBP and CHF (each a "**Hedged Currency Version**") as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy and Sampling Strategy are disclosed in the "*Investment Objectives, Policy and Strategy*" section of the Prospectus.

Share Class	Index Currency Version
hCHF dis hCHF acc	MSCI USA Mega Cap 18% Capped Specified 100% hedged to CHF Index (Net Total Return)
hEUR dis hEUR acc	MSCI USA Mega Cap 18% Capped Specified 100% hedged to EUR Index (Net Total Return)
hGBP dis hGBP acc	MSCI USA Mega Cap 18% Capped Specified 100% hedged to GBP Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises either the Replication Strategy or the Sampling Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "*Tracking Accuracy*".
As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable.

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie. the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI USA Mega Cap 18% Capped Specified Index and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the movements of the largest US capitalisation companies (consisting of the 40% largest US capitalization companies within the MSCI USA Index (Net Total Return)) across all industrial sectors which are listed on US markets.

The stocks comprising the Index are screened by size, liquidity and free float (meaning the proportion of shares outstanding that is deemed to be available for purchase in the public equity markets by international investors).

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the index sponsor should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (ticker no. 761935) is available on the MSCI internet website: https://www.msci.com/index-methodology

Additional information about the Index can be found under:

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.
In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market

disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of the largest US capitalisation companies (consisting of the 40% largest US capitalization companies within the MSCI USA Index (Net Total Return)) in the US market and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the USD acc Shares or (hedged to EUR, CHF or GBP) acc Shares. The net income attributable to the USD acc Shares and (hedged to EUR, CHF or GBP) acc Shares shall be retained within the Fund and the value of the USD acc Shares and (hedged to EUR, CHF or GBP) acc shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the USD dis Shares and (hedged to EUR, CHF or GBP) A-dis Shares in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.
Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	**Flat Fee**
USD dis	up to 0.12% per annum of the Net Asset Value of the Class
USD acc	up to 0.12% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.15% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.15% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.15% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.15% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.15% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.15% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis; and
- hGBP acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The following Classes will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	**Initial Offer Price**
USD dis	Index value / 800
USD acc	Index value / 800
hCHF dis	Index value / 800
hCHF acc	Index value / 800
hEUR dis	Index value / 800
hEUR acc	Index value / 800
hGBP dis	Index value / 800
hGBP acc	Index value / 800

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 5952.17 at 4 July 2025, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 7.4402. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

a) properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares, subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituent may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

ESG Integration

The Fund is passively managed and seeks to track the performance of the Index. Sustainability risks are not considered as part of the index selection process. Therefore, sustainability risks are not systematically integrated due to the nature of the investment objective of the Fund and the Investment Manager aims to track the Index in line with the limits set out in the investment policy of the Fund.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO

BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

UBS MSCI World ex Mega Cap UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 66
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to the UBS MSCI World ex Mega Cap UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	For USD Acc Shares, 14 January 2026 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	The MSCI World Ex Mega Cap Specified Index.
Index Provider	MSCI.
Initial Offer Period	For USD Acc 9.00 am (Irish time) on 15 July 2025 to 4.30 pm (Irish time) on the Closing Date. The Initial Offer Period for all other Classes is not open.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Period	The third Business Day after the Closing Date.
ISIN	USD dis IE000Y56IF17 USD acc IE0002THYAT9 hCHF dis IE0003ARGZM5 hCHF acc IE000ZSZYLL8 hEUR dis IE000KIZEL56 hEUR acc IE000NIEKXQ3 hGBP dis IE0009KPOUT5

	hGBP acc IE000R2XAJQ3
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI World ex Mega Cap UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the medium term through exposure to the equity market performance globally (excluding very large market capitalization companies) via a diversified portfolio of securities as described below in the *"Investment Objective and Strategy"* section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis; and
- hGBP acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled

"Primary Market" and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity market performance globally (excluding very large market capitalization companies).

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI World Ex Mega Cap Specified Index (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI World Ex Mega Cap Specified Index and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed.

The Fund complies with Article 6 of SFDR. The Fund considers principal adverse impacts on sustainability factors due to its investment strategy and the nature of underlying investments.

Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. The Investment Manager integrates PAI indicators in its Index selection process.

At present, the following PAI indicator is considered as part of the Index selection process:
1.14 “Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)”:

By tracking the Index, the Investment Manager does not invest in companies involved in cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons. A company is considered to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

The annual report of the Company will include information on the principal adverse impacts on sustainability factors.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities (TR Art. 7).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using, at its sole discretion, either the Replication Strategy or the Sampling Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. The Replication Strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. The Sampling Strategy seeks to build a representative portfolio that provides a return comparable to that of the Index and will be used where the Investment Manager believes that the Index is too broad to replicate (i.e. the Index contains too many securities for the Fund to be able to purchase them all efficiently) and/or which contain securities which are difficult to purchase in the open markets. Consequently, where this strategy is used the Fund will typically hold only a subset of the securities which comprise the Index. The Investment Manager will seek to use the Replication Strategy where possible, depending on the characteristics of the Index and the size of the Fund. For example, it is expected that the Sampling Strategy may be used following the Fund's launch but the Investment Manager would switch to the Replication Strategy as soon as it judges that the Fund's assets have increased to a sufficient extent to make the use of the Replication Strategy viable in an efficient manner. For the avoidance of doubt, the Replication Strategy or the Sampling Strategy are mutually exclusive and the Investment Manager will use only one of them at any one time.

There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, GBP and CHF (each a "**Hedged Currency Version**") as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy and Sampling Strategy are disclosed in the "*Investment Objectives, Policy and Strategy*" section of the Prospectus.

Share Class	Index Currency Version
hCHF dis hCHF acc	MSCI World Ex Mega Cap Specified 100% hedged to CHF Index (Net Total Return)
hEUR dis hEUR acc	MSCI World Ex Mega Cap Specified 100% hedged to EUR Index (Net Total Return)
hGBP dis hGBP acc	MSCI World Ex Mega Cap Specified 100% hedged to GBP Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the

interests of the Shareholders. The Fund as set above utilises either the Replication Strategy or the Sampling Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "*Tracking Accuracy*".
As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable.

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie. the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI World Ex Mega Cap Specified Index and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the movements of companies excluding the largest capitalisation companies (consisting of the 40% largest capitalization companies within the MSCI World Index (Net Total Return)) across all industrial sectors which are listed on worldwide markets.

The stocks comprising the Index are screened by size, liquidity and free float (meaning the proportion of shares outstanding that is deemed to be available for purchase in the public equity markets by international investors).

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the index sponsor should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (ticker no. 761938) is available on the MSCI internet website: https://www.msci.com/index-methodology

Additional information about the Index can be found under:
https://www.msci.com/indexes

Index Factsheet

The Index Factsheet is available on the MSCI internet website:
https://www.msci.com/equity-fact-sheet-search

Publication of the Index Value

The closing price and the composition of the Index is available on the MSCI internet website by selecting the underlying Index:
https://app2.msci.com/eqb/custom_indexes/custom_performance.html

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying Index:
https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising

from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.
In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of companies excluding the largest capitalisation companies (consisting of the 40% largest capitalization companies within the MSCI World Index (Net Total Return)) globally and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the USD acc Shares or (hedged to EUR, CHF or GBP) acc Shares. The net income attributable to the USD acc Shares and (hedged to EUR, CHF or GBP) acc Shares shall be retained within the Fund and the value of the USD acc Shares and (hedged to EUR, CHF or GBP) acc shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the USD dis Shares and (hedged to EUR, CHF or GBP) A-dis Shares in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.
Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.12% per annum of the Net Asset Value of the Class
USD acc	up to 0.12% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.15% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.15% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.15% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.15% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.15% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.15% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis; and
- hGBP acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The following Classes will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 800
USD acc	Index value / 800
hCHF dis	Index value / 800
hCHF acc	Index value / 800

hEUR dis	Index value / 800
hEUR acc	Index value / 800
hGBP dis	Index value / 800
hGBP acc	Index value / 800

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 5532.03 at 4 July 2025, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 6.9150. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

a) properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares, subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituent may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

ESG Integration

The Fund is passively managed and seeks to track the performance of the Index. Sustainability risks are not considered as part of the index selection process. Therefore, sustainability risks are not systematically integrated due to the nature of the investment objective of the Fund and the Investment Manager aims to track the Index in line with the limits set out in the investment policy of the Fund.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY

AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

UBS MSCI World Mega Cap UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 67
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to the UBS MSCI World Mega Cap UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	For USD Acc Shares, 14 January 2026 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	The MSCI World Mega Cap 18% Capped Specified Index.
Index Provider	MSCI.
Initial Offer Period	For USD Acc 9.00 am (Irish time) on 15 July 2025 to 4.30 pm (Irish time) on the Closing Date. The Initial Offer Period for all other Classes is not open.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Period	The third Business Day after the Closing Date.
ISIN	USD dis IE0006CJ9756 USD acc IE000RTQ5X23 hCHF dis IE000FAHT3T5 hCHF acc IE00086QWXH6 hEUR dis IE000EQFQTL8 hEUR acc IE000FQU2UA2 hGBP dis IE000XZ0IKI5

	hGBP acc IE000KDREKF5
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI World Mega Cap UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the medium term through exposure to the equity market performance globally via a diversified portfolio of securities as described below in the *"Investment Objective and Strategy"* section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis; and
- hGBP acc.

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity market performance globally.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the MSCI World Mega Cap 18% Capped Specified Index (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI World Mega Cap 18% Capped Specified Index and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "**Index**") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index. Any determination by the Directors that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly. The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed.

The Fund complies with Article 6 of SFDR. The Fund considers principal adverse impacts on sustainability factors due to its investment strategy and the nature of underlying investments.

Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. The Investment Manager integrates PAI indicators in its Index selection process.

At present, the following PAI indicator is considered as part of the Index selection process:
1.14 “Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)”:

By tracking the Index, the Investment Manager does not invest in companies involved in cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons. A company is considered to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

The annual report of the Company will include information on the principal adverse impacts on sustainability factors.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities (TR Art. 7).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using, at its sole discretion, either the Replication Strategy or the Sampling Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment

Restrictions set forth in the Prospectus. The Replication Strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. The Sampling Strategy seeks to build a representative portfolio that provides a return comparable to that of the Index and will be used where the Investment Manager believes that the Index is too broad to replicate (i.e. the Index contains too many securities for the Fund to be able to purchase them all efficiently) and/or which contain securities which are difficult to purchase in the open markets. Consequently, where this strategy is used the Fund will typically hold only a subset of the securities which comprise the Index. The Investment Manager will seek to use the Replication Strategy where possible, depending on the characteristics of the Index and the size of the Fund. For example, it is expected that the Sampling Strategy may be used following the Fund's launch but the Investment Manager would switch to the Replication Strategy as soon as it judges that the Fund's assets have increased to a sufficient extent to make the use of the Replication Strategy viable in an efficient manner. For the avoidance of doubt, the Replication Strategy or the Sampling Strategy are mutually exclusive and the Investment Manager will use only one of them at any one time.

There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, GBP and CHF (each a "**Hedged Currency Version**") as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy and Sampling Strategy are disclosed in the "*Investment Objectives, Policy and Strategy*" section of the Prospectus.

Share Class	Index Currency Version
hCHF dis hCHF acc	MSCI World Mega Cap 18% Capped Specified 100% hedged to CHF Index (Net Total Return)
hEUR dis hEUR acc	MSCI World Mega Cap 18% Capped Specified 100% hedged to EUR Index (Net Total Return)
hGBP dis hGBP acc	MSCI World Mega Cap 18% Capped Specified 100% hedged to GBP Index (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises either the Replication Strategy or the Sampling Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "*Tracking Accuracy*".
As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable.

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie. the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI World Mega Cap 18% Capped Specified Index and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier MSCI® and is denominated in USD. It tracks the movements of the largest capitalisation companies (consisting of the 40% largest capitalization companies within the MSCI World Index (Net Total Return)) across all industrial sectors which are listed on worldwide markets.

The stocks comprising the Index are screened by size, liquidity and free float (meaning the proportion of shares outstanding that is deemed to be available for purchase in the public equity markets by international investors).

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the index sponsor should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (ticker no. 761936) is available on the MSCI internet website: https://www.msci.com/index-methodology

Additional information about the Index can be found under:
https://www.msci.com/indexes

Index Factsheet
The Index Factsheet is available on the MSCI internet website:

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting the underlying Index:
https://www.msci.com/constituents

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be

exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.
In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk
A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the equity market performance of the largest capitalisation companies (consisting of the 40% largest capitalization companies within the MSCI World Index (Net Total Return)) globally and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the USD acc Shares or (hedged to EUR, CHF or GBP) acc Shares. The net income attributable to the USD acc Shares and (hedged to EUR, CHF or GBP) acc Shares shall be retained within the Fund and the value of the USD acc Shares and (hedged to EUR, CHF or GBP) acc shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the USD dis Shares and (hedged to EUR, CHF or GBP) A-dis Shares in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.
Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.12% per annum of the Net Asset Value of the Class
USD acc	up to 0.12% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.15% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.15% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.15% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.15% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.15% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.15% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- hCHF dis;
- hCHF acc;
- hEUR dis;
- hEUR acc;
- hGBP dis; and
- hGBP acc.

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The following Classes will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 800
USD acc	Index value / 800
hCHF dis	Index value / 800
hCHF acc	Index value / 800
hEUR dis	Index value / 800
hEUR acc	Index value / 800
hGBP dis	Index value / 800
hGBP acc	Index value / 800

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 4744.08 at 4 July 2025, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 5.9301. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

a) properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares, subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the

last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituent may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

ESG Integration

The Fund is passively managed and seeks to track the performance of the Index. Sustainability risks are not considered as part of the index selection process. Therefore, sustainability risks are not systematically integrated due to the nature of the investment objective of the Fund and the Investment Manager aims to track the Index in line with the limits set out in the investment policy of the Fund.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH

RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

UBS Nuclear Economies UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 68
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to the UBS Nuclear Economies UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	US Dollars.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	2 March 2026 or such earlier or later date as the Directors and/or the Manager may determine, provided however that such Closing Date does not exceed 6 months from the date of authorisation of the Fund.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	Solactive Global Uranium & Nuclear Economies Index (Net Total Return).
Index Provider	Solactive.
Initial Offer Period	9.00 am (Irish time) on 3 September 2025 to 5.00 pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Period	The third Business Day after the Closing Date.
ISIN	USD dis IE000MJRT6B6 USD acc IE0009TPHUV6 USD UKdis IE000GU5Y692 hEUR dis IE000A94WZV0 hEUR acc IE000EXO1FJ6 hGBP dis IE000KNNXCH6 hGBP acc IE000VH7T9B1 hCHF dis IE000G27FE35 hCHF acc IE0001G36GE8

Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the third Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.solactive.com/en.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS Nuclear Economies UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking a return on their investment over the long term through exposure to the equity market performance of companies that have business operations or exposure in the uranium industry (particularly in uranium mining, exploration of uranium, physical uranium investments and technologies related to the uranium industry).

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;
- hEUR dis;
- hEUR acc;
- hGBP dis;
- hGBP acc;
- hCHF dis;
- hCHF acc;

Description of Share Classes:

- Shares in Classes with an "A" in their name may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The investment objective of the Fund is to seek to track the performance of the Index.

Investment Policy

The investment policy of the Fund is to seek to track the performance of the Solactive Global Uranium & Nuclear Economies Index (Net Total Return) (or any other index determined by the Directors from time to time to track substantially the same market as the Solactive Global Uranium & Nuclear Economies Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track), in accordance with the Prospectus (the "Index") as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors (e.g. the funds size is close to the underlying index liquidity capacity) that the Fund should track another index at any time shall be subject to the provision of reasonable notice to Shareholders and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "Index Tracking Risk" in the "Risk Information" section of the Prospectus.

The Fund is passively managed.

The Fund complies with Article 6 of SFDR.

The Fund considers principal adverse impacts on sustainability factors due to its investment strategy and the nature of underlying investments.

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. The Investment Manager integrates PAI indicators in its Index selection process.

At present, the following PAI indicator is considered as part of the Index selection process:

1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":
By tracking the Index, the Investment Manager does not invest in companies involved in cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons. A company is considered to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company. In addition, the Fund excludes companies assessed to be violating UN Global Compact Principles, as well as companies with high and very high-risk exposure related to ESG issues, as assessed by the Index Provider and further described below.
The annual report of the Company will include information on the principal adverse impacts on sustainability factors.
The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities (TR Art. 7).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. These securities (which may include depositary receipts) shall be listed and/or traded on the exchanges and markets set out in Schedule II of the Prospectus. This strategy seeks to hold all of the securities of the

Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. There are also currency versions of the Index which are denominated in a currency other than US Dollars and hedged, including currency versions denominated in EUR, GBP, and CHF (each a "Hedged Currency Version"), as detailed in the table below. The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. This is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding an US Dollar denominated asset in a currency other than US Dollars. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

Share Class	**Index Currency Version**
hEUR dis hEUR acc	Solactive Global Uranium & Nuclear Economies Index hedged to EUR (Net Total Return)
hGBP dis hGBP acc	Solactive Global Uranium & Nuclear Economies Index hedged to GBP (Net Total Return)
hCHF dis hCHF acc	Solactive Global Uranium & Nuclear Economies Index hedged to CHF (Net Total Return)

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. The Fund may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set above utilises the Replication Strategy accordingly, investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("FDI") including currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising

differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "Use of Financial Derivative Instruments" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("RMP") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 70% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the Solactive Global Uranium & Nuclear Economies Index (Net Total Return) and is not a complete description of the Index.

General

The Index is an equity index calculated, maintained and published by international index supplier Solactive, and is denominated in USD. It measures the performance of companies that have business operations or exposure in the uranium industry (particularly in uranium mining, exploration of uranium, physical uranium investments and technologies related to the uranium industry) as defined in the Index methodology.

Selection of the Index components

The Index is composed of Pure Play and Non-Pure Play companies.

The Index defines eligible companies, including both Pure Play and Non-Pure Play entities, based on its proprietary methodology, as described below. This determination is supported annually by the Ux

Consulting Company's "Uranium Suppliers Annual". The "Uranium Suppliers Annual" offers comprehensive coverage of primary producers, domestic producers, planned producers, junior/uranium exploration companies, traders, and financial funds. It also features a quantitative risk assessment tool to compare primary producers within the uranium market.

Pure Play companies in the "Uranium Suppliers Annual" are generally those with significant business operations in the uranium industry (particularly in uranium mining and exploration for uranium). For companies that are defined as primary producers, they must additionally earn more than 50% of the previous year's revenue with the sale of uranium.

Non-Pure Play companies are generally those that conduct business operations that are related to the uranium industry (in particular uranium mining, exploration for uranium, physical uranium investments and technologies related to the uranium industry), and in which they generate large absolute revenues. Additionally, a list of nuclear component producers will be added to the eligible universe.

To be considered for inclusion in the Index, the following criteria must be met by the Pure & Non-Pure Play companies:

- A company must have a free float market capitalization of at least USD 50 million if they are not current constituents, and at least USD 30 million if they are existing constituents.
- For companies that are not current constituents, the average daily trading volume must be at least USD 500,000 over 1 and 6 months. For existing constituents, the required average daily trading volume is USD 400,000 over 1 and 6 months.
- Listed in one of the countries that are part of the Developed Market and Emerging Market as defined by the Solactive Country Classification (with the following exclusions: India, China and Taiwan) (https://www.solactive.com/documents/).
- Securities are excluded if they are headquartered in Bahamas, British Virgin Islands, Cayman Islands, Curaçao, Faroe Islands, Guernsey, Isle of Man, Liberia, Malta, Marshall Islands, or Puerto Rico.

The companies selected after completion of the above steps will be evaluated on the criteria outlined below. ESG-related exclusions are based on the data provided by RepRisk.

Controversial Weapons

- Companies linked to controversial weapon incidents, as indicated by a due dilligence score higher than 0 for specific weapon topic tags, are excluded. These tags include anti-personnel mines, automatic and semi-automatic weapons, biological weapons, chemical weapons, cluster munitions, nuclear weapons, depleted uranium munitions, and land mines, or any other weapon that violate humanitarian principles through normal use.
- Companies for which an evaluation of these exclusion criteria is not possible due to insufficient and/or missing information or data are also excluded.

UNGC Violator flag

- Companies classified as UNGC violators (red flag), indicating a high risk of violating one or more of the ten UNGC Principles, are excluded.
- Companies flagged as potential violators (yellow flag), with a potential risk of violating the principles, are excluded.
- Companies for which an evaluation of these exclusion criteria is not possible due to insufficient or missing information are also excluded.

Reputational Risk

- Companies with high and very high-risk exposure related to ESG issues, i.e. RR rating of C or D are excluded.
- Companies for which an evaluation of these exclusion criteria is not possible due to insufficient and/or missing information or data are excluded.

All eligible securities will be selected as components of the Index, while the overall number of Non-Pure Play companies and nuclear component producer companies (in aggregate) will be capped at 15, with preference given to current Index components first and then prioritized by free-float market capitalization. The selection of the Index components is fully rule-based and Solactive cannot make any discretionary decision.

Weighting of the Index components On each selection date, each Index component is assigned a weight according to free-float market capitalization subject to the following constraints to meet the UCITS requirements:

- The weight of the largest Pure Play company is capped at 30%, and all other Pure Play companies are capped at 18%. To ensure compliance with UCITS limits a 20% buffer is applied, resulting in effective portfolio caps of 24% and 14.4%, respectively.
- Non-Pure Play companies and nuclear component producer companies will be capped at a weight of 4%.

Residual weight from these caps will be redistributed pro-rata among eligible Index components, excluding those already capped if this process increases their weight above the defined weight caps.

In addition, if in-between the Index reviews, the largest company exceeds a weight of 30%, or that any other company exceeds 18%, the Index will be subject to reweighting. If the largest weighted company breaches the 30% threshold, its weight will be reduced to 24%, and the excess weight will be redistributed proportionally among the remaining companies. If the second largest weighted company also exceeds 18%, its weight will be reduced to 14.4% to meet the UCITS requirements, and the excess weight will be redistributed proportionally in an iterative manner.

Index reviews

The Index rebalances quarterly on the last business day of the third week in March, June, September and December.

The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

Monthly exclusion of ESG-related breaches

Companies within the Index are reviewed monthly to determine whether they meet the ESG-related criterion (Controversial Weapons, UNGC Violator flag and Reputational Risk). Companies which are breaching one of the criteria will be excluded from the Index by month-end.

Miscellaneous

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the Index sponsor should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (SOLNUCN) is available on the Solactive internet website

by selecting the Solactive Global Uranium & Nuclear Economies Index (Net Total Return) from the list of indices:

https://www.solactive.com/indices/

Index Factsheet

The Index Factsheet is available on the Solactive internet website by selecting the Solactive Global Uranium & Nuclear Economies Index (Net Total Return) from the list of indices. The Index Factsheet includes the weightings of the Index components:

Publication of the Index Value

The closing price, an additional factsheet and the composition of the Index is available on the Solactive internet website by selecting the Solactive Global Uranium & Nuclear Economies Index (Net Total Return) from the list of indices:

https://www.solactive.com/indices/

Publication of the Index Composition

The closing price, an additional factsheet and the composition of the Index is available on the Solactive internet website by selecting the Solactive Global Uranium & Nuclear Economies Index (Net Total Return) from the list of indices:

https://www.solactive.com/indices/

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic

sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Risk of Investing in the Mining Industry

As the Fund may invest in stocks of developed and emerging market companies (and accordingly where there is exposure to emerging market companies, such companies will be subject to the risks described under "*Custodial Risk*" and "*International Investment Risk"* in the "*Risk Information*" section of the Prospectus), companies that are involved in mining, the Fund is subject to certain risks associated with such mining

companies. Investments in mining companies may be speculative. Competitive pressures may have a significant effect on the financial condition of such companies. Mining companies are highly dependent on the price of the underlying metal or element. These prices may fluctuate substantially over short periods of time so the Fund's Share price may be more volatile than other types of investments. In particular, a drop in the price of coal, gold, silver bullion, steel or rare earth/strategic metals would particularly adversely affect the profitability of small- and medium-capitalisation mining companies and their ability to secure financing. Furthermore, companies that are only in the exploration stage are typically unable to adopt specific strategies for controlling the impact of such price changes.

Some of the companies in the Index may be early stage mining companies that are in the exploration stage only or that hold properties that might not ultimately produce these metals. Exploration and development involves significant financial risks over a significant period of time which even a combination of careful evaluation, experience and knowledge may not eliminate. Few properties which are explored are ultimately developed into producing mines. Major expenditures may be required to establish reserves by drilling and to construct mining and processing facilities at a site. In addition, many early stage miners operate at a loss and are dependent on securing equity and/or debt financing, which might be more difficult to secure for an early stage mining company than for a more established counterpart.

Risk of Investing in the Uranium Industry

Securities held in the Fund's portfolio are likely to be significantly impacted by competitive pressures within the uranium mining industry and fluctuations in the price of uranium. The price of uranium can be influenced by various factors such as changes in inflation rates, interest rates, monetary policy, economic conditions, and political stability. Given that the price of uranium may fluctuate substantially over short periods of time, the Fund's Share price could exhibit greater volatility compared to other types of investments. Additionally, companies engaged in uranium mining may be considerably affected by import controls, global competition, environmental liability, resource depletion, and mandatory safety and pollution control expenditures. The primary demand for uranium originates from the nuclear energy sector, which utilizes uranium as fuel for nuclear power plants. The demand for nuclear energy is subject to significant risks including incidents and accidents, security breaches, malicious acts or terrorism, air crashes, natural disasters (such as floods or earthquakes), equipment malfunctions, or mishandling during storage, transportation, treatment, or conditioning of substances and nuclear materials.

Risk of Investing in Small- and Medium-Capitalisation Companies

The securities of small- and medium-capitalisation companies may be more volatile and less liquid than the securities of large companies. As securities of small- and medium-capitalisation companies may experience more market price volatility than securities of larger companies, the net asset value of any fund which invests in small- and medium-capitalisation companies (such as the Fund) may reflect this volatility. Small- and medium-capitalisation companies, when compared with larger companies, may have a shorter history of operations, fewer financial resources, less competitive strength, may have a less diversified product line, may be more susceptible to market pressure and may have a smaller market for their securities. Investment in small- and medium-capitalisation companies may involve comparatively higher investment costs and accordingly investment in the Fund should be viewed as a long term investment. The Fund may however dispose of an investment made by it within a relatively short period of time, for example, to meet requests for redemption of Shares.

ESG Integration

The Fund is passively managed and seeks to track the performance of the Index. Sustainability risks are not considered as part of the index selection process. Therefore, sustainability risks are not systematically integrated due to the nature of the investment objective of the Fund and the Investment Manager aims to track the Index in line with the limits set out in the investment policy of the Fund.

Sustainability Risks

A 'sustainability risk' means an ESG event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of an investment. If a sustainability risk associated with an investment materialises, it could lead to the loss in value of an investment.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to take an exposure to the equity market performance of companies whose primary business is the production and development of nuclear technology (including Uranium mining and enrichment) and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

Accumulating Share Classes

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;
- hEUR acc;
- hGBP acc; and
- hCHF acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

Distributing Share Classes

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;
- hEUR dis;
- hGBP dis; and
- hCHF dis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.49% per annum of the Net Asset Value of the Class
USD acc	up to 0.49% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.49% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.52% per annum of the Net Asset Value of the Class
hEUR acc	up to 0.52% per annum of the Net Asset Value of the Class
hGBP dis	up to 0.52% per annum of the Net Asset Value of the Class
hGBP acc	up to 0.52% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.52% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.52% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis;
- USD acc;
- USD UKdis;
- hEUR dis;

- hEUR acc;
- hGBP dis;
- hGBP acc;
- hCHF dis;
- hCHF acc;

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The following Classes will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Period
USD dis	Index value / 200
USD acc	Index value / 200
USD UKdis	Index value / 200
hEUR dis	Index value / 200
hEUR acc	Index value / 200
hGBP dis	Index value / 200
hGBP acc	Index value / 200
hCHF dis	Index value / 200
hCHF acc	Index value / 200

The closing Index value which will be published on the Solactive website at the web address set out in section entitled *"Publication of the Index"* will be used to calculate the Initial Offer Price. For example, where the Index Value was 1'725.04 on 30 April 2025, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 8.6252. The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

c) properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
d) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

c) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior

to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and

d) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within three Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

RISK FACTORS

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituent may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, PROMOTED, SOLD OR SUPPORTED IN ANY OTHER MANNER BY SOLACTIVE AG NOR DOES SOLACTIVE AG OFFER ANY EXPRESS OR IMPLICIT GUARANTEE OR ASSURANCE EITHER WITH REGARD TO THE RESULTS OF USING THE INDEX AND/OR INDEX TRADE MARK OR THE INDEX PRICE AT ANY TIME OR IN ANY OTHER RESPECT. THE INDEX IS CALCULATED AND PUBLISHED BY SOLACTIVE AG. SOLACTIVE AG USES ITS BEST EFFORTS TO ENSURE THAT THE INDEX IS CALCULATED CORRECTLY. IRRESPECTIVE OF ITS OBLIGATIONS TOWARDS THE ISSUER, SOLACTIVE AG HAS NO OBLIGATION TO POINT OUT ERRORS IN THE INDEX TO THIRD PARTIES INCLUDING BUT NOT LIMITED TO INVESTORS AND/OR FINANCIAL INTERMEDIARIES OF THE FINANCIAL INSTRUMENT. NEITHER PUBLICATION OF THE INDEX BY SOLACTIVE AG NOR THE LICENSING OF THE INDEX OR INDEX TRADE MARK FOR THE PURPOSE OF USE IN CONNECTION WITH THE FINANCIAL INSTRUMENT CONSTITUTES A RECOMMENDATION BY SOLACTIVE AG TO

INVEST CAPITAL IN SAID FINANCIAL INSTRUMENT NOR DOES IT IN ANY WAY REPRESENT AN ASSURANCE OR OPINION OF SOLACTIVE AG WITH REGARD TO ANY INVESTMENT IN THIS FINANCIAL INSTRUMENT.

UBS Global Equity Income Plus UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 71
25 August 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS Global Equity Income Plus UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

In addition to investing in transferable securities and/or units of collective investment schemes, it is the intention of the Company to invest principally on behalf of the Fund in financial derivative instruments ("FDIs") for investment and efficient portfolio management purposes, where applicable.

Certain risks attached to investments in FDIs are set out in the Prospectus under the section headed "Risk Information".

An investment in the sub-fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	USD
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange in the main countries in which the Fund invests are open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	25 February 2027 or such earlier or later date as the Directors and/or the Manager may determine.
Dealing Day	Every Business Day and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Initial Offer Period	9.00 am (Irish time) on 26 August 2026 to 4.30 pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Period	The third Business Day after the Closing Date.
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.
Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Money Market Instruments	Instruments normally dealt in on the money markets which are liquid, have a value which can be accurately determined at any time and include, but are not limited to, government debt, commercial paper, bankers acceptances, certificates of deposit and other short-term debt securities.

Settlement Date	At the latest, on the second Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etf.

THE FUND AND SHARE CLASSES

The Fund

UBS Global Equity Income Plus UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking exposure to equity in both developed and emerging markets, as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis
- USD acc
- hEUR dis
- hEUR acc
- hCHF dis
- hCHF acc

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The Fund's primary investment objective is to seek total returns in excess of the Benchmark and to generate an income in excess of the Benchmark (after the deduction of fees and expenses).

There is no guarantee that the Fund will achieve its investment objective and, subject to market conditions, outperformance of the Benchmark may be volatile at times.

Investment Policy

In order to achieve its Investment Objective, the Fund will invest directly or indirectly in equity and other equity interests of small, medium and large-cap companies in developed and emerging markets worldwide, including China. Investments will be made directly or indirectly through other collective investment schemes or financial derivative instruments ("**FDI**").

Any exposure to investments in emerging markets (including China) will be limited to 20% of the Net Asset Value of the Fund. The Fund will not invest in investments which are under an active sanction adopted by the European Union.

With the exception of permitted investments in unlisted securities, the Fund's securities will be restricted to securities listed or traded on a Recognised Market.

The Fund is actively managed in reference to a benchmark. The Investment Manager uses MSCI World Index (Net Total Return) (the "**Benchmark**") for performance evaluation, sustainability profile comparison and risk management purposes. The Investment Manager can build the portfolio at their discretion and, concerning the selection of instruments and their weightings, is not bound to the Benchmark. Accordingly, the portfolio may deviate from the Benchmark with regards to allocations.

China A Shares

The Fund may invest in Chinese A shares traded via Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect ("**Stock Connect**").

Chinese A shares are renminbi-denominated A shares of companies domiciled in mainland China. These are traded on Chinese stock exchanges such as the Shanghai Stock Exchange and the Shenzhen Stock Exchange.

Stock Connect is a cross-boundary investment channel that connects the Shanghai and Shenzhen Stock Exchanges with the Hong Kong Stock Exchange. The aim of Stock Connect is for foreign investors to achieve stock market access to the People's Republic of China ("**PRC**") via Hong Kong.

The Shanghai-Hong Kong Stock Connect comprises a Northbound Shanghai Trading Link and a Southbound Hong Kong Trading Link. Under the Northbound Shanghai Trading Link, Hong Kong and overseas investors (including the Fund), through their Hong Kong brokers, sub-custodians and a securities trading service company established by the Stock Exchange of Hong Kong ("**SEHK**"), may be able to trade eligible China A-Shares listed on the Shanghai Stock Exchange ("**SSE Securities**") by routing orders to the Shanghai Stock Exchange. Under the Southbound Hong Kong Trading Link under Shanghai-Hong Kong Stock Connect, investors in the PRC will be able to trade certain stocks listed on the SEHK.

The Shenzhen-Hong Kong Stock Connect comprises a Northbound Shenzhen Trading Link and a Southbound Hong Kong Trading Link. Under the Northbound Shenzhen Trading Link, Hong Kong and overseas investors (including the Fund), through their Hong Kong brokers, sub-custodians and a securities trading service company established by SEHK, may be able to trade eligible China A-Shares listed on the Shenzhen Stock Exchange ("**SZSE Securities**") by routing orders to the Shenzhen Stock Exchange. Under the Southbound Hong Kong Trading Link under Shenzhen-Hong Kong Stock Connect, investors in PRC will be able to trade certain stocks listed on the SEHK.

In accordance with the UCITS requirements and the conditions imposed by the Central Bank, the Depositary shall provide for the safekeeping of the Fund's assets in the PRC through its global custody network. Such safekeeping requires the Depositary to retain control over the SSE Securities and SZSE Securities at all times.

Ancillary Liquid Assets

The Fund may hold up to 100% of Net Assets in cash and cash equivalent assets in circumstances where it is necessary to support derivative exposure, where market conditions may require a defensive investment strategy, pending reinvestment, to support redemptions and payment of expenses or in any other extraordinary market circumstances such as a market crash or major crises which in the reasonable opinion of the Investment Manager would be likely to have a significant detrimental effect on the performance of the Fund. The cash equivalent assets in which the Fund may invest include Money Market Instruments, in accordance with the limits outlined in chapter "Investment Restrictions" of the Prospectus.

FDI

The Fund may, for investment purposes or for the purpose of efficient portfolio management, where disclosed in the RMP (defined below) and in accordance with the conditions and limits imposed by the Central Bank, use the following financial derivative instruments ("**FDI**") currency forwards, swaps, options, warrants, and futures. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. While the Fund will be leveraged (calculated under the relative VaR approach as set out in the "Risk Management" section below) as a result of its investments in FDI, such leverage will not exceed 200% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts and/or options to either create exposure or reduce exposure to various securities or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The Manager will only adopt an RMP which has been provided to the Central Bank.

Investment Strategy

The investment universe of the Fund is broad and covers global equity and other equity interests of small, medium and large-cap companies in developed and emerging markets worldwide, including China as determined by the Investment Manager.

The Fund will invest directly or indirectly (or a combination of both) in such equities and other equity interests, as further detailed below. Direct or indirect exposure to such equities and other equity interests shall be determined at the sole discretion of the Investment Manager in order to seek to achieve the Fund's investment objective, having regard to prevailing market conditions, relative value considerations, liquidity, cost efficiency, and such other factors as the Investment Manager may deem relevant at the relevant time.

Direct Investment

From the broad universe, the Investment Manager will utilize its proprietary systematic process to identify companies that offer attractive total yields on a sustainable and/or persistent basis. Total yield is the combination of dividend yield and share buyback yield. From the broad investment universe, the

Investment Manager employs a proprietary quantitative stock selection model to identify companies that have attractive total yields and, in the Investment Manager's view, strong quality characteristics (i.e., measures such as return on equity, dividend payout ratio, or debt to equity ratio amongst other items) which could support the future return of capital to shareholders. The Investment Manager's systematic portfolio construction process also integrates risk controls to ensure diversification across sectors, geographies, risk factor exposures, and market capitalizations. Risk controls are integrated through the Investment Manager's proprietary portfolio management system which assesses fundamental market data, such as commercial risk models and proprietary alpha signs, to allow the Investment Manager to understand ex-ante portfolio volatility and tracking error and to monitor the Fund's exposures to individual stocks, sectors, and geographies amongst other metrics.

Throughout the investment process, the Investment Manager continually monitors portfolio holdings, rebalances as necessary, and performs ongoing risk assessments. This dynamic approach ensures that the portfolio remains aligned with the Fund's objectives of delivering attractive, consistent yields. The proprietary quantitative model is periodically reviewed and enhanced by the Investment Manager to incorporate new data, market trends, and evolving best practices, further strengthening the Investment Manager's ability to select high-quality, yield-generating equities.

For the avoidance of doubt, the Investment Manager is solely responsible for placing trades for the Fund following the identification of potential investments through its proprietary systematic process.

Indirect Investment

In addition, the Investment Manager may employ a derivatives strategy using options and/or futures. This strategy is primarily designed to generate income through the sale of equity call options. It may also utilise futures to help manage variations in market exposure arising from the written call options. The derivatives strategy may contribute to the Fund's overall volatility.

By selling call options, the Fund receives option premia from the option buyer in exchange for granting that buyer the right, for a specified tenor, to purchase exposure to the performance of the underlying asset at a predetermined strike price.

During times of market stress or heightened volatility, the derivatives strategy may increase the Fund's volatility. Investors should also be aware that losses arising from the derivatives strategy may offset gains generated by increases in the value of the Fund's direct equity portfolio.

The Investment Manager will select option and futures positions based on its assessment, including market risks, attractiveness, liquidity, and other factors. These assessments draw on the expertise of the Investment Manager's internal investment team as well as external market data sources.

The Investment Manager will employ this derivatives strategy where, in its sole discretion, it determines such indirect exposure offers a more efficient means of implementing the investment strategy than would otherwise be obtained by direct investment alone.

ESG Integration

The final step of constructing the Fund's portfolio is the integration of sustainability risks into the investment process ("ESG integration").

Such ESG integration is driven by considering financially material ESG factors as part of the investment process. Consideration of financial materiality ensures that the Investment Manager focuses on ESG risks and opportunities that can impact the financial performance of the corporate / non-corporate issuer and, by extension, investment returns. The analysis of material ESG factors can include many different aspects, such as the carbon footprint, health and well-being, human rights, supply chain management, fair customer treatment and governance.

This analysis is captured in a qualitative ESG assessment by the Investment Manager that leverages internal research. The Investment Manager also accesses quantitative ESG data that combines multiple sources and provides information on ESG risks and opportunities.

In the absence of a qualitative ESG assessment, which may occur for non-corporate issuers among others, the Investment Manager considers quantitative inputs.

The ESG integration process does not mitigate exposure to ESG risks altogether as the Investment Manager evaluates all information and makes decisions that primarily aim at maximizing financial performance.

Through its investments, the Fund seeks a lower carbon profile and investments that better manage their material environmental, social, and governance (ESG) risk and opportunities. The Fund complies with Article 8 of SFDR by promoting environmental and/or social characteristics of having a better sustainability profile measured by the ESG Score and lower scope 1 and 2 weighted carbon intensity (WACI) than the reference benchmark. Further information related to these environmental and/or social characteristics is available in Annex to this document, including with respect to the minimum proportion of the investments used to meet those promoted characteristics and with respect to the remaining proportion of investments not used to meet those promoted characteristics (namely cash, derivatives and 'unrated' securities for which data needed for the measurement of attainment of environmental or social characteristics is not available).

The results of the assessment of the likely impacts of the integration of these sustainable and ESG characteristics or risks on the returns of the Fund are that the investment approach described herein is likely to diminish the impact of these sustainable and ESG risks on the returns, and improve the overall risk profile, of the Fund.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as over the counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

Options

Options involve a contract for the right, but not the obligation, to buy or sell a specified asset at a fixed price by a specified date in the future. The Fund can use options to achieve economic exposure to an asset similar to buying or selling the asset itself but with a different non linear payoff profile. In relation to purchasing or selling put or call options, for instance, the Fund can obtain non linear exposure to upside (long call or short put options) or downside (long put short call options) in the price of the underlying asset.

Swap Agreements

The Fund may enter into swap agreements (including total return swaps) with respect to various underlyings, including currencies, interest rates, securities, collective investment schemes and indices. A swap is a contract under which one party agrees to provide the other party with something, for example a payment at an agreed rate, in exchange for receiving something from the other party, for example the performance of a specified asset or basket of assets. The Fund may use these techniques for example to protect against changes in interest rates and currency exchange rates. The Fund may also use these techniques to take positions in or protect against changes in securities indices and specific securities prices.

In respect of currencies, the Fund may utilise currency swap contracts where the Fund may exchange currencies at a fixed rate of exchange for currencies at a floating rate of exchange or vice versa. These contracts allow a Fund to manage its exposures to currencies in which it holds investment but also to obtain opportunistic exposure to currencies. For these instruments, the Fund's return is based on the movement of currency exchange rates relative to a fixed currency amount agreed by the parties.

In respect of interest rates, a Fund may utilise interest rate swap contracts where the Fund may exchange a fixed rate of interest against a variable rate (or the other way round). These contracts allow a Fund to manage its interest rate exposures. For these instruments, the Fund's return is based on the movement of interest rates relative to a fixed rate agreed by the parties. The Fund may also utilise caps and floors, which are interest rate swap contracts in which the return is based only on the positive (in the case of a cap) or negative (in the case of a floor) movement of interest rates relative to a fixed rate agreed by the parties.

In respect of securities and securities indices a Fund may utilise total return swap contracts where the Fund may exchange interest rate cash flows for cash flows based on the return of, for example, an equity or fixed income instrument or a securities index. These contracts allow a Fund to manage its exposures to certain securities or securities indices. For these instruments, the Fund's return is based on the movement of interest rates relative to the return on the relevant security or index. The Fund may also use swaps in which the Fund's return is relative to the volatility of price of the relevant security (a volatility swap, which is a forward contract whose underlying is the volatility of a given product. This is a pure volatility instrument allowing investors to speculate solely upon the movement of a stock's volatility without the influence of its price) or to the variance (the square of the volatility) (a variance swap which is a type of volatility swap where the payout is linear to variance rather than volatility, with the result that the payout will rise at a higher rate than volatility).

Where a Fund enters into total return swaps (or invests in other financial derivative instruments with the same characteristics) it will only do so on behalf of the Fund with counterparties that meet the eligibility criteria described in the "*USE OF SECURITIES FINANCING TRANSACTIONS*" section of the Prospectus. Subject to compliance with those conditions, the Investment Manager has full discretion as to the appointment of counterparties when entering into total return swaps in furtherance of the Fund's investment objective and policies. For the avoidance of doubt, the role of any swap counterparty in respect of the Fund's investment exposure only involves implementing the set of rules of the swap transaction, and this set of rules is agreed in advance with the Investment Manager and does not allow the exercise of any discretion by the counterparty.

A credit default swap ("CDS") is a derivative instrument which is a mechanism for transferring and transforming credit risk between purchaser and seller. The protection buyer purchases protection from the protection seller for losses that might be incurred as a result of a default or other credit event in relation to an underlying security. The protection buyer pays a premium for the protection and the protection seller agrees to make a payment to compensate the protection buyer for losses incurred upon the occurrence of any one of a number of possible specified credit events, as set out in the CDS agreement. In relation to the use of CDS, the Fund may be a protection buyer and/or a protection seller. A credit event is an event linked to the deteriorating credit worthiness of an underlying reference entity in a credit derivative. The occurrence of a credit event usually triggers full or partial termination of the transaction and a payment from protection seller to protection buyer. Credit events include, but are not limited to, bankruptcy, failure to pay, restructuring, and obligation default.

The maximum proportion of the Fund's total assets that can be subject to total return swaps is 50%.

The expected proportion of the Fund's total assets that can be subject to total return swaps should be in the range of 0% and 20%.

HEDGING

Share Classes denominated in a currency other than the Base Currency and which have "h" at the beginning of their name may (but are not obliged to) seek to minimise the effect of exchange rate fluctuations between the currency exposures of the Fund's assets and the currency of the Share Class. The Investment Manager will typically employ this approach when the Fund's assets are neither denominated in, nor hedged back to, the Base Currency. In these Share Classes, the currency exposures are systematically hedged back to the currency of the relevant Share Class in proportion to the relevant Share Class's share of the Net Asset Value of the Fund, unless for specific currencies it is impractical or not cost effective to hedge the exposure. For these Share Classes, the Shareholder will not benefit or suffer loss caused by exchange rate fluctuations between the currencies of the Fund's assets being hedged and the currency of the relevant Share Class, whereas Shares in the Base Currency will.

SECURITIES LENDING, REPURCHASE AND REVERSE REPURCHASE AGREEMENTS

The Company will not enter into any securities lending, repurchase or reverse repurchase agreements in respect of the Fund.

RISK MANAGEMENT

As disclosed above, the Fund may use FDI for investment purposes or for the purposes of efficient portfolio management. The Investment Manager has adopted a value-at-risk ("**VaR**") approach (carried out pursuant to the applicable laws and regulatory provisions). Pursuant to the ESMA guidelines on ETFs and other UCITS issues, the risk management procedure will also be applied within the scope of collateral management and the techniques and instruments for the efficient management of the portfolio.

The leverage for UCITS using the VaR approach is defined as the "sum of the notionals" of the derivatives used by the Fund. Shareholders should note that this definition may lead to artificially high leverage that does not reflect the actual economic risk due to, *inter alia*, the following reasons:

- Regardless of whether a derivative is used for investment or hedging purposes, it increases the leverage amount calculated according to the sum-of-notionals approach;

- The duration of interest rate derivatives is not taken into account. A consequence of this is that short-term interest rate derivatives generate the same leverage as long-term interest rate derivatives, even though short-term ones generate a considerably lower economic risk.

The economic risk of UCITS pursuant to the VaR approach is determined as part of a UCITS risk management process. This contains (among other things) restrictions on the VaR, which includes the market risk of all positions, including derivatives. The VaR is supplemented by a comprehensive stress-test programme.

The average leverage for the Fund using the VaR approach is expected to be within the range stated in the table below. Leverage is expressed as a ratio between the sum of the notionals and the net asset value of the Fund. Greater leverage amounts may be attained for the Fund, under certain circumstances.

Fund	Global risk calculation method	Expected range of leverage	Reference portfolio
UBS (Irl) ETF plc - UBS Global Equity Income Plus UCITS ETF	Relative VaR approach	0–2	MSCI World Index (Net Total Return)

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

Collateral Management Risk

The Company may post and receive collateral as set out in the "Collateral Policy" section of the Prospectus. Collateral posted may be subject to operational, liquidity, counterparty, custody and legal risks. Please see the sections entitled "Risk Information - Securities Financing Transactions", "Repurchase Agreements" and "Collateral Risk" of the Prospectus, which risks apply to the movement of collateral.

Stock Connect Risks

There are a number of restrictions that apply to Stock Connect trading that could affect the Fund's investment and returns:

Suspension Risk - both the Stock Exchange of Hong Kong (SEHK) and Shanghai Stock Exchange (SSE) reserve the right to suspend trading if necessary for ensuring an orderly and fair market and managing risks prudently which could adversely affect the Funds ability to access the PRC market.

Differences in Trading Day - investors should be aware that the Stock Connect will only operate on days when both PRC and Hong Kong markets are open for trading and when banks in both markets are open on the corresponding settlement days. The Fund may, therefore, be subject to a risk of price fluctuations in China A-Shares in respect of the period during which Stock Connect is not trading.

Clearing and Settlement Risk - the Hong Kong Securities Clearing Company Limited (HKSCC) and China Securities Depositary and Clearing Corporation Limited (ChinaClear) have established clearing links and each is a participant of each other to facilitate clearing and settlement of cross-boundary trades. ChinaClear has established a risk management framework and measures that are approved and supervised by the China Securities Regulatory Commission. The chances of ChinaClear default are considered to be remote. Should the remote event of ChinaClear default occur and ChinaClear be declared as a defaulter, HKSCC will in good faith, seek recovery of the outstanding stocks and monies from ChinaClear through available legal channels or through ChinaClear's liquidation. In that event, the Fund may suffer delay in the recovery process or may not be able to fully recover its losses from ChinaClear.

Regulatory Risk - the current regulations relating to Stock Connect are untested and there is no certainty as to how they will be applied. Moreover, the current regulations are subject to change. There can be no assurance that the Stock Connect will not be abolished. The Fund may be adversely affected as a result of these changes.

Legal/Beneficial Ownership - where shares are purchased through Stock Connect, the Fund would only have a contractual claim against HKSCC for the rights and interests in such shares. The Fund does not have any proprietary rights. Technically, as the PRC legal system does not recognise the concept of beneficial ownership, the PRC authorities recognise HKSCC as the legal owner of such shares and not the Fund. Because Stock Connect is in its early stages, additional developments are likely. It is unclear whether or how such developments may affect a Fund's investments or returns. Additionally, the application and interpretation of the laws and regulations of Hong Kong and the PRC are uncertain, as are the rules, policies and guidelines published or applied by relevant regulators and exchanges in respect of the Stock Connect program. These may have a negative impact on the Fund's investments and returns.

Operational Risk - the Stock Connect provides a new channel for investors from Hong Kong and overseas to access the PRC's stock market directly. Market participants are able to participate in this programme subject to meeting certain information technology capacity, risk management and other requirements as may be specified by the relevant exchange and/or clearing house. Market participants may need to address issues arising from these differences (as well as the fact that the securities regime and legal systems of the PRC and Hong Kong differ significantly) on an ongoing basis.

Front-end Monitoring Risk - PRC regulations require that before an investor sells any share, there should be sufficient shares in the account; otherwise SSE will reject the sell order concerned. SEHK will carry out pre-trade checking on China A-Shares sell orders of its participants (i.e. the stock brokers) to ensure there is no over-selling.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a long term time horizon who want to take an exposure to the global equity market including ESG considerations and are prepared to accept the risks associated with an investment of this type. Based on the structure and composition of

the portfolio, the volatility of the Fund, which may vary from time to time, is generally expected to be low to medium.

DIVIDEND POLICY

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc
- hEUR acc
- hCHF acc

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis
- hEUR dis
- hCHF dis

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD dis	up to 0.30% per annum of the Net Asset Value of the Class
USD acc	up to 0.30% per annum of the Net Asset Value of the Class

Share Class	Flat Fee
hEUR acc	up to 0.33% per annum of the Net Asset Value of the Class
hCHF acc	up to 0.33% per annum of the Net Asset Value of the Class
hEUR dis	up to 0.33% per annum of the Net Asset Value of the Class
hCHF dis	up to 0.33% per annum of the Net Asset Value of the Class

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- hEUR acc
- hCHF acc
- hEUR dis
- hCHF dis

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The following Classes will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD acc	USD 10
USD dis	USD 10
hEUR acc	EUR 10
hCHF acc	CHF 10
hEUR dis	EUR 10
hCHF dis	CHF 10

In order to receive Shares at the close of the Initial Offer Period:

a) properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares, subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within two Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the “Conversions” in the “Purchase and Sale” section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the “*Determination of Net Asset Value*” section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

PORTFOLIO TRANSPARENCY

Information on the exact composition of the Fund's portfolio on each Dealing Day is available on the Website.

In addition, on each Dealing Day a statement prepared by the Administrator will be published by the Company on (or through a link on) the Website disclosing each of the securities and the number thereof which the Company will expect to be delivered to it by an Authorised Participant when subscribing for Shares.

ANNEX II

Pre-contractual disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph of Regulation (EU) 2020/852

Product name: UBS Global Equity Income Plus UCITS ETF

Legal entity identifier:

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It will make a minimum of **sustainable investments with an environmental objective:** ___ %	☒ It **promotes Environmental/Social (E/S) characteristics** and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 40% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It will make a minimum of **sustainable investments with a social objective:** _____ %	☐ It promotes E/S characteristics, but **will not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What environmental and/or social characteristics are promoted by this financial product?

The following characteristics are promoted by the financial product:

1) Invest in companies that better manage their material environmental, social and governance risks and opportunities, including with respect to the factors set out below as *sustainability indicators*, by seeking to achieve a sustainability profile (measured using the weighted average ESG Score) that is higher than the Benchmark's sustainability profile.

2) A lower carbon profile by seeking to achieve a lower Scope 1 and 2 Weighted Average Carbon Intensity (WACI) than the Benchmark.

The Benchmark is a broad market index which does not assess or include constituents according to environmental and/or social characteristics and therefore is not intended to be consistent with the characteristics promoted by the financial product. No ESG reference benchmark has been designated for the purpose of attaining the characteristics promoted by the financial product.

- ***What sustainability indicators are used to measure the attainment of each of the environmental or social characteristics promoted by this financial product?***

The above characteristics are measured using the following indicators respectively:

Characteristic 1):

The sustainability profile is measured using the weighted average ESG score. The Investment Manager assesses the performance of the relevant companies with reference to environmental, social and governance (ESG) aspects and uses an ESG score for each investment in the Fund and in the Benchmark. These ESG aspects relate to the main areas in which the companies operate and their effectiveness in managing ESG risks. Environmental and social factors used to in calculating a company's ESG score to measure that company's better management of material environmental, social and governance risks and opportunities can include the following elements:

Environmental risk management, climate change, natural resource usage, pollution and waste management, human capital, workforce and supply-chain practices, product/customer responsibility, board composition, business ethics and shareholder rights.

The individual investments in the Fund and the Benchmark have an ESG score (on a scale of 0-10, with 10 having the best sustainability profile). These scores are used to measure the weighted average sustainability profile (ESG Score) of the Fund compared to that of the Benchmark.

	The weighted average ESG score of the Fund is calculated by multiplying each investment's ESG score by its weight in the Fund and combining. Similarly, the weighted average ESG score of the Benchmark is calculated by multiplying each investment's ESG score by its weight in the Benchmark and combining. The characteristic is achieved where the weighted average ESG score of the Fund is higher than the weighted average ESG score of the Benchmark. The degree to which the characteristic is achieved may vary over time and no minimum threshold improvement is targeted. Characteristic 2): Scope 1 and 2 Weighted Average Carbon Intensity (WACI): - Scope 1 refers to direct carbon emissions and therefore includes all direct greenhouse gas emissions from owned or controlled sources of the relevant entity or issuer. - Scope 2 refers to indirect carbon emissions and therefore includes greenhouse gas emissions from the generation of electricity, thermal energy and/or steam that is consumed by the relevant entity or issuer. Carbon intensity for an individual company is the sum of that company's Scope 1 + Scope 2 carbon emissions divided by sales. The WACI of the Fund is calculated by multiplying each individual company's carbon intensity by its weight in the Fund and combining. Similarly, the WACI of the Benchmark is calculated by multiplying each individual company's carbon intensity by its weight in the Benchmark and combining. The characteristic is achieved where the WACI of the Fund is lower than the WACI of the Benchmark. The degree to which the characteristic is achieved may vary over time and no minimum threshold is targeted.
	● ***What are the objectives of the sustainable investments that the financial product partially intends to make and how does the sustainable investment contribute to such objectives?***
	The objectives of the sustainable investments that the financial product partially intends to make is to contribute to an environmental and/or social objective, as measured, for example, by key resource efficiency indicators: 1) Positive environmental impacts considered as part of the integration of the first environmental characteristic promoted by the Fund to achieve a higher sustainability profile than the Benchmark, which may relate to themes such as climate change, natural resource usage, pollution and waste management, human capital and corporate governance; and 2) Carbon emissions reduction targets considered as part of the integration of the second characteristic promoted by the Fund to achieve a lower WACI score than the Benchmark, which supports investors seeking to achieve a range of objectives,

		including measuring and reporting on climate risk exposure, implementing low carbon and fossil fuel-free strategies, align with temperature pathways and factoring climate change research into their risk management processes.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How do the sustainable investments that the financial product partially intends to make, not cause significant harm to any environmental or social sustainable investment objective?***

When assessing "do no significant harm" (DNSH), the Investment Manager considers selected principal adverse impact indicators based on availability and appropriateness. These indicators are combined into a signal based on individual thresholds defined per indicator. A fail on a single indicator leads to an investment failing the DNSH criteria.

How have the indicators for adverse impacts on sustainability factors been taken into account?

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

1.4 "Exposure to companies active in the fossil fuel sector":

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded.

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.

1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":

- Companies violating the United Nations Global Compact (UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded.

1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":

- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

Full details of the Investment Manager's Sustainability Exclusion Policy can be found at: https://www.ubs.com/global/en/assetmanagement/capabilities/sustainable-

	investing.html The following PAI indicator is considered by virtue of the promoted characteristics: 1.3 “GHG intensity of investee companies” - The Investment Manager selects investments based upon a low scope 1+2 carbon intensity, either absolute or relative to a benchmark The following PAI indicators are additionally part of the DNSH signal: 1.7 “Activities negatively affecting bio-diversity-sensitive areas” 1.13 “Board gender diversity” 1.15. “GHG Intensity” 1.16. “Investee countries subject to social violations”.
	How are the sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?
	Companies violating the United Nations Global Compact (UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM’s Stewardship Committee are excluded.
	The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria. *The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.* *Any other sustainable investments must also not significantly harm any environmental or social objectives.*

Does this financial product consider principal adverse impacts on sustainability factors?

☒ Yes

Principal adverse impacts (the "PAI") are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. UBS integrates PAI indicators in its decision-making process.

At present, the following PAI indicators are considered by means of exclusions from the investment universe:

1.4 "Exposure to companies active in the fossil fuel sector":

- Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal mining and its sale to external parties or from oil sands extraction are excluded. Companies that exceed a certain revenue threshold (as per the UBS AM Sustainability Exclusion Policy) from thermal coal-based power generation are excluded.

1.10 "Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises":

- Companies violating the United Nations Global Compact (UNGC) principles which do not demonstrate credible corrective action as determined by UBS-AM's Stewardship Committee are excluded.

1.14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)":

- UBS-AM does not invest in companies involved in: cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non- Proliferation of Nuclear Weapons. UBS-AM considers a company to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

Full details of the Investment Manager's Sustainability Exclusion Policy can be found at: https://www.ubs.com/global/en/assetmanagement/capabilities/sustainable-investing.html

The following PAI indicator is considered by virtue of the promoted characteristics:

1.3 "GHG intensity of investee companies"

- The Investment Manager selects investments based upon a low scope 1+2 carbon intensity,

either absolute or relative to a benchmark

Information on consideration of PAIs on sustainability factors is also available in the Fund's annual report.

☐ No

What investment strategy does this financial product follow?

The investment strategy guides investment decisions based on factors such as investment objectives and risk tolerance.

The investment universe of the Fund is broad and covers global equity and other equity interests of small, medium and large-cap companies in developed and emerging markets worldwide, including China as determined by the Investment Manager.

The Investment Manager seeks to achieve the investment objective of the Fund by investing either directly in companies that offer attractive total yields on a sustainable and/or persistent basis or indirectly through a derivatives strategy using options and/or futures.

For direct investments, the Investment Manager employs a proprietary quantitative stock selection model to identify companies that have attractive total yields and, in the Investment Manager's view, strong quality characteristics (i.e., measures such as return on equity, dividend payout ratio, or debt to equity ratio amongst other items) which could support the future return of capital to shareholders.

In addition, the Investment Manager may employ a derivatives strategy using options and/or futures. The Investment Manager will select option and futures positions based on its assessment, including market risks, attractiveness, liquidity, and other factors. These assessments draw on the expertise of the Investment Manager's internal investment team as well as external market data sources.

As part of the investment strategy of the Fund, the Investment Manager integrates ESG factors, as follows:

ESG Integration is driven by taking into account material ESG risks as part of the research process. ESG integration enables the Investment Manager to identify financially relevant sustainability factors that impact investment decisions and to incorporate ESG considerations when implementing investment decisions, and allows ESG risks to be systematically monitored and compared to risk appetite and constraints. It also assists in portfolio construction through securities selection, investment conviction and portfolio weightings.

- For corporate issuers, this process utilizes an internal UBS ESG material issues framework which identifies the financially relevant factors per sector that can impact investment decisions. This orientation toward financial materiality ensures that analysts focus on sustainability factors that can impact the financial performance of the company and therefore investment returns. ESG integration can also identify opportunities for

engagement to improve the company's ESG risk profile and thereby mitigate the potential negative impact of ESG issues on the company's financial performance. The Investment Manager employs an internal UBS ESG risk dashboard that combines multiple internal and external ESG data sources in order to identify companies with material ESG risks. An actionable risk signal highlights ESG risks to the Investment Manager for incorporation in their investment decision making process.

- For non-corporate issuers, the Investment Manager applies a qualitative or quantitative ESG risk assessment that integrates data on material ESG factors.

The analysis of material sustainability/ESG considerations can include many different aspects, such as the following among others: the carbon footprint, health and well-being, human rights, supply chain management, fair customer treatment and governance.

Fund specific exclusions

The Fund excludes companies with a sustainability profile that indicates a high or severe ESG risk according to the Investment Manager's proprietary ESG risk assessment framework.

UBS Asset Management Approach to Exclusions

The Approach to Exclusions of the Investment Manager outlines the exclusions applied to the investment universe of the financial product. This sub fund applies Standard Exclusions as defined in the UBS Asset Management Approach to Exclusions and excludes UN Global Compact fails without credible corrective actions.

UBS Asset Management Approach to Exclusions can be found at: https://www.ubs.com/global/en/assetmanagement/capabilities/sustainable-investing.html

- ***What are the binding elements of the investment strategy used to select the investments to attain each of the environmental or social characteristics promoted by this financial product?***

The following binding element(s) of the investment strategy are used to select the investments to attain the characteristic(s) promoted by this financial product:

Characteristic 1):

A sustainability profile that is higher than the Benchmark's sustainability profile.

Characteristic 2):

	A lower Scope 1 and 2 Weighted Average Carbon Intensity (WACI) than the Benchmark. The calculations do not take account of cash, derivatives and unrated investment instruments. The characteristic(s), the minimum proportion of sustainable investments and the minimum proportion of investments used to meet the environmental and/or social characteristics promoted by the financial product are calculated at quarter end using the average of all business days' values in the quarter. **Fund specific exclusions** The Fund excludes companies with a sustainability profile that indicates a high or severe ESG risk. In addition, the Fund excludes: - any company involved in or engaged in transactions relating to: cluster munitions, anti-personnel mines, chemical and biological weapons or any company or transactions in breach of the Treaty on the Non-Proliferation of Nuclear Weapons; - any company involved in transactions in the production of depleted uranium weapons, ammunition and armour; - companies that generate more than 20% of their revenue from thermal coal mining and its sale to external parties or from the extraction of oil sands; and - any company which violates the UN Global Compact principles and which do not demonstrate credible corrective action as determined by the Investment Manager's Stewardship Committee. Further information in respect of the Fund's exclusions with respect to the companies in scope of the above exclusions can be found at: https://www.ubs.com/global/en/assetmanagement/capabilities/sustainable-investing.html
	• ***What is the committed minimum rate to reduce the scope of the investments considered prior to the application of that investment strategy?***
	Not applicable.
	• ***What is the policy to assess good governance practices of the investee***

Good governance practices include sound management structures, employee relations, remuneration of staff and tax compliance.

	companies?
	Good corporate governance is a key driver of sustainable performance and is therefore embedded in the Investment Manager's investment strategy. The Investment Manager employs a proprietary ESG Risk Dashboard that combines multiple ESG data sources from internal and recognized external providers in order to identify companies with material ESG risks. An actionable risk signal highlights ESG risks to the Investment Manager for incorporation in their investment decision making process. The assessment of good governance includes consideration of board structure and independence, remuneration alignment, transparency of ownership and control, and financial reporting.
	**What is the asset allocation planned for this financial product?**
Asset allocation describes the share of investments in specific assets.	The minimum proportion of the investments used to meet the environmental and/or social characteristics promoted by the financial product is 67%. The minimum proportion of sustainable investments of the financial product is 40%.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure** (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- ***operational expenditure*** *(OpEx) reflecting green operational activities of investee companies.*

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

- ***How does the use of derivatives attain the environmental or social characteristics promoted by the financial product*?**

Derivatives are not used for the attainment of the environmental or social characteristics promoted by this financial product. Derivatives are primarily used for income generation, hedging, and liquidity management purposes.

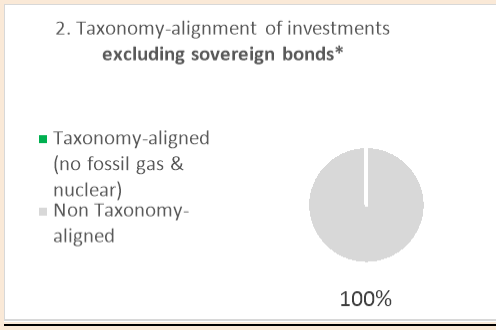
To what minimum extent are sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not applicable.

- **Does the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy[43]?**

[43] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

	☐ Yes: ☐ In fossil gas ☐ In nuclear energy ☒ No



To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

- ***What is the minimum share of investments in transitional and enabling activities?***

Not applicable.

are environmentally sustainable investments **that do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What is the minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy?

The sustainable investments made by the financial product will contribute to either environmental or social objectives or both. The financial product does not commit to a predetermined combination of environmental or social objectives, and therefore there is no minimum share of sustainable investments with an environmental objective that are not aligned with the EU Taxonomy. Where the financial product does invest in environmentally sustainably investments that are not Taxonomy-aligned, this is due to the absence of necessary data to determine Taxonomy-alignment.

What is the minimum share of socially sustainable investments?

The sustainable investments made by the financial product will contribute to either environmental or social objectives or both. The financial product does not commit a predetermined combination of environmental or social objectives, and therefore there is no minimum share of socially sustainable investments.

What investments are included under "#2 Other", what is their purpose and are

there any minimum environmental or social safeguards?

Included in "#2 Other" are cash, derivatives and unrated instruments. Unrated instruments include (i) cash equivalent ancillary liquid assets held for the purpose of liquidity and portfolio risk management; and/or (ii) securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

Is a specific index designated as a reference benchmark to determine whether this financial product is aligned with the environmental and/or social characteristics that it promotes?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

No ESG reference benchmark has been designated for the purpose of determining whether the financial product is aligned with the characteristics that it promotes.

- ***How is the reference benchmark continuously aligned with each of the environmental or social characteristics promoted by the financial product?***

Not applicable.

- ***How is the alignment of the investment strategy with the methodology of the index ensured on a continuous basis?***

Not applicable

- ***How does the designated index differ from a relevant broad market index?***

Not applicable.

- ***Where can the methodology used for the calculation of the designated index be found?***

Not applicable.

UBS MSCI World Small Cap UCITS ETF

(A sub-fund of UBS (Irl) ETF plc, an open-ended investment company constituted as an umbrella fund with segregated liability between sub-funds authorised by the Central Bank of Ireland pursuant to the UCITS Regulations).

Supplement No. 72
17 July 2026

This Supplement (the "Supplement") forms part of the Prospectus dated 17 July 2026 (the "Prospectus") in relation to UBS (Irl) ETF plc (the "Company") and should be read in the context of, and together with, the Prospectus and contains information relating to UBS MSCI World Small Cap UCITS ETF (the "Fund"), which is a separate sub-fund of the Company, represented by a separate series of shares in the Company (the "Shares").

Prospective investors should review this Supplement and the Prospectus carefully and in their entirety. If you are in any doubt about the contents of this Supplement, you should consult your stockbroker, bank manager, solicitor, accountant and/or financial adviser.

Potential investors should consider the risk factors set out in the Prospectus and in this Supplement before investing in this Fund.

The Company and the Directors of UBS (Irl) ETF plc (the "**Directors**") listed in the "*Management*" section of the Prospectus, accept responsibility for the information contained in this Supplement. To the best of the knowledge and belief of the Company and the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement is in accordance with the facts and does not omit anything likely to affect the import of such information. The Company and the Directors accept responsibility accordingly.

DEFINITIONS

Unless otherwise defined herein or unless the context otherwise requires, all defined terms used in this Supplement shall bear the same meaning as in the Prospectus.

Base Currency	USD.
Business Day	Each normal bank business day in Ireland, inclusive of all public and/or bank holidays other than the following – New Year's Day, Good Friday, Easter Monday, Christmas Day and St. Stephen's Day – and days on which the Primary Stock Exchange, on which the constituents of the Index are traded, is open for trading, except individual, non-statutory rest days and days on which the Primary Stock Exchange in the main countries in which the Fund invests are closed, or on which 50% or more of the investments of the Fund cannot be adequately valued and/or such other day or days as the Directors and/or the Manager may determine and notify in advance to Shareholders.
Closing Date	18 November 2026 or such earlier or later date as the Directors and/or the Manager may determine and notify to the Central Bank.
Dealing Day	Every Business Day (excluding (i) any day on which a market on which securities included in the Index are listed or traded is closed and (ii) any day where the Index is not calculated) and/or such other day or days as the Directors and/or the Manager may determine and notify to the Administrator and to Shareholders in advance, provided there shall be at least two Dealing Days at regular intervals in each month. A list of such closed market days will be published for the Fund in advance on the Website.
Dealing Deadline	For subscriptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day. For redemptions: 4.30 pm (Dublin time) on the Business Day prior to the relevant Dealing Day.
Dealing NAV	The Net Asset Value per Share calculated as at the Valuation Point on the relevant Dealing Day.
Index	MSCI World Small Cap Index (Net Total Return).
Index Provider	MSCI.
Initial Offer Period	9:00 am (Irish time) on 19 May 2026 to 4:30 pm (Irish time) on the Closing Date.
Investment Manager	UBS Asset Management (UK) Ltd.
IOP	Initial Offer Period.
IOP Settlement Date	The third Business Dat after the Closing Date.
ISIN	USD dis IE000OSOF4H4 USD acc IE000AZ2HZ31 USD UKdis IE00087OWYQ8
Minimum Holding	There is no minimum holding requirement for the Fund as at the date of this Supplement.

Minimum Subscription Amount	There is no minimum subscription amount in respect of the Fund as at the date of this Supplement.
Minimum Redemption Amount	There is currently no minimum redemption amount in respect of the Fund as at the date of this Supplement.
Settlement Date	At the latest, on the second Business Day after the relevant Dealing Day.
Share	Any share of any Class of the Fund.
Valuation	The Net Asset Value per Share is calculated in accordance with the "*Determination of Net Asset Value*" section of the Prospectus, using last traded prices for securities. Details of the Index can be found on www.msci.com.
Valuation Point	10.30 pm (Dublin time) on each Business Day.
Website	www.ubs.com/etfs

THE FUND AND SHARE CLASSES

The Fund

UBS MSCI World Small Cap UCITS ETF is a sub-fund of the Company.

The Fund may be suitable for investors seeking exposure global small cap companies via a diversified portfolio of securities as described below in the "*Investment Objective and Strategy*" section.

Share Classes

To date, the following Classes of Shares are available:

- USD dis;
- USD acc;
- USD UKdis;

Description of Share Classes:

- Shares may be acquired and sold on the secondary market by all investors.

The Company will generally only accept subscriptions from Authorised Participants. An investor who is not an Authorised Participant may purchase Shares on the secondary market. Shares may be issued and redeemed in exchange for cash, securities or a combination of cash and securities. To the extent required by applicable law of a country where the Shares are registered for public sale, cash redemptions may be accepted from Shareholders not qualifying as Authorised Participants, subject to the procedures and charges described below and in the Prospectus. Please see the sections entitled *"Primary Market"* and *"Secondary Market"* under the *"Purchase and Sale Information"* section of the Prospectus for further information.

The Company and/or the Manager may also, in accordance with the requirements of the Central Bank, without notice to Shareholders, create additional Share Classes, including Share Classes that are subject to fee arrangements and/or other terms that are different from those of any Share Class being offered hereby or then outstanding, including, without limitation offering Share Classes to certain entities affiliated with the Investment Manager. Such other Share Classes may be subject to higher, lower or no investment management or performance fees.

A separate pool of assets will not be maintained for each of the Share Classes.

INVESTMENT OBJECTIVE AND POLICY

Investment Objective

The objective of the Fund is to seek to track the equity market performance of the Index.

Investment Policy

In order to achieve the objective, the investment policy of the Fund is to seek to track the performance of the MSCI World Small Cap Index (Net Total Return), (or any other index determined by the Directors from time to time to track substantially the same market as the MSCI World Small Cap Index (Net Total Return) and which is considered by the Directors to be an appropriate index for the Fund to track, in accordance with the Prospectus (the "**Index**")), as closely as possible, while seeking to minimise as far as possible the difference in performance between the Fund and the Index.

Any determination by the Directors that the Fund should track another index at any time shall be subject to Shareholder approval or the provision of reasonable notice to Shareholders (as applicable) and implemented in accordance with the requirements of the Central Bank and this Supplement shall be updated accordingly.

The Fund will use replication techniques as described below in order to minimise as far as possible the difference in performance between the returns of the Index and the return of the Fund, after Fees and Expenses. For information in relation to the difficulties associated with tracking indices, please refer to "*Index Tracking Risk*" in the "*Risk Information*" section of the Prospectus.

The Fund is passively managed.

2. The Fund complies with Article 6 of SFDR.

3. The Fund considers principal adverse impacts on sustainability factors due to its investment strategy and the nature of underlying investments. Principal adverse impacts (the “PAI”) are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption, and anti-bribery matters. The Investment Manager integrates PAI indicators in its Index selection process.

4. At present, the following PAI indicator is considered as part of the Index selection process:

5. 1.14 “Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)”:

6. By tracking the Index, the Investment Manager does not invest in companies involved in cluster munitions, anti-personnel mines or chemical and biological weapons, nor does it invest in companies in breach of the Treaty on the Non-Proliferation of Nuclear Weapons. A company is considered to be involved in controversial weapons if the company is involved in development, production, storage, maintenance or transport of controversial weapons, or is a majority shareholder (>50% ownership stake) of such a company.

7. The annual report of the Company will include information on the principal adverse impacts on sustainability factors.

The investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities (TR Art. 7).

In order to seek to achieve this investment objective, the Investment Manager, on behalf of the Fund, will invest, using the Replication Strategy, primarily in the securities of the Index in the approximate weightings of the Index subject to the Investment Restrictions set forth in the Prospectus. This strategy seeks to hold all of the securities of the Index, with the approximate weightings as in that Index, so that essentially, the portfolio of the Fund will be a near mirror-image of the components of the Index. Further details regarding the Replication Strategy are disclosed in the "Investment Objectives, Policy and Strategy" section of the Prospectus.

There are also currency versions of the Index which are denominated in a currency other than USD and hedged, including currency versions denominated in EUR, GBP, USD, CHF, SGD, CAD,JPY and SEK (each a "**Hedged Currency Version**"). The purpose of the Hedged Currency Versions is to limit the profit or loss generated from foreign exchange exposure when holding a USD denominated asset in a currency other than USD. For those Share Classes with "hedged" in their name, this is achieved by the Hedged Currency Versions employing one month rolling forward FX contracts. In accordance with the Hedged Currency Versions methodologies the Fund may also employ rolling forward FX contracts to limit the profit or loss generated from foreign exchange exposure when holding a USD denominated asset in a currency other than USD. Shareholders should note that the disclosure in respect of the Hedged Currency Versions is for information purposes only and is to explain the manner in which the Fund will engage in currency hedging.

In seeking to implement its investment objective of tracking the performance of the Index, the Fund may also in exceptional circumstances hold securities which are not comprised in its Index, including, for example, securities in respect of which there has been an announcement or it is expected that they will shortly be included in the Index. The Fund, for the purposes of assisting in tracking the Index, may also invest in securities which are not constituents of the Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index. The Fund may avail of the higher investment limits allowed to certain index tracking funds, as described at paragraph 4.2 of the section of the Prospectus headed "Investment Restrictions". These limits may be availed of where exceptional market conditions apply for example if there is an increased allocation of an issuer within the Index. These exceptional market conditions include where a single constituent may, for various reasons, including as a result of a merger, have a very dominant position. If the investment limits of the Fund are exceeded for reasons beyond the control of the Directors, or as a result of the exercise of subscription rights, the Fund must adopt as a priority objective for its sales transactions the remedying of that situation, taking due account of the interests of the Shareholders. The Fund as set out above utilises the Replication Strategy in order to track the Index, accordingly investment in the Fund should be considered to provide a direct exposure to the Index. Details of the Fund's tracking error and trading difference is set out in the section of the Prospectus entitled "Tracking Accuracy".

As the Fund does not pursue a synthetic index replication strategy in order to track the Index, there is no corresponding counterparty risk applicable. As a result of currency hedging, hedged Share Classes may be exposed to counterparty risk as further detailed in the section of the Prospectus entitled "Counterparty Risk".

The Fund (as well as the Index) will take long positions only and the Fund will invest 100% of its net assets in long positions.

The Fund may, for the purpose of efficient portfolio management, where disclosed in the Manager's RMP Statement (if applicable) and in accordance with the conditions and limits imposed by the Central Bank, use financial derivative instruments ("**FDI**"), namely currency forwards, currency swaps, warrants, index futures and futures on stocks. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the Fund with an appropriate level of risk, taking into account the risk profile of the Fund and the risk diversification rules set out in the Central Bank Rules. In particular, FDI may be used for the purpose of minimising differences in performance between the Fund and the relevant Index, ie, the risk that the Fund return varies from the Index's return.

To the extent that the Investment Manager, on behalf of the Fund, uses FDI, there may be a risk that the volatility of the Fund may increase. It is anticipated that the volatility level of the Fund will be closely correlated with the volatility of the Index. Investors should note that there can be no assurance that the historical volatility levels of the Index will continue to be observed in the future or that the Fund will have a similar volatility level and that, therefore, there is a risk that the Fund's volatility may be relatively high when compared to other investments and may change significantly over time and, as a result, an investment in the Fund may not be appropriate for all investors. That notwithstanding, the Fund is not expected to have an above average risk profile as a result of its use of or investment in FDI. FDI will be used within the limits stipulated by the Central Bank and as described in the "*Use of Financial Derivative Instruments*" section of the Prospectus. Accordingly, although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance

between the Fund and the Index and, while the Fund will be leveraged as a result of its investments in FDI, such leverage (calculated under the commitment approach as set out in the "Risk Management" section below) will not exceed 100% of the Fund's total Net Asset Value at any time.

The Fund, subject to the restrictions imposed on the use of FDI described in the Prospectus and by the UCITS Regulations, may buy and sell futures contracts to either create exposure or reduce exposure to various securities included in the Index or to reduce certain aspects of risk inherent in specific trades. Futures contracts are agreements to buy or sell a fixed amount of an equity, bond or currency at a fixed date in the future. Futures contracts are exchange-traded instruments and their dealing is subject to the rules of the exchanges on which they are dealt.

Instruments shall be listed and/or traded on the exchanges and markets set out in Appendix II of the Prospectus.

The Manager has adopted a statement of its risk management processes ("**RMP**") in respect of the use of FDI which enables it to accurately measure, monitor and manage the various risks associated with FDI and the Fund will employ only FDIs which are described in the RMP. The RMP was prepared and submitted to the Central Bank in accordance with the Central Bank requirements.

GERMAN INVESTMENT TAX ACT DISCLOSURE

It is the intention of the Company to seek German tax reporting status for all Classes of the Fund. On this basis, in addition to the investment restrictions set out in the Prospectus, the Fund will also adhere to the restriction that at least 80% of the Net Asset Value of the Fund shall be invested in equity participations (the "Equity Participation Ratio"). More details on the Equity Participation Ratio can be found in the Prospectus.

As the Fund will continuously invest more than 50% of their respective assets in equity investments (as defined in Section 2(8) of the German Investment Tax Act and related guidelines), it will qualify as an "Equity fund" within the meaning of Section 2(6) of the German Investment Tax Act for the partial exemption pursuant to Section 20(1) of the German Investment Tax Act.

Investors should refer to their tax advisors in relation to the implications of German tax reporting status being obtained.

USE OF FDI

As detailed in the investment policy above the Fund may use the following FDI:

Futures, Index Futures & Futures on Stocks

A futures contract is a standardised contract to exchange a specified asset of standardised quantity and quality for a price agreed today (the futures price or the strike price) with delivery occurring at a specified future date, the delivery date.

Index futures may be used to manage a Fund's market exposure in a cost effective and efficient manner as futures are often more liquid and cost effective to trade for example, entering into an index future contract in place of immediate purchase of underlying securities, in certain circumstances may be deemed more cost effective and expedient.

A single stock future may be used to provide the Fund with exposure to a single security.

Currency swaps

Swap contracts are two-party contracts entered into for periods ranging from a few weeks to more than one year. In a standard swap transaction, two parties agree to exchange returns (or differentials in rates of return) calculated with respect to a "notional amount," e.g., the return on or increase in value of a particular amount invested at a particular interest rate, in a particular foreign currency, or in a "basket" of securities representing a particular index. Swaps offer independent profit opportunities as well as the possibility to hedge existing long positions.

Currency swaps are agreements between two parties to exchange future payments in one currency for payments in another currency.

Currency forwards

A currency forward is a non-standardised contract between two parties to exchange two currencies at an agreed exchange rate at a specified future date and time. They are negotiated as Over the Counter transactions with approved counterparties; there is a potentially unlimited loss if the currency for which a short position has been taken rises in value versus the long currency so that the long currency becomes worthless.

Warrants

Warrants are certificates entitling the holder to buy a specific amount of security at a specified price. In the case that the price of the security rises to above that of the warrant's exercise price, then the security can be bought at the warrant's exercise price and resell it for a profit. Otherwise, the warrant will simply expire or remain unused. Warrants are listed on options exchanges and trade independently of the security with which it was issued.

HEDGING

In accordance with the terms of the Prospectus, the Fund may (but shall not be obliged to) engage in currency hedging transactions in respect of Classes not denominated in the Base Currency to seek to hedge against declines in the values of one or more Classes of the Fund as a result of changes in currency exchange rates. All hedging transactions will be clearly attributable to a specific Class and therefore currency exposures of different Classes shall not be combined or offset and currency exposures of assets of the Fund shall not be allocated to separate Classes. Therefore, the costs, gains/losses of such hedging transactions will accrue solely to the relevant Class.

DESCRIPTION OF THE INDEX

This section is a summary of the principal features of the MSCI World Small Cap Index (Net Total Return) and is not a complete description of the Index.

General

The MSCI World Small Cap Index is a free float-adjusted market capitalization weighted index calculated, maintained and published by international index supplier MSCI® and denominated in USD. The Index tracks the net total return performance of small capitalisation stocks across developed markets globally which comply with MSCI's size, liquidity, and free-float criteria.

In order to be eligible for inclusion in the Index, securities are assessed in Index Provider's eligibility criteria which include country classification (to ensure such company is incorporated in a developed market), minimum size (to ensure such company's market capitalisation) and minimum liquidity requirements (to ensure such company has at least one eligible listing) (e.g., frequency of trading of the security or annual traded value ratio). Further information in respect of the Index Provider's eligibility criteria are set out in the section entitled "Index Methodology" below.

Securities are identified as small capitalisation according to the Index Provider's size segment methodology. This involves first defining the entire universe of small, medium, and large capitalisation companies within the market (the "**Investable Market Index**"), the large capitalistion segment accounting for approximately 70% of such universe, and the large and medium capitalisation segment (the "**Standard Index**") accounting for approximately 85% of the Investable Market Index. The small capitalisation segment is then derived as the difference between the Investable Market Index and the Standard Index.

The Index rebalances on a quarterly basis. The rebalancing frequency will have minimal impact on the transaction costs associated with the Fund as any rebalancing is not anticipated to require any higher frequency of position turnover in the Fund than would otherwise be the case were the Index to be static.

It is not anticipated that the composition of the Index will be adjusted to the extent that tracking is not possible within the scope of standard UCITS investment restrictions.

Further details of the Index composition and its calculation methodology (including information on the procedure to be adopted by the index sponsor should the weighting of any particular stock exceed the permitted investment restrictions) can be found at the website set out below. The Investment Manager monitors the investment restrictions applicable to the Fund. As soon as the Investment Manager becomes aware that the weighting of any particular stock in the Index exceeds the permitted investment restrictions, the Investment Manager will seek to either unwind that particular position or reduce the Fund's exposure to that stock to ensure that the Fund at all times operates within the permitted investment restrictions and complies with the requirements of the UCITS Regulations.

Index Methodology

The methodology of the construction of the Index (index code: 106230) is available on the MSCI internet website:
https://www.msci.com/index-methodology

Additional information about the Index can be found under:
https://www.msci.com/indexes/index/106230

Index Factsheet

The Index Factsheet is available on the MSCI internet website:
https://www.msci.com/equity-fact-sheet-search

Publication of the Index Value

The closing price of the Index is available on the MSCI internet website:
https://app2.msci.com/eqb/custom_indexes/custom_performance.html

Publication of the Index Composition

The composition of the Index is available on the MSCI internet website by selecting "WORLD SMALL CAP" in the tab:
https://www.msci.com/constituents

RISK MANAGEMENT / LEVERAGE

Although FDI will be inherently leveraged, the primary purpose of the use of FDI is to minimise as far as possible the difference in performance between the Fund and the Index. While the Fund will be leveraged as a result of its investments in FDI, such leverage will not exceed 100% of the Fund's total Net Asset Value at any time.

As disclosed above, the Fund may use FDI for the purposes of efficient portfolio management. The Investment Manager has adopted a commitment approach in the calculation of global exposure arising from the use of FDI. The Fund's global exposure relating to the use of FDI may not exceed its total net assets.

The commitment approach is calculated by converting the FDI position into an equivalent position based on the market value of the underlying asset. Where FDI are used for hedging purposes the exposure of the FDI is calculated and then netted against the instrument being hedged.

INVESTMENT RISKS

Investment in the Fund carries with it a degree of risk including the risks described in the "*Risk Information*" section of the Prospectus and in this Supplement. These risks are not intended to be

exhaustive and potential investors should review the Prospectus and this Supplement carefully and consult with their professional advisers before purchasing Shares.

In the event that the Fund uses FDI, the risk profile of the Fund may increase. For information in relation to the risks associated with the use of FDI, please note the following specific risks listed below. Please also refer to "*Derivatives Risk*" in the "*Risk Information*" section of the Prospectus.

Concentration Risk

The Fund may invest a relatively large percentage of its assets in issuers located in a single country, a small number of countries, or a particular geographic region. In these cases, the Fund's performance will be closely tied to the market, currency, economic, political, or regulatory conditions and developments in that country or region or those countries, and could be more volatile than the performance of more geographically-diversified funds.

In addition, the Fund may concentrate its investments in companies in a particular industry, market or economic sector. When the Fund concentrates its investments in a particular industry, market or economic sector, financial, economic, business, and other developments affecting issuers in that industry, market or sector will have a greater effect on the Fund than if it had not concentrated its assets in that industry, market or sector.

Further, investors may buy or sell substantial amounts of the Shares in response to factors affecting or expected to affect a particular country, industry, market or sector in which the Fund concentrates its investments, resulting in abnormal inflows or outflows of cash into or out of the Fund. These abnormal inflows or outflows may cause the Fund's cash position or cash requirements to exceed normal levels, and consequently, adversely affect the management of the Fund and the Fund's performance.

Currency Risk

The Fund may invest in securities that are denominated in currencies that differ from the Base Currency. Changes in the values of those currencies relative to the Base Currency may have a positive or negative effect on the values of the Fund's investments denominated in those currencies. The Fund may, but will not necessarily, invest in currency exchange contracts to help reduce exposure to different currencies, however there is no guarantee that these contracts will successfully do so. Also, these contracts may reduce or eliminate some or all of the benefit that a Fund may experience from favourable currency fluctuations.

Currency Hedged Classes

Fluctuations between the currency of a currency-hedged Class and the currency of an underlying Index constituents may be reduced by the use of one-month foreign exchange forwards. The use of one-month foreign exchange forwards may not take into account the underlying Index constituents' intra-month price movements. As a result a risk of an intra-month under- or over-hedging may arise. Consequently the performance of an Index measured in its base currency may not exactly be achieved by the hedged Index measured in the hedged currency.

Index Risk

The ability of the Fund to achieve significant correlation between the performance of the Fund and the Index may be affected by changes in securities markets, changes in the composition of the Index, cash flows into and out of the Fund and the fees and expenses of the Fund. The Fund will seek to track Index returns regardless of the current or projected performance of the Index or of securities comprising the Index. As a result, the Fund's performance may be less favourable than that of a portfolio managed using an active investment strategy. The structure and composition of the Index will affect the performance, volatility and risk of the Index (in absolute terms and by comparison with other indices), and consequently, the performance, volatility and risk of the Fund.

Index Tracking Risk

There is no guarantee that the investment objective of the Fund will be achieved. In particular, no financial instrument enables the returns of the Index to be reproduced or tracked exactly. Changes in the investments of the Fund and re-weightings of the relevant Index may give rise to various transaction costs (including in relation to the settlement of foreign currency transactions), operating expenses or inefficiencies which may adversely impact the Fund's tracking of the performance of an Index. Furthermore, the total return on investment in the Shares will be reduced by certain costs and expenses which are not taken into account in the calculation of the applicable Index. Moreover, in the event of the temporary suspension or interruption of trading in the investments comprising the Index, or of market disruptions, rebalancing the Fund's investment portfolio may not be possible and may result in deviations from the return of the Index.

Investment Risk

A Shareholder may lose the entire principal amount invested in the Fund. The value of the securities held in the Fund may increase or decrease, at times rapidly and unexpectedly. An investment in the Fund may at any point in the future be worth less than the original amount invested.

The total return on investment in the Shares may be reduced by taxes arising in the Fund including taxes in the jurisdictions in which the Fund invests. The Fund may benefit from reduced dividend withholding taxes under the terms of relevant double taxation treaties or conventions although there is no guarantee that it will do so. Please refer to the "Tax Information" section of the Prospectus for further information on the applicable tax treatment for the Company and the Fund.

INVESTOR PROFILE

Investors in the Fund are expected to be retail and professional investors or eligible counterparties (as described under MiFID II) seeking a return on their investment over a medium term time horizon who want to take an exposure to the global small-cap equity market performance of companies. Based on the structure and composition of the Index, the volatility of the Fund, which may vary from time to time, is generally expected to be medium to high.

DIVIDEND POLICY

Accumulating Share Classes:

It is not the current intention of the Directors to declare a dividend in relation to the following Share Classes:

- USD acc;

The net income attributable to the above Share Classes shall be retained within the Fund and the value of these Shares shall rise accordingly.

Distributing Share Classes:

The Directors intend to declare dividends out of:

(i) net income; and/or

(ii) realised and unrealised gains net of realised and unrealised losses

attributable to the following Share Classes:

- USD dis;
- USD UKdis;

in respect of each six month period ending on 31 December and 30 June within 30 calendar days of the end of the relevant period end. Any such dividends will be paid within two calendar months after declaration.

The Directors and/or the Manager reserve the right to increase or decrease the frequency of dividend payments, if any, at their discretion for income distribution Shares. In the event of a change of policy full details will be disclosed in an updated Supplement and Shareholders will be notified in advance.

Dividends will be paid to Shareholders through the settlement systems through which the Shares are held. The net income and/or realised and unrealised gains net of realised and unrealised losses available for distribution in respect of the relevant Class will be determined in accordance with the relevant law and generally accepted accounting principles consistently applied.

Any dividend unclaimed after six years from the date when it first became payable shall be forfeited automatically, without the necessity for any declaration or other action by the Company.

Further information is set out in the "Distributions" section of the Prospectus.

FEES AND EXPENSES

This section should be read in conjunction with the section entitled "Fees and Expenses" in the Prospectus.

The following fees and expenses apply in respect of the Share Classes of the Fund:

Share Class	Flat Fee
USD acc	up to 0.20% per annum of the Net Asset Value of the Class
USD dis	up to 0.20% per annum of the Net Asset Value of the Class
USD UKdis	up to 0.20% per annum of the Net Asset Value of the Class

The establishment costs of the Fund shall be borne by the Distributor and shall not be taken from the assets of the Fund.

DETERMINATION OF THE NET ASSET VALUE

The Net Asset Value of the Fund and Net Asset Value per Share is calculated by the Administrator as at the Valuation Point on each Business Day and will be published on the Website.

SUBSCRIPTIONS – PRIMARY MARKET

The Fund is offering the following Classes:

- USD dis
- USD acc
- USD UKdis

Applications have been made for all Classes to be listed on Listing Stock Exchanges.

The Classes listed below will be initially available from the Initial Offer Period at an Initial Offer Price with an appropriate provision for Duties and Charges. The Initial Offer Price may be calculated based on the related Index variant as follows:

Class	Initial Offer Price
USD dis	Index value / 150
USD acc	Index value / 150
USD UKdis	Index value / 150

The closing Index value which will be published on the MSCI website at the web address set out in section entitled "Publication of the Index" will be used to calculate the Initial Offer Price. For example, where the Index Value was 900.3320 on 16 January 2026, Shares in USD acc would be issued at an Initial Offer Price per Share of USD 6.0022 The Initial Offer Price will be calculated using the closing Index value taken at 10.30 pm CET on the Closing Date.

In order to receive Shares at the close of the Initial Offer Period:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the Closing Date (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the IOP Settlement Date.

Settlement of Shares subscribed for during the Initial Offer Period will take place on the IOP Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the IOP Settlement Date.

Settlement of Shares subscribed for after the Initial Offer Period will take place on the Settlement Date, provided always that settlement may take place earlier if consideration for the relevant Shares is received prior to the Settlement Date.

Following the Initial Offer Period, Shares in each Class will be issued on each Dealing Day at the Dealing NAV with an appropriate provision for Duties and Charges in accordance with the provisions set out in the Prospectus. In order to receive Shares on a Dealing Day:

(a) a properly completed share application form which satisfies the application requirements, including, but not limited to, full anti-money laundering documentation, must be received prior to the Dealing Deadline (Irish time) on the relevant Dealing Day (with the original to follow in the case of an initial subscription); and
(b) appropriate, cleared subscription monies must, in the case of cash subscriptions, be received by and delivery of the securities must, in the case of in-kind subscriptions, be effected by no later than the Settlement Date.

Applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank, provided that the original application form and the supporting documentation required for anti-money laundering purposes is received by post promptly thereafter.

Subsequent applications for Shares may be submitted to the Administrator either by fax or electronically in accordance with the requirements of the Central Bank and provided that all on-going anti-money laundering checks are complete.

REDEMPTIONS

Shareholders in the Fund may request the redemption of Shares on any Dealing Day at the appropriate Dealing NAV, subject to an appropriate provision for Duties and Charges (subject to any applicable regulations), provided that a written redemption request is signed by the Shareholder and received by the Administrator by the Dealing Deadline on the relevant Dealing Day in accordance with the provisions of the Prospectus. Redemption requests will be processed on receipt of faxed or electronic instruction only where payment is made to the account of record of the Shareholder. Settlement will normally take place within two Business Days of the Dealing Day.

CONVERSIONS

Shareholders should refer to the "Conversions" in the "Purchase and Sale" section of the Prospectus for information on Share conversions.

VALUATION OF ASSETS

The method of valuation of the Net Asset Value is set out in detail in the "*Determination of Net Asset Value*" section of the Prospectus. Further to such provisions, each asset of the Fund will be valued at the last traded price on the relevant Recognised Market at the close of business on such Recognised Market on each Dealing Day.

PORTFOLIO TRANSPARENCY

The Fund's transparency policy regarding the composition of its portfolio is to provide position-level disclosure on a daily basis. Investors can access this information by selecting the relevant investor and domicile option on the Website and navigating to the "Holdings" section of the Fund.

INDEX DISCLAIMERS

THIS FUND IS NOT SPONSORED, ENDORSED, SOLD OR PROMOTED BY MSCI LTD ("MSCI"), ANY OF ITS AFFILIATES, ANY OF ITS INFORMATION PROVIDERS OR ANY OTHER THIRD PARTY INVOLVED IN, OR RELATED TO, COMPILING, COMPUTING OR CREATING ANY MSCI INDEX (COLLECTIVELY, THE "MSCI PARTIES"). THE MSCI INDEXES ARE THE EXCLUSIVE PROPERTY OF MSCI. MSCI AND THE MSCI INDEX NAMES ARE SERVICE MARK(S) OF MSCI OR ITS AFFILIATES AND HAVE BEEN LICENSED FOR USE FOR CERTAIN PURPOSES BY UBS ASSET MANAGEMENT SWITZERLAND AG. NONE OF THE MSCI PARTIES MAKES ANY REPRESENTATION OR WARRANTY, EXPRESS OR IMPLIED, TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY REGARDING THE ADVISABILITY OF INVESTING IN FUNDS GENERALLY OR IN THIS FUND PARTICULARLY OR THE ABILITY OF ANY MSCI INDEX TO TRACK CORRESPONDING STOCK MARKET PERFORMANCE. MSCI OR ITS AFFILIATES ARE THE LICENSORS OF CERTAIN TRADEMARKS, SERVICE MARKS AND TRADE NAMES AND OF THE MSCI INDEXES WHICH ARE DETERMINED, COMPOSED AND CALCULATED BY MSCI WITHOUT REGARD TO THIS FUND OR THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY. NONE OF THE MSCI PARTIES HAS ANY OBLIGATION TO TAKE THE NEEDS OF THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY INTO CONSIDERATION IN DETERMINING, COMPOSING OR CALCULATING THE MSCI INDEXES. NONE OF THE MSCI PARTIES IS RESPONSIBLE FOR OR HAS PARTICIPATED IN THE DETERMINATION OF THE TIMING OF, PRICES AT, OR QUANTITIES OF THIS FUND TO BE ISSUED OR IN THE DETERMINATION OR CALCULATION OF THE EQUATION BY OR THE CONSIDERATION INTO WHICH THIS FUND IS REDEEMABLE. FURTHER, NONE OF THE MSCI PARTIES HAS ANY OBLIGATION OR LIABILITY TO THE ISSUER OR OWNERS OF THIS FUND OR ANY OTHER PERSON OR ENTITY IN CONNECTION WITH THE ADMINISTRATION, MARKETING OR OFFERING OF THIS FUND.

ALTHOUGH MSCI SHALL OBTAIN INFORMATION FOR INCLUSION IN OR FOR USE IN THE CALCULATION OF THE MSCI INDEXES FROM SOURCES THAT MSCI CONSIDERS RELIABLE, NONE OF THE MSCI PARTIES WARRANTS OR GUARANTEES THE ORIGINALITY, ACCURACY AND/OR THE COMPLETENESS OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES MAKES ANY WARRANTY, EXPRESS OR IMPLIED, AS TO RESULTS TO BE OBTAINED BY THE ISSUER OF THE FUND, OWNERS OF THE FUND, OR ANY OTHER PERSON OR ENTITY, FROM THE USE OF ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. NONE OF THE MSCI PARTIES SHALL HAVE ANY LIABILITY FOR ANY ERRORS, OMISSIONS OR INTERRUPTIONS OF OR IN CONNECTION WITH ANY MSCI INDEX OR ANY DATA INCLUDED THEREIN. FURTHER, NONE OF THE MSCI PARTIES MAKES ANY EXPRESS OR IMPLIED WARRANTIES OF ANY KIND, AND THE MSCI PARTIES HEREBY EXPRESSLY DISCLAIM ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO EACH MSCI INDEX AND ANY DATA INCLUDED THEREIN. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT SHALL ANY OF THE MSCI PARTIES HAVE ANY LIABILITY

FOR ANY DIRECT, INDIRECT, SPECIAL, PUNITIVE, CONSEQUENTIAL OR ANY OTHER DAMAGES (INCLUDING LOST PROFITS) EVEN IF NOTIFIED OF THE POSSIBILITY OF SUCH DAMAGES.

NO PURCHASER, SELLER OR HOLDER OF THIS SECURITY, PRODUCT OR FUND, OR ANY OTHER PERSON OR ENTITY, SHOULD USE OR REFER TO ANY MSCI TRADE NAME, TRADEMARK OR SERVICE MARK TO SPONSOR, ENDORSE, MARKET OR PROMOTE THIS SECURITY WITHOUT FIRST CONTACTING MSCI TO DETERMINE WHETHER MSCI'S PERMISSION IS REQUIRED. UNDER NO CIRCUMSTANCES MAY ANY PERSON OR ENTITY CLAIM ANY AFFILIATION WITH MSCI WITHOUT THE PRIOR WRITTEN PERMISSION OF MSCI.

UBS (Irl) ETF plc

An open ended umbrella investment company with variable capital incorporated on 14 December 2011 under the laws of Ireland with registered number 507439 and authorised in Ireland as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 as amended (S.I. No. 352 of 2011).

This Supplement contains information relating specifically to UBS (Irl) ETF plc (the "Company"), an open-ended umbrella fund with segregated liability between sub-funds.

This Supplement forms part of and should be read in the context of and in conjunction with the Prospectus for the Company dated 17 July 2026 (as of 6 October 2026; the "Prospectus") which immediately precedes this Supplement and is incorporated herein.

GLOBAL SUPPLEMENT

25 August 2026

Capitalised terms used herein shall have the meanings attributed to them in the Prospectus.

The Directors of the Company whose names appear in the section "Directory" of the Prospectus accept responsibility for the information contained in this Supplement and the Prospectus. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement and in the Prospectus is in accordance with the facts and does not omit anything likely to affect the import of such information. The Directors accept responsibility accordingly.

The following are a list of the sub-funds of the Company that are in existence as of the date of this Supplement.

1. UBS Core MSCI USA UCITS ETF;
2. UBS MSCI USA Value UCITS ETF;
3. UBS Core MSCI World UCITS ETF;

61. UBS MSCI World Small Cap UCITS ETF.

COUNTRY SUPPLEMENT

ADDITIONAL INFORMATION FOR SWISS INVESTORS

This Country Supplement forms part of, and should be read in conjunction with the Prospectus for UBS (Irl) ETF plc dated 17 July 2026 (as of 6 October 2026) and with the relevant Supplements, and is for use in Switzerland only.

1. Representative

The representative in Switzerland is UBS Fund Management (Switzerland) AG, Aeschenvorstadt 1, 4051 Basel.

2. Paying Agent

The paying agent in Switzerland is UBS Switzerland AG, Bahnhofstrasse 45, 8001 Zürich and its branches in Switzerland.

3. Location where the relevant documents may be obtained

The prospectus, Key Investor Information Document, Articles of Association as well as the annual and semi-annual reports may be obtained free of charge from the representative as well as under www.ubs.com/etf or www.ubs.com /fonds.

4. Publications

1. Publications concerning the foreign collective investment scheme are made in Switzerland on the website of “Swiss Fund Data AG” at www.swissfunddata.ch.

2. Each time units are issued or redeemed, the issue and the redemption prices or the net asset value together with a reference stating „excluding commissions“ must be published for all unit classes at www.ubs.com/fonds and on the website of “Swiss Fund Data AG” at www.swissfunddata.ch. Prices must be published at least twice per month (on the first and third Monday or the subsequent banking day).

5. Payment of retrocession and rebates

1. The Management Company and its agents may pay retrocessions as remuneration for distribution activity in respect of fund units in or from Switzerland. This remuneration may be deemed payment for the following services in particular:
   - Promoting and rendering the distribution of fund units;
   - Training client advisers and salespersons;
   - Organization of and participation in road shows, events and shows of all kinds in connection with the distribution of fund units;
   - Contacting potential investors;
   - Central relationship management and servicing of existing client relationships;
   - Responding to specific requests from investors regarding the investment product or the provider;
   - Produce and issue marketing and legal fund documents;
   - Provide administrative services of all kinds in connection with the distribution of fund units;
   - Brokering and processing subscription and redemption of fund units;
   - Subscribe units as a nominee for clients on behalf of the provider;
   - Appointment and monitoring of sub-distributors;
   - Performing due diligence delegated by the Provider in areas such as ascertaining client needs and distribution restrictions;

- Instruction of the external auditors to verify compliance (by the fund provider) with the legal and self-regulatory obligations of the Distributor, such as in particular the SFAMA Guidelines for the Distribution of Collective Investment Schemes;
- Operation and maintenance of electronic distribution platforms;
- Central reporting for fund providers and distribution distributers;
- Provide administrative services of all kinds including fulfilment of the due diligence obligations in combating money laundering and the financing of terrorism in connection with the distribution of fund units.

Retrocessions are not deemed to be rebates even if they are ultimately passed on, in full or in part, to the investors.

The recipients of the retrocessions must ensure transparent disclosure and inform investors, unsolicited and free of charge, about the amount of remuneration they may receive for distribution.

On request, the recipients of retrocessions must disclose the amounts they actually receive for distributing the collective investment schemes of the investors concerned.

2. In the case of distribution activity in Switzerland, the Company, the Management Company and its agents may, upon request, pay rebates directly to investors. The purpose of rebates is to reduce the fees or costs incurred by the investor in question. The objective criteria for the granting of rebates defined by the Company or the Management Company apply.

6. Place of performance and jurisdiction

In respect of the units distributed in and from Switzerland, the place of performance and jurisdiction is at the registered office of the Representative.

7. Information for the purpose of the listing on SIX Swiss Exchange

7.3 Clearing Agent

SIX SIS AG

7.4 Form of Securities

Registered Shares represented by a Global Share Certificate.

7.5 Information on the Net Asset Value (NAV) performance of the past three years

Not available yet.

7.6 Responsibility Clause

The Company, UBS (Irl) ETF plc., Dublin, bears all responsibilities for the content of this prospectus pursuant to Scheme A Point 4 of the Listing Rules of SIX Swiss Exchange. To the best of the knowledge of the Manager, all statements made in this prospectus are true and do not omit any material information.

7.7 Declaration on annual and semi-annual reports

The latest annual and semi-annual reports constitute an integral part of this listing prospectus.

7.8 Market Maker

The listing of the shares on SIX Swiss Exchange and their market on the SIX Swiss Exchange serves the purpose to provide the investors, in addition to the possibility to subscribe and redeem shares directly with the Company, a way to purchase and sell shares in a liquid and regulated secondary market, ie. on a stock exchange.

The following institutions have been appointed as market makers:

- Commerzbank
- UBS AG
- KCG Europe Limited
- Société Générale

A market maker is responsible for maintaining a market for the traded shares and, in this connection, for entering bid and ask prices for fund units in the trading system.

The Swiss Financial Market Supervisory Authority requires that a Market Maker makes sure that the spread between (i) the indicative net asset value of a share and (ii) the price at which investors can buy and sell shares is reduced to a reasonable level.

Pursuant to the agreement concluded between SIX Swiss Exchange and the market makers, the latter shall undertake to maintain a market for fund units within a certain framework and under normal conditions, and, within this context, enter bid and ask prices for fund units in the SIX trading system, which as a rule, and under normal conditions, shall not exceed a spread of 2% (1% above and below the indicative net asset value).

7.9 Declaration on primary / secondary listing
