Objectives and Investment Policy

- The objective of the Fund is to provide exposure to the performance of Euro denominated Additional Tier 1 contingent convertible bonds issued by banks from global developed market countries.
- The Fund is a passively managed Exchange-Traded Fund ("**ETF**").
- To achieve the investment objective, the Fund will seek to replicate the total return performance of the iBoxx EUR Contingent Convertible Liquid Developed Markets AT1 (8% Issuer Cap) Index (the "**Index**") less fees, expenses and transaction costs.
- The Fund will, as far as possible and practicable, replicate the Index by holding all the securities in the Index in a similar proportion to their respective weightings in the Index.
- The Fund is an Article 8 Fund (it promotes environmental and/or social characteristics) for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector ("**SFDR**").
- The Fund's base currency is EUR.
- This Share Class does not pay you income, but instead reinvests it to grow your capital, in line with its stated objectives.
- The Fund may use derivative instruments for the purposes of managing risk, reducing costs, generating additional capital or income.
- **Net Asset Value:** This is calculated daily and the Fund is open for subscriptions and redemptions on each day the Trans-European Automated Real-Time Gross Settlement Express Transfer System (T2) System is open. Please refer to the prospectus for further information.
- **The Index:** The Index is designed to reflect the performance of EUR-denominated Additional Tier 1 ("**AT1**") contingent convertible bonds issued by banks from global developed market countries. AT1 capital bonds are a type of contingent convertible bond issued by banks that qualify as regulatory capital under Basel III. The Index is based on the Markit iBoxx EUR Contingent Convertible Developed Market Index (the "**Parent Index**"), which is designed to reflect the performance of contingent convertible debt issued by banks and insurance companies from developed market countries. The Index only includes AT1 capital bonds from the Parent Index that have a minimum rating of B using the Index provider's rating methodology, that have a minimum par amount outstanding of EUR 500 million, and that have a remaining time to maturity of at least one year on the date of rebalancing. The Index provider applies exclusionary criteria to exclude securities that: 1) are involved (as defined by the Index provider) in any of the following business activities: controversial weapons, small arms, military contracting, oil sands, thermal coal, tobacco, cannabis and predatory lending; and 2) are deemed not to comply with the principles of the United Nations Global Compact. Involvement and revenue thresholds are defined by the Index provider. Further information in relation to any revenue thresholds and controversy scoring criteria, can be obtained from the Index provider's website. Issuer weights are capped at 8% in the Reference Index. The Index is rebalanced on a monthly basis.
- **Redemption and Dealing of Shares:** The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from the Umbrella Fund in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.

Risk and Reward Profile

Lower Risk ← → Higher Risk

Typically lower rewards — Typically higher rewards

1	2	3	**4**	5	6	7

- The Share Class is in risk category 4 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- **General Investment Risk:** The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.
- **Concentration Risk:** The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified.
- **Contingent Convertible Bonds Risk:** This Fund invests in contingent convertible bonds, a type of corporate debt security that may be converted into equity or forced to suffer a write down of principal upon the occurrence of a pre-determined event. If this occurs, the Fund could suffer losses. Other notable risks of these bonds include liquidity and default risk.
- **Country Concentration Risk:** The Fund is invested in a particular geographical region, which might result in greater fluctuations in the value of the Fund than for a fund with a broader geographical investment mandate.
- **Credit Risk:** The creditworthiness of the debt the Fund is exposed to may weaken and result in fluctuations in the value of the Fund. There is no guarantee the issuers of debt will repay the interest and capital on the redemption date. The risk is higher when the Fund is exposed to high yield debt securities.
- **Environmental, Social and Governance Risk:** The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings.
- **Interest Rate Risk:** Changes in interest rates will result in fluctuations in the value of the Fund.
- **Securities Lending Risk:** The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.
