More ESG information is available in the sales prospectus and supplement and on the DWS website. INVESTMENT OBJECTIVE: The aim is for your investment to reflect the performance of the Bloomberg MSCI EUR Corporate and Agency Green Bond Index (index). DESCRIPTION OF INDEX: The index aims to reflect the performance of certain types of Euro-denominated investment grade tradable debt (bonds) issued by corporate and agency issuers to fund projects with direct environmental benefits and that meet specific credit quality and liquidity requirements. In order to be eligible for inclusion in the index, the issuers of the bonds must meet certain ESG screening criteria. ESG CRITERIA: Bonds which breach the following ESG standards, amongst others, are excluded: (i) are associated with controversial, civilian, conventional and nuclear weapons and tobacco, (ii) are assigned an MSCI ESG Rating of CCC, (iii) derive revenues from thermal coal and oil sands extraction and military defence weapons, and (iv) are assigned an MSCI ESG Controversies Score of 0 (red flag). Bonds must also meet the green bond eligibility criteria as independently evaluated by MSCI ESG Research, including: (i) stated use of proceeds, (ii) process for green project evaluation and selection, (iii) management of proceeds, and (iv) ongoing reporting of environmental performance of the use of proceeds. INDEX REBALANCING, CALCULATION AND ADMINISTRATION: The index is reviewed and rebalanced monthly, where the weight of each issuer in the index is capped at a maximum 5% of the market value of the index. The index is calculated on a total return basis. This means that all interest payments received from bonds are reinvested in the index. INVESTMENT POLICY: To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying a portfolio of securities that may comprise the constituents of the index or other unrelated investments as determined by DWS entities. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of derivatives. FURTHER INFORMATION: Certain information (including the latest share prices of the fund, indicative net asset values, full disclosure on the composition of the fund's portfolio and information on the index constituents) are available on your local DWS website or at www.Xtrackers.com. Transaction costs and taxes, unexpected fund costs and market conditions such as volatility or liquidity issues may affect the ability of the fund to track the index. The anticipated level of tracking error in normal market conditions is 1 per cent. The return of the product is reflected by the daily calculated net asset value per unit and the distribution amount if applicable. The currency of the fund is EUR. Returns and gains are not distributed but are reinvested in the fund.
