What is this product?

The product is a share class of the Sub-fund Franklin Metaverse UCITS ETF (the "Fund") which is part of the Franklin Templeton ICAV (the "Umbrella Fund"), an Irish collective asset-management vehicle constituted as an umbrella fund with segregated liability between Sub-Funds with registration number C167746 and authorised by the Central Bank of Ireland pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011.

The Fund has no maturity date. The Fund could be closed under the conditions laid down in the current prospectus of the Fund.

Objectives

Investment Objective

The objective of the Franklin Metaverse UCITS ETF (the "Fund") is to provide equity exposure to listed companies around the world that are involved in the metaverse.

Investment Policy

The Fund seeks to track the performance of the Solactive Global Metaverse Innovation Index-NR (the "Index") as closely as possible, regardless of whether the Index level rises or falls, while seeking to minimise as far as possible the tracking error between the Fund's performance and that of the Index. The Index is comprised of global equity securities issued by companies that have or are expected to have significant exposure to the provision of products and/or services that contribute to the metaverse and supporting blockchain technologies. Index Securities are selected from the Solactive GBS Global Markets All Cap Index, a global all-cap free-float market capitalisation index consisting of developed and emerging market listed equities based on screening publicly available information such as financial news, business profiles and company publications using the Index Provider's proprietary natural language processing algorithm. This algorithm screens the publicly available information for key words that the Index

Provider has selected to describe the Index's theme, to identify companies that have or are expected to have significant exposure to the metaverse.

The securities in which the Fund invests will be primarily listed or traded on recognised markets globally in accordance with the limits set out in the UCITS Regulations.

The Fund may use derivatives for efficient portfolio management purposes only.

The Fund's shares are listed and traded on one or more stock exchanges. Investors can deal in shares daily through a broker on stock exchange(s) on which the shares are traded. Income from the Fund's investments will be reinvested and not distributed to investors.

Share Class Policy

For accumulation shares, income from investments is reinvested in the Fund and reflected in the price of shares.

Processing of subscription and redemption orders

The Fund's shares are listed and traded on one or more stock exchanges. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares directly with the Fund. Other investors can deal in shares daily through a broker on stock exchange(s) on which the shares are traded.

Intended retail investor

The Fund may appeal to investors looking to track the performance of the listed companies around the world that are involved in the metaverse and who are willing to hold their investment over the medium to long term, for a minimum period of 3 to 5 years. The Fund may be suitable for investors who do not have specific knowledge and/or experience of financial markets and who understand that they may not get back the full amount invested in the Fund.

Depository

What are the risks and what could I get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets.

We have classified this product as 6 out of 7, which is the second-highest risk class. This rates the potential losses from future performance at high level, and poor market conditions are very likely to impact the capacity to pay you.

Be aware of currency risk. In some circumstances, you may receive payment in a different currency, so that the final return you get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Other risks materially relevant to the product not included in the summary risk indicator:

- concentration risk

For a full discussion of all the risks applicable to this Fund, please refer to the "Investment Risk" section of the Fund supplement.

This product does not include any protection from future market performance so you could lose some or all of your investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10,000 is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	47 USD	448 USD
Annual cost impact (*)	0.5%	0.5% each year

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 17.6% before costs and 17.1% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Please note that the figures shown here do not include any additional fees that may be charged by your distributor, advisor or any insurance wrapper in which the fund may be placed.
