What is this product?

Type
This product is a UCITS exchange traded fund or "UCITS ETF". It is a sub-fund of JPMorgan ETFs (Ireland) ICAV, an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between its sub-funds and authorised by the CBI pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

Objectives, Process and Policies
Objective The objective of the Sub-Fund is to achieve a long-term return in excess of the Benchmark by investing primarily in bonds where proceeds are directed to projects and activities that contribute towards a more sustainable and inclusive economy.
Share Class Benchmark Bloomberg Global Aggregate Green Social Sustainability Bond 1-10 year Index
Investment Policy The Sub-Fund pursues an actively managed investment strategy.
The Sub-Fund aims to invest in a portfolio of investment grade bonds which have been labelled as Green, Social, Sustainable and Sustainability-linked (or which have equivalent features or labels, as determined by the Investment Manager, using the proprietary framework described below) issued by governments and their agencies, state and provincial governmental entities and supranational organisations and corporations. The bonds may include up to 20% of Net Asset Value in MBS/ABS and up to 15% of Net Asset Value in below investment grade bonds. Issuers may be located anywhere in the world, including (without limit) emerging markets and onshore bonds issued within the PRC, through China-Hong Kong Bond Connect.
The Sub-Fund has sustainable investment as its objective and the Investment Manager considers that the Sub-Fund's investments will qualify as "sustainable investments" for the purposes of the SFDR and will invest a minimum of 90% of the Sub-Fund's Net Asset Value in these "sustainable investments". Investments are evaluated and deemed sustainable investments via the following process.
The investment process to identify bonds for inclusion in the Sub-Fund's portfolio has two steps: 1) application of proprietary selection criteria through the Investment Manager's proprietary research framework to identify the most compelling, sustainable issuances; and 2) exclusionary framework:
Step 1: The Investment Manager's proprietary framework determines whether a bond is eligible for inclusion in the Sub-Fund's portfolio based on the following criteria:
- the bond type label i.e. Green, Social, Sustainable or Sustainability-Linked;
- the consistency of the projects for which the bonds have been issued to fund with the Investment Manager's Sustainable and Inclusive Economy Framework and industry recognised standards. In order to assess the consistency of the projects, the use of the proceeds from each project will be measured against industry-recognised principles (for example, renewable energy and pollution prevention and control) which promote the role global debt capital markets can play in financing progress towards environmental and social sustainability. The principles outline best practices when issuing bonds serving social and/or environmental purposes, thereby underpinning the integrity of the market;
- a quantitative assessment based on the following industry principles: use of proceeds, project evaluation, segregation/transparency of proceeds, reporting and compliance;
Step 2: the Investment Manager evaluates and applies values and norms based screening to implement exclusions on certain industries and issuers based on specific ESG criteria and/or minimum standards of business practice based on international norms. To support this screening, the Investment Manager relies on third party provider(s) who identify an issuer's participation in or the revenue which they derive from activities that are inconsistent with the values and norms based screens.
Further details on the screening process can be found in the Sub-Fund's full exclusion policy which can be found on the Website (www.jpmorganassetmanagement.ie).
The Investment Manager may actively invest in certain bonds whose proceeds are directed to the transition to a sustainable economy. As a result the Sub-Fund may invest in bonds issued by issuers that would otherwise be excluded by the exclusions detailed above. Investment in such bonds is conditional on the bonds being sustainable investments and the issuer having good governance.
Ongoing monitoring is in place to ensure that the proceeds of bonds in which the Sub-Fund has invested are deployed as intended. If the proceeds are not deployed as intended, the Investment Manager will engage with the issue to determine the circumstances surrounding the difference in deployment relative to the Investment Manager's expectation. If the issuer can resolve the matter in the short-term the bond may continue to be held in the Sub-Fund's portfolio. If not, the bond will be sold as soon as reasonably practicable, taking into account the best interests of Shareholders.
For the avoidance of doubt, investors should note that the Sub-Fund will not seek to track the performance of or replicate the Benchmark rather the Sub-Fund will hold a portfolio of fixed income securities (which may include but will not be limited to Benchmark Securities) which are actively selected and managed with the aim of delivering an investment performance which exceeds that of the Benchmark over the long-term. The Benchmark has been included as a point of reference against which the performance of the Sub-Fund may be measured. The Sub-Fund may bear a close resemblance to the Benchmark.
The Sub-Fund systematically includes environmental, social and governance ("ESG") analysis in its investment decisions on at least 90% of securities purchased.
The Sub-Fund may invest in assets denominated in any currency and currency exposure may be managed by reference to the Benchmark. The risk characteristics of the portfolio of securities held by the Sub-Fund, such as volatility levels, will be broadly equivalent to the risk characteristics of the Benchmark.
The Sub-Fund may, for efficient portfolio management purposes, use financial derivative instruments.
USD is the base currency of the Sub-Fund.
The Sub-Fund will publicly disclose its complete holdings on a daily basis. Details of the Sub-Fund's holdings and full disclosure policy may be found on www.jpmorganassetmanagement.lu.
This Share Class seeks to minimise the effect of currency fluctuations between the currency of certain (but not necessarily all) assets of the Sub-Fund and the Reference Currency of this Share Class (EUR).
Redemption and Dealing Shares of the Sub-Fund are traded on one or more stock exchanges. Certain market makers and brokers may subscribe and redeem Shares directly with JPMorgan ETFs (Ireland) ICAV, and are referred to as "Authorised Participants". Other investors who are not Authorised Participants can purchase and sell Shares daily on a recognised stock exchange or over-the-counter.
Distribution Policy This Share Class does not pay dividends. Earned income is retained in the Net Asset Value.
SFDR Classification Article 9
Intended retail investor
This product is intended for investors who plan to stay invested for at least 5 years.

- Investors should understand the risks involved, including the risk of losing all capital invested and must evaluate the Sub-Fund objective and risks in terms of whether they are consistent with their own investment goals and risk tolerances. The Sub-Fund is not intended as a complete investment plan.
- The Sub-Fund is aimed at investors seeking to achieve a long-term return in excess of the Benchmark by actively investing primarily in a

portfolio of Green, Social, Sustainable and Sustainability-linked Bonds.
- Typical investors in the Sub-Fund are expected to be investors who want to make an asset allocation into the Green, Social, Sustainable and Sustainability-linked Bond sector.

Term This product does not have a fixed maturity date and may be liquidated in certain circumstances, as further detailed in the Prospectus.

What are the risks and what could I get in return?

Risks

Lower risk **Higher risk**

1	2	**3**	4	5	6	7

The risk indicator assumes you keep the product for 5 year(s).

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 3 out of 7, which is a medium-low risk class.

This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact our capacity to pay you. The risk of the product may be significantly higher if held for less than the recommended holding period.

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Beside the risks included in the risk indicator, other risks materially relevant for the product may affect its performance. Please refer to the relevant supplement, available free of charge at www.jpmorganassetmanagement.lu.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 2017 and 2022.

Moderate: this type of scenario occurred for an investment between 2020 and 2025.

Favourable: this type of scenario occurred for an investment between 2016 and 2021.

What happens if JPMorgan Asset Management (Europe) S.à.r.l. is unable to pay out?

JPMorgan Asset Management (Europe) S.à r.l. is responsible for administration and management of the Sub-Fund and does not hold assets of the Sub-Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). JPMorgan Asset Management (Europe) S.à r.l., as the manufacturer of this product has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Sub-Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset, all or any of, your loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:
- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- € 10,000 is invested.

Example Investment € 10,000	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	**€ 58**	**€ 271**
Annual cost impact*	**0.6%**	**0.6%**

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be -1.4% before costs and -2.0% after costs.
