Fund overview

ISIN
IE000TD3TI26

Investment objective: The Sub-Fund aims to achieve a long-term return in excess of Russell 1000 Value Index (Net Total Return of 30% dividend withholding tax) ("the Benchmark") by actively investing primarily in a value style-biased portfolio of US Companies.

Investment policy: The Sub-Fund pursues an actively-managed investment strategy.

Investment approach

- Uses a fundamental, bottom- up stock selection process.
- Targets companies with durable business models, consistent earnings, strong cash flows and experienced management teams.

Investor profile: Typical investors in the Sub-Fund are expected to be investors who want to take broad market exposure to the US equity market, who seek to benefit from potential excess returns with similar risks to investing in securities representing the Benchmark and who are prepared to accept the risks associated with an investment of this type, including the volatility of such market.

Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.
The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
REITs and real estate related investments are subject to the risks associated with the ownership of real estate which may expose the relevant Sub-Fund to increased liquidity risk, price volatility and losses due to changes in economic conditions and interest rates.
Value stocks may decrease in price or may not increase in price as anticipated by the Investment Manager if other investors fail to recognise the company's value or the factors that the Investment Manager believes will cause the stock price to increase do not occur.
Exclusion of companies that do not meet certain ESG criteria from the Sub-Fund's investment universe may cause the Sub-Fund to perform differently compared to similar funds that do not have such a policy.
The Sub-Fund seeks to provide a return above the Benchmark; however the Sub-Fund may underperform the Benchmark.
Further information about risks can be found in the "Risk Information" section of the Prospectus.

The risk indicator is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown above is not guaranteed to remain unchanged and may change over time. A Share Class with the lowest risk rating does not mean a risk-free investment. See the Key Investor Information Document (KIID) for details.

The possible difference between the current ongoing charge as stated in this document and those mentioned in the KIID, is caused by the fact that the costs mentioned in the KIID are an estimate based on the actual costs incurred over the past year.
