Investment risks

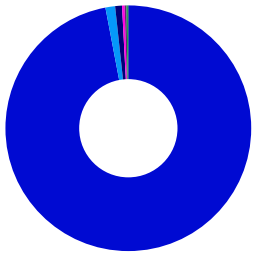

For complete information on risks, refer to the legal documents. The value of investments will fluctuate and you may not get back the full amount invested. The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults. The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings. The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified. The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund. Currency hedging between the base currency of the Fund and the currency of the share class may not completely eliminate the currency risk between those two currencies and may affect the performance of the share class.

About the index

The Reference Index is designed to reflect the performance of companies in the Nasdaq-100 Index (the "Parent Index") that meet specific ESG criteria. Companies are evaluated and weighted on the basis of their business activities, controversies and ESG Risk Ratings. The Reference Index is constructed by first excluding securities that: (1) are involved in adult entertainment, alcohol, arctic oil and gas exploration, recreational cannabis, controversial weapons, gambling, military weapons, nuclear power, oil and gas, oil sands, riot control, shale energy, small arms, thermal coal or tobacco; (2) do not comply with the principles of the UN Global Compact or have a high Sustainalytics controversy score; or (3) have a high Sustainalytics ESG Risk Rating or are not yet rated.

Invesco NASDAQ-100 ESG UCITS ETF EUR Hdg Acc was launched on 16 December 2025. Performance information will be available after 16 December 2026.

MSCI ESG Fund Rating: The Fund's ESG rating is designed to assess the resilience of the fund's aggregate holdings to long-term, financially relevant ESG risks and should facilitate the ability to rank or screen mutual funds and ETFs on a AAA to CCC ratings scale. This rating aims to provide fund level transparency and measures the ESG characteristics of the total portfolio.
