

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

RIZE USA ENVIRONMENTAL IMPACT UCITS ETF: USD Accumulating ETF
Rize UCITS ICAV (the "ICAV")

ISIN: IE000PY7F8J9

The Fund is a sub-fund of Rize UCITS ICAV (the "ICAV").

Managed by IQ EQ Fund Management (Ireland) Limited (the "Manager") of the IQ EQ group of companies

Objectives and Investment Policy

FUND. The Rize USA Environmental Impact UCITS ETF (the "Fund") is a passively managed exchange traded fund ("ETF") that aims to replicate the performance of the Foxberry SMS USA Environmental Impact USD Net Total Return Index (the "Index").

INDEX. The Index is designed to provide exposure to United States companies that are developing and applying innovative and impactful solutions to tackle the world's most pressing climatic and environmental challenges. These are companies that are considered to be making a substantial contribution to one or more of the six environmental objectives of the EU Sustainable Finance Taxonomy: (1) Climate change mitigation; (2) Climate change adaptation; (3) The sustainable use and protection of water and marine resources; (4) The transition to a circular economy; (5) Pollution prevention and control; and (6) The protection and restoration of biodiversity and ecosystems. The Index utilises a unique thematic classification and scoring system pursuant to which companies must derive at least 50% of their revenues from the sub-sectors of the "Environmental Impact Opportunities" thematic classification used by the Index and are primarily weighted according to their respective forward-looking Environmental Impact Scores.

The Index shall be rebalanced on a semi-annual basis. Please refer to the "The Index" section of the Fund Supplement for further detail.

TRACKING METHOD. The Fund will primarily invest in the companies contained in the Index in similar proportions to their weightings in the Index. The Fund may also invest in (1) Depositary receipts relating to the companies contained in the Index and (2) financial derivative instruments ("FDIs") which are investments the prices of which are based on the companies contained in the Index.

DIVIDEND POLICY. This Share Class does not intend to pay dividends. Any income which may result from the Fund's investments will be re-invested into the Fund.

DEALING. Shares in this Share Class (the "Shares") are denominated in USD and can be bought and sold on stock exchanges by ordinary investors using an intermediary (e.g. a stockbroker). In normal circumstances, only Authorised Participants may buy and sell Shares directly with the ICAV. Authorised Participants may redeem their Shares on demand in accordance with the "Dealing Timetable" published on <http://www.rizeetf.com>

Risk and Reward Profile

- Historical data may not be a reliable indication for the future.
- The risk category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'.

The Fund is rated 7 due to the nature of its investments and its risks. The rating is calculated based on historical data and may not be a reliable indication of the Fund's future risk profile. The risk category may shift over time. The lowest category on the above scale does not mean "risk free".

The Fund may be subject to the risks associated with companies operating in the renewable energy sectors including, but not limited to, fluctuating energy prices which impact upon company revenues, weather fluctuations that impact the ability to generate electricity, the risk that existing regulatory frameworks (the benefits of which might include commitments to pay premium prices, priority access to electricity grids, support for the necessary infrastructure investments and guarantees of purchases of renewable energy output) become less supportive and the cost of producing renewable energy which can be high relative to conventional energy sources / technologies (which pose a risk to the long term economic viability of renewable energy ventures).

The Fund may also be subject to the risks associated with companies developing new renewable energy technologies and other technologies associated with energy efficiency, electrification of vehicles and other modes of transport, water treatment and purification, waste management and recycling and pollution control,

including the risk arising from rapidly changing technologies and obsolescence of existing products; fierce competition from competitors with lower costs; aggressive pricing and reduced profit margins; the loss of patent, copyright and trademark protections; cyclical market patterns; evolving industry standards, evolving regulatory frameworks; and frequent new product introductions.

Some companies may be smaller and less experienced companies, with limited product lines, markets or financial resources and fewer experienced management or marketing personnel. They may experience extreme price and volume fluctuations that are often unrelated to their operating performance.

The Index is typically comprised of a mix of micro, small, mid and large capitalisation companies. Micro and small capitalisation companies may be more vulnerable to adverse business or economic events than larger, more established companies and may underperform other segments of the market or the equity market as a whole. Securities of micro and small capitalisation companies generally trade in lower volumes, are less liquid and are often more vulnerable to market volatility and greater and more unpredictable price changes than larger capitalisation stocks or the stock market as a whole.

Other: (1) Third party service providers (such as the ICAV's depositary) may go bankrupt and fail to pay money due to the Fund or return property belonging to the Fund. (2) If the Index provider stops calculating the Index or if the Fund's license to replicate the Index is terminated, the Fund may have to be closed. (3) It may not always be possible to buy and sell the Fund's Shares on a stock exchange or at prices closely reflecting the Net Asset Value. (4) There is no capital guarantee or protection on the value of the Fund and investors can lose all the capital invested in the Fund. (5) Please refer to the "Risk Factors" section of the ICAV's Prospectus and the Fund Supplement.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	No charge
Exit charge	No charge
Charges taken from the Fund over a year	
Ongoing charges	0.45%
Charges taken from the Fund under certain specific conditions	
Performance fee	No charge

*Authorised Participants dealing directly with the ICAV will pay dealing-related transaction costs.

Investors who buy and sell Shares on stock exchanges are not charged entry or exit charges by the ICAV but may be charged dealing costs and fees by their stockbroker. Please consult your stockbroker and/or investment adviser for details of such fees.

The ongoing charges figure is an estimate of the charges that will be deducted from the Share Class over the course of a year. The ongoing charges figure excludes portfolio transaction costs (except for transaction costs paid to the Depositary, which are included).

For more information about charges, please see the "Fees, Costs and Expenses" and "Subscriptions and Redemptions" sections of the ICAV's Prospectus and the "Fees and Expenses" and "Dealing in Shares of the Fund" sections of the Fund Supplement which are available at: <http://www.rizeetf.com>

Past Performance

- The Fund has been in existence since August 2023. This Share Class has been in existence since August 2023.
- There is insufficient data to provide a useful indicator of past performance to investors.

Practical Information

- Fund Depositary: Northern Trust Fiduciary Services (Ireland) Limited.
- The ICAV is resident in Ireland for taxation purposes. This may have an impact on your personal tax position. Please consult your investment or tax adviser for advice on your own tax liabilities.
- The Manager may be held liable solely on the basis of any statement contained in this document that is misleading, inaccurate or inconsistent with the relevant parts of the ICAV's Prospectus.
- Switching of shares between this Share Class and other share classes of the Fund and/or other sub-funds of the ICAV is not permitted.
- The Fund is one of a number of sub-funds of the ICAV. The assets and liabilities of each sub-fund are segregated from each other by Irish law. Although the rights of investors and creditors are normally limited to the assets of each sub-fund, the ICAV is a single legal entity that may operate in jurisdictions which may not recognise such segregation.
- Further information about the Fund and the Share Class can be obtained from the ICAV's Prospectus and Fund Supplement and the annual and interim financial statements (that are prepared for the ICAV as a whole), which are available in English and certain other languages, in addition to the latest available Net Asset Value for the Share Class and details of the Fund's portfolio, at: <http://www.rizeetf.com>
- Details of the Manager's up-to-date policy in respect of remuneration, including a description of how remuneration and benefits are calculated and the identities of the persons responsible for awarding same can be accessed from the following website: www.iqeq.com/policy-documents
- An indicative intra-day net asset value ("iNAV") for the Share Class will be available at: <http://www.rizeetf.com>

The ICAV is authorised in Ireland and regulated by the Central Bank of Ireland. The Manager is authorised in Ireland and regulated by the Central Bank of Ireland.
