WHAT IS THIS PRODUCT?

Type

This Product is an undertaking for collective investment in transferable securities (UCITS) qualifying as an exchange-traded fund (ETF). It is a sub-fund of BNP PARIBAS Easy ICAV, an open-ended investment vehicule with variable capital organised governed by the laws of Ireland as well as by UCITS Directive 2009/65/CE.

Term

This Product has no maturity date.
BNPP AM is not entitled to terminate the Product unilaterally. The board of directors of the ICAV has the authority to decide to terminate the Product under specific circumstances as descibed in the prospectus.

Objectives

Investment Objective: The Sub-Fund (the "Fund") seeks to replicate the performance of the ECPI Global ESG Infrastructure Equity (NR) Index (Bloomberg: GALPHGIN Index) (the "Index") while aiming to minimise the tracking error between the Fund's Net Asset Value and the Index.
Investment Policy: The Fund pursues a passively managed (index tracking) strategy.In order to achieve its investment objective, the Fund will generally seek to replicate the Index by holding all of the Index equity securities in a similar proportion to their weighting in the Index (Full Replication as defined in the Prospectus). The Fund may also employ Optimised Replication (as defined in the Prospectus) and select Index equity securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.
The objective of the Index is to provide investors with exposure to global developed market companies that are best placed to seize the opportunities offered by the growing demand for sustainable infrastructure development and maintenance. The Index selects securities in line with the long-term growth of infrastructure trends with positive Environmental, Social and Corporate Governance (ESG) ratings (such as transport, social services, water, waste management, human capital, corporate governance, etc.) and based on their efforts to reduce their exposure to coal and unconventional fossil fuels. As a result, companies involved in sectors with a potentially high negative ESG impact, those subject to significant violations of the UN Global Compact principles and those involved in severe ESG-related controversies are excluded from the Index.The type of approach implemented by the Index is thematic (i.e., the Index is composed of companies that provide products and services proving concrete solutions to specific environmental and/or social challenges, seeking to benefit from future growth anticipated in these areas while contributing capital to the transition towards a low-carbon, inclusive economy).
The Index is rebalanced semi-annually.
The extra-financial strategy of the Index, carried out at each step of the investment process, may comprise methodological limitations such as the Extra-financial Criteria and Sustainable Investments Risk or the Index rebalancing.The Fund's base currency is Euro.Further information on the Index, its composition, calculation and rules for monitoring and periodic rebalancing, as well as information on the general methodology common to all ECPI indices, can be found at www.ecpigroup.com.
Distribution Policy: It is not the current intention of the Directors to declare dividends in respect of Classes identified as "Capitalisation".Recommendation: This Fund is suitable for medium to long term investment, though the Sub-Fund may also be suitable for shorter term exposure to the Index.Please refer to the supplement of the Fund (the "Supplement") for additional details about the objective and investment policy.
