Vanguard EUR Corporate Bond UCITS ETF

Managed by Vanguard Asset Management, Limited.

Investment Objective

Vanguard EUR Corporate Bond UCITS ETF seeks to track the performance of the Bloomberg Euro-Aggregate: Corporates Index, a widely recognised benchmark designed to reflect the total universe of publicly traded, fixed-coupon, euro-denominated, investment-grade corporate bonds with maturities greater than 1 year and a minimum issue size of €300 million.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- For the six months ended 31 December 2025, global financial markets rose, buoyed by optimism surrounding artificial intelligence, robust corporate earnings and more dovish monetary policy. The Federal Reserve lowered rates three times during the period, while the Bank of England cut rates twice.
- The ETF's benchmark index returned 1.21% for the period.
- Among the largest markets in the index, Austria, Italy, Spain, Germany and the United Kingdom outperformed. The United States and Japan were among the laggards.
- By sector, bonds issued by utilities and financial institutions returned more than those issued by industrial companies.
- By credit quality, bonds on the bottom rung of the investment-grade ladder returned more than their higher-rated counterparts. By maturity, shorter-term bonds generally fared better than longer-term bonds.

Benchmark returns in the commentary above are in euros.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

Vanguard EUR Eurozone Government Bond UCITS ETF

Managed by Vanguard Asset Management, Limited.

Investment Objective

Vanguard EUR Eurozone Government Bond UCITS ETF seeks to track the performance of the Bloomberg Euro-Aggregate: Treasury Index, a widely recognised benchmark designed to reflect the total universe of publicly traded, fixed-coupon, euro-denominated euro zone treasury securities with maturities greater than 1 year and a minimum issue size of €300 million.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- For the six months ended 31 December 2025, global financial markets rose, buoyed by optimism surrounding artificial intelligence, robust corporate earnings and more dovish monetary policy. The Federal Reserve lowered rates three times during the period, while the Bank of England cut rates twice.
- However, euro zone government bonds underwent fairly substantial volatility during the period, partly because of a surge in supply and yields, especially at longer maturities, along with persistent concerns about inflation, geopolitical risks, defense spending and fiscal loosening. The ETF's benchmark index returned 0.04% for the six months.
- Bonds in the index with maturities longer than 15 years posted negative returns, while those with maturities less than 15 years posted modest gains. By credit quality, bonds with lower ratings had higher returns than those with higher ratings.
- The 20 markets in the index had returns that ranged from mildly negative to mildly positive. The two largest markets – France and Italy – returned roughly –0.6% and 1.0%, respectively.

Benchmark returns in the commentary above are in euros.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

Investment Objective

Vanguard Global Aggregate Bond UCITS ETF seeks to track the performance of the Bloomberg Global Aggregate Float Adjusted and Scaled Index, a widely recognised benchmark designed to reflect the characteristics of the global aggregate bond universe.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- For the six months ended 31 December 2025, global financial markets rose, buoyed by optimism surrounding artificial intelligence, robust corporate earnings and more dovish monetary policy. The Federal Reserve lowered rates three times during the period, while the Bank of England cut rates twice.
- The ETF's benchmark index returned 2.19% for the period.
- Except for Japan and South Korea, all countries in the index posted positive returns. The US, which had the largest weighting in the index by far, returned about 3%.
- Bonds with the longest maturities (30 years or more) had modest declines, while maturities in the 5- to 10-year range had the highest gains.
- Securitized debt such as US mortgage-backed securities provided the largest returns, followed by corporate bonds. Government bonds posted modest gains.
- By credit quality, the picture was mixed. Securities with the lowest rating had the largest returns, followed by those with the second-highest rating.

Benchmark returns in the commentary above are in US dollars.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

Returns are based on NAV with income reinvested.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

Vanguard U.K. Gilt UCITS ETF

Managed by Vanguard Asset Management, Limited.

Investment Objective

Vanguard U.K. Gilt UCITS ETF seeks to track the performance of the Bloomberg Sterling Gilt Float Adjusted Index, a market-weighted index of UK government fixed income securities denominated in pound sterling.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- For the six months ended 31 December 2025, global financial markets rose, buoyed by optimism surrounding artificial intelligence, robust corporate earnings and more dovish monetary policy. The Federal Reserve lowered rates three times during the period, while the Bank of England (BoE) cut rates twice.
- The ETF's benchmark index returned 2.48% for the period.
- While the UK Consumer Price Index eased in the second half of 2025, it remained well above the BoE's 2% target. The unemployment rate moved higher over the same period.
- Longer-dated gilts generally fared better than short-dated ones: The average return for those maturing in 15 years or more was 3.27%, while those maturing in 10 years or less averaged a return of 2.11%.
- As a whole, gilts didn't gain as much ground as the broad UK investment-grade bond market, which returned 2.70%, as measured by the Bloomberg Sterling Aggregate Index.

Benchmark returns in the commentary above are in British pounds.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

Vanguard U.S. Treasury 0–1 Year Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC.

Investment Objective

Vanguard U.S. Treasury 0–1 Year Bond UCITS ETF seeks to track the performance of the Bloomberg Short Treasury Index, a widely recognised benchmark designed to measure the performance of US dollar-denominated bonds paying a fixed rate of interest issued by the US government.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- For the six months ended 31 December 2025, global financial markets rose, buoyed by optimism surrounding artificial intelligence, robust corporate earnings and more dovish monetary policy. The Federal Reserve lowered rates three times during the period, while the Bank of England cut rates twice.
- The ETF's benchmark index returned 2.17% for the six months, underperforming US Treasuries as a whole.
- Overall, Treasuries underperformed the broad US investment-grade bond market, which returned 3.08% as measured by the Bloomberg U.S. Aggregate Float Adjusted Index.

Benchmark returns in the commentary above are in US dollars.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

The Central Bank of Ireland requires a schedule of material changes in the composition of the portfolio during the period. These are defined as aggregate purchases of a security exceeding 1% of the total value of purchases for the period and aggregate disposals greater than 1% of the total value of sales. At a minimum, the largest 20 purchases and 20 sales must be shown; all purchases and sales must be shown if there are fewer than 20. A full listing of the portfolio changes for the period is available, upon request, at no extra cost from the Administrator.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

Vanguard U.S. Treasury 3–7 Year Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC.

Investment Objective

Vanguard U.S. Treasury 3–7 Year Bond UCITS ETF seeks to track the performance of the Bloomberg U.S. Treasury 3-7 Year Index.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- For the six months ended 31 December 2025, global financial markets rose, buoyed by optimism surrounding artificial intelligence, robust corporate earnings and more dovish monetary policy. The Federal Reserve lowered rates three times during the period, while the Bank of England cut rates twice.
- From its inception on 4 November 2025 through 31 December 2025, the ETF's benchmark index returned 0.60%.
- The ETF invests in fixed-rate US dollar-denominated US Treasury securities with maturities of 3–7 years. To the extent practicable, the portfolio consists of a representative sample of the component securities of the index.

Benchmark returns in the commentary above are in US dollars.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

Vanguard USD Corporate 1–3 Year Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC.

Investment Objective

Vanguard USD Corporate 1–3 Year Bond UCITS ETF seeks to track the performance of the Bloomberg Global Aggregate Corporate – United States Dollar Index 1–3 Year, a widely recognised benchmark designed to reflect the total universe of publicly traded, fixed-coupon, US dollar-denominated corporate debt securities with maturities of between 1 and 3 years.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- For the six months ended 31 December 2025, global financial markets rose, buoyed by optimism surrounding artificial intelligence, robust corporate earnings and more dovish monetary policy. The Federal Reserve lowered rates three times during the period, while the Bank of England cut rates twice.
- The ETF's benchmark returned 2.71% for the period.
- Shorter-dated US dollar corporate bonds underperformed the US dollar corporate bond market as a whole, which returned 3.51%, as measured by the Bloomberg Global Aggregate Corporate USD Index in US dollars on an unhedged basis.
- Although there was not much difference in performance by sector, bonds issued by financial institutions and utilities returned a little more than those issued by industrial companies.
- By credit quality, bonds on the lowest rung of the investment-grade ladder returned more than their higher-rated counterparts.

Benchmark returns in the commentary above are in US dollars.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

Vanguard USD Emerging Markets Government Bond UCITS ETF

Managed by Vanguard Global Advisers, LLC.

Investment Objective

Vanguard USD Emerging Markets Government Bond UCITS ETF seeks to track the performance of the Bloomberg EM USD Sovereign + Quasi-Sov Index, a widely recognised benchmark designed to reflect the total universe of US dollar-denominated publicly traded debt (with maturities greater than 1 year and a minimum issue size of $500 million) issued by sovereign and quasi-sovereign emerging-market issuers. Quasi-sovereign issuers include entities that are government-guaranteed and/or government-sponsored, entities that are more than 50% government-owned and local authorities.

Performance Summary

The Performance Summary does not form part of the Financial Statements.

- For the six months ended 31 December 2025, global financial markets rose, buoyed by optimism surrounding artificial intelligence, robust corporate earnings and more dovish monetary policy. The Federal Reserve lowered rates three times during the period, while the Bank of England cut rates twice.
- The ETF's benchmark index returned 6.53% for the period.
- Almost all countries in the index had positive returns, some in double digits. Among those with higher weightings in the index (5% or more), Argentina had the highest total return (about 10%), while China had the lowest (roughly 3%).
- Bonds across the maturity spectrum had solid positive returns, with those on the longer end (maturing in 20 years or more) posting returns of 9% or more.
- By credit quality, bonds with lower ratings had higher returns, some of them in the double digits. However, the majority of the index's weighting was in higher-quality bonds.

Benchmark returns in the commentary above are in US dollars.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

All of the returns in this report represent past performance, which is not a guarantee of future results that may be achieved by the fund. For performance data current to the most recent month-end, which may be higher or lower than that cited, visit our website at https://global.vanguard.com. Note, too, that both investment returns and principal value can fluctuate widely, so an investor's shares, when sold, could be worth more or less than their original cost.

* The tracking difference between the fund return and the index return over a stated period of time can be attributed to a number of factors, including, without limitation, small differences in weightings, trading activity, transaction costs and differences in the valuation and withholding tax treatment between the fund and the index vendor.

2. Basis of Presentation.

The financial statements are prepared in accordance with accounting standards generally accepted in Ireland, including Financial Reporting Standard ("FRS") 104, the Financial Reporting Standard applicable in the UK and the Republic of Ireland issued by the Financial Reporting Council (the "FRC"), Irish statute comprising the Companies Act 2014, as amended, the UCITS Regulations, the Central Bank UCITS Regulations and the Listing Rules of the Euronext Dublin.

To more appropriately reflect the Company's business as an investment fund, the Company has determined that the headings and sub-headings of the financial statements require adaptation from the requirements in the Companies Act 2014 and certain wordings and format of the financial statements have been adapted from those contained in FRS 102, Section 3.

A Cash Flow Statement has not been presented due to the exemption contained in FRS 102, Section 7.1A.

The information required by FRS 102 to be included in a statement of comprehensive income is contained in the Statement of Operations of each Fund and the Company.

The financial statements have been prepared on a going concern basis, subject to the historical cost convention, as modified by the revaluation of financial assets and liabilities at fair value through profit or loss ("FVTPL"). The ESG USD Corporate Bond UCITS ETF terminated on 23 October 2025.

Cross Investments. The Asset Allocation Funds invest in other Funds of the Company, which are disclosed in each Fund's Statement of Investments. These cross investments and any related movements in realised or unrealised gains and losses on these investments have been eliminated in the Company's financial statements (30 June 2025: same).

3. Significant Accounting Policies.

The unaudited financial statements should be read in conjunction with the relevant Fund's annual audited financial statements for the year ended 30 June 2025. There have been no changes to the significant accounting policies adopted by the Funds since the last audited period, and the accounting policies have been consistently applied to all periods presented, unless otherwise stated.

4. Risk Management Policies.

The Funds' activities, investments in financial instruments and the markets it invests in create a direct exposure to a variety of risks such as market risk (including price risk, interest rate risk and currency risk), liquidity risk and credit risk. The Funds may also invest in financial derivative instruments which may expose the Funds to a higher degree of risks, particularly, financial derivative instruments contracts can be highly volatile, and a relatively small market movement may have a potentially larger impact. The Funds may also make investments in other underlying funds. The financial instruments which constitute these other underlying funds generally expose the Funds to indirect risks resulting from other price risk, currency risk, interest rate risk, liquidity risk and credit risk.

Significant market disruptions, such as those caused by pandemics, natural or environmental disasters, war, acts of terrorism, political or regulatory conditions, or other events, can adversely affect local and global markets and normal market operations. Any such disruptions could have an adverse impact on the value of the Funds' investments and Funds' performance.

The Manager seeks to minimise potential adverse effects of risk on the Funds' performance by employing professional, experienced portfolio managers; by daily monitoring of the Funds' positions and market events; by diversifying the investment portfolio within the constraints of the investment objectives; and by periodically using derivatives to economically hedge certain risk exposures.

Each Fund's financial risk management objectives and policies continue to be substantially consistent with the previous Annual Audited Financial Statements for the financial year ended 30 June 2025.

5. Taxation.

Under current law and practice, the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year period beginning with the acquisition of such shares. Any tax arising on a chargeable event is a liability of the shareholders, albeit it is paid by the Company (although if the Company fails to deduct the correct amount of tax it becomes ultimately a liability of the Company).

No Irish tax will arise on the Company in respect of chargeable events.

(a) a shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations;

(b) certain exempted Irish tax resident shareholders who have provided the necessary signed statutory declarations; and

(c) any transaction in relation to, or in respect of, units which are held in a recognised clearing system as designated by order of the Irish Revenue Commissioners.

Dividends, interest and capital gains received on investments may be subject to withholding or other taxes imposed by the country from which the investment income/gains are received, and such taxes may not be recoverable. Foreign withholding taxes on dividends and interest are recognised when such taxes are not recoverable and are included in Taxation. Funds may also be subject to tax on realised and unrealised capital gains and has recognized a provision for deferred tax payable arising from material timing differences between the taxation of unrealised gains in the financial statements and actual realisable taxable profits.

The Funds have filed tax reclaims for previously withheld taxes on dividends earned in certain European Union countries. These filings are subject to various administrative and judicial proceedings within these countries. Such tax reclaims recognised during the period, if any, are included in Taxation. No other amounts for these tax reclaims are reflected in the financial statements due to the uncertainty as to the ultimate resolution of proceedings, the likelihood of receipt of these reclaims and the potential timing of payment.

Below is an analysis of the tax charge for the period ended 31 December 2025 and 31 December 2024:

6. Distribution Policy.

The Directors intend to distribute all, or substantially all, of the net income (interest and dividends, less expenses) to distributing share class holders. The Directors do not intend to declare dividends on accumulating shares.

7. Net Asset Value Per Share.

The net asset value per share of each share class is calculated by dividing the total net assets of each share class by the number of shares in issue.

8. Share Capital.

The Company has variable share capital consisting of 5,000,000,000,002 authorised shares divided into two Subscriber Shares (US$1.00 par value) and 5,000,000,000,000 (five trillion) redeemable participating shares (no par value).

The Directors may issue shares of any class and create new classes of shares on such terms as the Directors may from time to time determine in relation to any Fund and in accordance with the requirements of the Central Bank. Shares may be divided into different classes to accommodate different subscription, redemption or fee arrangements, dividend provisions, or charges.

Subscriber Shares. There are two Subscriber Shares in issue, which are held by nominees for the Investment Managers. Subscriber Shares do not entitle the holders thereof to any dividend and on a winding-up entitle the holder to receive the amount paid up thereon but not otherwise to participate in the assets of the Company. The Subscriber Shares do not form part of the Shareholders' funds and are not included in the net asset value of the Company.

Redeemable Participating Shares. Members who are individuals may attend and vote at general meetings in person or by proxy. Members who are corporations may attend and vote at general meetings by appointing a representative or proxy. Subject to any special terms as to voting upon which any shares may be issued or may for the time being be held, at any general meeting on a show of hands every shareholder who (being an individual) is present in person or (being a corporation) is present by duly authorised representative shall have one vote. On a poll every such holder presents as aforesaid or by proxy shall have one vote for every share held.

If the Company shall be wound up, then the payment to the holders of the redeemable participating shares of each class, is a sum in the currency in which that class is designated, as nearly as possible equal to the Net Assets Attributable to Holders of Redeemable Participating Shares respectively. This payment is as at the date of commencement to wind up provided that there are sufficient assets available in the relevant Fund to enable such payment to be made. In the event that there are insufficient assets available in the relevant Fund to enable such payments to made, the following recourse shall apply:

(1) the assets of the Company not comprised within any of the Funds; and

(2) the assets remaining in the Funds for the other classes of Shares after payment to the holders of the Shares of the class to which they relate of the amounts to which they are respectively entitled under this paragraph prorata to the total value of such assets remaining within each such Fund.

9. Credit Facility.

The Funds and certain other funds managed by the Manager and its affiliates participate in an annually renewable US$4.3 billion (2024: US$4.3 billion) committed credit facility. Each participating Fund is individually liable for its borrowings under the credit facility. Borrowings may be utilised for temporary or emergency purposes and are subject to the participating Fund's regulatory and contractual borrowing restrictions. Participating Funds are allocated an annual commitment fee of 0.10% of the undrawn facility amount as well as certain administrative fees. Any fees allocated to the Funds are paid by the Manager. Interest and direct borrowing costs associated with draws on the credit facility are charged to the Funds and recorded in the Statement of Operations.

The rate charged for borrowings under this facility is linked to the currency borrowed. Borrowings in US dollars will bear interest at an agreed-upon spread plus the higher of the federal funds effective rate, the overnight bank funding rate or the Daily Simple Secured Overnight Financing Rate inclusive of an additional agreed-upon spread. Borrowings in currencies other than the US dollar will bear interest at an agreed-upon spread plus the Euro Interbank Offered Rate, the Daily Simple Euro Short Term Rate, the Swiss Average Rate Overnight, the Sterling Overnight Index Average or the Tokyo Interbank Offered Rate, as applicable.

The Credit Facility agreement was renewed in March 2025. As the EUR Cash UCITS ETF, EUR Corporate 1–3 Year Bond UCITS ETF, EUR Eurozone Government 1–3 Year Bond UCITS ETF, Global Government Bond UCITS ETF, U.S. Treasury 1–3 Year Bond UCITS ETF, U.S. Treasury 3–7 Year Bond UCITS ETF and U.S. Treasury 7–10 Year Bond UCITS ETF were launched after this date, they were not included under the terms of the renewed agreement.

The Funds had no borrowings outstanding at 31 December 2025 or at any time during the period then ended (30 June 2025: none).

10. Efficient Portfolio Management.

Investment techniques and financial derivative instruments ("FDIs") may be employed for efficient portfolio management purposes, including hedging against market movements, currency exchange or interest rate risks. Any investment technique or use of FDIs must be one which is reasonably believed by the Investment Managers to be economically appropriate in that it is realised in a cost-effective way. Realised and unrealised gains or losses arising from financial derivative instrument transactions are accounted for through the Statement of Operations as Net Gain/(Loss) on Financial Instruments.

Securities lending is also used for efficient portfolio management. The securities lending agent is J.P. Morgan SE - Luxembourg Branch (2024: Brown Brothers Harriman & Co.). All operational costs in support of the lending programme are borne by the lending agent and paid directly out of any lending agent fees. Securities lending income is net of any lending agent fees paid.

Securities on loan continue to be recognised by the Funds as financial assets because they substantially retain the risks and rewards of ownership. Similarly, security collateral received from the borrower is not recognised by the Funds as an asset because they do not have rights to sell or re-pledge the collateral, unless in the event of default. Collateral accepted by the Funds is limited to high quality sovereign debt (U.S. Treasuries, U.K. Gilts, etc.).

11. Collateral.

The Funds pledge and receive non-cash collateral against financial derivative instruments, TBA transactions and reverse repurchase agreements. Such collateral cannot be sold, reinvested or repledged. As a result, pledged collateral remains an asset of the Fund and is included in the Statement of Investments. Securities received as collateral are not considered assets of the Fund and will not appear in the Statement of Investments. Under these collateral agreements, upon a counterparty default (including bankruptcy), the Funds may terminate all derivatives, TBA transactions or reverse repurchase agreements with that counterparty, determine the net amount owed by either party and sell or retain any collateral held up to the net amount owed to the Funds, with an obligation to return excess collateral to the counterparty.

In certain cases, the Funds may be required to maintain cash collateral in margin accounts or pledge cash with certain counterparties. Cash collateral held in margin accounts for futures contracts and other centrally cleared derivatives is segregated on the Statement of Assets and Liabilities and presented separately as part of "Margin Cash Due to/from Broker". Cash pledged for OTC derivative instruments and TBAs is segregated on the Statement of Assets and Liabilities and presented separately as "Cash Collateral". Additionally, the Funds may receive cash collateral, which is segregated from the Funds' cash, and is subject to restrictions. The Funds do not earn any interest from the cash collateral received nor does it have any right for reinvestment, therefore any cash collateral received is not recorded as part of the Funds' assets.

At 31 December 2025, the Funds did not have any collateral pledged or received in connection with TBA transactions (30 June 2025: Nil).

In addition, the Funds receive other non-cash collateral in relation to securities lending transactions which is separately disclosed in Note 10.

Counterparties to financial derivative transactions where collateral was required to be exchanged included Bank of America NA, Bank of New York Mellon, Barclays Bank plc, BNP Paribas, Citibank NA, Deutsche Bank AG, HSBC Bank, JPMorgan Chase Bank, Morgan Stanley, Royal Bank of Canada, Standard Chartered Bank, State Street Bank, Toronto Dominion Bank and UBS AG.

As of 31 December 2025 and 30 June 2025, the collateral pledged or received by the Funds for financial derivative instrument transactions and reverse repurchase agreements was:

12. Related and Connected Parties Transactions.

Parties are related if one can control or exercise significant influence over the other in making financial or operational decisions or is a member of a group which provides key management personnel services. The Company's directors and Manager are considered related parties. The Investment Managers or affiliates of the Manager, as well as sub-investment manager or their delegate, and associated or group company of the Manager, are considered connected parties.

Manager. Vanguard Group (Ireland) Limited is the Funds' Manager and acts as a principal in respect of all transactions of shares in the Funds. For its services, the Manager receives a fixed single fee per share class (the "Management Fees") calculated on a daily basis and paid monthly. Out of the fees received, the Manager pays for any sub-advisers, as well as the costs of administration including audit, depositary, legal, registration and regulatory fees associated with the Funds. As a result, the Manager anticipates that the ongoing charges figure ("OCF") of each share class will closely track the Management Fees. In the event that the costs and expenses of any Fund exceed the OCF, the Manager will be responsible for discharging any excess out of its own assets. The Manager, in its sole discretion, may voluntarily waive all or part of its fee, and any such waiver could be discontinued at any time and without notice.

The Asset Allocation Funds invest in other Funds of the Company, and substantially all of the income from these collective investment schemes are derived from related party holdings. Each Asset Allocation Fund separately includes within this report a complete set of financial statements which details its holdings in related parties, significant portfolio changes, revenues and net gains or losses from these investments in related parties. Additionally with respect to the Asset Allocation Funds, the Manager will reduce its Management Fees in an amount equal to similar charges already incurred in the underlying affiliated collective investment schemes.

Any amounts due from or to the Manager at the end of the period are disclosed in the Statement of Assets and Liabilities. Amounts earned by the Manager in respect to fees for the period are disclosed in the Statement of Operations.

15. Contingent Liabilities.

There were no contingent liabilities as at 31 December 2025 and 30 June 2025.

16. Segregated Liabilities.

Each Fund is treated as bearing its own liabilities.

17. Fair Value Hierarchy.

Financial instruments are measured at fair value using a three-level hierarchy. Instruments are categorised in their entirety based on the lowest level input that is significant to the fair value measurement. Assessing the significance and observability of a particular input requires significant judgement specific to an asset or liability. Inputs are considered to be observable when they are readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Level 1 — Quoted prices in active markets for identical securities.

Level 2 — Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 — Significant unobservable inputs (including the Fund's own assumptions used to determine the fair value of investments).

The following tables provide an analysis within the fair value hierarchy of financial assets and liabilities, measured at fair value at 31 December 2025 and 30 June 2025:
