L&G Market Neutral Commodities UCITS ETF

Share Class USD Accumulating ETF - ISIN: IE000IIHLZL0. The Fund is a sub-fund of Legal & General UCITS ETF Plc (the "**Company**"). Managed by LGIM Managers (Europe) Limited, a member of the Legal & General group (the "**Manager**")

OBJECTIVES AND INVESTMENT POLICY

- The investment objective of the Fund is to provide a long/short exposure to a broad base of futures contracts on physical commodities.
- The Fund is passively managed and aims to track the performance of the Barclays Backwardation Tilt Alpha Capped ex-Precious Metals 1.75x TR Index (the "Index"), before the deduction of fees and expenses.
- The Index is designed to provide long/short exposure to a diversified portfolio of commodity futures across multiple commodity sectors, using enhancement strategies, in accordance with its methodology.
- The Fund achieves exposure to the performance of the Index primarily through the use of financial derivative instruments, in particular total return swap agreements. The Fund may also invest in a basket of securities and/or other assets for collateral and liquidity management purposes, and may use other financial derivative instruments for efficient portfolio management or to assist in tracking the performance of the Index.
- This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be reinvested into the Fund.
- Shares in this share class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the Company. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on www.lgim.com.
- The Fund's base currency is denominated in US dollar (USD).

RISK AND REWARD PROFILE

Lower Risk — Higher Risk

Potentially lower rewards — Potentially higher rewards

1	2	3	**4**	5	6	7

- The Fund is rated 4 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free"

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The Index utilises leverage, meaning that its value may rise or fall more than the difference in performance of the two commodity indices to which it has exposure over the short, medium and/or long term.
- The Fund invests in securities valued in currencies that are different from the base currency of the Fund. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it
- If a swap counterparty is no longer willing or able to continue entering into swaps with the Fund, the Fund may not be able to continue tracking the Index and may need to close. If a swap counterparty increases the cost of entering into swaps with the Fund, the Fund's performance will be negatively impacted.
- Third party service providers (such as swap counterparties or the Company's depositary) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund.
- If the Index provider stops calculating the Index or if the Fund's license to track the Index is terminated, the Fund may have to be closed.
- It may not always be possible to buy and sell Shares on a stock exchange or at prices closely reflecting the NAV.
- There is no capital guarantee or protection on the value of the Fund. Investors can lose all the capital invested in the Fund.
- Please refer to the "Risk Factors" section of the Company's Prospectus and the Fund Supplement.
