What is this product?

Type

UBS (Irl) ETF Plc is an umbrella investment company with variable capital and segregated liability between sub-funds incorporated in Ireland and authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities under the UCITS Regulations. The fund is a UCITS ETF.

Term

The Product does not have a maturity date (the Product has been established for an indefinite period of time). The Manufacturer may terminate the Product early. The amount you will receive upon early termination may be less than the amount you invested.
The recommended holding period (RHP) is displayed in the section "How long should I hold it and can I take money out early?".

Objectives

The Fund aims to track, before expenses, the price and income performance of the Solactive EUR Ultra-Short diversified Bond ESG Index (Total Return) (the "Index"). The Fund seeks to hold a representative selection of components comprising the underlying Index selected by the Investment Manager using a Sampling Strategy. The Fund invests in a representative sample of components of the Index selected by the Investment Manager using a "portfolio optimisation" technique. For each security, a decision is made based on its investment characteristics as to whether it should be considered for inclusion in the Fund replicating the Index. At least 90% of the securities in the Fund, excluding cash, money market funds and derivatives have an ESG rating. The Index is eliminating at least 20% of the least well-rated securities as against the standard index universe. It is expected that the Fund's resulting ESG rating will be higher than the ESG rating of a sub-fund tracking a standard index. The proportionate exposure by the Fund to the component securities will be achieved either through direct investment or through the use of derivatives or through a combination of both techniques. The Fund may further hold securities which are not comprised in its Index where the Investment Manager considers that such securities may provide a similar return to certain securities that make up the Index and believes this to be appropriate considering the Fund's investment objective and the investment restrictions or other factors.
The Fund will invest its net assets predominantly in bonds, transferable securities, money market instruments, units of collective investment schemes, deposits with credit institutions, structured notes listed or dealt in on a regulated market and other assets eligible under the rules set forth in the chapter "Investment Restrictions" of the prospectus.
The Fund promotes environmental and/or social characteristics and complies with article 8 of SFDR.
The Fund will not enter into any securities lending.
The return of the fund depends mainly on the performance of the tracked index.
Fund income is not paid out, but instead will be reinvested.

Intended retail investor

This fund applies to retail investors with a basic financial understanding, who can accept a possible loss on the investment amount. The fund is aimed at generating a substantial part of its yield through recurring income and addresses a preference for Sustainable Investing, while granting daily access to the capital under normal market conditions. With their investment in this fund, investors can satisfy medium term investment needs. The fund is suited to be acquired by the target client segments without any restriction of the distribution channel or platform.

Depositary

State Street Custodial Services (Ireland) Limited

What are the risks and what could I get in return?

Indicator

The risk indicator assumes you keep the product for 1 year(s).
The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.
We have classified this product as 1 out of 7, which is the lowest risk class.
This rates the potential losses from future performance at a very low level. The past may be a poor predictor of the future and, hence, the actual risk of losing money may vary significantly.

The product may be exposed to further risk factors such as operational, political and legal risks which are not included in the summary indicator. Please refer to the prospectus for more detail.

This product does not include any protection from future market performance so you could lose some or all of your investment.
If we are not able to pay you what is owed, you could lose your entire investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performances of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		**1 Year**
Example Investment:		**EUR 10 000**
		If you exit after 1 year
Scenarios		
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**	
Stress	**What you might get back after costs**	EUR 9 880
	Average return each year	-1.2%
Unfavourable	**What you might get back after costs**	EUR 9 880
	Average return each year	-1.2%
Moderate	**What you might get back after costs**	EUR 9 960
	Average return each year	-0.4%
Favourable	**What you might get back after costs**	EUR 10 360
	Average return each year	3.6%

The stress scenario shows what you might get back in extreme market circumstances.
The figures shown include all costs of the product itself. The figures do not take account of your personal tax situation, which can also have an impact on how much you receive back.
Unfavourable scenario: This type of scenario occurred for an investment between 2017 and 2018.
Moderate scenario: This type of scenario occurred for an investment between 2018 and 2019.
Favourable scenario: This type of scenario occurred for an investment between 2023 and 2024.

What happens if UBS Asset Management (Europe) S.A. is unable to pay out?

Losses are not covered by an investor compensation or guarantee scheme. Furthermore, with respect to State Street Custodial Services (Ireland) Limited as depositary of the Fund, which is responsible for the safekeeping of the assets of the Fund (the "Depositary"), there is a potential default risk if the assets of the Fund held with the Depositary are lost. However, such default risk is limited as the Depositary is required by law and regulation to segregate its own assets from the assets of the Fund. The Depositary is liable to the Fund or to the investors of the Fund for the loss by the Depositary or one of its delegates of a financial instrument held in custody unless the Depositary is able to prove that the loss has arisen as a result of an external event beyond its reasonable control.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The table shows the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
We have assumed:
- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed that the product performs as shown in the moderate scenario.
- 10 000 EUR is invested.

	If you exit after 1 year
Total costs	EUR 17
Annual cost impact (*)	0.2%

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be -0.2% before costs and -0.4% after costs.

Composition of costs
