Fund overview

ISIN
IE000H0H26Q8

Investment objective: The objective of the Sub-Fund is to achieve a long-term return in excess of the Benchmark, by actively investing primarily in a portfolio of companies globally, including emerging markets, while seeking to align with the objectives of the Paris Agreement.

Investment policy: The Sub-Fund pursues an actively-managed investment strategy.

Investment approach

- Uses a fundamental, bottom-up selection process.
- Enhanced index approach that builds a portfolio in reference to a Paris-aligned benchmark by overweighting securities with the highest potential to outperform and underweighting securities considered most overvalued.
- Investment process built on stock level analysis by a global research team.
- Diversified portfolio with disciplined, risk-controlled portfolio construction while retaining the decarbonization objectives of the Paris Agreement.

Investor profile:

- Typical investors in the Sub-Fund are expected to be investors who seek long-term capital growth through exposure to global stock markets whilst seeking to promote the characteristics of the Paris Agreement, who seek to benefit from potential excess returns with similar risks to investing in securities representing the Benchmark and who are prepared to accept the risks associated with an investment of this type, including the volatility of such market.

Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.
The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
Emerging markets may be subject to increased political, regulatory and economic instability, less developed custody and settlement practices, poor transparency and greater financial risks. Emerging market currencies may be subject to volatile price movements. Emerging market securities may also be subject to higher volatility and lower liquidity than developed market securities respectively.
REITs and real estate related investments are subject to the risks associated with the ownership of real estate which may expose the relevant Sub-fund to increased liquidity risk, price volatility and losses due to changes in economic conditions and interest rates.
Since the instruments held by the Sub-Fund may be denominated in currencies other than the Base Currency, the Sub-Fund may be affected unfavourably by exchange control regulations or fluctuations in currency rates. For this reason, changes in currency exchange rates can affect the value of the Sub-Fund's portfolio and may impact the value of the Shares.
In respect of unhedged Share Classes in a currency other than the Base Currency of the Sub-Fund, the value of the Share Class will be subject to exchange risk in relation to the Base Currency of the Sub-Fund.
Sustainability risk may materially negatively impact the financial condition or operating performance of an issuer and therefore the value of that investment. In addition, sustainability risk may increase the Sub-Fund's volatility and/or magnify pre-existing risks to the Sub-Fund.
The Sub-Fund seeks to provide a return above the Benchmark, however the Sub-fund may underperform the Benchmark.
Further information about risks can be found in the "Risk Information" section of the Prospectus.

The risk indicator is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown above is not guaranteed to remain unchanged and may change over time. A Share Class with the lowest risk rating does not mean a risk-free investment. See the Key Investor Information Document (KIID) for details.
The possible difference between the current ongoing charge as stated in this document and those mentioned in the KIID, is caused by the fact that the costs mentioned in the KIID are an estimate based on the actual costs incurred over the past year.
