WHAT IS THIS PRODUCT?

Type: This product is a sub-fund of First Trust Global Funds ICAV (the "ICAV"), an open-ended investment fund established as an Irish collective asset-management vehicle with segregated liability between sub-funds. The product is an exchange-traded fund.

Term: The ICAV is open-ended, however, the shares of the Fund or a class may be redeemed by the ICAV with notice to shareholders in the circumstances described in the Prospectus.

Objectives:

- The Fund is a passively managed Fund that seeks to provide investors with investment results that correspond generally to the price and yield of the Cboe S&P 500® Dividend Aristocrats Target Income Index Monthly Series (the "Index").
- In order to achieve this, the Fund is to invest at least 90% of its net assets in a portfolio comprised of constituents of the Index, which are: (i) equity securities, that consists of the equity securities of the Index and depositary receipts that may include American Depositary Receipts ("ADRs"), Global Depositary Receipts ("GDRs") or European Depositary Receipts ("EDRs") representing securities in the Index where direct investment in a constituent security of the Index is not practicable or possible; (ii) covered call options on equity securities of the Index ("Covered Calls").
- The Fund attempts to replicate, before fees and expenses, the performance of the Index. The Sub-Investment Manager will seek to do this by replicating so far as possible most, if not all, of the investments in the Index.
- The Covered Calls shall operate in the following manner. In exchange for additional income in the form of a premium, the Fund will sell a call option on each of the equity securities in the Index. If the value of a stock on the expiration date of the option is below a certain value, the option will not be exercised and will expire. If the value of a stock on the expiration date is above a specified price (the "strike price"), then the option finished "in the money". Then, the Fund either sells the stock at the strike price or pays the buyer the difference between the strike price and the current market price of the stock.

It is intended to declare dividends on a monthly basis.

You may sell your shares usually by sending your request to the administrator on any day on which the London Stock Exchange is open for business.

Intended Retail Investor:

The product is intended for retail investors who: (i) can bear loss of capital, are not seeking to preserve capital and who are not looking for capital guarantee; (ii) have specific knowledge or experience of investing in similar products and in financial markets; and (iii) seek a product offering exposure to the performance of the underlying index and have an investment horizon in line with the recommended holding period stated below.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

1	2	3	**4**	5	6	7

Lower risk — Higher risk

The risk indicator assumes you keep the product for 5 Years.

Risk indicator

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the Prospectus available at www.ftgportfolios.com.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.
The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period: 5 Years **Example Investment: 10 000 USD**			
Scenarios		**If you exit after 1 Year**	**If you exit after 5 Years** (recommended holding period)
Minimum:			
Stress scenario	**What you might get back after costs**	**USD 3 190**	**USD 3 380**
	Average return each year	- 68.1%	- 19.5%
Unfavourable scenario	**What you might get back after costs**	**USD 8 790**	**USD 8 790**
	Average return each year	- 12.1%	0%
Moderate scenario	**What you might get back after costs**	**USD 10 630**	**USD 13 760**
	Average return each year	6.3%	6.6%
Favourable scenario	**What you might get back after costs**	**USD 12 890**	**USD 21 070**
	Average return each year	28.9%	16.1%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

- Unfavourable: This type of scenario occurred for an investment (and benchmark) between December 2024 and June 2026.
- Moderate: This type of scenario occurred for an investment (and benchmark) between April 2018 and March 2023.
- Favourable: This type of scenario occurred for an investment (and benchmark) between January 2017 and December 2021.

WHAT HAPPENS IF FIRST TRUST GLOBAL PORTFOLIOS MANAGEMENT LIMITED IS UNABLE TO PAY OUT?

You may not face financial loss should the Manager default on its obligations to the Fund. The assets of the Fund are held in the safekeeping by the Depositary. In the event of the insolvency of the Depositary, the Fund's assets should not be subject to a claim by the Depositary's liquidator. In the event of any loss, there is no compensation or guarantee scheme in place which may offset, all or any of, such loss.

WHAT ARE THE COSTS?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- USD 10 000 is invested

Investment: 10 000 USD	**If you exit after 1 Year**	**If you exit after 5 Years** (recommended holding period)
Total Costs	**USD 77**	**USD 455**
Annual Cost Impact (*)	0.8% each year	0.8% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.8% before costs and 10.3% after costs.

Composition of Costs

One-off costs upon entry or exit		**If you exit after 1 Year**
Entry costs	We do not charge an entry fee. **	None **
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so. **	None **
