

Franklin Euro IG Corporate UCITS ETF

Class SINGLECLASS • ISIN IE000H0TSO96 • A sub-fund of Franklin Templeton ICAV

The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Franklin Euro IG Corporate UCITS ETF (the "Fund") aims to provide income from the European corporate bond market while seeking to preserve capital.

The Fund invests primarily in Euro-denominated investment grade corporate debt securities.

The Fund will invest at least 80% of its Net Asset Value in fixed and floating rate investment grade corporate debt securities. The Fund may invest in debt securities of any maturity or duration. Corporate issuers may include corporate or other business entities in which a sovereign or government agency may have a direct or indirect interest, including an ownership interest.

The Fund pursues an actively managed investment strategy. Therefore, the Fund will hold a portfolio of actively selected and managed investments rather than seek to track the performance of the benchmark. The Fund's benchmark, the Bloomberg Euro-Aggregate Corporates Index is a point of reference against which the performance of the Fund may be measured. It is anticipated that a significant percentage of the Fund's investments will be components of the benchmark. However, their weightings may deviate materially from those of the benchmark. The Fund may also invest in securities that are not included in the benchmark.

The securities in which the Fund invests will be primarily listed or traded on recognised markets in Europe in accordance with the limits set out in the UCITS Regulations.

The Fund may use derivatives for efficient portfolio management or investment purposes.

Environmental, social and governance (the "ESG") factors are an important

component of the Investment Manager's corporate credit research process and the Fund seeks to promote environmental and social characteristics.

The Fund employs a proprietary ESG rating methodology with the aim of identifying best in class issuers and to avoid investment in issuers that are lagging in the transition to support a low-carbon economy. The ESG rating methodology is applied to at least 90% of the issuers present in the Fund's portfolio and is binding for the portfolio construction. The Fund will exclude issuers in each category (i.e. sovereign and corporate) that score in the bottom 20% of its investment universe from its portfolio.

The Fund is classified as Article 8 under the EU Sustainable Finance Disclosure Regulation.

For distribution shares, dividend income is distributed to investors.

For further information on the Objectives and Investment Policy of the Fund, please refer to the "Investment Objective and Strategy" section of the current prospectus of Franklin Templeton ICAV and the Fund supplement.

Terms to Understand

Debt securities: Securities representing the issuer's obligation to repay a loan at a specified date and to pay interest.

Derivatives: Financial instruments whose characteristics and value depend on the performance of one or more underlying assets, typically securities, indexes, currencies or interest rates.

Investment grade debt securities: securities that are rated at the time of purchase in the top four ratings categories by one or more recognised rating agencies or, if unrated, are determined to be of comparable quality.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in debt securities issued by any government or corporation worldwide. Such securities have historically been subject to price movements, generally due to interest rates or movements in the bond

market. As a result, the performance of the Fund can fluctuate moderately over time.

Risks materially relevant not adequately captured by the indicator:

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

Counterparty risk: the risk of failure of financial institutions or agents (when serving as a counterparty to financial contracts) to perform their obligations, whether due to insolvency, bankruptcy or other causes.

Sustainability risk: The fund's integration of sustainability risks in the investment decision process may have the effect of excluding profitable investments from the investment universe of the fund and may also cause the fund to sell investments that will continue to perform well. A sustainability risk could materialise due to an environmental, social or governance event or condition which may impact the fund's investments and negatively affect the returns of the fund.

For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Considerations" section of the current prospectus of Franklin Templeton ICAV.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	Not applicable*
---------------------	-----------------

Exit charge	Not applicable*
--------------------	-----------------

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the Fund over a year

Ongoing charges	0.15%
------------------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	Not applicable
------------------------	----------------

*No entry nor exit charges are payable where investors deal in shares in the secondary market – i.e. where shares are purchased and sold on a stock exchange. In such cases, investors may pay fees charged by their broker. Authorised Participants dealing directly with the Fund may pay an entry charge up to a maximum of 3% and an exit charge up to a maximum of 2%. The entry and exit charges shown are maximum amounts: you may pay less in some cases. For more information please ask your financial adviser.

The ongoing charges shown here are an estimate of the charges. We have used estimated figures as under current applicable rules we are not allowed to calculate ongoing charges for share classes with less than 12 months of data. The UCITS' annual report for each financial year will include detail on the exact charges made.

For detailed information about charges, please refer to the "Fees and Expenses" section of the current prospectus of Franklin Templeton ICAV and the Fund supplement.
