WHAT IS THIS PRODUCT?

Type

This Product is an undertaking for collective investment in transferable securities (UCITS) qualifying as an exchange-traded fund (ETF). It is a sub-fund of BNP PARIBAS Easy ICAV, an open-ended investment vehicle with variable capital organised governed by the laws of Ireland as well as by UCITS Directive 2009/65/CE.

Term

This Product has no maturity date.

BNPP AM Europe is not entitled to terminate the Product unilaterally. The board of directors of the ICAV has the authority to decide to terminate the Product under specific circumstances as described in the prospectus.

Objectives

Investment Objective: The Sub-Fund (the "Fund") seeks to replicate the performance of the ECPI Global ESG Infrastructure Equity (NR) Index (Bloomberg: GALPHGIN Index) (the "Index") while aiming to minimise the tracking error between the Fund's Net Asset Value and the Index.

Investment Policy: The Fund pursues a passively managed (index tracking) strategy.

In order to achieve its investment objective, the Fund will generally seek to replicate the Index by holding all of the Index equity securities in a similar proportion to their weighting in the Index (Full Replication as defined in the Prospectus). The Fund may also employ Optimised Replication (as defined in the Prospectus) and select Index equity securities in order to build a representative portfolio that provides a return that is comparable to that of the Index.

The objective of the Index is to provide investors with exposure to global developed market companies that are best placed to seize the opportunities offered by the growing demand for sustainable infrastructure development and maintenance. The Index selects securities in line with the long-term growth of infrastructure trends with positive Environmental, Social and Corporate Governance (ESG) ratings (such as transport, social services, water, waste management, human capital, corporate governance, etc.) and based on their efforts to reduce their exposure to coal and unconventional fossil fuels. As a result, companies involved in sectors with a potentially high negative ESG impact, those subject to significant violations of the UN Global Compact principles and those involved in severe ESG-related controversies are excluded from the Index.

The type of approach implemented by the Index is thematic (i.e., the Index is composed of companies that provide products and services proving concrete solutions to specific environmental and/or social challenges, seeking to benefit from future growth anticipated in these areas while contributing capital to the transition towards a low-carbon, inclusive economy).

The Index is rebalanced semi-annually.

The extra-financial strategy of the Index, carried out at each step of the investment process, may comprise methodological limitations such as the Extra-financial Criteria and Sustainable Investments Risk or the Index rebalancing.

The Fund's base currency is Euro.

Further information on the Index, its composition, calculation and rules for monitoring and periodic rebalancing, as well as information on the general methodology common to all ECPI indices, can be found at www.ecpigroup.com.

Distribution Policy: It is not the current intention of the Directors to declare dividends in respect of Classes identified as "Capitalisation".

Recommendation: This Fund is suitable for medium to long term investment, though the Sub-Fund may also be suitable for shorter term exposure to the Index.

Please refer to the supplement of the Fund (the "Supplement") for additional details about the objective and investment policy.

Intended retail investors

This Product is designed for retail investors who have neither financial expertise nor any specific knowledge to understand the Product but nevertheless may bear a total capital loss. It is suited for clients who seek growth of capital. Potential investors should have an investment horizon of at least 5 years.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The risk indicator assumes you keep the Product for 5 years.

You may not be able to sell your Product easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this Product compared to other Products. It shows how likely it is that the Product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Product as 4 out of 7, which is a medium risk class. The risk category is justified by the investment mainly in stocks and shares, the value of which can fluctuate considerably. These fluctuations are often amplified in the short term.

Be aware of currency risk. If the currency of your account is different from the currency of this Product, the payments you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risk materially relevant to the Product not included in the summary risk indicator:

■ Operational risk: in the event of an operational breakdown within the management company, one of its representatives or the depositary, investors could face various disruptions (late payment, delivery etc.).

For additional details regarding the risks, please refer to the prospectus.

This Product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios presented represent examples using the best and worst performance, as well as the average performance of the Product and/or appropriate benchmark over the last 10 years. The markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period: 5 years

Example Investment: EUR 10,000

If you exit after 1 year

WHAT HAPPENS IF BNPP AM EUROPE IS UNABLE TO PAY OUT?

The ICAV is incorporated as a separate entity distinct from BNPP AM Europe. In the event BNPP AM Europe would default, the assets of the Product/ICAV, held by a depositary, would not be affected by this default.

In case of default of the depositary, the risk of financial loss of the Product/ICAV is mitigated by the legal segregation of the assets of the depositary from those of the Product/ICAV.

WHAT ARE THE COSTS?

The person advising on or selling you this Product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. If this Product is used as an underlying of an insurance policy or a capitalization policy, the costs presented do not include any costs related to such policies.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

■ in the first year, you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the Product performs as shown in the moderate scenario.

■ EUR 10,000 is invested.

	If you exit after 1 year	If you exit after 5 years
Total Cost	32.71 EUR	217.54 EUR

	If you exit after 1 year	If you exit after 5 years
Annual Cost Impact (*)	0.33%	0.35%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.08% before costs and 5.73% after costs.

Composition of costs

In case of conversion, no fee will be charged.

* The Product is an ETF. Investors who are not Authorised Participants will generally only be able to buy or sell shares on the secondary market where shares of the Product are traded with the assistance of an intermediary (e.g. a broker). Investors may incur fees and costs for doing so which are payable to the investor's intermediary and not charged by the Product itself or its management company. In addition, investors may pay more than the current net asset value when buying shares and may receive less than the current net asset value when selling them. On the primary market Authorised Participants or Authorised Investors dealing directly with the Product may pay related primary market costs as described in the prospectus.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period ("RHP"): 5 years.

The RHP has been defined and based on the risk and reward profile of the Product.

Investors are able to redeem on a daily basis (on bank business days) as described in the prospectus.

Any redemption occurring before the end of the RHP may adversely impact the performance profile of the Product.
