Ratings/Awards

CITYWIRE +

Fund Objective & Policy

The Fund aims to increase the value of your investment over the long term.
The Fund invests at least 80% of its assets in listed equity and equity related securities of global companies listed or traded on Regulated Markets.
The Fund will invest up to 20% of its net assets in emerging markets which may include China A shares through the Shanghai-Hong Kong Stock Connect and / or the Shenzhen-Hong Kong Stock Connect.
The Fund is actively managed in reference to the MSCI ACWI Index. The index is broadly representative of the companies in which the Fund invests and provides a suitable target benchmark against which Fund performance will be measured and evaluated over time. The Investment Manager has discretion to select investments with weightings different to the index, and that are not in the index, and the Fund may display significant divergence from the index.
The Fund applies a proprietary research model to generate model rankings for individual companies based on three underlying themes: (i) Quality; (ii) Catalyst; and (iii) Value. The Fund selects securities that rank most highly with regard to each theme relative to other securities within their industry.
The Fund promotes environmental and social characteristics by applying a proprietary ESG (environmental, social and governance) materiality rating model to assess investee companies' exposure to material ESG risks in their respective industries. In applying the proprietary ESG model, the Fund aims to compare favourably against the index over rolling 12-month periods. At least 50% of the Fund is invested in companies that are aligned with environmental or social characteristics.
The Fund also commits to investing at least 20% of its assets in sustainable investments. The Fund excludes companies that derive certain levels of revenue from industries such as, but not limited to, coal and tobacco. It also excludes companies that have direct involvement in nuclear or controversial weapons, and companies determined to have breached international standards and principles.
The Investment Manager engages with companies to encourage improvement of their ESG practices.
Further information about the environmental or social characteristics promoted by the Fund is available in the SFDR Annex to the Fund Supplement available at www.columbiathreadneedle.com. The Fund is considered to fall within the scope of Article 8 of SFDR.

Risk & Reward Profile

UCITS SRRI

The Risk and Reward Indicator demonstrates where the Fund ranks in terms of it's potential risk and reward. Please see the Key Investor Information Document for more information.

Typically lower rewards, lower risk ← → Typically higher rewards, higher risk

1	2	3	4	5	6	7

Key Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- The fund typically carries a risk of high volatility due to its portfolio composition or the portfolio management techniques used. This means that the fund's value is likely to fall and rise more frequently and this could be more pronounced than with other funds.
- The Fund applies a range of measures as part of its consideration of ESG factors, including the exclusion of investments involved in certain industries and/or activities. This reduces the investable universe, and may impact the performance of the Fund positively or negatively relative to a benchmark or other funds without such restrictions.
- The risks currently identified as applying to the Fund are set out in the "Risk Factors" section of the prospectus and relevant Supplement.

Source: Confluence & Morningstar UK Limited © 2026 as at 30/09/26.
NAV returns are based on the ETF's Net Asset Value and assume reinvestment of distributions. Market Price returns are based on the bid–ask midpoint (or last traded price, as applicable) and may differ from NAV returns due to market factors such as liquidity, spreads, and premiums/discounts.
Index returns include capital gains and assume reinvestment of any income. The index does not include fees or charges and you cannot invest directly in it.
The Morningstar Categories for funds in the Europe/Asia/Africa universe include funds domiciled in Europe and/or traded on European Markets. Morningstar regularly reviews the category structure and the funds within each category to ensure that the system meets the needs of investors and keeps pace with market developments. The performance shown includes Open End Funds and Exchange Traded Funds only and is filtered by Primary Share Class in Morningstar Offshore Territories Classification.
Performance figures will be shown once the share class has a 12 month track record.

The Fund promotes environmental or social characteristics and is categorised as Article 8 under the EU Regulation 2019/2088 on sustainability-related disclosures in the financial services sector (SFDR).

MSCI ESG Rating & Score
The MSCI score assesses effectiveness at managing ESG exposure. If the fund score is above the index, the fund is overweight in issuers that manage their ESG exposures better than others. The MSCI ESG rating shows the assessment as a seven-point letter rating scale from AAA to CCC. These assessments are intended to be interpreted relative to a company's industry peers.

Columbia Threadneedle ESG Materiality Rating
We give companies an ESG materiality score using our ESG Materiality Rating model. This model, owned and developed by Columbia Threadneedle, builds on the Sustainability Accounting Standards Board (SASB) materiality framework and identifies the most financially material ESG risk and opportunity factors across a wide range of industries, based on subjective indicators. Where sufficient data is available, the output of the model is a rating from 1 to 5. The ratings indicate how much exposure a company has to material ESG risks and opportunities in a particular industry. A rating of 1 indicates that a company has minimal exposure to material ESG risks and a rating of 5 indicates that a company has a higher exposure to such risks. These ratings help us gain deeper insights into ESG issues and prioritise our engagement activity.

Tilt
The "Tilt" figure shows the bias of the fund relative to the index. It is expressed as the arithmetic difference in the weighting. A positive tilt indicates a bias towards a "better" RI profile than the index.

Sustainable Finance Disclosure Regulation (SFDR)
EU regulation requiring investors and funds to communicate how they integrate sustainability risk and consider principal adverse impacts. It also classifies funds into different categories depending on their sustainability approach and requires increased related disclosure.

Net Zero
Means balancing the amount of greenhouse gases emitted with the amount removed from the atmosphere.

PAIs
Principle adverse impacts (PAIs) are the main, potential negative effects on sustainability factors of our investments, based on criteria defined by European regulators.

Sustainable Investments Committed & Actual
The minimum percentage that the fund has committed to investing in sustainable investments (if applicable) and the actual percentage that the fund currently holds in sustainable investments.

Carbon Footprint (tCO2e/US $m invested)
Total carbon emissions for a portfolio normalized by the market value of the portfolio, expressed in tonnes of CO2e per US $1m invested.

Weighted Average Carbon Intensity (tCO2e/US $m revenue)
This measures carbon emissions relative to the size of issuers, measured by revenues. The metric used is tons of CO2e per US $1m of revenues. We give data for the overall fund based on the weightings of the securities held and a comparison with similar data for the index.

Coverage
The fund and index's percentage of market value consisting of holdings for each applicable metric. Cash and derivatives, sovereign bonds, fund of funds, and asset-backed securities are excluded from coverage and all climate emissions calculations, unless otherwise stated in the case of sovereign bonds.

Scope 1 & 2 Emissions
The building blocks used to measure the carbon emissions and carbon intensity of a company. Under an international framework called the Greenhouse Gas Protocol these are divided into scope 1, 2 and 3 emissions. Scope 1 emissions are generated directly by the business (e.g. its facilities and vehicles). Scope 2 covers emissions caused by something a company uses (e.g. electricity). Scope 3 is the hardest to measure. It covers other indirect emissions generated by the products it produces (e.g. from people driving the cars a company makes).

Measures are being used to compare the ESG characteristics of the fund against the Index. This index also provides a helpful benchmark against which the financial performance can be compared. Accordingly, the index is not designed to specifically consider environmental or social characteristics. For more information on Responsible Investment (RI) or investment terms used in this document, please see the Glossary published in the Document Centre on our website: https://www.columbiathreadneedle.co.uk/en/retl/about-us/responsible-investment/. The decision to invest in the promoted fund should also take into account all the characteristics or objectives of the promoted fund as described in its prospectus. The fund's sustainability related disclosures can be found on our website columbiathreadneedle.com. The ESG materiality scores are calculated on a trailing 12-month weighted average. For periods less than 12 months the rolling average will be calculated using the months available. Weighted average is computed using an equal weighting of the metric for each of the business days contained in the prior 12-month period. Cash and derivatives are excluded from coverage.
