Invesco MSCI ACWI Islamic M-Series UCITS ETF Acc

MWIM

Fund objective

The Invesco MSCI ACWI Islamic M-Series UCITS ETF Acc aims to provide the net total return performance of the MSCI ACWI Islamic M-Series Index (the "Reference Index"), less the impact of fees.

An investment in this fund is an acquisition of units in a passively managed, index tracking fund rather than in the underlying assets owned by the fund.

Investment risks

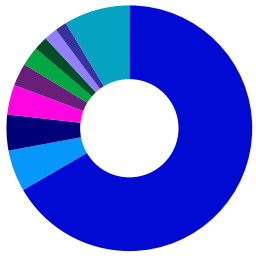

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. As a large portion of this fund is invested in less developed countries, investors should be prepared to accept a higher degree of risk than for an ETF that invests only in developed markets. The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund. The Index and its constituent holdings will be determined Shari'ah compliant by the Index Provider. Neither the Fund, the Manager nor the Investment Manager make any representation of such determination. The application of Shari'ah principles may result in the Fund performing differently from funds with comparable investment objectives that do not seek to adhere to Islamic investment criteria.

About the index

The Reference Index is designed to reflect the performance of large and mid-capitalisation companies that pass screens for adherence to Shari'ah investment principles from both developed and emerging market countries. The Reference Index is constructed from the MSCI ACWI Index (the "Parent Index") by applying Shari'ah investment principles. Companies are excluded if they are involved (as defined by the Index Provider) in any of the following prohibited business activities: alcohol, tobacco, pork-related products, non-Islamic conventional financial services, weapons and defence, hotels, gambling and casinos, cinema, music and adult entertainment. The remaining eligible companies are then subject to financial ratio screening and excluded if they derive significant income from interest or have excessive leverage in accordance with Shari'ah investment principles. The Reference Index is created by applying a float-adjusted market capitalisation weighting scheme of remaining eligible securities with the maximum issuer weight capped at 5%. The index is rebalanced quarterly. Performance of the Reference Index does not reflect non-permissible income received from the underlying securities.

Invesco MSCI ACWI Islamic M-Series UCITS ETF Acc was launched on 10 February 2026. Performance information will be available after 10 February 2027.

Important information

For information on our funds and the relevant risks, refer to the Key Information Documents/Key Investor Information Documents (local languages) and Prospectus (English), and the financial reports, available from www.invesco.eu. A summary of investor rights is available in English from www.invesco.com/ie-manco/en/home.html. The management company may terminate marketing arrangements.

This is marketing material and not financial advice. It is not intended as a recommendation to buy or sell any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication.

If investors are unsure if this product is suitable for them, they should seek advice from a financial adviser.

Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

Views and opinions are based on current market conditions and are subject to change.

UCITS ETF's units / shares purchased on the secondary market cannot usually be sold directly back to UCITS ETF. Investors must buy and sell units / shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units / shares and may receive less than the current net asset value when selling them.

The funds or securities referred to herein are not sponsored, endorsed, or promoted by MSCI Inc. ("MSCI"), and MSCI bears no liability with respect to any such funds or securities or any index on which such funds or securities are based. The prospectus contains a more detailed description of the limited relationship MSCI has with Invesco and any related funds.

Not all share classes of this fund may be available for public sale in all jurisdictions and not all share classes are the same nor do they necessarily suit every investor.

For the full objectives and investment policy please consult the current prospectus.

Issued by Invesco Asset Management Limited, Perpetual Park, Perpetual Park Drive, Henley-on-Thames, Oxfordshire RG9 1HH, UK. Authorised and regulated by the Financial Conduct Authority. This fund is authorised overseas, not in the UK. The UK Financial Ombudsman Service is unlikely to be able to consider complaints about this fund, its management company, or its depositary. Any losses related to the management company or depositary are unlikely to be covered by the UK Financial Services Compensation Scheme.

Glossary

Benchmark: An index against which the ETF is measured, in terms of relative performance, risk and other useful comparisons.

Distribution Yield: The distribution yield is a measurement of cash flow being paid. It's the sum of the distributions over 12 months divided by the net asset value (NAV) of the fund.

ETF: Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

Factors: An investment approach that seeks to identify and invest in securities that display certain quantifiable characteristics. Common examples of factors include Value, Quality and Momentum. A factor strategy may seek to target just one factor or combine multiple factors.

Hedged: The intended result of reducing the portfolio's exposure to a specific risk, such as the risk of fluctuations between currency exchange rates ("currency hedging").

ISA: Individual Savings Account. A type of investment account in the UK in which the tax on income is lower than usual, and there is no tax on profits made from an increase in the value of shares.

Physical Replication: Physical funds invest directly in constituents of the benchmark index.

Replication Method: Strategy employed by the fund to achieve its objective.

SIPP: Self-Invested Pension Plan. A type of UK pension for which a person makes their own investment decisions.

UCITS: Undertakings for Collective Investment in Transferable Securities. European regulatory framework for an investment vehicle that can be marketed across the European Union.

UK Reporting Status: Indicates whether or not the fund has United Kingdom fund tax status, this can lead to a UK investor receiving favourable tax rates on any gain or disposal of holdings in the fund.
