This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### Invesco S&P 500 ESG UCITS ETF (the "Fund") A sub-fund of Invesco Markets plc (the "Umbrella Fund") EUR Hdq Acc (ISIN: IE000QF66PE6) (the "Share Class")

The Fund is managed by Invesco Investment Management Limited, part of the Invesco Group.

## Objectives and Investment Policy

- The Fund is a passively managed Exchange-Traded Fund (ETF), which aims to achieve the net total return of the S&P 500 ESG Index (the "**Index**")<sup>1</sup>, less fees, expenses and transaction costs.
- To achieve the objective the Fund will use unfunded swaps ("**Swaps**"). These Swaps are an agreement between the Fund and an approved counterparty to exchange one stream of cash flows against another stream but do not require the Fund to provide collateral, on the basis that the Fund has already invested in a basket of equities and equity related securities (namely shares). Please note that the Fund will purchase securities that are not contained in the Index. The performance of the Index is swapped from the counterparty to the Fund in exchange for the performance of equities and equity related securities held by the Fund.
- The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from Invesco Markets plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund is an Article 8 Fund (it promotes environmental and/or social characteristics) for the purposes of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability related disclosures in the financial services sector ("**SFDR**").
- The Fund's base currency is USD. The Share Class currency is EUR. To minimise exposure to fluctuations in the exchange rate between the Fund's base currency and the Share Class currency, the Share Class enters into an unfunded swap where it receives the performance of the hedged currency version of the Index.
- **Dividend Policy:** This Share Class does not pay you income, but instead reinvests it to grow your capital, in line with its stated objectives.
- **Net Asset Value:** This is calculated daily and the Fund is open for redemptions on each day on which the United States Federal Reserve System is open. Please refer to the prospectus for further information.
- **The Index:** The Index is a broad-based, market-cap-weighted index that is designed to measure the performance of securities meeting sustainability criteria, while maintaining similar overall industry group weights as the S&P 500 Index (the "**Parent Index**"). The Index has been constructed to provide a risk and return profile similar to that of the Parent Index, while improving ESG characteristics. The Index is constructed from the Parent Index by excluding from the Parent Index securities that: 1) are involved in business activities in tobacco, controversial weapons, oil sands, small arms, military contracting and thermal coal (extraction and power generation); 2) are classified as Non-Compliant according to the United Nations Global Compact (UNGC) principles; 3) have a S&P Dow Jones Index ("DJI") ESG Score that falls within the worst 25% of ESG scores from each Global Industry Classification Standard ("GICS®") industry group. The Index rebalances quarterly.

## Risk and Reward Profile

- The Share Class is in risk category 6 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

## Other Risks

- **General Investment Risk:** The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- **Concentration risk:** The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified.
- **Equity Risk:** The value of equities and equity-related securities can be affected by a number of factors including the activities and results of the issuer and general and regional economic and market conditions. This may result in fluctuations in the value of the Fund.
- **Environmental, Social and Governance Risk:** The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings.
- **Risk of using Derivatives:** The Fund's ability to track the benchmark's performance is reliant on the counterparties to continuously deliver the performance of the benchmark in line with the swap agreements and would also be affected by any spread between the pricing of the swaps and the pricing of the benchmark. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- **Synthetic ETF Risk:** The fund might purchase securities that are not contained in the index and will enter into swap agreements to exchange the performance of those securities for the performance of the index.
- **Currency hedging:** Currency hedging between the base currency of the Fund and the currency of the share class may not completely eliminate the currency risk between those two currencies and may affect the performance of the share class.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at [etf.invesco.com](http://etf.invesco.com) (select your country and navigate to the Prospectus on the Documents section on the product page).
