HSBC Global Asset Management Shariah Committee

HSBC Investment Funds (Luxembourg) S.A. (the “Management Company”) has entered into a Shariah Compliance Advisory Agreement with HSBC Bank Middle East Limited under which the latter agrees to appoint the members of the HSBC Global Asset Management Shariah Committee (the “Shariah Committee"). The members of the Shariah Committee are

Sh. Nizam Yaquby - resident in Bahrain
Dr. Mohammed Elgari - resident in Saudi Arabia
Dr. Aznan Hassan - resident in Malaysia

Directors' Report

The board of directors of the Company (each a "Director", together the "Directors" or the "Board") submit their annual report together with the audited financial statements for the financial year ended 31 December 2025 (the "Financial Statements").

Company information

HSBC ETFs PLC (the "Company") was incorporated as an open-ended investment company with variable capital on 27 February 2009 with registration number 467896. The Company is authorised by the Central Bank of Ireland (the "Central Bank") as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the "2011 UCITS Regulations") and is also subject to the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment In Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"), (together "the UCITS Regulations").

The Company is structured as an umbrella fund with segregated liability between sub-funds and comprises separate sub-funds, in that the Directors may from time to time, with the prior approval of the Central Bank, issue different series of shares representing separate portfolios of assets. The assets of each sub-fund will be invested in accordance with the investment objective and policies applicable to such sub-fund as disclosed in the prospectus of the Company (the "Prospectus") and the relevant sub-fund's supplement (the "Supplement").

As at 31 December 2025, the Company has 54 sub-funds in operation (31 December 2024: 50).

The Company has 8 inactive sub-funds. HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF was closed on 18 September 2020 and was delisted from London Stock Exchange on 21 September 2020. HSBC MSCI EM FAR EAST UCITS ETF was closed on 6 July 2022 and was delisted from London Stock Exchange on 11 July 2022. HSBC MSCI RUSSIA CAPPED UCITS ETF was suspended from trading from 2 March 2022 as a result of Russia's invasion of Ukraine. The closure of the sub-fund commenced on 24 March 2023 and the sub-fund was delisted from London Stock Exchange on 29 March 2023. HSBC MSCI BRAZIL UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC MSCI MEXICO CAPPED UCITS ETF and HSBC MSCI TURKEY UCITS ETF were closed and delisted from London Stock Exchange on 10 May 2024. HSBC World ESG Biodiversity Screened Equity UCITS ETF was closed on 19 February 2025. The sub-fund was delisted from London Stock Exchange on 17 February 2025.

Each of the sub-funds in operation, through the listing of their shares on one or more stock exchanges, is an exchange traded fund in operation ("ETF").

The Financial Statements are published on the Company's website at www.etf.hsbc.com. The Directors, together with the Management Company, are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website.

Directors' Report (continued)

Corporate Governance Statement

The Board is committed to maintaining the highest standards of corporate governance and is accountable to shareholders of the Company (the "Shareholders") for the governance of the Company's affairs.

The Company's corporate governance practices comply with the following:

i) The European Communities (Directive 2006/43/EC) Regulations which requires the inclusion of a corporate governance statement in the Directors' Report;
ii) The Companies Act 2014;
iii) The Articles of Association of the Company which are available for inspection at the registered office of the Company and at the Companies Registration Office in Ireland;
iv) The Undertakings for Collective Investment in Transferable Securities (UCITS) Regulations;
v) The Financial Conduct Authority's UK Listing Rules ("UKLR") as they apply to open-ended investment companies under Chapter 12 of UKLR; and
vi) The Irish Funds' Corporate Governance Code for Collective Investment Schemes and Management Companies (December 2011) (the "IF Code").

The Company is not subject to the European Communities (Takeover Bids (Directive 2004/25/EC)) Regulations 2006.

Compliance with the IF Code

The Directors have adopted the IF Code with effect from 31 December 2012. The Directors have reviewed and assessed the measures included in the IF Code and consider the corporate governance practices and procedures since the adoption of the IF Code as consistent therewith. The Board considers that the Company has complied with the IF Code throughout this accounting year and that it complies with the various other corporate governance requirements prescribed by the legislation noted above.

Internal controls and risk management systems

The Directors in conjunction with the Management Company are responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of error or fraud in achieving the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

The Directors in conjunction with the Management Company have procedures in place designed to ensure that all relevant accounting records are properly maintained and are readily available, including production of annual and interim financial statements. The annual and interim financial statements of the Company are required to be approved by the Directors and filed with the Central Bank. The annual financial statements are required to be audited by an independent auditor who reports annually to the Board of Directors on their findings. The Directors evaluate and discuss significant accounting and reporting issues as the need arises.

Directors' Report (continued)

Internal controls and risk management systems (continued)

The Management Company has established processes regarding internal control and risk management systems designed to ensure their effective oversight of the financial reporting process. These include appointing the Administrator to maintain adequate accounting records of the Company independently of the Investment Manager and the Depositary. The Administrator is authorised and regulated by the Central Bank and complies with the rules imposed by the Central Bank.

The Management Company also periodically reviews the Administrator's financial accounting and reporting routines. The Board of Directors is responsible for reviewing the independent auditor's performance, qualifications and independence. The Administrator has operating responsibility in respect of its internal controls in relation to the financial reporting process and the Administrator's report to the Directors.

The Directors receive regular presentations and review reports from the Management Company, the Depositary, the Investment Manager and the Administrator. The Directors also have an annual process to consider and address any shortcomings identified and measures recommended by the independent auditor.

Dealings with Shareholders

Investors invest in sub-funds to gain exposure to the expertise of the Investment Manager and investment strategies. The Company has appointed the Distributor who is tasked with actively managing the relationship between the Company and investors. The Distributor provides the Board with quarterly updates which form the primary information source for the Directors to understand the views of major investors. A senior representative of the Distributor attends each Board meeting and presents a report providing the Directors with additional information on the ongoing investors relationships.

The Company also communicates with Shareholders through the annual and interim Financial Statements which aim to provide Shareholders with a full understanding of the Company's activities and its results. Additional information is also available on the Company's website at www.etf.hsbc.com.

The convening and conduct of Shareholders' meetings are governed by the Articles of Association of the Company and the Companies Act 2014, as amended (the "Companies Act"). Although the Directors may convene an extraordinary general meeting of the Company at any time, the Directors must convene an annual general meeting of the Company within fifteen months of the date of the previous annual general meeting. Extraordinary general meetings of the Company may also be convened by holders of Subscriber Shares. Not less than twenty-one clear days' notice of every annual general meeting and any meeting convened for the passing of a special resolution must be given to Shareholders.

One Shareholder present either in person or by proxy constitutes a quorum at a general meeting. Subject to any special rights or restrictions for the time being attached to any series or class of shares of the Company, each Shareholder is entitled to such number of votes as is produced by dividing the aggregate net asset value of that Shareholder's holding (expressed or converted into US Dollars and calculated as of the relevant record date) by one. The shareholders of the Subscriber Shares and the shareholders of the Capitalisation Shares have one vote for each Subscriber Share or Capitalisation Share held respectively, as defined in the Company's Articles of Association.

At any general meeting, a resolution put to the vote of the meeting will be decided on a poll. On a poll, every member in person or by proxy has such number of votes as is calculated in accordance with the methodology set out above.

The rights attached to any class of shares in the capital of the Company may only (unless otherwise provided by the terms of the issue of the shares of that class) be varied or abrogated with the consent in writing of the holders of three-fourths of the issued shares of that class, or with the sanction of a resolution passed by a majority of three-fourths of the votes cast by the members of that class who attend at a separate general meeting of the holders of the shares of the relevant class.

Directors' Report (continued)

Composition and operation of the Board of Directors

Unless otherwise determined by an ordinary resolution of the Company in a general meeting, the number of Directors shall not be less than two. As at 31 December 2025 the Board of Directors is composed of six Directors, being those listed in General Information section of these Financial Statements.

The business of the Company is managed by the Directors, who exercise all such powers of the Company as are, by the Companies Act or by the Articles of Association of the Company, required to be exercised by the Company in a general meeting. A Director may, and the Secretary of the Company on the requisition of a Director will, at any time summon a meeting of the Directors. Questions arising at any meeting of the Directors are determined by a majority of votes. In the case of an equality of votes, the Chairperson of the Board has a second or casting vote. The quorum necessary for the transaction of business at a meeting of the Directors is two.

The principal responsibility of the Directors is oversight of the business affairs of the Company and consistent with these oversight responsibilities the Directors have delegated management functions and responsibilities to duly qualified service providers. Such service providers are subject to ongoing oversight by the Directors.

Audit committee

The Board has determined not to establish an audit committee. Given the current size of the Board, it is likely that any audit committee would comprise all, or at least a significant majority, of the Board. Therefore, it is considered more efficient for audit matters to be discussed by the entire Board rather than by an audit committee.

Accounting Records

The Directors believe that they have complied with the requirements of the Companies Act with regard to accounting records by engaging the services of the Administrator, who employs personnel with appropriate expertise and adequate resources, appropriate systems and procedures to provide the Company's finance function. The accounting records are retained at the office of the Administrator at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2, Ireland.

Directors and Secretary

The names of the persons who were Directors at any time during the financial year ended 31 December 2025 are set out in General Information section of these Financial Statements. All the Directors serve in a non-executive capacity. Goodbody Secretarial Limited held the office of secretary (the "Secretary") throughout the financial year. Effective 1 January 2026, the Company Secretary changed to Matsack Trust Limited.

Directors' and Secretary's interests

None of the Directors nor the Secretary or their respective families held any interest, beneficial or otherwise, in the share capital of the Company during or at the end of the financial year.

The Board of Directors is not aware of any contracts or arrangements of any significance in relation to the business of the Company in which the Directors had any interest at any time during the year ended 31 December 2025, other than those described in Note 12, 'Related parties'.

Employees

The governance framework of the Company reflects the fact that, as a collective investment scheme, it has no employees and outsources investment management and administration. The Management Company is responsible on a day-to-day basis, under the supervision of the Directors, for overseeing the provision of administration, marketing, investment management and advice services in respect of all sub-funds. The Management Company employs a number of staff across different categories of staff including senior management to oversee their responsibilities.

Directors' Report (continued)

Review of performance, risks, uncertainties and future developments

The Company's overall risk management policy focuses on the agreed risk management mechanisms and techniques that are used by the Investment Manager to measure, manage, and report the relevant risks which the sub-funds of the Company are or might be exposed to. The main risks arising from investment in the Company include, but are not limited to, the risks referred to in Note 4 of these Financial Statements.

The value of the assets of the Company may be affected by uncertainties such as international political developments or conflicts, changes in government policies, taxation, restrictions on foreign investment and currency repatriation, currency fluctuations and other developments in applicable laws and regulations.

The Company's business activities and performance during the year together with the factors likely to affect its future development, are set out in the Investment Manager's Report. The performance review within the Investment Manager's Report encompasses tracking error and tracking difference disclosures which are key metrics as to how well the sub-funds of the Company have performed and how they have been managed against their benchmark indices.

The Company will continue its investment objective as set out in each relevant sub-fund's Supplement.

Key performance indicators

The key performance indicators monitored for each sub-fund include the performance and the financial position of the sub-funds. These include gross and net returns and TERs which are contained in the Investment Management Report. The financial position of the Company is described in the Financial Statements on page 243. Key performance indicators monitored by the Directors include the month to month movement in the NAV per share, the tracking of each Sub-Fund's performance to the performance of the relevant Index and the share capital movements.

Segregated liability

The Company has segregated liability between its sub-funds and accordingly any liability incurred on behalf of or attributable to any sub-fund shall be discharged solely out of the assets of that sub-fund. As of the date of the financial year end the Directors are not aware of any unrecognised existing or contingent liability of any sub-fund of the Company.

Significant events during the financial year

1. On 1 January 2025, Simon Fryatt resigned from the Board of Directors and Olga de Tapia was appointed to the Board of Directors.
2. The updated supplement for HSBC MSCI China A UCITS ETF was issued on 31 January 2025 to include two new HKD hedged share classes and reflect the reduction of the maximum TER for hedged share classes from 0.33% to 0.31%.
3. HSBC World ESG Biodiversity Screened Equity UCITS ETF was closed on 19 February 2025. The sub-fund was delisted from London Stock Exchange on 17 February 2025.
4. HSBC PLUS World Equity Income Quant Active UCITS ETF, HSBC PLUS World Equity Quant Active UCITS ETF, HSBC PLUS Emerging Markets Equity Quant Active UCITS ETF, HSBC PLUS Emerging Markets Equity Income Quant Active UCITS ETF and HSBC PLUS USA Equity Quant Active UCITS ETF were authorised by the Central Bank on 24 April 2025.

Directors' Report (continued)

Significant events during the financial year (continued)

5. Change of names for the sub funds listed below occurred on 30 April 2025:

New Names	Formerly Known As
HSBC ASIA PACIFIC EX JAPAN SCREENED EQUITY UCITS ETF	HSBC ASIA PACIFIC EX JAPAN SUSTAINABLE EQUITY UCITS ETF
HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF	HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF

HSBC USA SCREENED EQUITY UCITS ETF	HSBC USA SUSTAINABLE EQUITY UCITS ETF

6. HSBC PLUS USA Equity Quant Active UCITS ETF was launched on 20 May 2025.

7. Effective 30 May 2025, the index of HSBC MSCI USA UCITS ETF was changed to the MSCI USA Sector Neutral Quality Index. The name of the sub-fund was also changed HSBC MSCI QUALITY UCITS ETF.

8. HSBC PLUS World Equity Quant Active UCITS ETF and HSBC PLUS World Equity Income Quant Active UCITS ETF were launched on 3 June 2025.

9. Effective 1 July 2025, the registered address of the Company changed to 25 North Wall Quay, Dublin 1, Ireland.

10. In line with mandatory audit firm rotation requirements, PWC Chartered Accountants replaced KPMG Chartered Accountants as the Company's statutory auditors on 23 July 2025.

11. HSBC PLUS Emerging Markets Equity Income Quant Active UCITS ETF were launched on 14 August 2025.

Directors' Report (continued)

Significant events during the financial year (continued)

12. The Company's constitution was amended on 15 August 2025 to enable the creation of unlisted shares.

13. HSBC PLUS Emerging Markets Equity Quant Active UCITS ETF was launched on 19 August 2025.

14. The revised prospectus was issued on 24 October 2025 to reflect the inclusion of unlisted share classes.

15. The supplements were updated on 22 December 2025 to include unlisted share classes, revise the index description, clarify what "replication" means, and remove a specific charity name.

16. It was identified during the reporting period that some costs included in the calculation of the PRIIP KID transaction costs figure may have been incorrect for certain sub-funds. This was due to a number of underlying trades not being included in the calculation in the previous 3 year period. Investors were notified via disclaimers on the KIDs, the European PRIIP Template ("EPT"), European MIFiD Template ("EMT") files and the relevant websites. Following a detailed assessment by the Board, the appointed Management Company and the Investment Adviser it was further determined that the impact of this error was zero or negligible for majority of the sub-funds, with the exception of two sub-funds (HSBC MULTI FACTOR WORLDWIDE EQUITY UCITS ETF and HSBC MSCI INDONESIA UCITS ETF), which saw an estimated change in the transaction costs over a 3 year period of 0.05% and 0.03% respectively. These published transaction costs calculations have no bearing on the NAV and do not impact investor returns. All transaction costs have been amended if required, within the PRIIPs KIDs for each sub-fund.

Significant events since the financial year end

Significant events since the financial year end are disclosed in Note 19.

Directors' Report (continued)

Connected Persons transactions

The Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 require that any transaction carried out with the Company by the Management Company or Depositary to the Company and the delegates or sub-delegates of the Management Company or Depositary (excluding any non-group company sub-custodians appointed by the Depositary) and any associated or group companies of the Management Company, Depositary, delegate or sub-delegate ("Connected Persons") must be conducted at arm's length and must be in the best interests of the Shareholders .

The board of directors of the Management Company is satisfied that there are arrangements, evidenced by written procedures, in place to ensure that any transaction carried out with the Company by a Connected Person is conducted at arm's length; and in the best interests of the Shareholders.

The board of directors of the Management Company is satisfied that all transactions with a Connected Person entered into during the year complied with the requirements that any transaction carried out with the Company by a Connected Person is conducted at arm's length; and in the best interests of the Shareholders.

Auditor

PWC Chartered Accountants were appointed as statutory auditor on 23 July 2025 and pursuant to section 383 (2) will continue in office.

Directors' compliance statement

The Directors, in accordance with Section 225 (2) of the Companies Act, acknowledge that they are responsible for securing the Company's compliance with certain obligations specified in that section arising from the Companies Act and Tax laws ("relevant obligations"). The Directors confirm that:

- a compliance policy document has been drawn up that sets out policies, that in our opinion are appropriate to the Company, respecting compliance by the Company with its relevant obligations;
- appropriate arrangements or structures are in place that are, in our opinion, designed to secure material compliance with the Company's relevant obligations; and
- a review has been conducted, during the financial year, of those arrangements and structures.

Directors' Report (continued)

Statement of relevant audit information

In discharging their responsibilities under Section 225 of the Companies Act, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Company's relevant obligations.

The Directors believe that they have complied with the requirements of Section 330 of the Companies Act as follows:

- So far as each person who is a Director at the date of approving this report is aware, there is no relevant audit information, being information needed by the auditor in connection with preparing its report, of which the auditors are unaware; and
- Having made enquiries of fellow Directors and the Company's auditor, each Director has taken all the steps that he/she is obliged to take as a Director in order to make himself/herself aware of any relevant audit information and to establish that the auditor is aware of the information.

Results and dividends

The results for the financial year are shown in the Statement of Comprehensive Income. The Board of Directors may declare at its discretion, dividends in respect of each distribution share class of each sub-fund. Dividend distributions during the financial year are set out in Note 11 of these Financial Statements.

Going concern

The Company's business activities, together with the factors likely to affect its future development, its financial position, financial risk management objectives, details of its financial instruments and derivative activities, and its exposures to price, credit and liquidity risk are described as part of Note 4. The Company has considerable financial resources in the form of highly liquid investments and cash balances. As a consequence, the Directors believe that the Company is well placed to manage its business risks successfully.

After making enquiries, the Directors have a reasonable expectation that the Company has adequate resources to continue in operational existence for a period of at least twelve months from the date when the financial statements are authorised for issue.

Diversity report

The Board acknowledges the importance of diversity to enhance its operation. During the selection process for new Directors, the Board is committed to selecting those with diversity of age, gender and educational and professional background and candidates for appointment are selected based on these attributes. The Board's policy is that selection decisions are based on merit and objective criteria, that recruitment is fair and non-discriminatory and within this context promote diversity of gender, social and ethnic backgrounds, cognitive and personal strengths. The Board has not set specific targets in respect of diversity but acknowledges its importance and currently has female representation of 50% and Directors with a wide variety of skills and experience.

Directors' Report (continued)

Diversity report (continued)

The objective of the Board Diversity and Inclusion Policy is to ensure diversity and inclusion is taken into consideration in the succession planning, selection, nomination, operation and evaluation of the Board.

The Board notes the diversity and inclusion policy of HSBC Group (the "Group"), which is focused on building a more diverse and inclusive workforce, regarding diversity and inclusion as a critical component to developing a sustainable and successful business within the Group and is informed by the Group's deep roots in many geographical regions and its international approach. In particular, it is noted that the Group policy is particularly focused on:

- improving the diversity of its workforce;
- fostering open, inclusive and, where appropriate, challenging discussion; and
- leveraging diversity of thought.

The Board is conscious of its regulatory obligations in relation to Board composition. In considering Board diversity, the Board will also take into account the following non-exhaustive factors:

1. the obligation to have two Directors resident in Ireland on the Board;
2. the obligation for the Company to comply with the Central Bank's Fitness and Probity Regime;
3. the Board's existing arrangements with current Directors;
4. the nature, scale and complexity of the Company and its activities;
5. the obligation to act in the best interests of investors, including in relation to costs; and
6. market sentiment, which may favour the capture of a diverse range of perspectives, insights and challenge on a Board, so as to support good decision-making.

Taking into account the objectives of this Company's policy and the factors listed above, new appointments to the Board will be made on merit, taking account of the specific skills and experience, independence and knowledge needed to ensure a rounded Board and the diversity benefits that each candidate can bring to overall Board composition.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and Financial Statements, in accordance with applicable law and regulations.

Company law requires the Directors to prepare Financial Statements for each financial year. Under that law the Directors have elected to prepare the Financial Statements in accordance with Financial Reporting Standard ("FRS") 102, the Financial Reporting Standard applicable in the UK and Republic of Ireland.

Under Company law the Directors must not approve the Financial Statements unless they are satisfied that they give a true and fair view of the assets, liabilities and financial position of the Company and of its change in net assets attributable to holders of Redeemable Participating Shares for that financial year. In preparing the Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with FRS102;
- assess the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern; and
- use the going concern basis of accounting unless they either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Directors' Report (continued)

Statement of Directors' Responsibilities (continued)

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the Company and enable them to ensure that the Financial Statements comply with the Companies Act, the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019. The books of account are kept at 1 Grand Canal Square, Grand Canal Harbour, Dublin 2, Ireland by the Administrator. They are responsible for such internal controls as they determine is necessary to enable the preparation of the Financial Statements that are free from material misstatement, whether due to fraud or error, and have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the Company. In this regard they have entrusted the assets of the Company to the Depositary for safe-keeping. They have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

The Directors are responsible for the maintenance and integrity of the corporate and financial information included on the Company's website at www.assetmanagement.hsbc.com. Legislation in the Republic of Ireland concerning the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

The Directors confirm that they have complied with the above requirements in preparing the Financial Statements.

Investment Manager's Report
for the year ended 31 December 2025

Market Commentary 2025

Global Bonds

Global bond markets produced minimal returns in sterling over the year, although the asset class achieved decent performance in US dollar terms as the greenback weakened. In sterling, aggregate global corporate bonds rose marginally, while global government bonds were flat to down.

While fixed income markets benefitted from falling interest rates and subdued inflation, they were unsettled by the disruption from US trade tariffs and their potential impact on inflation levels, as well as growing national debt levels and large new issuance by countries such as the US and Japan. This caused something of a buyers' strike in both the US and Japan in May; at that time, new long-dated issues received lower bids than normal, and long-term yields spiked to decade highs.

The US 10-year Treasury yield fell from about 4.6% to just over 4.1% over the year. It dipped below 4.0% on two occasions: in early April, when US President Donald Trump first published his tariff levels against US trading partners; and in October, when concerns mounted about the US economy and a weakening labour market. UK bond yields also fell, with the UK benchmark 10-year gilt yield slipping from approximately 4.6% to just below 4.5%. In contrast, German bond yields rose, with the German 10-year Bund yield climbing from 2.45% to 2.85%. Japan was by far and away the weakest major bond market, and saw yields soar as the Bank of Japan ("BoJ") tightened its monetary policy. The Japanese 10-year bond yield almost doubled from 1.05% to 2.05%, a 27-year high. Some longer-dated Japanese government bond yields hit all-time highs during the year.

Interest rates continued to tumble across most major economies as inflationary pressures eased. The European Central Bank cut rates four times in the first six months of the year, although it left rates unchanged thereafter. The Bank of England lowered rates four times during the whole year. The US Federal Reserve, however, having warned investors in late 2024 that the pace of rate cuts would likely slow in 2025, left rates unchanged until September. The weakening labour market and dwindling inflationary pressures drove it to cut rates three times in the final few months of the year. In contrast, the BoJ continued to tighten monetary policy and lifted its benchmark rate to 0.5% in January, before hiking again in December to a 30-year high of 0.75%.

The global economic outlook was mixed. US gross domestic product ("GDP") fell by 0.5% on an annualised basis in the first quarter of the year – the first fall in quarterly GDP for three years – although it recovered in the next two quarters, rising by 4.3% in the third quarter. While the UK and eurozone economies grew solidly in the first quarter of the year, economic expansion waned over the remainder of the year. Mainland China grew ahead of expectations in the first quarter but slipped during the following quarters. Japan managed decent growth in the first two quarters of the year, before contracting in the third quarter. Conversely, India's economy recovered well and grew by more than 8% in the third quarter of the year.

Global Equities

Calendar year 2025 proved to be a very strong one for global equity markets, with nearly all regions achieving double-digit returns. The asset class was supported by falling interest rates across many major economies, positive earnings growth, investor enthusiasm for artificial intelligence ("AI") and relief that US President Donald Trump's tariff threats ultimately led to trade deals being signed with the major economic blocs. Many markets – including the S&P 500, Stoxx Europe 600, Nikkei 225 and FTSE 100 – set new all-time highs during the year.

Emerging markets heavily outperformed developed markets. The best returns by far came in Korea, which soared on significant corporate and governance reform, recovering economic growth and very strong share price rises in the technology sector. Taiwan was also supported by its technology stocks and interest in AI. China produced positive returns but underperformed the wider Emerging Market benchmark due to trade issues with the US and headwinds in the domestic economy which remained sluggish. In developed markets, Europe and the UK rose strongly and outperformed both the US and Japan.

Market Commentary 2025 (continued)

Global Equities (continued)

Markets were quite volatile at times during the year, not least in early April as President Trump unleashed wide-ranging trade tariffs against US trading partners. The sell-off was nevertheless short-lived; President Trump suspended the worst of his tariffs for a 90-day grace period, allowing trade negotiations to take place, and markets staged a recovery that effectively lasted for the rest of the year.

Interest rates continued to tumble across most major economies as inflationary pressures eased. The European Central Bank cut rates four times in the first six months of the year, although it left rates unchanged thereafter. The Bank of England lowered its rates four times during the whole year. The US Federal Reserve, however, having warned investors in late 2024 that the pace of rate cuts would likely slow in 2025, left rates unchanged until September. The weakening labour market and dwindling inflationary pressures drove it to cut rates three times in the final few months of the year. In contrast, the Bank of Japan continued to tighten its monetary policy and lifted its benchmark rate to 0.5% in January, before raising it again in December to a 30-year high of 0.75%.

The global economic outlook was mixed. US gross domestic product ("GDP") fell by 0.5% on an annualised basis in the first quarter of the year – the first fall in quarterly GDP for three years – although it recovered in the next two quarters, rising by 4.3% in the third quarter. While the UK and eurozone economies grew solidly in the first quarter of the year, economic expansion waned over the remainder of the year. Mainland China grew ahead of expectations in the first quarter but slipped during the following quarters. Japan managed decent growth in the first two quarters of the year, before contracting in the third quarter. Conversely, India's economy recovered well and grew by more than 8% in the third quarter of the year.

Commodities

Commodities rose in aggregate over the year. The CRB Commodity Index rose but was quite volatile, plunging in early April as US President Donald Trump announced his wide-ranging tariffs, before recovering through much of the rest of the year. Commodities spiked higher in mid-June, led by oil, as Israel and the US launched airstrikes against Iran's nuclear facilities, but quickly fell back as the conflict petered out. However, the asset class edged higher in the final months of the year, led by precious metals, specifically gold and silver, as geopolitical worries dominated the investment landscape.

Oil prices declined, weighed down by concerns about the global economic outlook and rising production levels through much of the year. OPEC+ members lifted production by 547,000 barrels per day from September, after gradual increases from the spring. While OPEC+ agreed to leave production levels unchanged in the first quarter of 2026, oil prices softened into the year-end. West Texas Intermediate dropped from approximately $72 per barrel to $58 over the year, touching a near five-year low in December. Brent Crude followed a similar pattern, easing from about $75 to $61 over the period. Oil prices had surged abruptly in June on the brief Israel/Iran conflict, with Iran threatening to shut the Strait of Hormuz, although nothing came of this, and prices quickly fell back. The US raid on Venezuela late in the period and some efforts to tighten up on the illegal transport of Russian oil by sea ultimately had little effect on the direction of oil prices.

In contrast, precious metals, such as gold, silver and platinum, soared on favourable demand/supply dynamics and as investors sought out so-called 'safe havens'. The gold price breached the $3,000 per ounce mark for the first time in its history in March. It subsequently surged through $4,000 per ounce in early October, ending the year above $4,300 as it benefited from the weaker US dollar, economic uncertainty and strong government buying, particularly from mainland China. The silver price also set new all-time highs, more than doubling from just below $30 per ounce to over $70 during the year. Platinum also soared by well over 100% to new all-time highs on a growing supply/demand imbalance and notably strong demand from jewellers looking for an alternative to gold as the gold price traded higher.

Market Commentary 2025 (continued)

Commodities (continued)

Industrial metals were generally firmer. Copper was very strong and established a new all-time high of approximately $5.8 per pound in July, a level it almost matched again in late December after a significant slump in late July. The strength in copper was partly driven by concerns that the US administration would go ahead with threats to impose significant tariffs on imported copper to protect its domestic industry. Rekindled demand and stockpiling from mainland China also supported the copper price. Zinc, aluminium and nickel all also recovered from weakness early in the year to end higher over the period.

Foreign Exchange

The key development in foreign exchange markets over the period was the decline in the US dollar. The currency touched a more than two-year high in early January on optimism about newly elected US President Donald Trump's plans to cut taxes and regulations, and the US Federal Reserve's indication that it would likely pause further rate cuts for a while. The dollar then fell steadily through the rest of the period. Much of this had to do with tariffs. It began to fall steadily through the early spring months as President Trump threatened the likes of Canada, Mexico and mainland China with higher trade levies, before unveiling his comprehensive tariff levels on 2 April 2025, so-called "Liberation Day". There was also talk of the dollar being affected by the decline in "US exceptionalism" which accompanied the implementation of tariffs by the US, even though Liberation Day was quickly followed by a 90-day 'truce' and suspension of the worst of the tariffs, allowing for trade negotiations to take place. Although the dollar stabilised over the second half of the year, for the whole of 2025 it declined by approximately 9% – its worst showing since 2017.

Most other major currencies benefited from the weakness of the dollar. Sterling traded higher over the period, rising from 1.25 to 1.35 against the dollar over the year, touching 1.37 at mid-year, its highest level for over three years. Sterling's strength appeared to be driven more by the weakness in the dollar than any great vote of optimism in the UK economy. Economic growth in the UK dwindled under the weight of tax increases, with business and consumer confidence remaining brittle. Sterling weakened against the euro, falling from 1.21 to 1.15 over the period.

The euro was strong against the dollar and most other global currencies. The euro currency index traded up to its highest level for four years, while against the dollar it rallied from 1.04 to 1.17. This was partly driven by signs of a shift towards the euro as an alternative reserve currency, with governments around the world expanding their euro holdings. Despite several rate cuts from the European Central Bank in the first half of the year, the central bank kept rates unchanged in the second half, which gave the euro some support. This, along with some improved economic data and hopes that the post-Covid economic slump in the eurozone was largely over, helped the euro.

The yen weakened against sterling and the euro but was largely unchanged against the dollar. It started and closed the year at approximately 1.57 against the greenback. It then rallied to almost 1.40 in April as the dollar weakened, hurt by Trump's trade tariffs and the Bank of Japan's determination to tighten its monetary policy in the face of inflationary pressures in the domestic economy. The central bank raised rates in January and then again in December, taking the benchmark rate to a 30-year high. Despite this, the yen weakened over the second half of the year as traders discounted greater fiscal spending and large bond issuance as new prime minister Sanae Takaichi pledged to boost economic growth.

Tracking Error

A realised tracking error is an annualised standard deviation of the difference in returns between a sub-fund and its benchmark index. The tracking error shows the consistency of returns relative to the benchmark index over a defined financial period of time.

An anticipated tracking error is based on the expected volatility of differences between the returns of a sub-fund and the returns of its benchmark index.

For full physically replicating sub-funds, the investment management approach is to buy a portfolio of securities that as far as practicable consist of the securities that make up the benchmark index, in similar proportion to the weights presented in the benchmark index.

For partial replicating sub-funds, the investment management approach aims to match the main risk characteristics of the benchmark index by investing in a portfolio that is primarily made up of securities that represent the benchmark index. The aim is to generate a return which is as close as practicable to the total return of the index net of transaction costs and gross of fees and other costs.

The primary drivers represent where the impact makes a material difference to the sub-fund's performance to deviate from the underlying index. The primary drivers impacting tracking difference include withholding tax, accrued capital gains tax, securities lending, transaction costs from rebalancing, holding a proxy future, as a result of HSBC Group policy to exclude banned weapon stocks, optimisation and holding American Depositary Receipts and Global Depositary Receipts. These impacts can be either positive or negative depending on the underlying circumstances.

The table overleaf and the relevant footnotes indicate the primary drivers impacting tracking difference gross of the total expense ratio and where realised tracking difference is greater than the anticipated tracking error.

^*The gross percentage is calculated on a daily basis by dividing the latest daily NAV against its most recent daily NAV and the resulting answer is then deducted by one. The resulting answer is multiplied by the corresponding daily change in the index to arrive at the daily gross return percentage. The accumulation of all the daily return percentages gives the yearly gross performance percentage. The performance percentages disclosed are not deemed to be directly reconcilable to the Financial Statements. Also it allows the users to understand the relevance and reliability of the amounts quoted.

Additional disclosure requirements under SFDR are applicable to this annual report to the extent it relates to sub-funds classified as Article 8 / Article 9 funds under SFDR and such disclosures as they relate to those sub-funds can be found in the Other Additional Disclosures of this report. Such disclosures have in part been prepared using data sourced from third party data providers which was available as at the date of which the disclosures were produced. Similarly, the activities reported in the disclosures may be an output of proprietary analysis, which in turn may utilise data published by underlying investee companies. It has been observed that the availability of data, both from third party data providers and underlying investee companies, continues to be challenging in some respects. Additionally, there may be further regulatory guidance of relevance to the content of the disclosures that is still to be issued. The disclosures included in the Other Additional Disclosures of this report should consequently be read and understood considering these continuing challenges. With the assistance of the Management Company and the Investment Manager, the Board continues to monitor the ongoing development and evolution of sustainability-related regulation and associated guidance and the availability of relevant third party and investee companies' data in this regard.

Annual Depositary Report to the Shareholders

Re: HSBC ETFs plc (the "Company")

We, HSBC Continental Europe, Ireland, appointed Depositary to HSBC ETFs plc (the "Company") provide this report solely in favour of the Shareholders of the Company for the year ended 31 December 2025 ("the Accounting Period"). This report is provided in accordance with the UCITS Regulations - European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended ("the Regulations"). We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the Company for the Accounting Period, and we hereby report thereon to the Shareholders of the Company as follows.

We are of the opinion that the Company has been managed during the Accounting Period, in all material respects:

(i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the constitutional documents and the Regulations; and

(ii) otherwise in accordance with the provisions of the constitutional documents and the Regulations.

Yours sincerely,

_____

For and on behalf of
HSBC Continental Europe, Ireland

Independent auditors' report to the members of HSBC ETFs PLC

Report on the audit of the financial statements

Opinion

In our opinion, HSBC ETFs PLC's financial statements:

- give a true and fair view of the company's and sub-funds' assets, liabilities and financial position as at 31 December 2025 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements (the "Annual Report"), which comprise:

- the Statement of Financial Position as at 31 December 2025;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares for the year then ended;
- the Schedule of Investments as at 31 December 2025; and
- the notes to the financial statements, which include a description of the accounting policies.

Our opinion is consistent with our reporting to the Board of Directors.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law. Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and belief, we declare that non-audit services prohibited by IAASA's Ethical Standard were not provided.

Other than those disclosed in note 3 (d) to the financial statements, we have provided no non-audit services to the company in the period under audit.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 1 to the financial statements which describes the directors' reasons why the financial statements of HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF, HSBC MSCI EM FAR EAST UCITS ETF, HSBC MSCI RUSSIA CAPPED UCITS ETF, HSBC MSCI BRAZIL UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC MSCI MEXICO CAPPED UCITS ETF, HSBC MSCI TURKEY UCITS ETF and HSBC WORLD ESG BIODIVERSITY SCREENED UCITS ETF have been prepared on a basis other than going concern.

Our audit approach

Overview

Audit scope

- The Company is an open-ended investment Company with variable capital and engages HSBC Investment Funds (Luxembourg) S.A. (the “Management Company and Global Distributor”) to manage certain duties and responsibilities with regards to the day-to-day management of the Company. We tailored the scope of our audit taking into account the types of investments within the sub-funds, the involvement of the third parties referred to below, the accounting processes and controls, and the industry in which the Company operates. We look at each of the sub-funds at an individual level.

Key audit matters

- Existence of financial assets and financial liabilities at fair value through profit or loss.
- Valuation of financial assets and financial liabilities at fair value through profit or loss.

Materiality

- Overall materiality: 50 basis points of Net Assets Value ("NAV") at 31 December 2025 for each of the company’s sub-funds.
- Performance materiality: 75% of overall materiality.

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in the auditors’ professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

This is not a complete list of all risks identified by our audit.

Key audit matter	How our audit addressed the key audit matter
Existence of financial assets and financial liabilities at fair value through profit or loss.	
See significant accounting policy 2 (f) of the financial statements of the Company for further details. The financial assets and financial liabilities at fair value through profit or loss included in the Statement of Financial Position of each sub-fund are held in the sub-fund's name at 31 December 2025. We focused on this area because it represents the principal element in the financial statements.	Our audit approach sought to obtain independent confirmation of positions held with the depositary and relevant counterparties. We then reconciled these confirmations to the accounting records maintained by the sub-funds’ administrator and evaluated any material differences identified. For all financial derivative instruments held with counterparties, we obtained an independent confirmation to evidence the existence of the positions. No material issues were noted as a result of these procedures.

Valuation of financial assets and financial liabilities at fair value through profit or loss.	
See significant accounting policy 2 (f) of the financial statements of the Company for further details. The financial assets and financial liabilities at fair value through profit or loss included in the Statement of Financial Position of each sub-fund at 31 December 2025 are valued at fair value through profit or loss in line with FRS 102. We focused on this area because it represents the principal element in the financial statements.	We tested the valuation of the financial assets and financial liabilities by independently obtaining price quotations for the sub-funds' investments included within the financial statements. All material positions could be vendor priced and no differences above our threshold were identified. No material issues were identified from the results of these procedures.

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the company, the accounting processes and controls, and the industry in which it operates.

As at 31 December 2025 there are 54 funds operating. The Company's Statement of Financial Position, Statement of Comprehensive Income, and Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares are an aggregation of the positions and results of the sub-funds. The directors control the affairs of the Company and are responsible for the overall investment policy which is determined by them. The Company engages HSBC Investment Funds (Luxembourg) S.A. (the 'Management Company and Global Distributor') to manage certain duties and responsibilities with regards to the day to day management of the Company. The Manager has delegated certain responsibilities to HSBC Global Asset Management (UK) Limited (the 'Investment Manager and UK Representative') and to HSBC Securities Services (Ireland) DAC (the 'Administrator'). The financial statements, which remain the responsibility of the directors, are prepared on their behalf by the Administrator. The Company has appointed HSBC Continental Europe (the "Depositary") to act as Depositary of the Company's assets. In establishing the overall approach to our audit we assessed the risk of material misstatement at a sub-fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the Company's interaction with the Administrator, and we assessed the control environment in place at the Administrator.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the sub-funds as follows:

Overall materiality and how we determined it	50 basis points of Net Assets Value ("NAV") at 31 December 2025 for each of the company's sub-funds.
Rationale for benchmark applied	We have applied this benchmark because the main objective of the Company is to provide investors with a total return at a sub-fund level, taking account of the capital and income returns.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% of overall materiality.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 5 basis points of each sub-fund's NAV, for NAV per share impacting differences, as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

With the exception of HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF, HSBC MSCI EM FAR EAST UCITS ETF, HSBC MSCI RUSSIA CAPPED UCITS ETF, HSBC MSCI BRAZIL UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC MSCI MEXICO CAPPED UCITS ETF, HSBC MSCI TURKEY UCITS ETF and HSBC WORLD ESG BIODIVERSITY SCREENED UCITS ETF where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, our evaluation of the directors' assessment of the ability of the company and the sub-funds to continue to adopt the going concern basis of accounting included:

- Reviewing the liquidity profile of the assets and liabilities, for any significant mismatches, as detailed in Note 4 Risks associated with financial instruments;
- Agreeing the liquidity terms surrounding the Company and sub-fund's ability to manage liquidity risk through redemption limits, if necessary, as per Note 4 Risks associated with financial instruments - Liquidity Risk, to the legal documents;
- Performing subsequent event testing around capital activity to determine whether material redemption requests have been presented to the sub-funds; and
- Discussing management's plans to assess if there is a plan to terminate any of the sub-funds.

With the exception of HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF, HSBC MSCI EM FAR EAST UCITS ETF, HSBC MSCI RUSSIA CAPPED UCITS ETF, HSBC MSCI BRAZIL UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC MSCI MEXICO CAPPED UCITS ETF, HSBC MSCI TURKEY UCITS ETF and HSBC WORLD ESG BIODIVERSITY SCREENED UCITS ETF where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ability of the company and the sub-funds to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

With the exception of HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF, HSBC MSCI EM FAR EAST UCITS ETF, HSBC MSCI RUSSIA CAPPED UCITS ETF, HSBC MSCI BRAZIL UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC MSCI MEXICO CAPPED UCITS ETF, HSBC MSCI TURKEY UCITS ETF and HSBC WORLD ESG BIODIVERSITY SCREENED UCITS ETF where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the ability of the company and the sub-funds to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or any form of assurance thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 31 December 2025 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- Based on our knowledge and understanding of the company and its environment obtained in the course of the audit, we did not identify any material misstatements in the Directors' Report.
- In our opinion, based on the work undertaken in the course of the audit of the financial statements, the description of the main features of the internal control and risk management systems in relation to the financial reporting process included in the Corporate Governance Statement, is consistent with the financial statements and has been prepared in accordance with section 1373(2) of the Companies Act 2014.
- Based on our knowledge and understanding of the company and its environment obtained in the course of the audit of the financial statements, we have not identified material misstatements in the description of the main features of the internal control and risk management systems in relation to the financial reporting process included in the Corporate Governance Statement.
- In our opinion, based on the work undertaken during the course of the audit of the financial statements, the information required by section 1373(2)(a),(b),(e) and (f) of the Companies Act 2014 and regulation 6 of the European Union (Disclosure of Non-Financial and Diversity Information by certain large undertakings and groups) Regulations 2017 is contained in the Corporate Governance Statement.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on pages 27-28, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the ability of the company and the sub-funds to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the company and industry, we identified that the principal risks of non-compliance with laws and regulations related to breaches of Irish legislation and Central Bank of Ireland regulations, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended). We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to management override of controls. Audit procedures performed by the engagement team included:

- Enquiry of management to identify any instances of non-compliance with laws and regulations;
- Identifying and testing journal entries, where any such journal entries, that met our specific risk based criteria, were identified;
- Designing audit procedures to incorporate unpredictability;

- Reviewing relevant minutes of the meetings of the board of directors; and
- Reviewing financial statement disclosures and agreeing to supporting documentation to assess compliance with applicable laws and regulations.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at: https://iaasa.ie/wp-content/uploads/docs/media/IAASA/Documents/audit-standards/Description_of_auditors_responsibilities_for_audit.pdf. This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Other exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Appointment

We were appointed by the directors on 23 July 2025 to audit the financial statements for the year ended 31 December 2025 and subsequent financial periods. This is therefore our first year of uninterrupted engagement.

1. The reporting entity HSBC ETF Plc (the "Company")

HSBC ETFs plc (the "Company") was incorporated in Ireland as an open-ended investment company with variable capital and segregated liability between sub-funds on 27 February 2009 with registration number 467896. The Company is authorised by the Central Bank as an Undertaking for Collective Investment in Transferable Securities ("UCITS") pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 as amended (the "UCITS Regulations 2011") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48 (1)) (Undertakings for Collective Investment In Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"), (together the "UCITS Regulations").

The Company has been structured as an umbrella fund with segregated liability between sub-funds, in that the Directors may from time to time, with the prior approval of the Central Bank, issue different series of shares representing separate portfolios of assets. The assets of each sub-fund will be invested in accordance with the investment objective and policies applicable to such sub-fund as disclosed in the prospectus and the relevant supplement to the prospectus.

The objective of the Company is the collective investment in transferable securities and other liquid financial assets of capital raised from the public, operating on the principle of risk spreading in accordance with the UCITS Regulations.

As at 31 December 2025, the Company has 54 sub-funds in operation (31 December 2024: 50).

The Company has 8 inactive sub-funds. HSBC ECONOMIC SCALE WORLDWIDE EQUITY UCITS ETF was closed on 18 September 2020 and was delisted from London Stock Exchange on 21 September 2020. HSBC MSCI EM FAR EAST UCITS ETF was closed on 6 July 2022 and was delisted from London Stock Exchange on 11 July 2022. HSBC MSCI RUSSIA CAPPED UCITS ETF was suspended from trading from 2 March 2022 as a result of Russia's invasion of Ukraine. The closure of the sub-fund commenced on 24 March 2023 and the sub-fund was delisted from London Stock Exchange on 29 March 2023. HSBC MSCI BRAZIL UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC MSCI MEXICO CAPPED UCITS ETF and HSBC MSCI TURKEY UCITS ETF were closed and delisted from London Stock Exchange on 10 May 2024. HSBC World ESG Biodiversity Screened Equity UCITS ETF was closed on 19 February 2025. The sub-fund was delisted from London Stock Exchange on 17 February 2025.

2. Significant accounting policies

(a) Basis of accounting

The Company has consistently applied the following accounting policies to all periods presented in these Financial Statements except if mentioned otherwise. Set out below are the significant accounting policies.

The comparative figures included in the Company's Statement of Financial Position, Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares relate to the balances at and for the year ended 31 December 2024. The Company's totals represent the aggregated results and financial position of the individual sub-funds.

For the year ended 31 December 2024, the Financial Statements were prepared under the International Financial Reporting Standards ("IFRS"). For the year ended 31 December 2025 the Board of Directors has elected to prepare the financial statements in accordance with the FRS102, Companies Act 2014 and the UCITS Regulations.

2. Significant accounting policies (continued)

(a) Basis of accounting (continued)

The Company's transition date to FRS102 is 1 January 2024 and the comparative financial information for the year ended 31 December 2024 has been restated on a consistent basis with those accounting policies applied by the Company in preparing its first full Financial Statements in accordance with FRS102 at 31 December 2025. The closing balances as of 31 December 2023 are considered to be the opening balances as of 1 January 2024 in the Statement of Financial Position.

The transition to FRS102 is accounted for in accordance with the standard and how to adopt FRS102 for the first time. The Board of Directors has considered how the transition from IFRS to FRS102 has affected the Company's reported financial position, financial performance and cash flows. The transition to FRS102 has had no impact:

- on reported net assets at the date of transition to FRS102 or at the end of the latest period presented in the entity's most recent annual financial statements in accordance with previous GAAP; or
- on the Statement of Comprehensive Income for the latest period presented in the entity's most recent annual financial statements in accordance with previous GAAP, as such no reconciliations from IFRS to FRS102 are included in these financial statements.

The Directors have availed of the exemption available under FRS102 Section 7.1A not to prepare a Statement of Cash Flows. This exemption is available to the Company as majority of the Company's investments are highly liquid and are carried at market value. The Company produces a Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares.

(b) Basis of measurement

The Financial Statements have been prepared on a going concern basis, applying the historical cost convention, except for the non-derivative financial instruments valued at fair value through profit or loss and derivative financial instruments which have been valued at fair value through profit or loss.

The Financial Statements of the eight sub-funds referred to in Note 1 have been prepared on a non-going concern basis.

(c) Functional and presentation currency

(i) *Presentation currency of the Company*

The Company does not have a functional currency as it does not operate or transact in an economic environment and is structured as an umbrella fund for the segregated sub-funds. The Company's presentation currency is US Dollar.

(ii) *Functional and presentation currency of the sub-funds*

Functional currency is the currency of the primary economic environment in which the sub-funds operate. If indicators of the primary economic environment are mixed, then management uses its judgement to determine the functional currency that most faithfully represents the economic effects of the underlying transactions, events and conditions. The majority of each sub-fund's investments and transactions are denominated in one of the following: Euro, US Dollar, Pound Sterling or Hong Kong Dollar. Similarly, subscriptions and redemptions are determined based on the net asset value, and received and paid in Euro, US Dollar, Pound Sterling or Hong Kong Dollar. Distributions are also paid in Euro, US Dollar, Pound Sterling or Hong Kong Dollar. The functional currency of the sub-funds, which is in each case is the Euro, US Dollar, Pound Sterling or Hong Kong Dollar, is shown in the Statement of Financial Position of each sub-fund. The Company has also adopted these functional currencies as the presentation currency of each sub-fund.

2. Significant accounting policies (continued)

(c) Functional and presentation currency (continued)

(iii) *Translation and balances*

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign currency assets and liabilities are translated into the functional currency using the exchange rate prevailing at the Statement of Financial Position date.

Foreign exchange gains and losses arising from translation are included in the Statement of Comprehensive Income.

(iv) *Presentational translation*

For the purpose of presenting the Financial Statements of the Company:

- For the purpose of producing the Company's Statement of Financial Position, assets and liabilities, including net assets attributable to holders of Redeemable Participating Shares of each sub-fund whose presentation currency is not USD are translated from its presentation currency to USD at the closing rate at the Statement of Financial Position date; and

- For the purpose of producing the Company's Statement of Comprehensive Income and the Company's Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders, the average exchange rates for the respective financial period are used to convert into USD, the respective statements of the sub-funds with a presentation currency other than USD. The currency gain or loss on retranslation of opening net assets, and the average rate difference arising on the translation of the Combined Statement of Comprehensive Income and the Combined Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders, is included in the Company's Statement of Changes in Net Assets Attributable to Redeemable Participating Shareholders. This translation adjustment does not impact the net asset value per share of any of the individual sub-funds.

The translation method resulted in a foreign currency translation amount of USD 306,638,048 (31 December 2024: USD (156,462,022) due to the use of average rates as referred to above and the movement of closing exchange rates between 31 December 2025 and 31 December 2024. This has no impact on the net asset value per share of each of the sub-funds in their own functional currencies.

(d) Judgements and estimates

The preparation of Financial Statements in conformity with FRS102, requires the Board to make judgements, estimates and assumptions which affects the application of policies and the reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors which are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities which are not readily apparent from others.

Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on a regular basis. Revisions to accounting estimates are recognised in the financial period in which the estimates are revised and in any future periods affected. The transition to FRS102 has had no impact on the estimates included in the financial statements.

2. Significant accounting policies (continued)

(d) Judgements and estimates (continued)

Judgements

The determination of what constitutes an active market and what inputs are "observable" requires judgement by the Board when considering fair value measurement principles and fair value hierarchy disclosures. The determination of the sub-funds functional currencies also requires judgement. Information about judgements made in applying accounting policies that have effects on the amounts recognised in the Financial Statements is included in Note 2c(ii) and 2g(iv).

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a risk of resulting in an adjustment to the carrying amounts and levelling classification of assets and liabilities within the year ending 31 December 2025 and 31 December 2024 is included in Note 4(d).

(e) Amendments and interpretations effective from 1 January 2025

There are no amendments to existing standards relevant to the Company that are effective for the financial period beginning 1 January 2025.

2. Significant accounting policies (continued)

(f) Financial assets and liabilities at fair value through profit or loss

(i) *Classification and measurement of financial assets and financial liabilities*

In accordance with Section 11.2 of FRS102, the Company has elected to apply the recognition and measurement provisions of IFRS 9 Financial Instruments to all financial instruments. Disclosure and presentation requirements are applied in accordance with FRS102.

The Company is an open-ended investment company and materially all of the financial assets and liabilities of its sub-funds are required to be managed on a fair value through profit or loss basis in order to track the relevant reference indices. This applies to both initial and subsequent recognition. None of the Company's assets qualify for measurement at fair value through other comprehensive income.

Financial assets and liabilities such as cash and cash equivalents, due to/from broker and other short-term receivables and payables are measured at amortised cost at initial recognition and subsequently. All other material assets and liabilities of the Company are debt securities, equity investments and derivatives, and required to be measured at Financial Value Through Profit and Loss ("FVTPL") due to the business model of the sub-funds at initial recognition and subsequently.

Purchases and sales of investments are recognised on the trade date - the date on which the Company commits to purchase or sell the investment. Financial assets and financial liabilities at FVTPL are initially recognised at fair value. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

(ii) *Impairment of financial assets*

The Company assesses on a forward-looking basis the expected credit loss ("ECL") associated with its financial assets carried at amortised cost. Significantly, all of the Company's financial assets measured at amortised cost are short term assets. Therefore, as the term length of these assets is less than one year, the Company in effect measures loss allowances based on their life-time ECLs. When estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort, such as counterparty credit ratings.

(iii) *Derecognition*

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire or it transfers the rights to receive contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risk and rewards of ownership and does not retain control of the financial asset.

On derecognition of a financial asset, the difference between the carrying amount of the asset (or the carrying amount allocated to the portion of the asset that is derecognised) and the consideration received (including any new asset obtained less any new liability assumed) is recognised in the profit or loss. Any interest in such transferred financial assets that is created or retained by the Company is recognised as a separate asset or liability.

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expired.

2. Significant accounting policies (continued)

(f) Financial assets and liabilities at fair value through profit or loss (continued)

(iv) *Fair value measurement principles*

A fair value measurement assumes that the transaction to sell the asset or transfer the liability takes place either:

(a) in the principal market for the asset or liability; or
(b) in the absence of a principal market, in the most advantageous market for the asset or liability

The fair value of financial instruments where quoted in an active market is based on their quoted market prices at the reporting date without any deduction for estimated future selling costs. The Company utilises the last traded market price for both financial assets and financial liabilities where the bid-ask spread is narrow.

If an active quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Where discounted cash flow techniques are used, estimated future cash flows are based on management's best estimates and the discount rate used is a market rate at the Statement of Financial Position date applicable to an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data at the Statement of Financial Position date.

(v) *Offsetting of financial assets and liabilities*

None of the financial assets or financial liabilities are offset in the Statement of Financial Position.

(vi) *Securities Lent*

Securities which are lent out as part of the securities lending agreement continue to be recognised as financial assets and liabilities in the balance sheet. Securities lending constitutes temporary transfer of ownership and would not have any impact on the sub-funds holdings in the Statement of Financial Position when securities are lent. Bonds are priced dirty and interest receivable related to bonds is identified under transferable securities in the Statement of Financial Position. Further information on securities lending and the breakdown of this amount is detailed in Note 9 to the Financial Statements.

(g) Cash and cash equivalents

Cash and cash equivalents comprise deposits with banks. As at 31 December 2025 and at 31 December 2024, all cash and overdraft balances are held with HSBC Bank plc. Details of overdraft facility are disclosed in Note 7.

(h) Due from/to brokers

Amounts due to/from brokers relate to margin cash and cash collateral which is held by or due to brokers for open futures contracts and represents the exchange traded futures contracts' margin deposits held with brokers. This amount is the minimum deemed by the brokers and counterparties for collateral requirements and is restricted and reported separately to the unrestricted cash on the sub-funds' Statement of Financial Position.

2. Significant accounting policies (continued)

(i) Due from/to shareholders

Due from shareholders relates to subscriptions receivable not settled at the year end and due to shareholders relates to redemptions payable not settled at year end.

(j) Net gains/(losses) from financial instruments at fair value through profit and loss

Net gains/(losses) from financial instruments at fair value through profit and loss includes all realised gains and losses and unrealised fair value changes, foreign exchange differences, and interest income. Interest income is accounted for on an effective interest basis and is recognised when earned using the effective rate of interest.

(k) Payables for securities purchased/receivables for securities sold

Payables for securities purchased and receivables for securities sold represent purchases and sales that have been contracted for but not yet delivered by the end of the financial period. These accounts are measured at amortised cost and presented in the Statement of Financial Position as part of other assets and other liabilities.

(l) Other assets and other liabilities

In the Statement of Financial Position, receivables for securities sold, due from shareholders, dividend receivable, interest receivable and any other miscellaneous receivable amounts are included in other assets figure. Other liabilities figure in the Statement of Financial Position is consisted of payables for securities purchased, due to shareholders, management fee payable and other miscellaneous payable amounts.

(m) Dividend Income

Dividend income on financial assets at FVTPL is credited to the Statement of Comprehensive Income on the date on which the relevant securities are listed as “ex-dividend”. Dividend income, which is disclosed separately in the Statement of Comprehensive Income, is shown gross of any non-recoverable withholding taxes.

(n) Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accrual basis and as the related services are performed.

(o) Dividend Distributions

Distributions to holders of Redeemable Participating Shares are recorded in the Statement of Comprehensive Income as finance costs when declared (i.e. the decision has been through the final required approval stage and cannot be reversed).

(p) Redeemable Participating Shares

Redeemable Participating Shares in all share classes are redeemable at the shareholder’s option and are classified as financial liabilities. The Redeemable Participating Shares can be redeemed at any time for cash equal to a proportionate share of a particular sub-fund’s net asset value.

There are two types of share classes: accumulating share class and distribution share class. An accumulating share class is a class of shares in a sub-fund in respect of which net income and realised and unrealised capital gains net of realised and unrealised losses arising will be retained within the sub-fund and reflected in the net asset value of such class of shares. A distribution share class is a class of shares in a sub-fund in respect of which the Directors ordinarily intend to declare and pay dividends in respect of each financial year in which the total income of the sub-fund exceeds the fees and expenses by more than a de minimis amount determined by the Directors from time to time.

3. Fees and expenses

(a) Management fee

The Company has a fee structure where, in respect of each of the sub-funds, all of the fees and expenses (except for transaction costs and taxes or duty charges for portfolio re-balancing that are paid separately out of the assets of the relevant sub-funds) are paid as one single fee.
This is referred to as the “Total Expense Ratio” or “TER” in the prospectus and is being disclosed in these Financial Statements as the “Management fee”.

The Management fee is paid to the Management Company, and the Management Company is then responsible for the payment of all other operational expenses of the Company. This includes, but is not limited to, fees and expenses of the Directors, the Management Company, Investment Manager, distributors, the Depositary, the Administrator, the Registrar and Transfer Agent, the Auditor, the Secretary and such other person as the Management Company may determine at its discretion, and the operating administrative and services expenses as referred to below.

The Management fee covers all of the fees and expenses, except transaction charges and taxes or duty charges for portfolio re-balancing (which are classified as "other expenses" in the Statement of Comprehensive Income), all of which will be paid separately out of the assets of the relevant sub-fund.

The following list is indicative but not exhaustive of the types of services that the Management fee covers:

(i) all establishment costs of the Company;
(ii) the cost of listing and maintaining a listing of shares on any stock exchange;
(iii) registration fees;
(iv) financial index licencing fees;
(v) the cost of convening and holding Directors’ and shareholders’ meetings;
(vi) professional fees and expenses for legal, auditing and other consulting services;
(vii) the costs and expenses of preparing, printing, publishing and distributing prospectuses, supplements, annual and condensed semi-annual reports and other documents to current and prospective shareholders;
(viii) the costs and expenses of any investment adviser appointed by the Investment Manager;
(ix) for currency hedged classes, fees to third parties to cover the execution of the share class currency hedging policy. An additional fee for this service will apply to currency hedged classes as detailed in the relevant sub-fund’s supplement;
(x) such other costs and expenses (excluding non-recurring and extraordinary costs and expenses) as may arise from time to time and which have been approved by the Directors as necessary or appropriate for the continued operation of the Company or of any sub-fund;
(xi) interest on the overdraft facility as per Note 7.

The Management fee is calculated and accrued daily at a rate ranging from 0.05% to 0.60% from the net asset value (Total Expense Ratio section) of each sub-fund and payable monthly in arrears. The Management fee for each sub-fund is decided based on, among other things, its investment strategy and return potential. The Management fee of each sub-fund of the Company is listed in the relevant sub-fund’s supplement.

If any of the sub-funds’ expenses exceeded the Management fee outlined above in relation to operating the funds, the Management Company will cover any shortfall from its own assets.

3. Fees and expenses (continued)

(a) Management fee (continued)

The Management fee is not expected to exceed the TER as set out for the different sub-funds in the Company's prospectus and the sub-fund supplements to the prospectus. However, if an increase in a sub-fund's Management fee is required, that decision will require prior approval by shareholders of the relevant sub-fund, which must be approved by a majority vote at a meeting of shareholders.

The Management fee for the financial year amounted to USD 66,825,708 (31 December 2024: USD 47,032,769) of which USD 13,882,278 (31 December 2024: USD 4,670,082) was payable at the financial year end.

(b) Administrator's and Depositary's Fees

The Management Company is responsible for the payment to the Administrator and Depositary out of the Management fee, an annual fee, payable monthly in arrears at a rate ranging from 0.30 basis points to 1.00 basis points of the net asset value of the Company as of each valuation day. The Administrator's fees payable by the Management Company out of the Management fee for the financial year ended 31 December 2025 is USD 2,619,840 (31 December 2024: USD 2,276,169) of which USD 723,363 (31 December 2024: Nil) is payable at 31 December 2025. The Depositary's fee payable by the Management Company out of the Management fee for the financial year ended 31 December 2025 is USD 8,036,471 (31 December 2024: USD 3,446,756) of which USD 13,65,981 (31 December 2024: Nil) is payable at 31 December 2025.

(c) Directors' fees and expenses

The maximum amount of each Director's fees is Euro 50,000 per annum per Director and will not exceed that amount without the approval of the Board (with each Director abstaining on any resolution relating to their own remuneration).

The Directors' fees which are paid out of the Management fee for the financial year ended 31 December 2025 amounted to USD 135,849 (31 December 2024: USD 125,554).

(d) Auditor's fees

Fees for the statutory auditors, PWC, in respect of the financial year 31 December 2025, relating to the audit of the Financial Statements of the Company amounted to USD 362,906 (31 December 2024: USD 334,302 (KPMG)) excluding VAT. Fees for the statutory auditors, PwC, in respect of the financial year 31 December 2025, relating to non-audit services amounted to USD 51,860 (31 December 2024: USD NIL). All payments for the statutory auditor are met from the TER charge detailed above and levied by the Management Company.

(e) Transaction costs

The table below provides an analysis of the total transaction costs on the purchase and sale of transferable securities such as equities and derivative instruments for each of the Company's sub-funds. For the year ended 31 December 2025 and 31 December 2024.

Sub-Funds	31 December 2025	31 December 2024

3. Fees and expenses (continued)

(f) Dividend Purification

Some Shariah-compliant investments may yield small percentages of income inconsistent with Shariah Principles that will then need to be "purified". On at least an annual basis, following the approval by the Shariah Committee of the calculation of the non-permissible income in respect of the relevant Shariah sub-fund (following the principles to determine this calculation as set down by the Shariah Committee), the Company will donate any such non-permissible income to one or more charities selected by the Investment Manager and approved by the Shariah Committee. Non-permissible income in respect of a Shariah sub-fund will be calculated by assessing the income received by the relevant Shariah sub-fund that arose from non-compliant activities. In order to calculate the non-permissible income in respect of a Shariah sub-fund, the index provider will provide the Management Company with the dividend purification ratios, represented as a percentage of each dividend paid out by the companies in the index. The Management Company then calculates the amount to be purified based on the income received by the sub-fund on a monthly basis, and liaises with the Administrator so that such non-permissible income is accrued. Following the review by the Shariah Committee, the Management Company will instruct the Administrator to pay the total non-permissible income to the nominated charity.

For the year ended 31 December 2025, incurred dividend purification was USD 5,695.74 in HSBC FTSE EPRA NAREIT DEVELOPED ISLAMIC UCITS ETF, USD 19,227.88 in HSBC MSCI EMERGING MARKETS ISLAMIC SCREENED CAPPED UCITS ETF, EUR 9,452.03 in HSBC MSCI EUROPE ISLAMIC SCREENED UCITS ETF, USD 3,884.58 in HSBC MSCI JAPAN ISLAMIC SCREENED UCITS ETF, USD 4,473.17 in HSBC MSCI USA ISLAMIC SCREENED UCITS ETF and USD 10,295.42 in HSBC MSCI WORLD ISLAMIC SCREENED UCITS ETF.

4. Risks associated with financial instruments

The Company's investment activities expose it to a variety of financial risks: market risk (including price risk, currency risk and interest rate risk), credit risk and liquidity risk. The Company's overall risk management process focuses on the unpredictability of financial markets and seeks to mitigate potential adverse effects on the Company's financial performance.

Certain of the Company's sub-funds will seek to replicate the performance of a financial index while minimising as far as possible the tracking error between the sub-funds' performance and that of the relevant financial index. Certain sub-funds will seek to achieve this objective by holding a portfolio of securities that constitute the respective financial index.

The securities in which certain of the sub-funds invest will be traded or dealt in on a regulated market (a multilateral system operated and/or managed by a market operator, which brings together or facilitates the bringing together of multiple third-party buying and selling interests in financial instruments in the system).

The sub-funds may also use Financial Derivative Instruments ("FDIs") such as futures, forwards and warrants for efficient portfolio management of its assets and for investment purposes. Efficient portfolio management means investment decisions involving transactions that are entered into for one or more of the following specific aims: the reduction of risk; the reduction of cost; or the generation of additional capital or income for the sub-funds with an appropriate level of risk, taking into account the risk profile of the sub-funds and the general provisions of the UCITS Regulations. In particular, FDIs may be used for the purpose of minimising tracking error i.e. the risk that the sub-funds return varies from the respective benchmark financial index.

Changes to the composition and/or weighting of the securities constituting the financial index which is tracked by a sub-fund will ordinarily require that sub-fund to make corresponding adjustments or rebalancing to its investments in order to seek to track the financial index. The Investment Manager will accordingly seek to rebalance the composition and/or weighting of the securities held by a sub-fund from time to time to the extent practicable and possible to conform to changes in the composition and/or weighting of securities that constitute the respective financial index. Other re-balancing measures may be taken from time to time to seek to maintain the correspondence between the performance of a sub-fund and the performance of the financial index.

The Company uses the commitment approach to calculate the sub-funds' global exposure. The commitment approach is a methodology which aggregates the underlying market or notional values of derivatives to determine the exposure of the sub-fund to derivatives.

The Management Company employs a risk management process in respect of each sub-fund which enables it, together with the Investment Manager, to accurately measure, monitor and manage the various risks associated with FDI. A statement of this risk management process has been prepared and submitted to the Central Bank in accordance with the Central Bank requirements. Any FDI not included in the risk management process in respect of the Company will not be utilised until such time as a revised risk management process has been submitted to the Central Bank. The Management Company will, on request, provide supplementary information to shareholders relating to the risk management methods employed including the quantitative limits that are applied and any recent developments in the risk and yield characteristics of the main categories of investment.

When using FDI as part of efficient portfolio management techniques and instruments, a relevant sub-fund may incur operational costs and such costs are paid by the relevant sub-fund to the counterparty with which the Company has entered into a relevant agreement. The Company ensures that all revenues arising from efficient portfolio management techniques, net of direct and indirect costs, are returned to the relevant sub-fund. The exposure obtained through efficient portfolio management and the identity of the counterparties are in Note 5.

The Company does not currently use total return swaps.

4. Risks associated with financial instruments (continued)

(a) Market risk

Market risk is the risk that changes in market prices such as interest rates, foreign exchange rates or equity and credit spreads will affect the sub-funds' income or the fair value of its holdings of financial instruments.

(i) Price risk

Price risk is the risk that the value of instruments will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. The Company's financial instruments principally comprise equity investments. The Investment Manager attempts to mitigate this risk through the construction of a well-diversified portfolio in accordance with the respective sub-fund's investment objective. In accordance with the Company's policies and procedures, the Investment Manager monitors the Company's overall other price risk on a daily basis, and the Board reviews it on a quarterly basis.

The investment concentrations within the portfolio for each sub-fund are disclosed in the Schedule of Investments by investment type.

The below table provides an analysis of the effect on net assets of the respective sub-funds due to a indicative/illustrative increase/decrease in the benchmark market indices, with all other variables held constant.

Sub-Funds	Benchmark Index*^	Indicative change in benchmark index 31 Dec 2025	Indicative change in benchmark index 31 Dec 2024	Indicative change in net assets 31 Dec 2025	Indicative change in net assets 31 Dec 2024

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(i) Price risk (continued)

The majority of the sub-funds employ an investment strategy of full replication of the respective underlying benchmark index, therefore a Beta of 1 was assumed in the calculation of the above sensitivity analysis. The methodology utilised above is based on historical data and cannot take account of the fact that future market price movement and correlations between markets in conditions of market stress may bear no relation to historical patterns. The sub-funds that do not employ a full replication strategy are HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF, HSBC MSCI WORLD SMALL CAP SCREENED UCITS ETF and HSBC MSCI World UCITS ETF which utilise an optimisation strategy instead and HSBC Multi Factor Worldwide Equity UCITS ETF, which is actively managed and does not track a benchmark.

(ii) Currency risk

Currency risk is the risk that the fair value of a financial instrument as determined in a sub-fund's functional currency will fluctuate because of changes in foreign exchange rates. Each sub-fund may invest in financial instruments and enter into transactions denominated in currencies other than its functional currency. Consequently, each sub-fund is exposed to risks that the exchange rate of its currency relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the Company's assets or liabilities.

To the extent that each sub-fund may invest in foreign currency-denominated securities, it may also invest in currency exchange rate agreements. The sub-funds may use such FDI's (which will be based only on underlying assets or sectors which are permitted under the investment policy of the sub-funds): (i) to hedge a currency exposure, (ii) as a substitute for taking a position in the underlying asset where the Investment Manager determines that an FDI exposure to the underlying asset represents better value than a direct exposure; (iii) to tailor each sub-fund's interest rate exposure to the Investment Manager's outlook for interest rates; and/or (iv) to gain an exposure to the composition and performance of a particular index (provided always that each sub-fund may not have an indirect exposure through an index to an instrument, issuer or currency to which it cannot have a direct exposure) which will improve the efficiency of the management of sub-funds.

The sub-funds may buy and sell foreign currency futures and may engage in foreign currency transactions either on a spot or forward basis, to reduce the risks of adverse market changes in exchange rates.

Monetary items are units of currency held and assets and liabilities to be received or paid in a fixed or determinable number of units of currency. Monetary assets and liabilities included cash and cash equivalents, trade receivables and payables including due to/from brokers, and amounts due to/from brokers.

All assets and liabilities that do not meet the definition of monetary items are classified as non-monetary. Marketable equity investments are considered non-monetary assets. The sub-funds, in line with the securities comprising their underlying indices, are exposed to the currency risk of the respective reference index/strategy. The currency risk associated with equities is included in other price risk. Net assets attributable to holders of Redeemable Participating Shares are non-monetary.

As at 31 December 2025 and 31 December 2024, only HSBC BLOOMBERG GLOBAL SUSTAINABLE AGGREGATE 1-3 YEAR BOND UCITS ETF had significant monetary assets or liabilities that are exposed to currency risk. The majority of the monetary assets of the other sub-funds are in the denomination of the sub-funds' currency.

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(ii) Currency risk

The table below outlines the net foreign currency risk exposure of the sub-funds as at 31 December 2025.

As at 31 December 2025	Other assets/(liabilities) USD	Financial assets/liabilities at fair value through profit or loss* USD	Net Currency Exposure USD
Chinese Yuan	787	2,719,738	2,720,525
Euro	497	13,718,556	13,719,053
Hong Kong Dollar	1,190	25,212	26,402
Pound Sterling	2,089	2,501,147	2,503,236
Other	61,700	10,612,529	10,674,229
	66,263	29,577,182	29,643,445

*Includes interest receivable at fair value through profit or loss.

The sub-fund has entered into a number of forward exchange contracts for currencies other than USD. The impact of the hedging has been included in the above table. At 31 December 2025, if any non-functional currencies had strengthened by 5% in relation to the respective functional currency of the sub-fund, with all other variables held constant, net assets attributable to holders of redeemable participating shares would have increased/decreased by the amounts shown below.

As at 31 December 2025

	USD
Chinese Yuan	136,026
Euro	685,953
Hong Kong Dollar	1,320
Pound Sterling	125,162
Other	533,711
	1,482,172

A 5% decrease in non-functional currencies in relation to the respective functional currency with all other variables held constant, would lead to a corresponding decrease/increase in the net assets attributable to holders of redeemable participating shares by the approximate amounts as shown in the above tables. The estimated movement is based on management's determination of a reasonably possible change in foreign exchange rates. In practice, the actual results may differ from the sensitivity analysis above and the difference could be material.

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(ii) Currency risk (continued)

The table below outlines the net foreign currency risk exposure of the sub-funds as at 31 December 2024.

As at 31 December 2024	Other assets/(liabilities) USD	Financial assets/liabilities at fair value through profit or loss* USD	Net Currency Exposure USD
Chinese Yuan	7,179	3,348,492	3,355,671
Euro	9,495	19,889,668	19,899,163
Hong Kong Dollar	869	24,409	25,278
Pound Sterling	11,442	3,144,642	3,156,084
Other	100,623	16,476,722	16,577,345
	129,608	42,883,933	43,013,541

*Includes interest receivable at fair value through profit or loss.

The sub-fund has entered into a number of forward exchange contracts for currencies other than USD. The impact of the hedging has been included in the above table. At 31 December 2024, if any non-functional currencies had strengthened by 5% in relation to the respective functional currency of the sub-fund, with all other variables held constant, net assets attributable to holders of redeemable participating shares would have increased/decreased by the amounts shown below.

As at 31 December 2024

	USD
Chinese Yuan	167,784
Euro	994,958
Hong Kong Dollar	1,264
Pound Sterling	157,804
Other	828,867
	2,150,677

A 5% decrease in non-functional currencies in relation to the respective functional currency with all other variables held constant, would lead to a corresponding decrease/increase in the net assets attributable to holders of redeemable participating shares by the approximate amounts as shown in the above tables. The estimated movement is based on management's determination of a reasonably possible change in foreign exchange rates. In practice, the actual results may differ from the sensitivity analysis above and the difference could be material.

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(iii) Interest rate risk (continued)

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The majority of the Company's financial assets and liabilities are non-interest bearing. Interest bearing financial assets and liabilities include cash at bank which matures or reprices in the short-term, no longer than 3 months.

As a result, the Company is subject to limited direct exposure to fair value interest rate risk and cash flow interest rate risk due to fluctuations in the prevailing levels of market interest rates.

Only HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF held fixed income securities (i.e. bonds) as at year ended 31 December 2025 which are exposed to interest rate risk.

HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF^ Fund as at 31 December 2025

A summary of the Fund's interest rate gap position, analysed by the earlier of contractual re-pricing of maturity date, as follows.

	Less than 1month	1 to 3 months	3 months to 1 year	Above 1 year	Total
	USD	USD	USD	USD	USD

^See "Significant events during the financial year" in the Directors' Report.

4. Risks associated with financial instruments (continued)

(a) Market risk (continued)

(iii) Interest rate risk (continued)

The following tables detail the effect on net assets should interest rates have increased/decreased by 100 basis points (bps) with all other variables remaining constant, assuming that a 100 bps increase/decrease in the base interest rate would result in a correlating 100 bps increase/decrease in the value of net interest bearing assets. In reality, an increase/decrease of 100 bps would not result in a direct correlating increase/decrease in the fair value of net interest bearing assets, as the movement in the value of net interest bearing assets would depend on the individual asset class and/or market sentiment towards any sensitivity in the interest rate. The majority of the portfolio of the sub-fund is of fixed rate interest nature and therefore interest income received would not be affected by the fluctuation of interest.

	Interest bearing USD
Effect after 100 bps decrease	59,375,881
Effect after 100 bps increase	58,200,121

The majority of the portfolio of the sub-fund is of fixed rate interest nature and therefore interest income received would not be affected by the fluctuation of interest.

	Interest bearing USD
Effect after 100 bps decrease	85,095,349
Effect after 100 bps increase	83,410,293

(b) Credit Risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Company. Credit risk is generally higher when a non-exchange traded financial instrument is involved because the counterparty for non-exchange traded financial instruments is not backed by an exchange clearing house. Exchange clearing houses benefit both parties in a transaction as they bear most of the credit risk. If two individuals deal with one another, the buyer bears the credit risk of the seller, and vice versa. When an exchange clearing house is used, the credit risk that is held against both buyer and seller is passed on to the exchange clearing house.

Credit risk associated with investing activities is managed by the Investment Manager as part of the overall investment process. To reduce the Company's counterparty credit exposures, securities trading is primarily conducted on recognised exchanges and on a delivery-versus-payment basis. The risk of default is considered minimal, as delivery of securities on a settled trade is simultaneous with the Depositary receiving payment. Payment is made on a purchase simultaneous with the securities being received by the Depositary. The trade will fail if either party fails to meet its obligation.

The assets of the Company held by the Depositary will be segregated from the assets of either the Depositary or its agents or both. The assets of the sub-funds will be segregated from the assets of the other sub-funds. The Company is subject to credit risk to the extent that this institution may be unable to fulfil its obligations either to return the Company's securities or repay amounts owed. The Investment Manager does not anticipate any losses as a result of this concentration.

The ECL is not material and hence not included in the Statement of Comprehensive Income.

All of the cash of the Company held by the Depositary is placed on deposit with an affiliate of the Depositary, HSBC Bank plc with credit rating of AA- (31 December 2024: AA-) by Fitch and credit rating of A+ (31 December 2024: A+) by Standard and Poor's. The Company's future contracts and related collateral amounts were held with HSBC Bank plc. These institutions are highly rated by prominent credit rating agencies.

The Company will rank as a general creditor in the event of bankruptcy or insolvency of HSBC Bank Plc. Cash held by HSBC Bank plc is not held in a segregated client account. HSBC Bank plc complies with the FSA capital requirements in the event of insolvency of HSBC Bank plc.

(b) Credit Risk (continued)

Investments in debt securities

The Company's credit risk exposure is represented by the carrying amounts of cash at bank and due from or to brokers as disclosed on the Statement of Financial Position on the respective pages of each sub-fund. Bonds or other debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating.

As at 31 December 2025, HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF invested in debt securities (31 December 2024: HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF). This sub-fund does not have significant concentrations of credit risk with the largest single counterparty being the US treasury at 34.45% (see Schedule of Investments). The following table reflects the Standard and Poor's, Moody's and Fitch credit ratings of the debt investments held as a percentage of total debt investments.

HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF^

4. Risks associated with financial instruments (continued)

(c) Liquidity risk

Liquidity risk is the risk that an entity will encounter difficulty in meeting obligations associated with financial liabilities. The Company is exposed to daily cash redemptions of Redeemable Participating Shares and monitors this activity to ensure that funds are available to meet the redemption requirements.

The Company's investments are considered to be readily realisable as they are all traded on regulated markets. The Company has therefore limited exposure to liquidity risk.

The Company's financial instruments also comprise investments in derivative contracts traded over-the-counter, which are not traded in an organised public market and which generally may be illiquid. As a result, the Company may not be able to liquidate quickly some of its investments in these instruments at an amount close to its fair value in order to meet its liquidity requirements, or to respond to specific events such as a deterioration in the credit worthiness of any particular issuer. This risk is mitigated by restricting the exposure to any particular instrument.

The Company has also obtained overdraft facilities in order to manage its short term liquidity requirements. Details of the Company's overdraft facility are outlined in Note 7.

In accordance with the Company's policies and procedures in place and ESMA's guidelines on liquidity stress testing in UCITS and alternative investment funds, the Investment Manager monitors the Company's overall liquidity risk on at least a monthly basis, and the Board reviews it on a quarterly basis.

Substantially all of the Company's financial liabilities included in the Statement of Financial Position at 31 December 2025 and 31 December 2024 on the respective pages of each sub-fund, are payable within one month.

(d) Fair value of assets and liabilities

FRS102 requires disclosures of financial instruments measured at fair value to be based on a three-level fair value hierarchy that reflects the significance of the inputs in such fair value measurements. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy are as follows:

Level 1	Inputs that reflect unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date;
Level 2	Inputs other than unadjusted quoted prices that are observable for the asset or liability either directly or indirectly, including inputs in markets that are not considered to be active.
Level 3	This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments but for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments

A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. However, the determination of what constitutes "observable" requires judgement by the Directors.

4. Risks associated with financial instruments (continued)

(d) Fair value of assets and liabilities (continued)

Inputs are used in applying the various valuation techniques and broadly refer to the assumptions that market participants use to make valuation decisions, including assumptions about risk. Inputs may include price information, volatility statistics, specific and broad credit data, liquidity statistics, and other factors.

The Directors consider observable data to be that market data which is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market. The categorisation of a financial instrument within the hierarchy is based upon the pricing transparency of the instrument and does not necessarily correspond to the Directors' perceived risk of that instrument.

Transferable securities
Transferable securities with values based on quoted market prices in active markets are classified within Level 1. These include active listed equities and debt securities. Transferable securities that trade in markets that are not considered to be active but are valued based on models that use quoted market prices, dealer quotations based on actual trades or alternative pricing sources supported by observable inputs such as interest rates, yield curves, implied volatilities, credit spreads, are classified within Level 2. Under Asset Level 2 classification, either the price must be composed of quoted prices or any pricing information not observable in the market must rely on observable inputs. Transferable securities classified within Level 3 have significant unobservable inputs, as they trade infrequently or not at all. The fair value of such instruments is determined using valuation techniques including inputs not based on market data and where significant entity determined adjustments or assumptions are applied, as detailed in the fair value hierarchy note to the Financial Statements. Level 3 investments in equity securities are disclosed here.

Derivative instruments
Derivative instruments can be exchange-traded or privately negotiated over-the-counter ("OTC"). Exchange-traded derivatives, such as contracts for difference and futures contracts, are typically classified within Level 1 or Level 2 of the fair value hierarchy depending on whether or not they are deemed to be actively traded.

The financial instruments as at 31 December 2025 and 31 December 2024 were classified as follows:

Equities	Level 1/2/3
Futures contracts	Level 1
Debt Securities	Level 1/2
Warrants	Level 2/3
Forward contracts	Level 2
Other funds	Level 2

Equities, debt securities and warrants which are less frequently traded, or a price cannot be valued are classified as Level 2 and Level 3 respectively.

4. Risks associated with financial instruments (continued)

(d) Fair value of assets and liabilities (continued)

The following table presents the fair value hierarchy of the Company's financial assets and liabilities measured at 31 December 2025 and 31 December 2024.

At 31 December 2025 Financial assets at FVTPL	Level 1	Level 2	Level 3	Total
Equities	48,798,520,047	108,937,718	447,241	48,907,905,006

Forward contracts	-	(5,158,727)	-	(5,158,727)
Total	(4,361,682)	(5,158,727)	-	(9,520,409)

4. Risks associated with financial instruments (continued)

(d) Fair value of assets and liabilities (continued)

A reconciliation of movements in Level 3 assets and liabilities for the year ended 31 December 2025 and for the year ended 31 December 2024 is set out below.

	31 December 2025 USD	31 December 2024 USD
Opening balance	786,768	224,536
Purchases	619,675	975,966
Sales	(92,259)	(939,199)
Realised losses	(51,887)	(15,419)
Unrealised (losses)/gains	2,531,160	(10,919)
Transfers into Level 3*	-	551,852
Transfers out of Level 3*	(3,306,536)	-
FX losses on level 3	(2,676)	(49)
Closing balance	**484,245**	**786,768**

*All transfers are taken at the end of the financial year.

Cash and cash equivalents include cash in hand and other short-term deposits with original maturities of three months or less, net of bank overdrafts and are categorised as Level 2. The carrying amount of these short-term financial assets approximate fair value because of their short-term nature and the high credit quality of counterparties.

Receivable for investments sold and other receivables include the contractual amounts for settlement of trades and other obligations due to the Company. Payable for investments sold and other payables represent the contractual amounts and obligations due by the Company for settlement of trades and expenses. All receivable and payable balances are categorised as Level 2. The carrying amount of these short-term financial assets approximate fair value because of their short-term nature and the high credit quality of counterparties.

Redeemable Participating Shares are redeemable at the shareholder's option and are classified as financial liabilities. The Company issues the redeemable shares at the amount equal to the proportionate share of net assets of the Company, calculated on a basis consistent with that used in these Financial Statements. Accordingly, the carrying amount of net assets attributable to holders of redeemable shares approximates their fair value. The Redeemable Participating Shares can be redeemed at any time for cash equal to a proportionate share of a particular sub-fund's net asset value. As such, Level 2 is deemed to be the most appropriate categorisation for net assets attributable to holders of redeemable shares.

At 31 December 2025 and 31 December 2024, had the unobservable inputs such as last traded prices and average cost used in the fair value measurement categorised within level 3 of the fair value hierarchy increased or decreased by 5% with all other variables held constant, the decrease or increase in the net assets attributable to holders of Redeemable Participating Shares of each sub-fund is shown overleaf.

5. Derivative Contracts

Futures contracts

Futures contracts are commitments either to purchase or sell a specific financial instrument, currency, commodity or an index at a specified future date for a specified price and may be settled in cash or another financial asset. Futures are standardised exchange-traded contracts. Initial margin requirements for futures are met in cash or other instruments, and changes in the future contract values are settled daily through cash margin accounts.

Forward contracts

Forward contracts are contractual agreements to buy or sell a specified financial instrument at a specific price and date in the future. Forwards are customised contracts transacted in the OTC market. The Company may enter into forward foreign exchange contracts to manage the currency risk arising from the Company's investment or anticipated investment in investments denominated in foreign currencies. Forward contracts may be used for hedging and currency management of both local and foreign currencies.

For the year ended 31 December 2025, HSBC EURO STOXX 50 UCITS ETF, HSBC FTSE EPRA NAREIT DEVELOPED UCITS ETF, HSBC MSCI CHINA A UCITS ETF, HSBC MSCI WORLD UCITS ETF and HSBC S&P 500 UCITS ETF held forward contracts (31 December 2024: HSBC FTSE EPRA NAREIT DEVELOPED UCITS ETF, HSBC S&P 500 UCITS ETF HSBC MSCI WORLD UCITS ETF and HSBC S&P 500 UCITS ETF).

Warrants

A warrant is a financial instrument which is usually issued along with a bond or preferred stock, entitling the holder to buy a specific amount of securities at a specific price, usually above the current market price at the time of issuance, for a specified or unspecified period. The listed warrants are traded on recognised exchanges and all warrants are valued at fair value. Realised and change in unrealised gains and losses are recorded in profit or loss in the Statement of Comprehensive Income.

*The sub-fund was launched on 14 August 2025 and listed on London Stock Exchange on 22 August 2025.
**The sub-fund was launched on 19 August 2025 and listed on London Stock Exchange on 22 August 2025.
*** The sub-fund was launched on 20 May 2025. and listed on London Stock Exchange on 5 June 2025.
****The sub-fund launched on 3 June 2025 and listed on London Stock Exchange on 5 June 2025.
*****The sub-fund was launched on 29 February 2024 and listed on London Stock Exchange on 4 March 2024.
******The sub fund was closed on 19 February 2025. The sub-fund was delisted from London Stock Exchange on 17 February 2025.
^*Net value of Assets under Custody (“NVAC”) represents 10% of the NVAC with the Depositary. To the extent that the facility is drawn down, the assets and cash balances held by the Depositary are held as collateral for the overdraft facilities.

An overdraft fee is charged on the facility at the HSBC Bank plc’s base lending rate plus 2%, calculated on a per annum basis. An annual fee of EUR 10,000 is payable per sub-fund. The overdraft fee on the facility is paid out of TER. As at 31 December 2025, overdraft facility was drawn by HSBC MSCI EM FAR EAST UCITS ETF (31 December 2024: overdraft facility was drawn by HSBC MSCI EM FAR EAST UCITS ETF).

For certain sub-funds, the agreements are not in place due to lead time in documentation. Until the agreements are executed, the sub-funds rely on a ‘payment settlement limit’ that is in place to manage the overdrafts. Payment settlement limit is used to manage intraday credit requirements that may arise throughout the usual course of business.

8. Due from/to brokers

Broker cash balances (restricted cash) held with HSBC Bank plc at 31 December 2025 amounted to USD 14,786,075 (31 December 2024: USD 15,710,323). None of these balances were withdrawable. Broker cash balances relate to balances due to/from brokers with respect to open futures contracts.

9. Securities Lending

Securities lending is used by the sub-funds to generate additional income from the securities held by the sub-funds. Further disclosures pertaining to securities lending are disclosed in Other Additional Disclosures.

Securities lent by a sub-fund are not derecognised from the sub-fund's balance sheet and securities lent can be sold at any time. The sub-funds listed below engaged in securities lending as at 31 December 2025 and 31 December 2024.

Cash collateral and securities collateral for securities lending are mainly held by third parties (Tri-party collateral agents) and by HSBC Bank plc and would not have any impact in the Statement of Financial position of the sub-funds as cash collateral and securities collateral are not owned by the sub-funds. Securities Lending Agent, HSBC Bank plc is the custodian of the collaterals.

The proportion of collateral held in the sub-funds is segregated in full and never pooled.

The securities lending commission is allocated to the following parties:

75% of the gross revenue on securities lending is allocated to the relevant sub-fund.
10% of the gross revenue on securities lending is allocated to the Management Company.
15% of the gross revenue on securities lending is allocated to the Securities Lending Agent, HSBC Bank plc.

Direct costs from securities lending include 15% of the gross revenue due to the Securities Lending Agent which is USD 1,418,143 (31 December 2024: USD 1,102,242) and 10% of the gross revenue due to the Management Company which is USD 945,432 (31 December 2024: USD 734,828) as shown in the table below.

^See “Significant events during the financial year” in the Directors’ Report.
*The sub-fund was launched on 13 March 2024 and listed on London Stock Exchange on 15 March 2024.

9. Securities Lending (continued)

Sub-Funds	Functional Currency	Type of Collateral held	Value of Collateral held
HSBC S&P 500 UCITS ETF	USD	Equity	528,176,810
		Government Bonds	21,608,468
HSBC MSCI USA QUALITY UCITS ETF	USD	Equity	234,840
		Government Bonds	505,947

	One to three months	Three months to one year	Above one year	Open Maturity (USD)	Total (USD)
Securities on Loan	-	-	-	2,685,275,099	2,685,275,099
Non-Cash Collateral	1,037,707	35,145,855	941,397,978	2,108,250,119	3,085,831,660

Acceptable collateral from securities lending activities consists of USD/GBP/EUR/AUD/CAD cash, Government Sovereign Bond with minimum issuer rating of A+/A1, Government Agency and Supranational Bond with minimum issuer rating of AA/Aa2, Provincial Government Bond with minimum issuer rating of AA-/Aa3, and Main Index Equities of the following indices:

AEX NL/AEX	BEL 20/BE BEL20	CAC40/FR CAC
DAX/GR DAX	DK/KFX	Eurostoxx 50/SX5E
FTSE 100/ UKX	FTSE 350/UK NMX	FTSE MIB/IT FTSE
Hang Seng/HK HSI	HEX25	IBEX 35/ES IBEX
MIB	NIKKEI225 JP/NKY	NZX 50/NZSE50FG
OMX Copenhagen 20	OMX Helsinki 25 FI	OMX Stockholm 30/SE
PSI 20	PT/PSI20	Russell 3000/US RAY
S&P/ASX200/ AUAS51	S&P/TSX 60/CA TSX	S&P 500/US SPX
Swiss Market/CH SMI		

The securities received as collateral are not required to be in the same currency as the securities lent but collateral value margins over the value of securities lent do apply and additional margin is required when currency mismatches arise.

As at 31 December 2025, only Government Sovereign Bond and Main Index Equities were held as collateral (31 December 2024: Government Sovereign Bond and Main Index Equities).

Currency wise breakdown of the collateral held in each sub-fund as at 31 December 2025 and 31 December 2024 is shown below.

^See “Significant events during the financial year” in the Directors’ Report.

10. Share capital and Redeemable Participating Shares

Authorised

The authorised share capital of the Company is 2 subscriber shares of no par value issued at EUR1.00 each (the "Subscriber Shares"); 300,000 capitalisation shares of no par value issued at EUR1.00 each and fully redeemed and 500,000,000,000 participating shares of no par value (the "Redeemable Participating Shares").

Capital Management

2 Subscriber Shares are held by the Investment Manager. They entitle the holders to attend and vote at general meetings of the Company but do not entitle the holders to participate in the profits or assets of the Company except for a return of capital on a winding-up. The holders of Subscriber Shares have one vote for each Subscriber Share held. The Subscriber Shares do not form part of the net asset value of the Company. They are thus disclosed in the Financial Statements by way of this note only.

The Redeemable Participating Shares entitle the holders to attend and vote at general meetings of the Company and to participate equally (subject to any differences between fees, charges and expenses applicable to different classes of shares) in the profits and assets of the Company.

The list of share classes in issue as at 31 December 2025 are as follows:

11. Distributions

The Directors intend to declare and pay dividends on the shares of each of the sub-funds in respect of each financial year in which the total income of the relevant sub-funds exceeds the fees and expenses by more than a de-minimis as determined by the Directors (the "Net Investment Income") except as set out below. Dividends will ordinarily be paid twice annually in January/February and July/August. For HSBC MSCI WORLD UCITS ETF, HSBC MSCI EM LATIN AMERICA UCITS ETF, HSBC FTSE 250 UCITS ETF, HSBC FTSE EPRA NAREIT Developed UCITS ETF, HSBC MSCI EMERGING MARKETS UCITS ETF, HSBC MULTI FACTOR WORLDWIDE EQUITY UCITS ETF, HSBC ASIA PACIFIC EX JAPAN SCREENED EQUITY UCITS ETF, HSBC DEVELOPED WORLD SCREENED EQUITY UCITS ETF^ , HSBC MSCI AC FAR EAST EX JAPAN UCITS ETF and HSBC MSCI CHINA A UCITS ETF dividends will be paid quarterly in January/February, April/May, July/August and October/November.

Distributions made are also subject to equalisation. Equalisation is operated in connection with the issue and redemption of shares. It represents the income element included in the price for the issue and redemption of shares as detailed in Note 2(p).

The Company paid the following dividends during the financial year ended 31 December 2025:

12. Related parties

(a) Transactions with key management personnel

The Company has appointed, HSBC Investment Fund (Luxembourg) S.A. as the Management Company as disclosed in Note 3(a). The Management Company is therefore considered to be a related party. The Management Company, Investment Manager, the Swiss Representative, the Switzerland Paying Agent, the Administrator and the Depositary are all wholly owned subsidiaries of HSBC Holdings plc and are therefore considered as related parties to the Company. HSBC Holdings plc is the parent company of the above parties and therefore considered as a related party to the Company. Fees and charges to these parties are disclosed in Note 3(a) to the Financial Statements. As at 31 December 2025, two Subscriber Shares are held by the Investment Manager and its nominee.

Key management personnel include the Directors of the Company. Directors' fees are paid only to the independent Directors of the Company and are disclosed in Note 3(c).

The Directors had no direct or indirect interest in any shares in issue by the Company as at 31 December 2025 (31 December 2024: Nil).

(b) Other related party transactions

The Company receives fees from HSBC Bank plc in the form of duties and charges, direct dealing cash transaction fees, in-kind transaction fees and share conversion transaction fees, where applicable to cover expenses incurred by the Company in processing creations and redemptions. HSBC Bank plc also acts as an Authorised Participant of the Company and pays for the transaction fees for subscriptions and redemptions which are subsequently charged to the investors. Transaction fees received by the Company during the financial year from HSBC Bank plc amounted to USD 11,243,571 (31 December 2024: USD 5,651,345) and are included in the Statement of Comprehensive Income under the heading "Net gain/(loss) on financial assets and liabilities at fair value through profit or loss".

An overdraft fee is charged on the facility at the HSBC Bank plc's base lending rate plus 2%, calculated on a per annum basis to the extent drawn. An annual fee of EUR 10,000 is payable per sub-fund. The overdraft fee on the facility is paid out of TER. For certain sub-funds, the agreements are not in place due to lead time in documentation. Until the agreements are executed, the sub-funds rely on a 'payment settlement limit' that is in place to manage the overdrafts.

The Company entered into a securities lending agreement with HSBC Bank plc from 2 March 2021 and details of the securities lending transactions are set out in Note 9. The Company holds cash margin, cash on deposit and has obtained credit facilities with HSBC Bank plc as detailed in Note 2(h), 2(i) and Note 7. HSBC Bank plc is considered to be a related party being a subsidiary of HSBC Holdings plc.

HSBC DEVELOPED WORLD SCREENED EQUITY UCITS ETF^, HSBC EUROPE SCREENED EQUITY UCITS ETF^, HSBC FTSE 100 UCITS ETF, HSBC MSCI EUROPE CLIMATE PARIS ALIGNED UCITS ETF, HSBC MSCI EUROPE UCITS ETF, HSBC MSCI WORLD VALUE SCREENED UCITS ETF^, HSBC MSCI WORLD UCITS ETF, HSBC UK SCREENED EQUITY UCITS ETF^, HSBC WORLD CPA UCITS ETF, HSBC WORLD ESG BIODIVERSITY SCREENED EQUITY UCITS ETF and HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF^ hold investments in HSBC Holdings plc as disclosed in the Schedules of Investments. HSBC Client Holdings Nominee (UK) Limited and HSBC Global Custody Nominee (UK) Limited held shares at year end as a nominee account and are held on behalf of the beneficial owners. HSBC Global Markets acts as an Authorised Participant to the sub-funds. HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF^ holds an investment in HSBC – US Dollar ESG Liquidity Fund as disclosed in the Schedule of Investments.

^ See "Significant events during the financial year in the Directors' Report.

12. Related parties (continued)

(c) Authorised Participants

HSBC Global Markets is the only Authorised Participant that is a related party to the sub-funds. The Company does not make any other payments to HSBC Global Markets.

Barclays Capital Securities Limited, BNP Financial Markets, , Banca Sella , Citigroup Global Markets, CLSA (UK), DRW Global Markets Ltd, Flow Traders B.V., GTX UK LLP, Goldman Sachs International, HSBC Bank Plc, JP Morgan Securities plc, Jane Street Financial Limited, Merrill Lynch International, Morgan Stanley & Co. International PLC, Old Mission Europe LLP, Optiver VOF, RBC Europe LLP, Societe Generale S.A., Susquehanna International Securities Limited, UBS AG London Branch, Virtu Financial Ireland Limited are Authorised Participants to the sub-funds which are significant contracts and are not related parties to the sub-funds.

The Company does not make any other payments to the Authorised Participants.

During the year, Authorised Participants helped maintain the liquidity of the sub-funds by subscribing for and redeeming shares. There were no brokerage fees accrued or paid to the Authorised Participants during the financial year ended 31 December 2025 (31 December 2024: Nil).

(d) Investment transactions with related parties

In their purchases and sales of investments, the sub-funds utilise the services such as brokerage, clearing and settlement of members of HSBC Group. Details of such transactions executed during the year ended 31 December 2025 and 31 December 2024 are shown below:

14. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains. However, Irish tax may arise on the occurrence of a "chargeable event".

A chargeable event includes any distribution payments to shareholders or any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight-year financial period beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

a) A shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company; or the Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and

b) Certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations; and

c) Any transaction (which might otherwise be a chargeable event) in relation to shares held in a recognised clearing system as designated by order of the Irish Revenue Commissioners (such as ICSD) will not constitute a chargeable event. It is the current intention of the Directors that all shares in the Company will be held in ICSD or another recognised clearing system.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.
The Management Company have assessed Pillar II tax requirements and have concluded that the Company does not fall into the scope of Pillar II.

The Company may be subject to withholding taxes and capital gains tax imposed on realised and unrealised gains on securities for certain foreign countries in which the Company invests. The foreign tax expense, if any, is recorded on an accrual basis and is included in capital gains taxes in the Statement of Comprehensive Income. The amount of foreign tax owed, if any, is included in the capital gains tax payable in the Statement of Financial Position. For the year ended 31 December 2025 and 31 December 2024, there were capital gains tax charges on the below sub-funds.

Tax Risk Disclaimer for Taxation in the People's Republic of China ("PRC")

PRC withholding tax has been enforced on payment of dividends to Qualified Foreign Institutional Investors ("QFIIs") from PRC listed companies at the rate of 10%. However, PRC Tax authorities have, since 2014, provided a temporary exemption from withholding tax on capital gains realised by QFIIs on selling of A-Shares. There is a risk that the PRC tax authorities seek to remove the temporary exemption on capital gains realised QFIIs on selling of A-Shares. There is a risk that the PRC tax authorities may seek to remove the temporary exemption on capital gains realised as well as future gains. In such a case, the sub-funds might be adversely impacted.

15. Directed Brokerage Services

There were no brokerage fees accrued or paid to the Authorised Participants during the financial year ended 31 December 2025 (31 December 2024: Nil).

16. Operating segments

Operating segments are the components of the Company whose results are regularly reviewed by the Company's chief operating decision maker ("CODM") to make decisions about resources to be allocated to the segment and assess its performance. Various sub-fund revenues are disclosed in the respective Statement of Comprehensive Income of the sub-funds. The Board, which is considered to be the CODM, managed the Company on the basis of business divisions determined with reference to market focus, geographical focus, investment funding model and the Company's management hierarchy. It is the opinion of the CODM that each sub-fund can be treated as a segment as the return on each sub-fund is linked to a different benchmark. Revenue generated from each sub-fund is presented in the Statement of Comprehensive Income of the relevant sub-fund.

Geographical areas
The Company does not separately monitor revenues from different geographical areas. However, by their nature of tracking indices which represent specific markets in specific regions, each sub-fund's revenue may be considered as being attributed to the region stated in its investment objective.

17. Major customers

The Company regards the holders of redeemable shares as customers, because it relies on their funding for continuing operations and meeting its objectives. See Note 13, 'Significant Shareholders' for details on number of shareholders who held more than 10% of the Company's net asset value attributable to holders of redeemable shares.

18. Charges

HSBC Bank plc holds a number of charges over assets held in custody by the sub-funds as security for obligations under uncommitted overdraft facilities that HSBC Bank plc provides to the sub-funds.

19. Significant events since the financial year end

1. The Company declared the following dividends subsequent to the financial year end.

Securities Lending

The Securities Financing Transaction Regulation ("SFTR") Disclosure

A Securities Financing Transaction is defined as per Article 3(11) of the SFTR as:
- a repurchase transaction;
- securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction; or
- a margin lending transaction.

As at 31 December 2025 and 31 December 2024, the below sub-funds had securities out on loan. The Depositary is HSBC Continental Europe and the Securities Lending Agent is HSBC Bank plc. The securities issued on loan are on open basis and can be recalled at any time.

The amount of securities on loan as a proportion of lendable assets (calculated as Total Assets less cash and cash equivalents) were as follows:

31 December 2025

Sub-Funds	Functional Currency	Securities issued on loan	Lendable assets	Securities on loan as a percentage of lendable assets
HSBC ASIA PACIFIC EX JAPAN SCREENED EQUITY UCITS ETF^	USD	13,013,677	495,509,772	2.63%

Plan d'Epargne en Actions ("PEA") Eligibility

For the purpose of eligibility requirements of Article L-221-31 of the French Monetary and Financial Code, the relevant sub-funds must at all times during the financial year ended 31 December 2025 and 31 December 2024 be invested in more than 75% of PEA eligible assets. PEA eligible assets are defined as equity or equity equivalent securities, which have their registered office in a country which is a member of the EU or the European Economic Area. In the context of the Brexit, the French government decided that, until 30 September 2021, UK securities would remain eligible to make up the aforementioned 75% ratio. From 1st October 2021, the sub-funds HSBC FTSE 100 UCITS ETF, HSBC FTSE 250 UCITS ETF and HSBC MSCI EUROPE UCITS ETF were no longer eligible to the PEA wrapper.

As at 31 December 2025, only HSBC EURO STOXX 50 UCITS ETF sub-fund satisfied the criteria for PEA Eligibility:

	% PEA Eligible Assets	
Sub-Funds	**31 December 2025**	**31 December 2024**
HSBC EURO STOXX 50 UCITS ETF	99.34%	99.02%

Management Company's Remuneration Policy

The Management Company has implemented a remuneration policy pursuant to Directive 2014/91/EU of the European Parliament and of the Council of 23 July 2014 amending Directive 2009/65/EC on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities (UCITS) as regards to depositary functions, remuneration policies and sanctions (the "UCITS V Directive"), which was transposed into Luxembourg law on 1 June 2016 by way of the Luxembourg law of 10 May 2016.

The remuneration policy, which has been approved by the Management Company's board of directors, includes measures to avoid conflicts of interest and seeks to promote sound and effective risk management and that neither encourage risk taking which is inconsistent with the risk profile and instrument of incorporation of the Company nor impair compliance with the Management Company's duty to act in the best interest of the Company.

The remuneration policy, which describes how remuneration and benefits are determined, is available at https://www.hsbc.lu, or on request from the Management Company.

Total amount of remuneration paid by the Management Company to its staff during the financial year ending 31 December 2025 is as follows:

Fixed remuneration EUR 2,341,155
Variable remuneration EUR 363,975
Number of beneficiaries 22
of which, the fixed and variable remuneration of senior management is:
Fixed remuneration EUR 982,777
Variable remuneration EUR 183,356
Number of beneficiaries 6

The annual review of the remuneration policy, including a review of the existing remuneration structure as well as implementation of the regulatory requirements and compliance with them, was completed during the year and no irregularities were identified. Furthermore, there were no material changes made to the remuneration policy in the past financial year.

Neither the Management Company nor the Company pay any remuneration to the identified staff of any delegate.

Appendix (unaudited) - Sustainability Finance Disclosure Regulation Periodic Reports

as at 31 December 2025

Information regarding the environmental and/or social characteristics promoted by the Article 8 SFDR Funds and how they intend to invest in environmentally sustainable investments contributing to the environmental objectives of the Taxonomy Regulation is shown in the following pages. The list of Article 8 SFDR sub-funds are shown in Investment Manager's Report.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC ASIA PACIFIC EX JAPAN SCREENED EQUITY UCITS ETF

Legal Entity Identifier: 213800OOTJ3VDM7F9R44

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 30.66% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the FTSE Asia Pacific ex Japan ESG Low Carbon Select Index (the "Index"), the Fund
:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Asia Pacific ex Japan Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	169.09	307.35
ESG Score	3.91	3.38
Fossil Fuel Reserve Exposures	2,191.06	3,392.02

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

	31 December 2023	1,571.21	2,692.63

Broad Market Index - FTSE Asia Pacific ex Japan Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To support the DNSH assessment, quantitative criteria was established across the PAIs.
In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.
Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	33,178.03	1,099,827,909.52
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	92.78	132.62

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	169.09	307.35
4. Exposure to companies active in the fossil fuel sector	31 December 2025	11.50%	5.07%
5a. Share of non-renewable energy consumption	31 December 2025	71.43%	75.86%
5b. Share of non-renewable energy production	31 December 2025	9.34%	67.07%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 December 2025	0.61	8,257.40
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.05%	-0.10%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.30	11.24
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	10.29	7.24
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	6.06%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	4.96%	8.27%
12. Unadjusted gender pay gap	31 December 2025	17.43%	17.10%
13. Board gender diversity	31 December 2025	24.24%	23.83%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.07%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Asia Pacific ex Japan Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	11.31%	Taiwan
BHP Group Ltd	Materials	5.37%	Australia
National Australia Bank Limited	Financials	4.59%	Australia
Infosys Limited	Information Technology	4.57%	India
Xiaomi Corporation Class B	Information Technology	3.92%	China
DBS Group Holdings Ltd	Financials	2.64%	Singapore
SK hynix Inc.	Information Technology	2.60%	Korea
Commonwealth Bank of Australia	Financials	2.40%	Australia
Zijin Mining Group Co., Ltd. Class H	Materials	2.02%	China
HCL Technologies Limited	Information Technology	1.75%	India
Ping An Insurance (Group) Company of China, Ltd. Class H	Financials	1.71%	China
ASE Technology Holding Co., Ltd.	Information Technology	1.57%	Taiwan
AIA Group Limited	Financials	1.54%	Hong Kong
Yum China Holdings, Inc.	Consumer Discretionary	1.54%	China
Delta Electronics, Inc.	Information Technology	1.43%	Taiwan

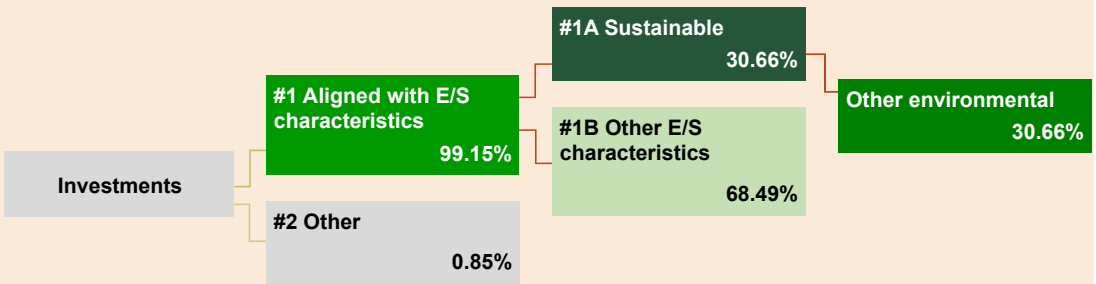

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

30.66% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	36.40%
Financials	28.25%
Materials	10.45%
Consumer Discretionary	7.86%
Industrials	3.55%

Independent Power Producers & Energy Traders	*0.00%*
Communication Services	1.35%
Real Estate	1.10%
Cash & Derivatives	0.85%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

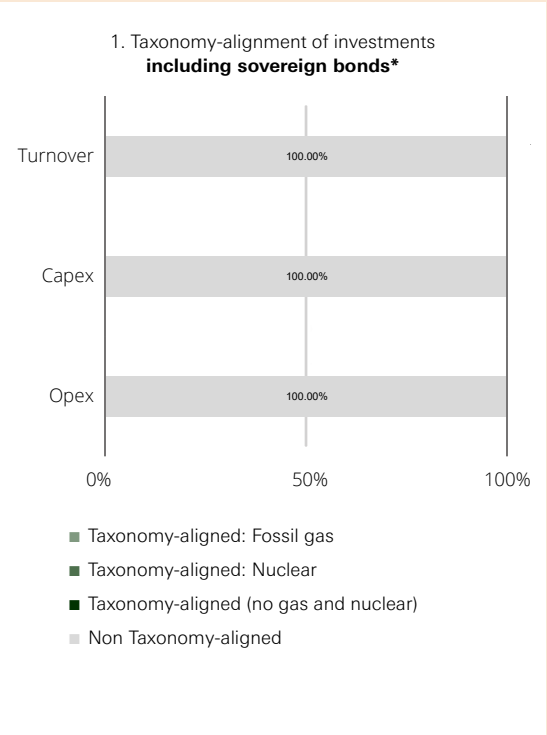

Taxonomy-aligned activities are expressed as a share of:

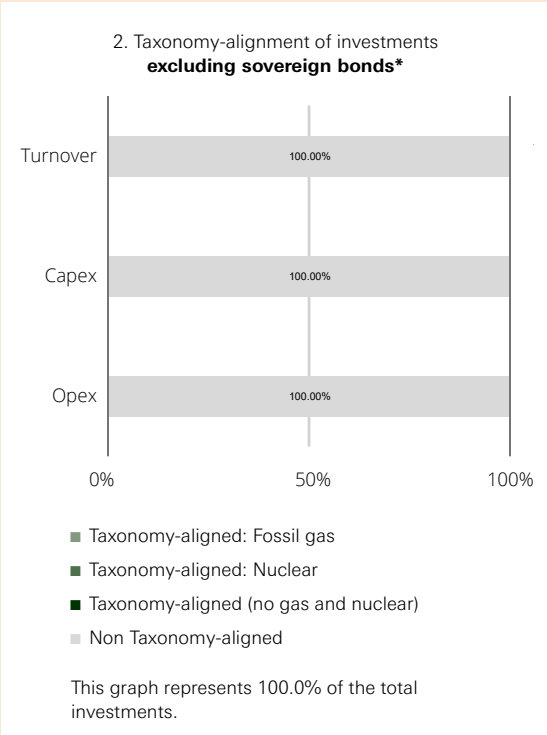

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 30.66%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria; and
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

  The Index is a subset of the Parent Index and aimed to measure the performance of companies in emerging and developed countries in Asia Pacific ex-Japan as defined by the Index provider.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weight companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	169.09	170.77

Product Name: HSBC BLOOMBERG GLOBAL ESG AGGREGATE 1-3 YEAR BOND UCITS ETF

Legal Entity Identifier: 213800ZJTJGZCCWI1I41

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 32.18% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the Bloomberg MSCI Global Aggregate 1-3 Year SRI Carbon ESG-Weighted Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- Better management of a broad range of environmental and social risks, and where applicable, positioning to meet demand for provision of goods and services that had a positive environmental or social contribution, collectively measured by MSCI ESG ratings. MSCI ESG ratings provided an opinion of companies' management of financially relevant ESG risks and opportunities. Each company was assessed on relevant environmental, social and governance themes, and where applicable, was positioned to meet market demand for the provision of products and services that had a positive environmental or social contribution. The themes determined by MSCI were climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance and corporate behaviour. The Fund targeted this by excluding issuers based on sustainability exclusionary criteria and weighting issuers to increase the exposure to those with favourable MSCI ESG ratings; and
- Supporting the transition to a lower carbon economy by excluding issuers with carbon intensity above limits set by the Index provider.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund. The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.
The performance of the sustainability indicators the Fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilise data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	6.42	6.01
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	10.11	121.48

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Global Aggregate 1-3 Year Index

	31 December 2023	28.99	

Broad Market Index - Bloomberg Global Aggregate 1-3 Year Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy; - Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation; - Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); - Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity; and - Supporting environmentally and/or socially sustainable initiatives using the proceeds of bond issuance.
Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework; - Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities; and - Issuers whereby the proceeds of the bond issuance were determined to contribute to a sustainable objective by the Investment Manager's Green, Social and Sustainable bond framework. The issuances were required to have external assurance and met certain reporting requirements to confirm the validity of the proceeds and their use.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.
In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.
Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using a combination of BBG and MSCI data. The MSCI proprietary data on each security's business involvement was used to initially screen securities for eligibility in the Index. Business Involvement Screening Research (BSIR) highlighted each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 11), Carbon and Sustainable Impact (Positive screening) (PAI 1,2,3). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). Securities involved in GHG Emissions and Intensity, Fossil fuels, Carbon and Energy, (PAI 1, 2, 3, 4) were also screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated. The methodology used the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities (minimum BB rating). These scores were used to apply tilt factors to reduce weight to the securities with the lowest ESG score and increase weight to those securities with robust ESG characteristics.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	24.18	145,340.32
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	1.77	45.73
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	10.11	121.48
4. Exposure to companies active in the fossil fuel sector	31 December 2025	0.13%	0.00%
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.73%	0.38%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	0.10%	0.86%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.07%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - Bloomberg Global Aggregate 1-3 Year Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Government Of Japan 0.1% 20-mar-2027	Government	1.11%	Japan
Government Of France 0.75% 25-feb-2028	Government	0.90%	France
Government Of The United States Of America 4.5% 15-may-2027	Government	0.87%	United States of America

Government Of The United States Of America 4.0% 15-dec-2027	Government	0.72%	United States of America

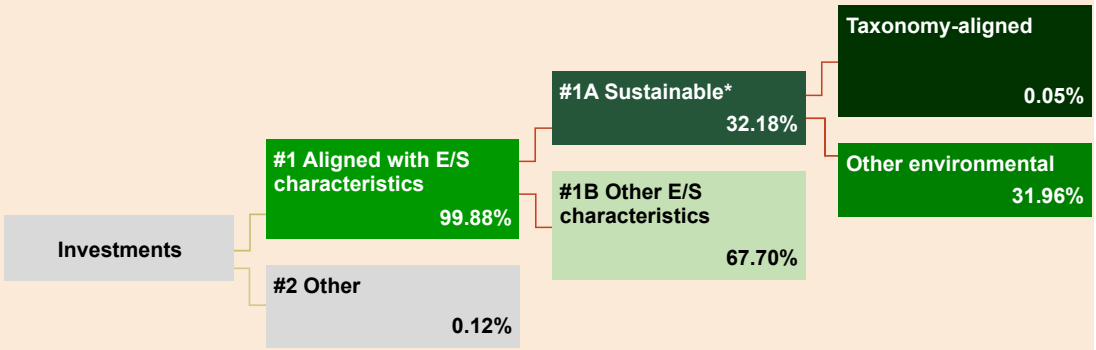

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

32.18% of the portfolio was invested in sustainable assets.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Government	75.66%
Financials	19.52%
Industrials	1.01%
Consumer Discretionary	0.91%
Health Care	0.87%
Information Technology	0.68%
Real Estate	0.37%
Utilities	0.32%
Electric Utilities	*0.16%*
Communication Services	0.29%
Other	0.19%
Cash & Derivatives	0.11%
Consumer Staples	0.06%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.05% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

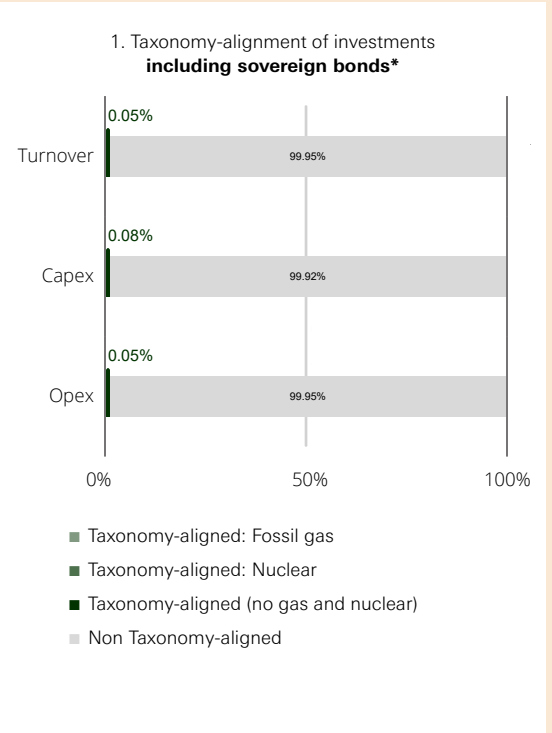

☐ In fossil gas ☐ In nuclear energy

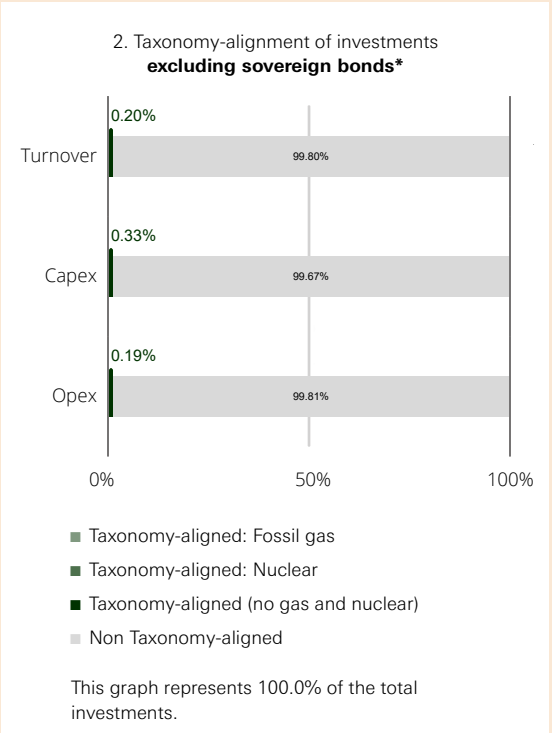

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.02%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.05%	0.25%	0.09%
Revenue - Non Taxonomy-aligned	99.95%	99.75%	99.91%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.08%	0.35%	0.12%
CAPEX - Non Taxonomy-aligned	99.92%	99.65%	99.88%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.05%	0.35%	0.19%
OPEX - Non Taxonomy-aligned	99.95%	99.65%	99.81%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 31.96%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for hedging and efficient portfolio management, and securitized assets, such as Mortgage-Backed Securities, Asset-Backed Securities and Commercial Mortgage-Backed Securities may have been held, in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Fund used optimisation techniques which took into account tracking error and trading costs when constructing a portfolio. The Index sought to achieve a carbon emissions reduction and an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. The weight of each constituent issuer is adjusted by a fixed multiplier, as set out in the Index methodology, which is determined by its MSCI ESG Rating.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns ha with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index grouped each bond issuance into the following three sub-sectors:
Sub-sector 1: Treasuries and Sovereign (which includes only Treasury and Sovereign issuers with an MSCI ESG Rating of BB or higher);
Sub-sector 2: Corporate, Agencies, Supranational and Covered bonds and Local Authority (which includes issuers from corporate, covered, agency, local authority and supranational sectors only); and
Sub-sector 3: MBS, ABS and CMBS.

The Index sought to achieve a reduction in carbon emissions and an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this by, in respect of sub-sector 1 and sub-sector 2 only, removing securities based on sustainability exclusionary criteria, on a monthly basis. No exclusionary criteria was applied in respect of sub-sector 3.
The Index applied the following exclusionary criteria to securities in sub-sector 2 only, with thresholds defined in the index methodology on a monthly basis.

issuers with an MSCI ESG Rating of lower than BB;
issuers with an ESG Pillar Score of less than 2; and
issuers involved in the following business activities:
adult entertainment;
alcohol;
gambling;
tobacco;
conventional weapons;
civilian firearms;
nuclear weapons;
controversial weapons;
nuclear power;
fossil fuels;
thermal coal extraction, generation and distribution;
non-compliance with UN Global Compact Principles
genetically modified organisms; and
MSCI Controversies Score.

For the purposes of point (a), controversial weapons meant controversial weapons as referred to in international treaties and conventions, United Nations principles and, where applicable, national legislation.

A carbon intensity screen was also applied to the securities in sub-sector 2 only, and issuers with Scope 1 and 2 carbon intensity of 750mn t/USD million sales or higher were excluded.

Finally, the weight of each constituent issuer in all sub-sectors was adjusted by a fixed multiplier, as set out in the index methodology, which is determined by its MSCI ESG Rating.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.42	6.36
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	10.11	24.74

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark -

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
Identification and analysis of a company's environmental and social factors		
ESG score (third-party score)	6.42	6.01
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	10.11	121.48

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Product Name: HSBC DEVELOPED WORLD SCREENED EQUITY UCITS ETF

Legal Entity Identifier: 213800EFZQ3TDN1ID335

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 46.86% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the FTSE Developed ESG Low Carbon Select Index (the "Index"), the Fund

:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Developed Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues.The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact (UNGC) exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and improved the exposure to companies with favorable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	55.69	112.58
ESG Score	4.16	3.54
Fossil Fuel Reserve Exposures	470.88	957.17

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Developed Index

...and compared to previous periods?

Broad Market Index - FTSE Developed Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures..

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	4,306.67	2,495,854,569.57
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	17.20	37.07

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	55.69	112.58
4. Exposure to companies active in the fossil fuel sector	31 December 2025	5.23%	5.87%
5a. Share of non-renewable energy consumption	31 December 2025	47.33%	53.60%
5b. Share of non-renewable energy production	31 December 2025	54.12%	62.09%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 December 2025	0.28	0.47
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.04%	-0.04%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	12.79	7.16
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	4.75	6.13
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.58%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	0.64%	3.49%
12. Unadjusted gender pay gap	31 December 2025	16.16%	15.96%
13. Board gender diversity	31 December 2025	37.40%	35.53%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.22%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Developed Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Visa Inc. Class A	Financials	6.81%	United States of America
Microsoft Corporation	Information Technology	6.41%	United States of America
Johnson & Johnson	Health Care	5.31%	United States of America
NVIDIA Corporation	Information Technology	4.97%	United States of America
Cisco Systems, Inc.	Information Technology	3.45%	United States of America
Apple Inc.	Information Technology	3.07%	United States of America
Amazon.com, Inc.	Consumer Discretionary	1.46%	United States of America
Citigroup Inc.	Financials	1.30%	United States of America
Mitsubishi UFJ Financial Group, Inc.	Financials	1.22%	Japan
Coca-Cola Company	Consumer Staples	1.15%	United States of America
Verizon Communications Inc.	Communication Services	1.15%	United States of America
Salesforce, Inc.	Information Technology	1.11%	United States of America
Merck & Co., Inc.	Health Care	1.07%	United States of America
Meta Platforms Inc Class A	Communication Services	0.95%	United States of America
Intel Corporation	Information Technology	0.89%	United States of America

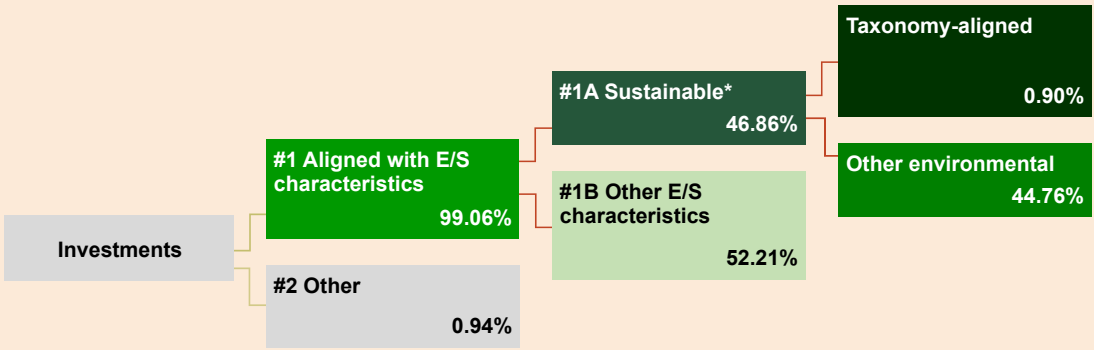

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

46.86% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	28.92%
Financials	27.67%
Health Care	10.59%
Consumer Discretionary	7.58%
Consumer Staples	6.81%
Communication Services	5.60%
Industrials	4.46%
Materials	3.60%
Utilities	2.05%
Electric Utilities	*1.39%*
Gas	*0. %*
Multi-Utilities	*0.39%*
Energy	1.12%

Oil & Gas Refining & Marketing	*0.0 %*
Oil & Gas Storage & Transportation	*0.2 %*
Cash & Derivatives	0.94%
Real Estate	0.67%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.90% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☑ Yes:

☑ In fossil gas ☑ In nuclear energy

☐ No

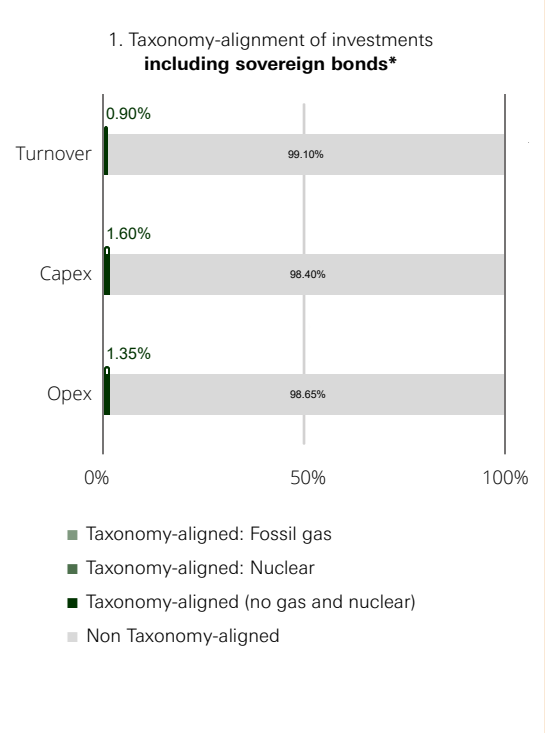

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

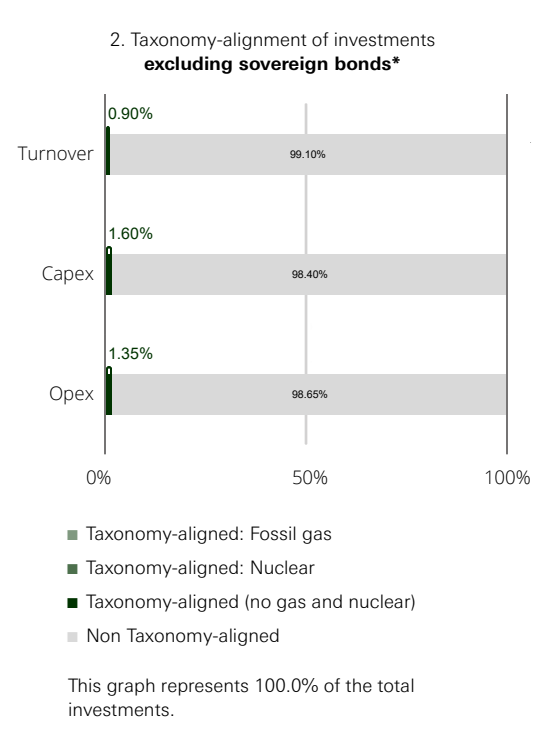

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.65%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.90%	0.87%	0.59%
Revenue - Non Taxonomy-aligned	99.10%	99.13%	99.41%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.60%	1.61%	1.39%
CAPEX - Non Taxonomy-aligned	98.40%	98.39%	98.61%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.35%	1.28%	1.16%
OPEX - Non Taxonomy-aligned	98.65%	98.71%	98.84%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 44.76%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and sought to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria.
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria.
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

  The Index is a subset of the FTSE Developed Index and aimed to measure the performance of companies in developed countries as defined by the Index provider.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weight companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the United Nations Global Compact (UNGC) exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	55.69	55.62
ESG Score	4.16	4.16
Fossil Fuel Reserve Exposures	470.88	473.97

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE Developed ESG Low Carbon Select Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	55.69	112.58
ESG Score	4.16	3.54
Fossil Fuel Reserve Exposures	470.88	957.17

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Developed Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC EMERGING MARKET SCREENED EQUITY UCITS ETF

Legal Entity Identifier: 213800CZ9MK115HQY537

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 29.44% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the FTSE Emerging ESG Low Carbon Select Index (the "Index"), the Fund :

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Emerging Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	211.72	395.75
ESG Score	3.76	3.25
Fossil Fuel Reserve Exposures	2,258.83	4,445.56

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Emerging Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	211.72	395.75
	31 December 2024	236.70	444.15
	31 December 2023	294.02	438.12
ESG Score	31 December 2025	3.76	3.25
	31 December 2024	3.56	3.08
	31 December 2023	3.30	3.05

	31 December 2024	2,730.21	5,957.14
	31 December 2023	3,733.48	8,449.84

Broad Market Index - FTSE Emerging Index

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights. HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Sustainability investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	23,990.69	1,076,447,378.84
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	117.47	153.22

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	211.72	395.75
4. Exposure to companies active in the fossil fuel sector	31 December 2025	8.37%	4.45%
5a. Share of non-renewable energy consumption	31 December 2025	77.23%	80.43%
5b. Share of non-renewable energy production	31 December 2025	17.93%	79.80%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 December 2025	1,512.28	10,769.22
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.09%	-0.10%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	3.19	9.37
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	5.04	21.71
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	8.03%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	7.49%	10.54%
12. Unadjusted gender pay gap	31 December 2025	13.14%	11.26%
13. Board gender diversity	31 December 2025	19.89%	19.58%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.06%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Emerging Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	11.29%	Taiwan
Infosys Limited	Information Technology	5.24%	India
Xiaomi Corporation Class B	Information Technology	4.11%	China

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.01% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

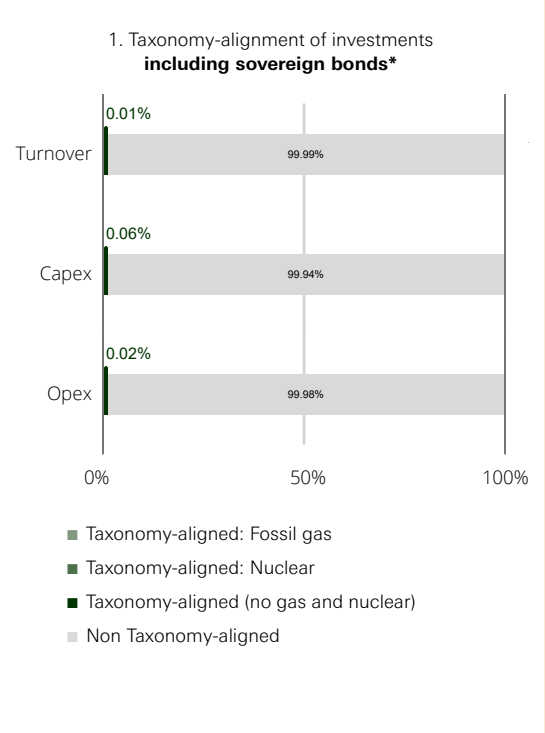

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

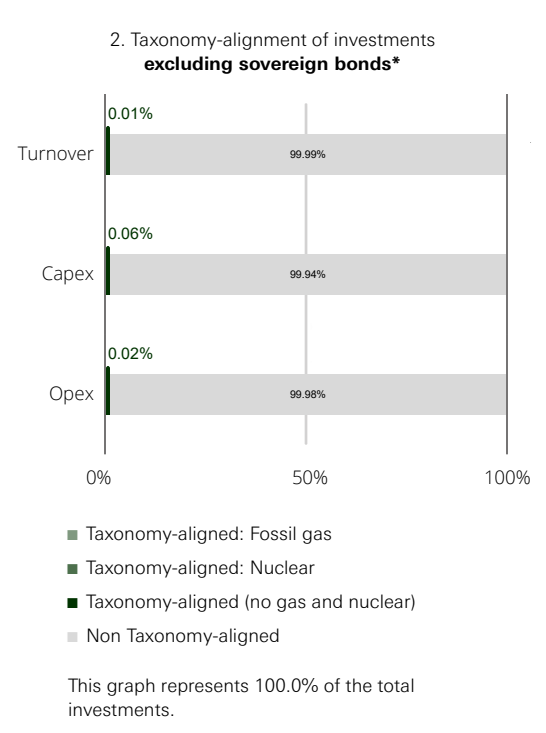

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.01%	0.01%	0.00%
Revenue - Non Taxonomy-aligned	99.99%	99.99%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.06%	0.06%	0.00%
CAPEX - Non Taxonomy-aligned	99.94%	99.94%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.02%	0.02%	0.00%
OPEX - Non Taxonomy-aligned	99.98%	99.98%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 29.35%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria;
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

  The Index is a subset of the FTSE Emerging Index and aimed to measure the performance of companies in emerging markets as defined by the Index provider.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	211.72	213.79
ESG Score	3.76	3.76
Fossil Fuel Reserve Exposures	2,258.83	2,259.84

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE Emerging ESG Low Carbon Select Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	211.72	395.75
ESG Score	3.76	3.25
Fossil Fuel Reserve Exposures	2,258.83	4,445.56

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Emerging Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC EUROPE EX UK SCREENED EQUITY UCITS ETF **Legal Entity Identifier:** 213800BYGCDDSOKCQZ34

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 52.50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the FTSE Developed Europe ex UK ESG Low Carbon Select Index (the "Index"), the Fund
:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Developed Europe ex UK Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	50.74	106.67
ESG Score	4.43	3.91
Fossil Fuel Reserve Exposures	430.99	895.36

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Developed Europe ex UK Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	50.74	106.67
	31 December 2024	45.70	103.36
	31 December 2023	52.91	103.56
ESG Score	31 December 2025	4.43	3.91
	31 December 2024	4.40	3.85
	31 December 2023	4.41	3.89
Fossil Fuel Reserve Exposures	31 December 2025	430.99	895.36
	31 December 2024	531.77	1,054.18
	31 December 2023	485.05	1,655.77

Broad Market Index - FTSE Developed Europe ex UK Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights. HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainability investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	1,880.42	544,817,825.18
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	25.31	63.68

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	50.74	106.67
4. Exposure to companies active in the fossil fuel sector	31 December 2025	9.02%	6.20%
5a. Share of non-renewable energy consumption	31 December 2025	46.27%	52.31%
5b. Share of non-renewable energy production	31 December 2025	54.77%	51.44%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 December 2025	0.36	0.71
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.03%	-0.05%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.45	2.27
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	1.52	5.05
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.25%
12. Unadjusted gender pay gap	31 December 2025	12.65%	12.12%
13. Board gender diversity	31 December 2025	40.17%	40.43%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Developed Europe ex UK Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
L'Oreal S.A.	Consumer Staples	7.04%	France
Novartis AG	Health Care	4.78%	United States of America
Nestle S.A.	Consumer Staples	4.56%	United States of America
Siemens Aktiengesellschaft	Industrials	4.40%	Germany
Deutsche Boerse AG	Financials	4.20%	Germany
Enel SpA	Utilities	4.13%	Italy
BNP Paribas S.A. Class A	Financials	3.88%	France
UBS Group AG	Financials	3.60%	Switzerland
Schneider Electric SE	Industrials	3.27%	France
ASML Holding NV	Information Technology	2.50%	Netherlands
Iberdrola SA	Utilities	2.40%	Spain
Telefonaktiebolaget LM Ericsson Class B	Information Technology	2.36%	Sweden
Nokia Oyj	Information Technology	2.35%	Finland
KBC Group N.V.	Financials	2.30%	Belgium

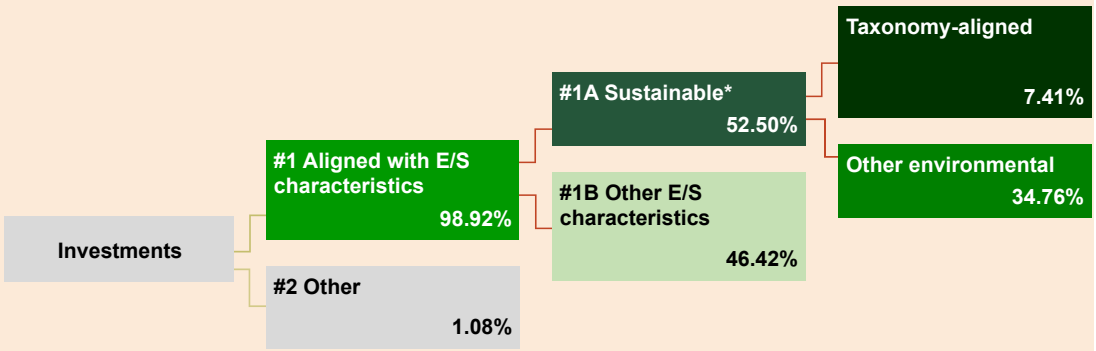

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

52.50% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Financials	28.77%
Consumer Staples	15.36%
Industrials	13.83%
Health Care	9.67%
Information Technology	9.13%
Utilities	7.93%
Electric Utilities	*6.99%*
Gas	*0.13%*
Multi-Utilities	*0.20%*
Consumer Discretionary	6.59%
Communication Services	4.05%
Materials	2.38%
Energy	1.17%
Integrated Oil & Gas	*1.10%*
Oil & Gas Exploration & Production	*0.06%*
Oil & Gas Refining & Marketing	*0.01%*
Cash & Derivatives	1.08%
Real Estate	0.04%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

7.41% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☑ Yes:

☑ In fossil gas ☑ In nuclear energy

☐ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

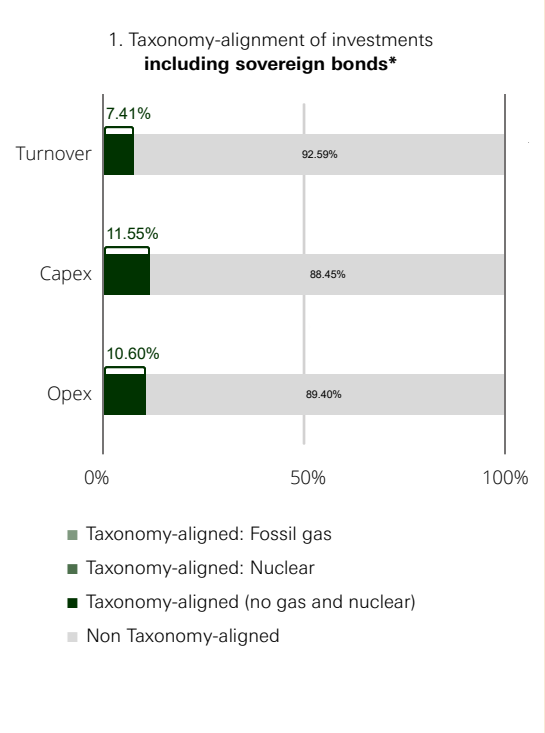

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

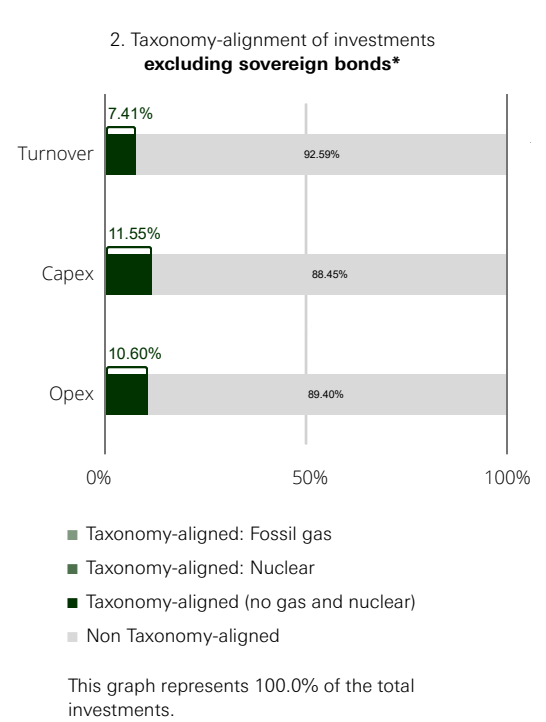

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 5.33%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	7.41%	8.25%	5.41%

OPEX - Taxonomy-aligned (no gas and nuclear)	10.60%	12.14%	11.33%
OPEX - Non Taxonomy-aligned	89.40%	87.86%	88.67%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 34.76%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria;
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is a subset of the and aimed to measure the performance of companies in emerging markets as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sust ainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	50.74	50.55
ESG Score	4.43	4.43
Fossil Fuel Reserve Exposures	430.99	436.02

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 49.58% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE Developed Europe ESG Low Carbon Select Index (the "Index"), the Fund :

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Developed Europe Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	47.53	98.50
ESG Score	4.42	3.90
Fossil Fuel Reserve Exposures	790.90	1,613.19

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Developed Europe Index

...and compared to previous periods?

	Period Ending	Fund	Broad Market Index
Consideration of lower carbon intensity investments			
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	47.53	98.50
	31 December 2024	48.44	99.30
	31 December 2023	52.80	103.56
ESG Score	31 December 2025	4.42	3.90
	31 December 2024	4.38	3.86
	31 December 2023	4.38	3.89
Fossil Fuel Reserve Exposures	31 December 2025	790.90	1,613.19
	31 December 2024	1,089.04	1,910.08
	31 December 2023	1,019.21	1,655.77

Broad Market Index - FTSE Developed Europe Index

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To support the DNSH assessment, quantitative criteria was established across the PAIs.
In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative.
Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainablity investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	745.56	636,618,987.41
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	24.44	58.70

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	47.53	98.50
4. Exposure to companies active in the fossil fuel sector	31 December 2025	7.64%	9.67%
5a. Share of non-renewable energy consumption	31 December 2025	45.56%	52.57%
5b. Share of non-renewable energy production	31 December 2025	53.89%	50.49%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 December 2025	0.28	0.34
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.03%	-0.05%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	11.17	14.32
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	11.07	11.77
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	0.04%	0.31%
12. Unadjusted gender pay gap	31 December 2025	14.11%	12.73%
13. Board gender diversity	31 December 2025	42.15%	41.90%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.57%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Developed Europe Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
L'Oreal S.A.	Consumer Staples	4.89%	France
Barclays PLC	Financials	4.05%	United Kingdom of Great Britain and Northern Ireland
Novartis AG	Health Care	3.98%	United States of America
Nestle S.A.	Consumer Staples	3.66%	United States of America
Siemens Aktiengesellschaft	Industrials	3.53%	Germany
Diageo plc	Consumer Staples	3.18%	United Kingdom of Great Britain and Northern Ireland
Lloyds Banking Group plc	Financials	2.96%	United Kingdom of Great Britain and Northern Ireland
Schneider Electric SE	Industrials	2.87%	France
Enel SpA	Utilities	2.76%	Italy
ASML Holding NV	Information Technology	2.67%	Netherlands
Deutsche Boerse AG	Financials	2.50%	Germany
BNP Paribas S.A. Class A	Financials	2.20%	France
UBS Group AG	Financials	1.99%	Switzerland
Aviva plc	Financials	1.77%	United Kingdom of Great Britain and Northern Ireland
Iberdrola SA	Utilities	1.76%	Spain

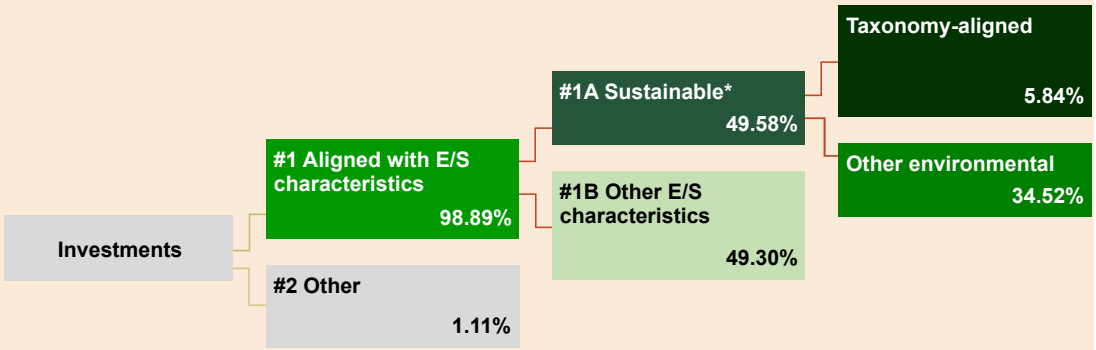

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

49.58% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Financials	29.39%
Consumer Staples	17.94%
Industrials	12.22%
Health Care	9.27%
Information Technology	8.25%
Consumer Discretionary	7.57%
Utilities	5.95%
Electric Utilities	*4.87%*
Gas	*0.11%*
Multi-Utilities	*0.45%*
Communication Services	4.38%
Materials	2.79%
Cash & Derivatives	1.11%
Energy	0.99%
Integrated Oil & Gas	*0.95%*
Oil & Gas Exploration & Production	*0.03%*
Oil & Gas Refining & Marketing	*0.01%*
Real Estate	0.13%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

% of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

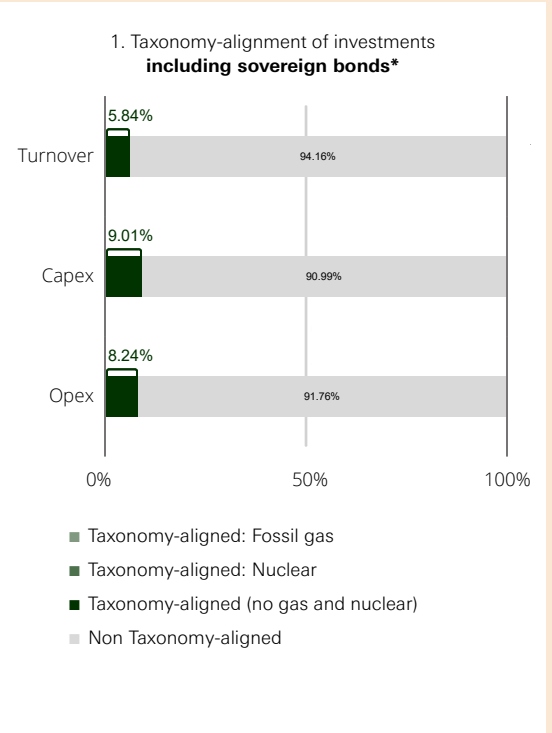

☐ In fossil gas ☐ In nuclear energy

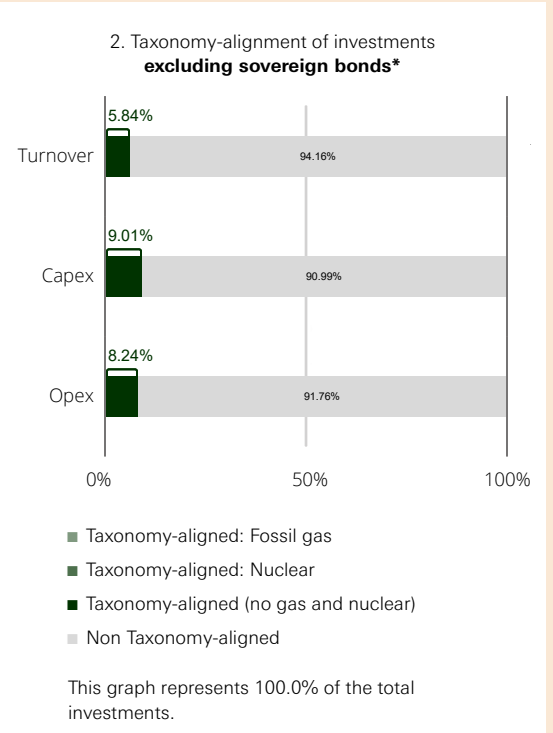

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 4.31%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	5.84%	6.36%	4.00%
Revenue - Non Taxonomy-aligned	94.16%	93.64%	96.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	9.01%	9.87%	8.40%
CAPEX - Non Taxonomy-aligned	90.99%	90.12%	91.60%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	8.24%	9.22%	8.24%
OPEX - Non Taxonomy-aligned	91.76%	90.77%	91.76%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 34.52%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria; and
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is a subset of the FTSE Developed Europe Index and aimed to measure the performance of companies in developed countries in Europe as defined by the Index provider.

As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	47.53	47.35
ESG Score	4.42	4.42
Fossil Fuel Reserve Exposures	790.90	802.39

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE Developed Europe ESG Low Carbon Select Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	47.53	98.50
ESG Score	4.42	3.90
Fossil Fuel Reserve Exposures	790.90	1,613.19

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Developed Europe Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC FTSE EPRA NAREIT DEVELOPED CLIMATE PARIS ALIGNED UCITS ETF

Legal Entity Identifier: 213800XEE1M9BCGSLO73

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 32.10% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the FTSE EPRA NAREIT Developed Green EU PAB Index (the "Index"), the Fund the environmental and/or social characteristics :

- seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Seeking an increase in green building certification and energy usage reduction;

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to achieve a reduction in GHG emisision intensity.

During the reporting period, the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators the Fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilise data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE EPRA Nareit Global Developed Index

The source used for the GHG Intensity reported is different from the one used by the Index. The Index is using REIT carbon emissions metrics from Measurabl . The Measurabl metric takes into account data such as the carbon per sq foot as well as the floorspace. For more information, please see the index methodology available here: https://www.lseg.com/content/dam/ftse-russell/en_us/documents/ground-rules/ftse-epra-nareit-green-indices-ground-rules.pdf

Fossil Fuel Reserves Exposure is zero as the companies in the Index are from the real estate sector and as such typically do not have direct exposure to fossil fuels.

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
	31 December 2025		
	31 December 2024		

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that t he Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Discl osures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The mandatory principal adverse impacts ("PAI") indicators were used in the assessment of business activities of the initial universe of securities. Revenue data, business involvement and other data sources have been considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators.

The eligible universe was constructed once thermal coal mining and generation, oil and gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that have faced very severe and severe controversies pertaining to environmental issues were also removed (PAI 7,8,9).

Embedded in the ESG controversy score is an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues. No optional indicators were taken into account.

Principal Adverse Impact	**Period Ending**	**Fund**	**Broad Market Index**
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	304.90	12,187,266.60
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	5.7	7.79
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	70.76	100.68
4. Exposure to companies active in the fossil fuel sector	31 December 2025	0.00%	0.00%
5a. Share of non-renewable energy consumption	31 December 2025	52.18%	57.20%
5b. Share of non-renewable energy production	31 December 2025	0.22%	0.46%
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	0.00%	0.00%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.0	0.0
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	0.03	0.05
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE EPRA Nareit Global Developed Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Welltower Inc.	Real Estate	8.70%	United States of America
Public Storage	Real Estate	5.47%	United States of America
Realty Income Corporation	Real Estate	3.26%	United States of America
Invitation Homes, Inc.	Real Estate	3.20%	United States of America
Vonovia SE	Real Estate	3.08%	Germany
Extra Space Storage Inc.	Real Estate	3.07%	United States of America
Equity Residential	Real Estate	2.62%	United States of America
AvalonBay Communities, Inc.	Real Estate	2.61%	United States of America
Equinix, Inc.	Real Estate	2.61%	United States of America
Swiss Prime Site AG	Real Estate	2.38%	Switzerland
Host Hotels & Resorts, Inc.	Real Estate	2.09%	United States of America
Prologis, Inc.	Real Estate	2.09%	United States of America
Simon Property Group, Inc.	Real Estate	2.07%	United States of America
Essex Property Trust, Inc.	Real Estate	1.88%	United States of America
Gecina SA	Real Estate	1.58%	France

Cash and derivatives were excluded

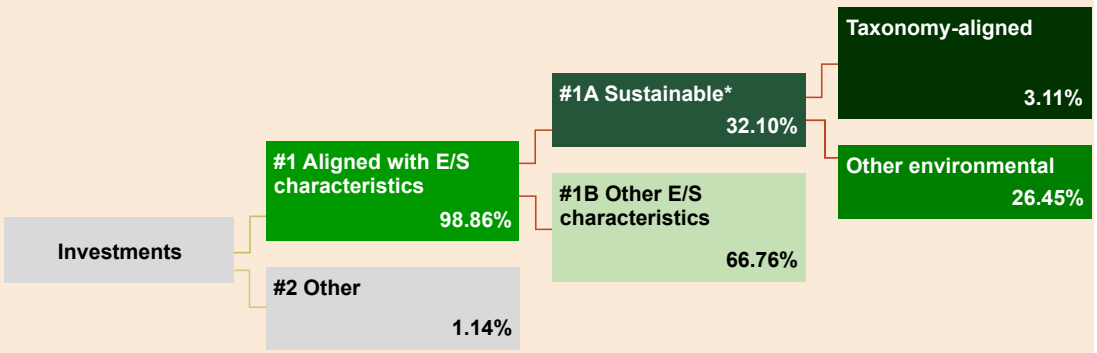

What was the proportion of sustainability-related investments?

32.10% of the portfolio was invested in sustainable investments.

As an Article 8 fund under SFDR, the Fund committed that a minimum proportion of 98.27% of its net assets would promote E/S characteristics. This minimum proportion was based on an estimate at the time of the Fund's approval by the Central Bank of Ireland. Since the Fund launched, its actual level of investments promoting E/S characteristics has been very close to this minimum. However, HSBC believes there should be an appropriate space between the minimum commitment level and the actual level achieved to ensure that the minimum commitment level can be maintained over time and the minimum commitment has therefore been adjusted to 80%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Real Estate	98.43%
Cash & Derivatives	1.14%
Health Care	0.37%
Information Technology	0.04%
Consumer Discretionary	0.03%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

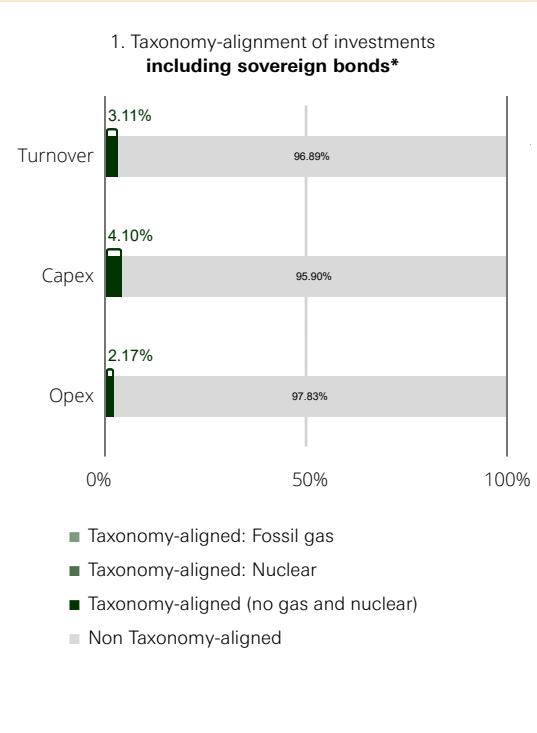

☐ In fossil gas ☐ In nuclear energy

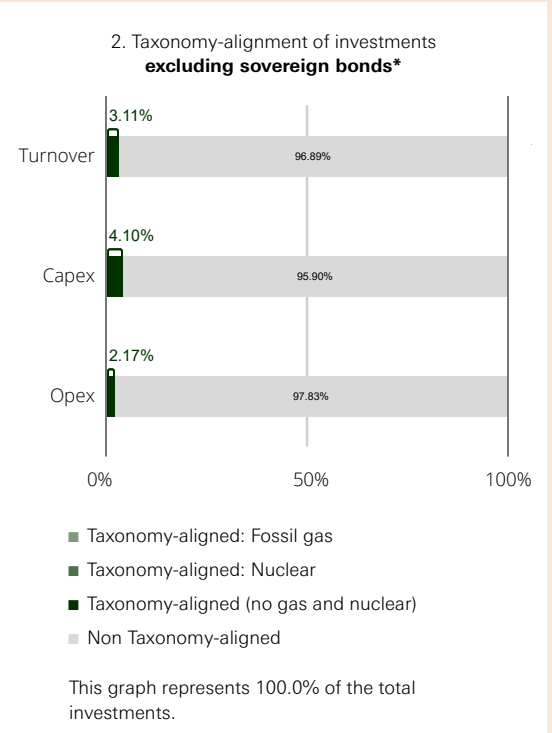

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	3.11%	1.83%
Revenue - Non Taxonomy-aligned	96.89%	98.17%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	4.10%	2.80%
CAPEX - Non Taxonomy-aligned	95.90%	97.20%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	2.17%	1.65%
OPEX - Non Taxonomy-aligned	97.83%	98.35%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 26.45%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was constructed from the FTSE EPRA Nareit Global Developed Index (the "Parent Index"). The Index is designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower carbon economy while aligning with the Paris Agreement requirements.

In doing so, the Index excludes companies involved in certain business activities. In addition, the Index also applies green building certification and energy usage targets.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is based on the FTSE EPRA Nareit Developed Index (the "Parent Index") and follows the FTSE EPRA Nareit Green Index Series ground rules. At each index review date, companies with the activities and conduct listed below are excluded from the eligible universe. Data is sourced from Sustainalytics:

Baseline exclusions
- Controversial weapons – 0%.
- Tobacco –0%.

Climate activity exclusions
- Thermal Coal Power Generation – 0%.
- Thermal Coal extraction – 0%.
- Thermal Coal Supporting Services – 0%.
- Oil & Gas Generation – 0%.

Conduct-related exclusions
- Non-compliance with UN Global Compact Principles.
- Non-compliance with the principles of Do No Significant Harm.

Constituents are weighted based on a target exposure weighting methodology; specifically, the FTSE EPRA Nareit Developed Green EU PAB Index targets a 50% GHG emissions intensity reduction, 7% minimum average GHG emissions intensity reduction relative to previous year after inception, 30% Green certificate increase and 10% energy consumption reduction. Moreover, the index takes into consideration constraints, including country and industry banding constraints.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the perfo mance of the sustainability indicators of the Fund, was close to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE EPRA Nareit Developed Green EU PAB Index Net

The source used for the GHG Intensity reported is different from the one used by the Index. The Index is using REIT carbon emissions metrics from Measurabl. The Measurabl metric takes into account data such as the carbon per sq foot as well as the floorspace. For more information, please see the index methodology available here: https://www.lseg.com/content/dam/ftse-russell/en_us/documents/ground-rules/ftse-epra-nareit-green-indices-ground-rules.pdf

Fossil Fuel Reserves Exposure is zero as the companies in the Index are from the real estate sector and as such typically do not have direct exposure to fossil fuels.

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE EPRA Nareit Global Developed Index

The source used for the GHG Intensity reported is different from the one used by the Index. The Index is using REIT carbon emissions metrics from Measurabl. The Measurabl metric takes into account data such as the carbon per sq foot as well as the floorspace. Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC JAPAN SCREENED EQUITY UCITS ETF **Legal Entity Identifier:** 2138007HUGP3AZAZZ552

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 40.03% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the FTSE Japan ESG Low Carbon Select Index (the "Index"), the Fund :

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE Japan Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	44.65	93.62
ESG Score	4.52	3.84
Fossil Fuel Reserve Exposures	179.03	384.74

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Japan Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	44.65	93.62
	31 December 2024	43.36	82.94
	31 December 2023	41.68	86.45
ESG Score	31 December 2025	4.52	3.84
	31 December 2024	4.42	3.78
	31 December 2023	4.20	3.54
Fossil Fuel Reserve Exposures	31 December 2025	179.03	384.74
	31 December 2024	311.66	441.73
	31 December 2023	163.57	368.64

Broad Market Index - FTSE Japan Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Sustainability investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics and were used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	6,490.11	363,873,476.48
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	30.19	78.91

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	44.65	93.62
4. Exposure to companies active in the fossil fuel sector	31 December 2025	11.95%	10.61%
5a. Share of non-renewable energy consumption	31 December 2025	69.23%	72.27%
5b. Share of non-renewable energy production	31 December 2025	11.28%	56.50%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 December 2025	0.30	0.44
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.06%	-0.06%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.03	0.04
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	0.30	0.56
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.10%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	0.08%	3.04%
12. Unadjusted gender pay gap	31 December 2025	31.61%	32.54%
13. Board gender diversity	31 December 2025	22.08%	21.61%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Japan Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Toyota Motor Corp.	Consumer Discretionary	9.59%	Japan
Mitsubishi UFJ Financial Group, Inc.	Financials	7.47%	Japan
Mizuho Financial Group, Inc.	Financials	5.77%	Japan
Itochu Corporation	Industrials	5.71%	Japan
Sony Group Corporation	Consumer Discretionary	4.17%	Japan
NEC Corporation	Information Technology	3.93%	Japan
KDDI Corporation	Communication Services	3.72%	Japan
SoftBank Corp.	Communication Services	3.59%	Japan
Seven & I Holdings Co., Ltd.	Consumer Staples	2.74%	Japan
Mitsui & Co.,Ltd	Industrials	2.58%	Japan
FAST RETAILING CO., LTD.	Consumer Discretionary	2.55%	Japan

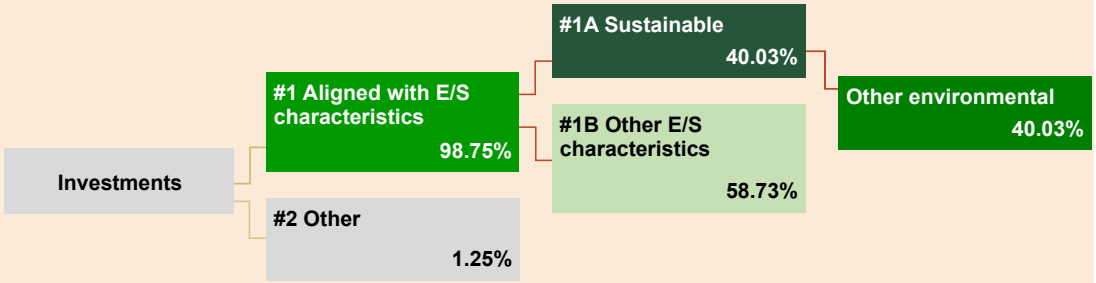

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

40.03% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Consumer Discretionary	23.04%
Industrials	18.01%
Financials	16.81%
Information Technology	15.35%
Communication Services	8.85%
Health Care	6.90%
Consumer Staples	6.00%
Real Estate	2.75%
Cash & Derivatives	1.25%
Materials	0.90%
Energy	0.07%
Oil & Gas Exploration & Production	*0.02%*
Oil & Gas Refining & Marketing	*0.05%*
Utilities	0.07%
Electric Utilities	*0.02%*
Gas	*0.05%*
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

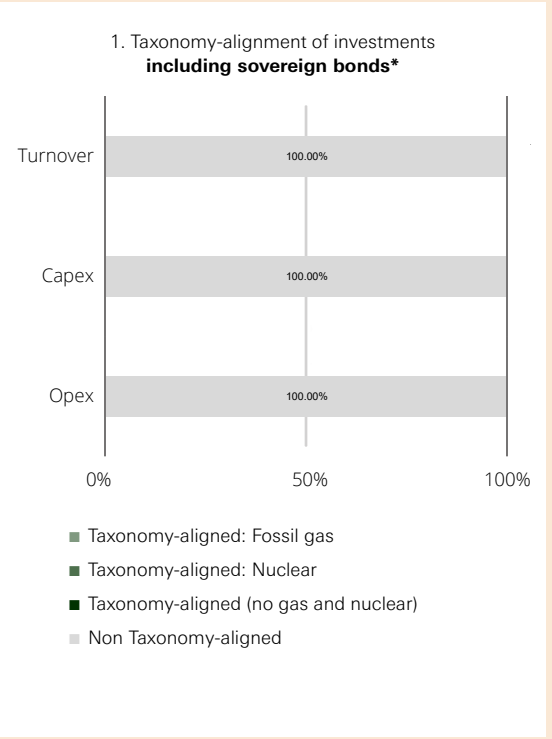

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

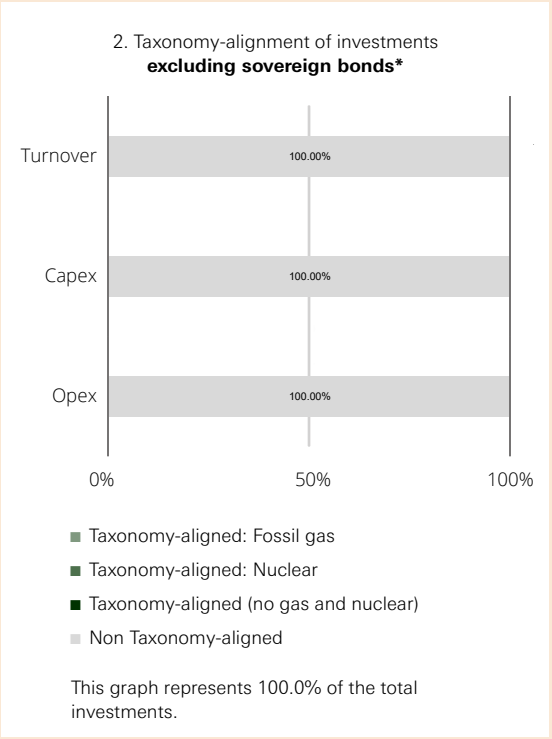

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 40.03%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria; and
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is a subset of the FTSE Japan Index and aimed to measure the performance of companies in Japan as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

- ***How did this financial product perform compared with the reference benchmark?***

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	44.65	44.63
ESG Score	4.52	4.52
Fossil Fuel Reserve Exposures	179.03	181.87

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE Japan ESG Low Carbon Select Index

- ***How did this financial product perform compared with the broad market index?***

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	44.65	93.62
ESG Score	4.52	3.84
Fossil Fuel Reserve Exposures	179.03	384.74

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE Japan Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI AC ASIA PACIFIC EX JAPAN CLIMATE PARIS ALIGNED UCITS ETF

Legal Entity Identifier: 213800IKV5W71V38OX51

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 37.03% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI AC Asia Pacific ex Japan Climate Paris Aligned Index (the "Parent Index"), the Fund
:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	82.47	276.66

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI AC Asia Pacific ex-Japan Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	82.47	276.66
	31 December 2024	82.61	324.38
	31 December 2023	132.31	

Broad Market Index - MSCI AC Asia Pacific ex-Japan Index

- ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

- ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	213.57	892,466,639.78
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	15.16	115.70
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	82.47	276.66
4. Exposure to companies active in the fossil fuel sector	31 December 2025	1.12%	0.65%
5a. Share of non-renewable energy consumption	31 December 2025	70.34%	75.43%
5b. Share of non-renewable energy production	31 December 2025	45.52%	64.24%
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.03%	-0.06%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.39	12.09
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	1.40	6.51
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	6.91%	6.69%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.07%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI AC Asia Pacific ex-Japan Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	12.95%	Taiwan
Tencent Holdings Ltd	Communication Services	5.84%	China
Commonwealth Bank of Australia	Financials	2.93%	Australia
Alibaba Group Holding Limited	Consumer Discretionary	2.25%	China
Goodman Group	Real Estate	2.03%	Australia
SK hynix Inc.	Information Technology	2.02%	Korea
Bharat Electronics Limited	Industrials	1.66%	India
AIA Group Limited	Financials	1.57%	Hong Kong
Delta Electronics, Inc.	Information Technology	1.57%	Taiwan
Samsung Electronics Co., Ltd.	Information Technology	1.54%	Korea
National Australia Bank Limited	Financials	1.29%	Australia
Keppel Ltd.	Industrials	1.28%	Singapore
MTR Corporation Limited	Industrials	1.15%	Hong Kong
Wesfarmers Limited	Consumer Discretionary	1.07%	Australia
ANZ Group Holdings Limited	Financials	1.06%	Australia

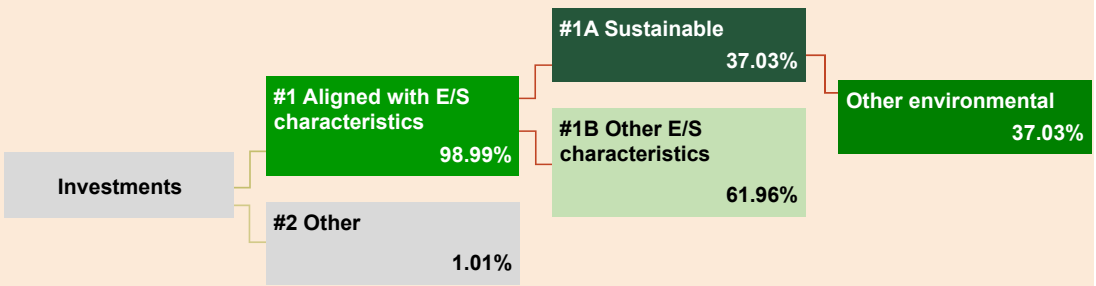

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

37.03% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	26.34%
Financials	22.06%
Industrials	11.47%
Communication Services	10.05%
Consumer Discretionary	9.49%
Health Care	6.59%
Real Estate	5.98%
Consumer Staples	2.98%
Materials	2.84%
Utilities	1.19%
Cash & Derivatives	1.01%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

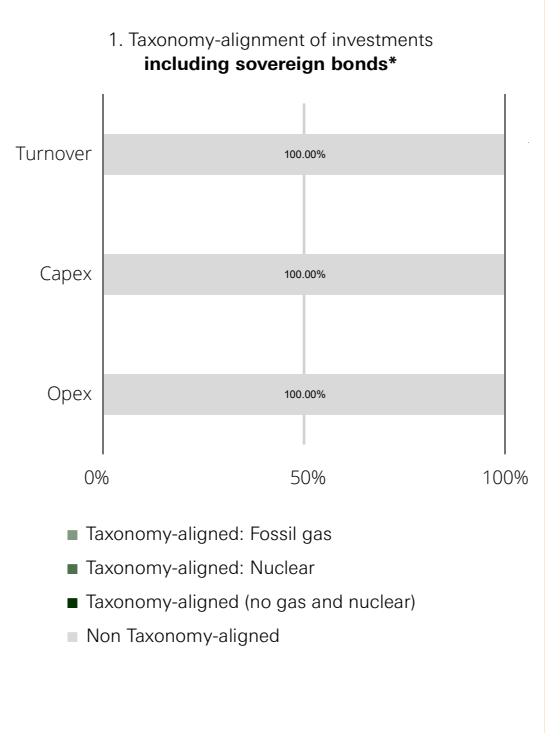

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

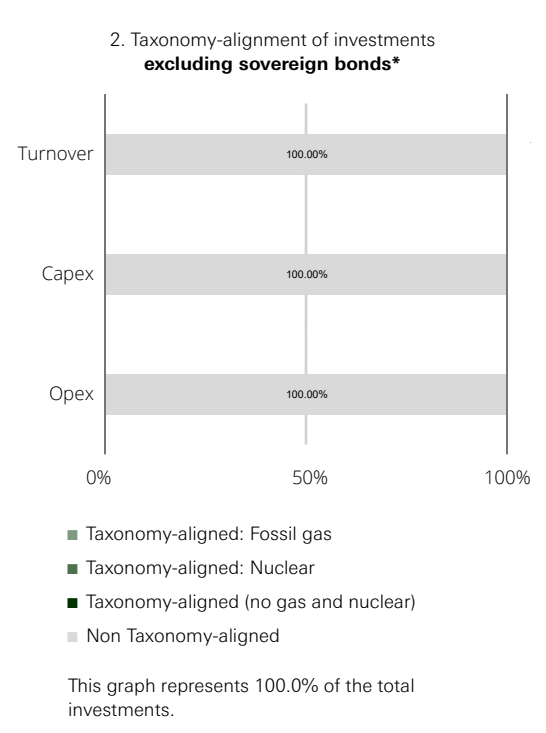

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 37.03%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time);
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements section of the SFDR Annex.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is an equity index based on the MSCI AC Asia Pacific ex-Japan Index, and includes companies from certain Developed and Emerging Market countries in the Asia Pacific region (excluding Japan), as determined by the Index provider. The Index was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining and distribution;
- oil and gas;
- power generation
- civilian firearms;
- nuclear weapons.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	82.47	80.95

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI Asia Pacific ex Japan Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	82.47	276.66

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI AC Asia Pacific ex-Japan Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI EMERGING MARKETS CLIMATE PARIS ALIGNED UCITS ETF **Legal Entity Identifier:** 2138004BU7N21TWYXT46

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 31.86% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the Index, the Fund :

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures (TCFD) recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	94.56	323.25

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	94.56	323.25
	31 December 2024	95.68	355.76
	31 December 2023	136.86	

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	423.23	996,899,809.95
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	17.13	133.32
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	94.56	323.25
4. Exposure to companies active in the fossil fuel sector	31 December 2025	1.05%	0.22%
5a. Share of non-renewable energy consumption	31 December 2025	74.88%	80.37%
5b. Share of non-renewable energy production	31 December 2025	55.90%	77.93%
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.03%	-0.06%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.45	5.02
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	1.10	18.98
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	7.29%	7.88%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.07%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	13.24%	Taiwan
Tencent Holdings Ltd	Communication Services	6.12%	China
Alibaba Group Holding Limited	Consumer Discretionary	2.66%	China
Bharat Electronics Limited	Industrials	1.92%	India
Delta Electronics, Inc.	Information Technology	1.79%	Taiwan
Grupo Aeroportuario del Pacifico SAB de CV Class B	Industrials	1.50%	Mexico
Infosys Limited	Information Technology	1.39%	India
SK hynix Inc.	Information Technology	1.22%	Korea
Al Rajhi Bank	Financials	1.20%	Saudi Arabia
Naspers Limited Class N	Consumer Discretionary	1.18%	South Africa
MediaTek Inc	Information Technology	1.17%	Taiwan
Samsung Electronics Co., Ltd.	Information Technology	0.97%	Korea
BYD Company Limited Class H	Consumer Discretionary	0.93%	China
Prologis Property Mexico, S.A. de C.V.	Real Estate	0.89%	Mexico
Fibra Uno Administracion SA de CV Series -11-	Real Estate	0.87%	Mexico

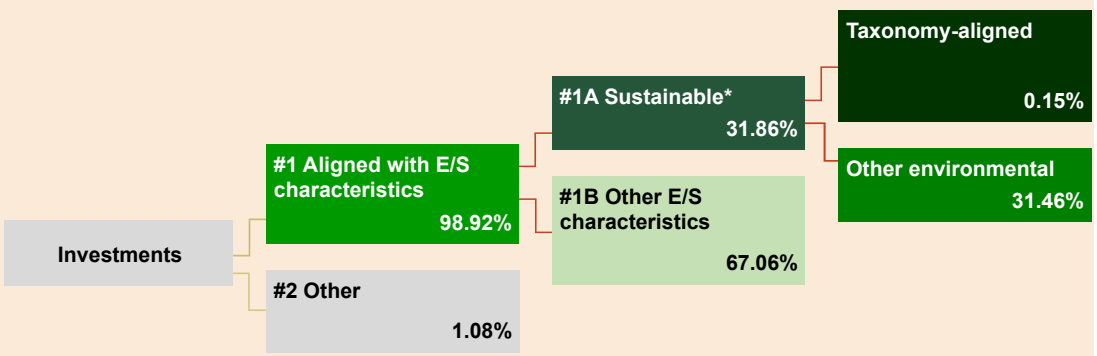

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

31.86% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	26.63%
Financials	20.53%
Industrials	10.99%
Communication Services	10.75%
Consumer Discretionary	10.74%
Health Care	5.44%
Consumer Staples	4.57%
Real Estate	3.92%
Materials	2.71%
Utilities	2.65%
Electric Utilities	*0.78%*
[Unassigned]	*0.12%*
Cash & Derivatives	1.08%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.1 % of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

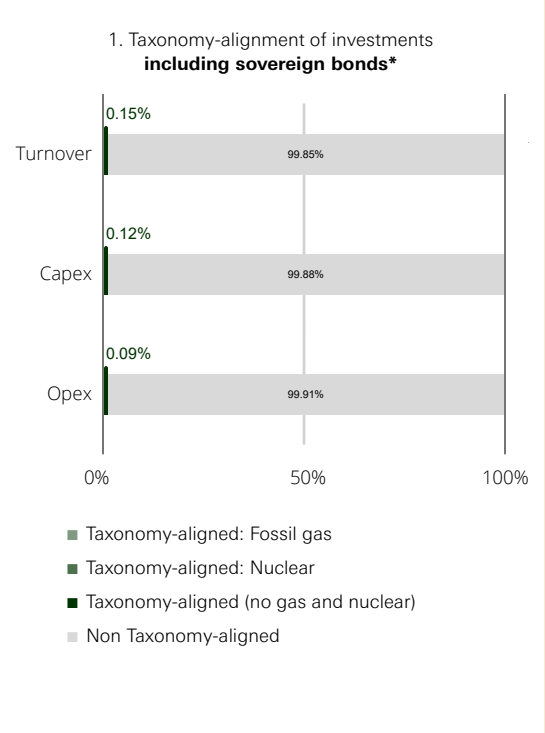

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

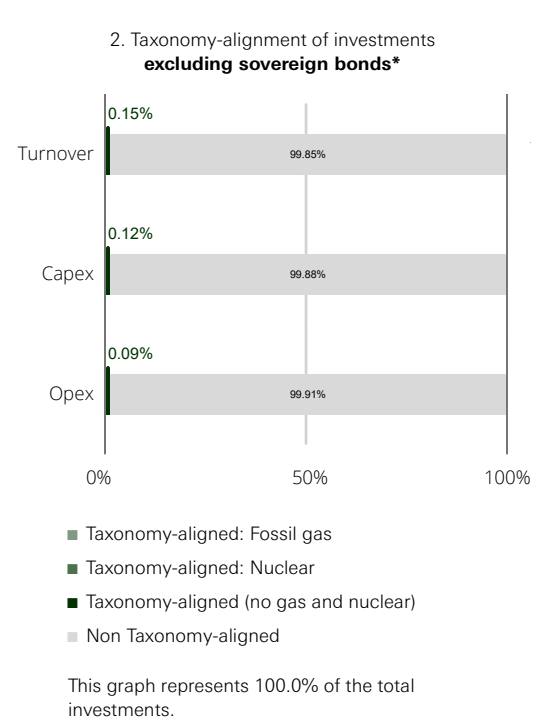

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.04%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.15%	0.11%	0.00%
Revenue - Non Taxonomy-aligned	99.85%	99.89%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.12%	0.14%	0.00%
CAPEX - Non Taxonomy-aligned	99.88%	99.86%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.13%	0.13%	0.00%
OPEX - Non Taxonomy-aligned	99.91%	99.90%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 31.46%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The Index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time).
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements of the SFDR Annex.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

  The Index is an equity index based on the MSCI Emerging Markets Index, and includes large and mid-cap securities across Emerging Market (EM) countries, as determined by the Index provider.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:
- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining and distribution;
- oil and gas; and
- power generation;
- civilian firearms;
- nuclear weapons.

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:
- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	94.56	94.63

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI Emerging Markets Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	94.56	323.25

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI EMERGING MARKETS ISLAMIC SCREENED CAPPED UCITS ETF **Legal Entity Identifier:** 213800JAZ1OUG85X6H43

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 28.32% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI EM (Emerging Market) Islamic ESG Universal Screened Select Index (the "Index"), the Fund promoted the following environmental and/or social characteristics:

- an improvement on the ESG rating against that of the MSCI Emerging Markets Islamic Index (the "Parent Index").
- An improvement in greenhouse gas intensity against that of the Parent Index.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria, excluded companies to reduce greenhouse gas intensity and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	6.10	5.62
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	441.60	547.40

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Islamic Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	6.10	5.62
	31 December 2024	6.39	5.77
	31 December 2023	6.14	5.36
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	441.60	547.40
	31 December 2024		
	31 December 2023		

Broad Market Index - MSCI Emerging Markets Islamic Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality

Principal Adverse Impact	Period Ending	Fund	Broad Market Index

1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	9,907.93	511,785,252.6
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	441.60	547.40
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	3.45	5.65%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Islamic Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
SK hynix Inc.	Information Technology	7.66%	Korea
Samsung Electronics Co., Ltd.	Information Technology	7.39%	Korea
Xiaomi Corporation Class B	Information Technology	4.03%	China

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

28.32% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.0 % of the Fund's investments were deemed sustainable investments with an enviromental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

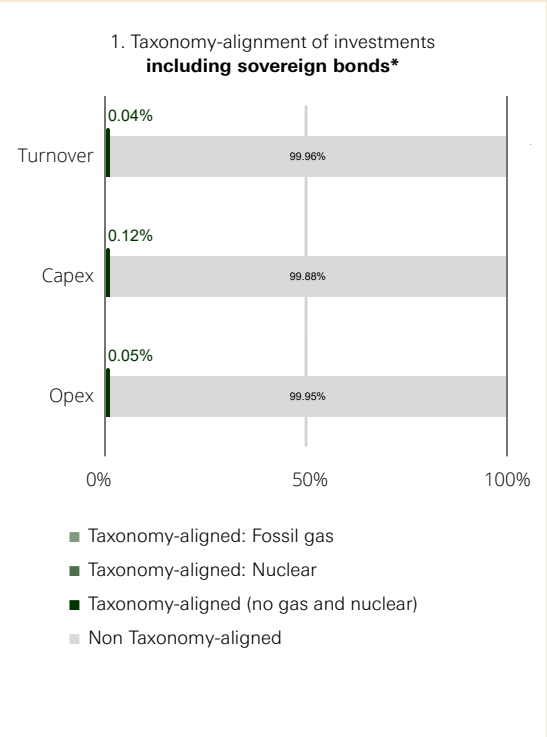

Taxonomy-aligned activities are expressed as a share of:

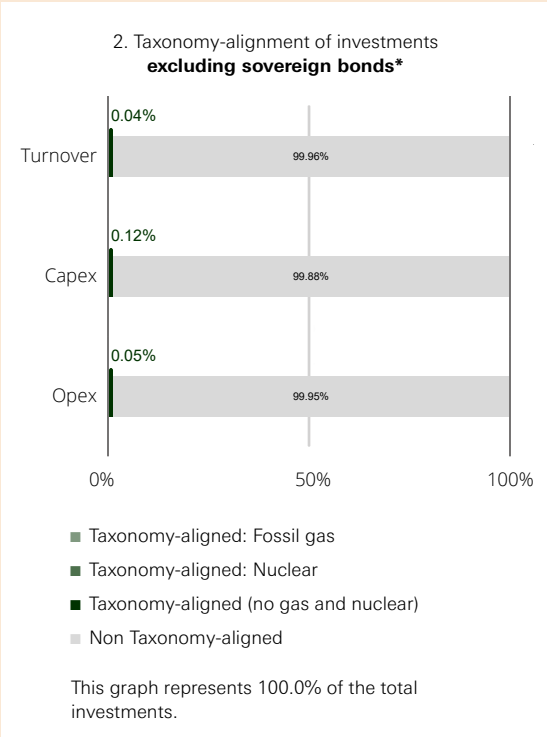

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.01%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.04%	0.02%	0.00%
Revenue - Non Taxonomy-aligned	99.96%	99.98%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.12%	0.05%	0.00%
CAPEX - Non Taxonomy-aligned	99.88%	99.95%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.05%	0.03%	0.00%
OPEX - Non Taxonomy-aligned	99.95%	99.97%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 27.60%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.
The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.
The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by he Index provider in the Index methodology) the certain characteristics. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index;
2. The Index applied the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

  The Index was an equity index based on the Parent Index and which reflected Shariah investment principles and included large- and mid-cap securities across 24 Emerging Markets (EM) countries, as determined by the Index provider.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index was constructed from the Parent Index by applying values and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology). Each of the exclusionary criteria may apply thresholds which are defined by the Index provider and set out in the Index methodology and which may be amended from time to time. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective. The use of the MSCI ESG Universal Indexes Methodology in the construction of the Index is to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile.
To achieve this, the Index provider applied the following steps to the Parent Index: (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index; (ii) the Index provider defined an ESG re-weighting factor that reflected an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and (iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.

Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

The Index also excluded securities based on the following criteria:

- Unrated Companies – Companies not assessed by MSCI ESG Research on MSCI ESG Ratings, MSCI ESG Controversies, MSCI Business Involvement Screening Research and MSCI Climate Change Metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
ESG score (third-party score)	6.10	6.12
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	441.60	441.35

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI EM (Emerging Market) Islamic ESG Universal Screened Select Capped Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	6.10	5.62
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	441.60	547.40

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Islamic Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI EMERGING MARKETS SMALL CAP SCREENED UCITS ETF **Legal Entity Identifier:** 2138007Z1WZEZHHYXH27

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 9.50% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI Emerging Markets Small Cap Universal Screens Index (the "Index"), the Fund

:

- Better management of a broad range of environmental and social risks, and where applicable, positioning to meet demand for provision of goods and services that had a positive environmental or social contribution, collectively measured by MSCI ESG ratings. MSCI ESG ratings provided an opinion of companies' management of financially relevant ESG risks and opportunities. Each company was assessed on relevant environmental, social and governance themes, and where applicable, positioning to meet market demand for the

provision of products and services that had a positive environmental or social contribution. The themes determined by MSCI were climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance and corporate behaviour. The Fund targeted this through an improvement of the MSCI ESG rating against that of the MSCI Emerging Markets Index (the "Parent Index")

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	5.42	4.76

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index -

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	5.42	4.76
	31 December 2024	5.18	4.59
	31 December 2023	5.03	4.24

Broad Market Index - MSCI Emerging Markets Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainablity related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	5,726.64	244,995,985.60
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	147.62	218.15

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	324.11	488.46
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.43%	0.81%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	11.51%	11.78%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.34%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index -

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Nanya Technology Corporation	Information Technology	0.91%	Taiwan
Coforge Limited	Information Technology	0.80%	India
Federal Bank Ltd. (India)	Financials	0.77%	India
Samsung Securities Co., Ltd.	Financials	0.72%	Korea
Asseco Poland S.A.	Information Technology	0.68%	Poland
Lojas Renner S.A.	Consumer Discretionary	0.68%	Brazil
Growthpoint Properties Limited	Real Estate	0.66%	South Africa
Mr Price Group Limited	Consumer Discretionary	0.66%	South Africa
Max Financial Services Limited	Financials	0.65%	India
BNK Financial Group, Inc.	Financials	0.57%	Korea
Corporacion Inmobiliaria Vesta S.A.B. de C.V.	Real Estate	0.55%	Mexico
Momentum Group Limited	Financials	0.55%	South Africa
Winbond Electronics Corp.	Information Technology	0.55%	Taiwan
Air Arabia PJSC	Industrials	0.53%	United Arab Emirates
Phison Electronics Corp.	Information Technology	0.52%	Taiwan

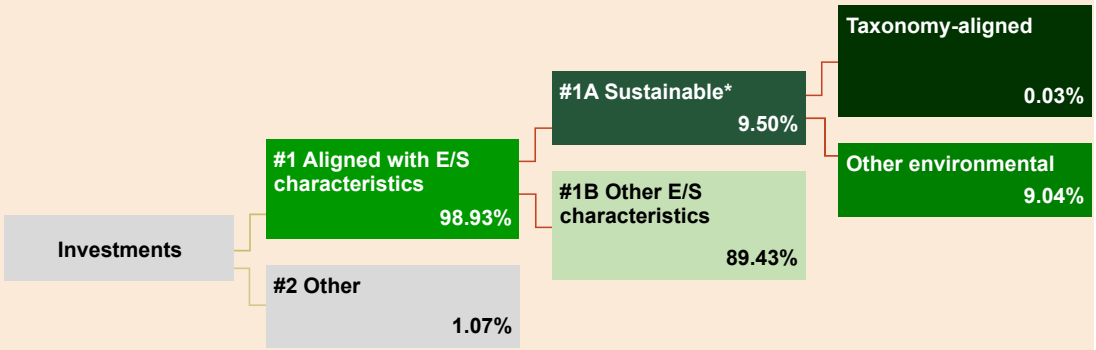

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

9.50% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	21.65%
Health Care	13.39%
Financials	12.67%
Industrials	12.18%
Consumer Discretionary	10.78%

Electric Utilities	*0.28%*
Gas	*0.37%*
Independent Power Producers & Energy Traders	*0.15%*
Multi-Utilities	*0.01%*
Cash & Derivatives	1.07%
Other	0.00%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

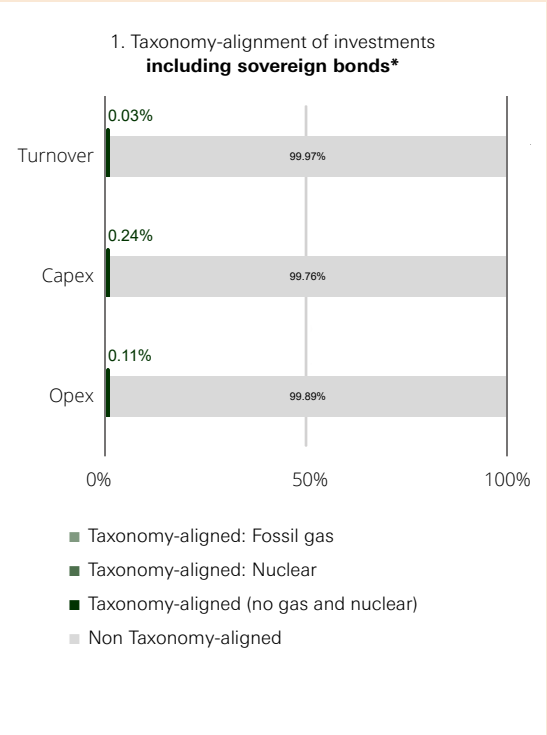

Taxonomy-aligned activities are expressed as a share of:

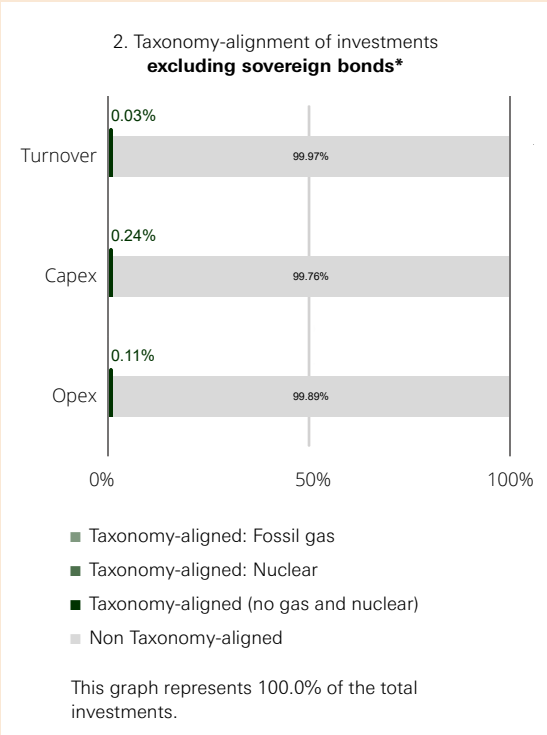

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.03%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	99.97%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.24%	0.05%	0.00%
CAPEX - Non Taxonomy-aligned	99.76%	99.96%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.11%	0.02%	0.00%
OPEX - Non Taxonomy-aligned	99.89%	99.98%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 9.04%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:
1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and
2. The Index applies the MSCI ESG Universal methodology (which is available on the Index provider's website) to achieve its ESG objective by re-weighting free-float market cap weights based upon certain ESG metrics, in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from their parent index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is an equity index based on the MSCI Emerging Markets Small Cap Index, which offered a representation of emerging markets equity markets worldwide, as determined by the Index provider. The small-cap market coverage in the Index was derived from the Parent Index by applying the Index provider's criteria on free-float adjustment, size & liquidity.

The Index was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time):

Furthermore, the Index applied the MSCI ESG Universal methodology (which is available on the Index provider's website) to achieve its ESG objective. To achieve this, the Index provider applied the following steps:

the Index provider excludes the securities with the weakest ESG profile from the Parent Index;
the Index provider defines an ESG re-weighting factor that reflects an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and
the Index provider re-weights securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
ESG score (third-party score)	5.42	5.41

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI Emerging Markets Small Cap Universal S Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	5.42	4.76

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Legal Entity Identifier: 213800K3JLJ32C6MT947

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 31.80% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI Emerging Markets Value Select Screens Advanced Index (the "Index"), the Fund

:

- Better management of a broad range of environmental and social risks, and where applicable, positioning to meet demand for provision of goods and services that had a positive environmental or social contribution, collectively measured by MSCI ESG ratings. MSCI ESG ratings provided an opinion of companies' management of financially relevant ESG risks and opportunities. Each company was assessed on relevant environmental, social and governance themes, and where applicable, positioning to meet market demand for the

provision of products and services that had a positive environmental or social contribution. The themes determined by MSCI were climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance and corporate behaviour. The Fund targeted this through an improvement of the MSCI ESG rating against that of the MSCI Emerging Markets Index (the "Parent Index")

The Fund sought to achieve the promotion of th characteristic by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact exclusionary criteria and improved the exposure to companies with favourable MSCI ESG ratings.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators the Fund used to measure the attainment of the environmental or social characteristics that it promoted can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilise data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third-party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.29	6.21

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	7.29	6.21
	31 December 2024	7.01	5.80
	31 December 2023	6.72	5.44

Broad Market Index - MSCI Emerging Markets Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainablity related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	5,993.68	404,411,518.86
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	107.67	261.10

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	192.98	335.46
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	6.13%	5.99%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	10.64%	12.74%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Taiwan Semiconductor Manufacturing Co., Ltd.	Information Technology	11.67%	Taiwan
Tencent Holdings Ltd	Communication Services	3.60%	China
SK hynix Inc.	Information Technology	3.36%	Korea
China Construction Bank Corporation Class H	Financials	3.00%	China
Baidu, Inc. Class A	Communication Services	2.58%	China
Samsung Electronics Co Ltd Pfd Non-Voting	Information Technology	2.48%	Korea
Samsung Electronics Co., Ltd.	Information Technology	2.42%	Korea
Hana Financial Group Inc.	Financials	2.08%	Korea
United Microelectronics Corp.	Information Technology	1.94%	Taiwan
Saudi Telecom Co.	Communication Services	1.93%	Saudi Arabia
Infosys Limited	Information Technology	1.64%	India
Bank of China Limited Class H	Financials	1.55%	China
Gold Fields Limited	Materials	1.52%	South Africa
Alibaba Group Holding Limited	Consumer Discretionary	1.51%	China
Industrial and Commercial Bank of China Limited Class H	Financials	1.47%	China

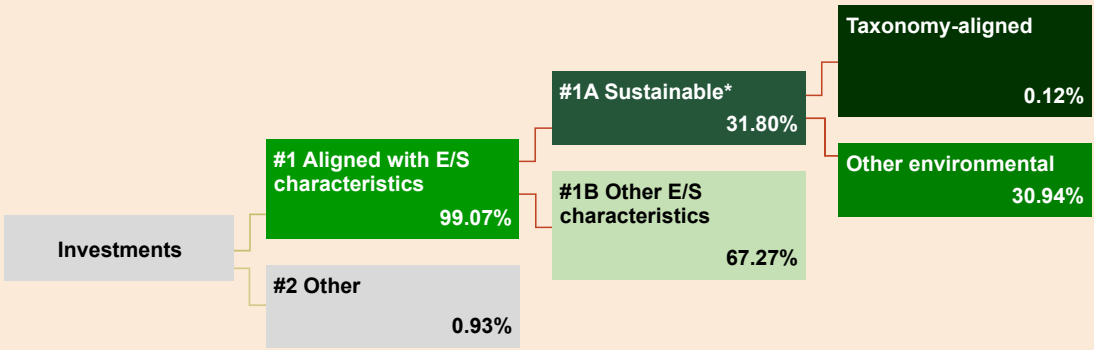

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

31.80% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	29.54%
Financials	21.43%
Consumer Discretionary	12.80%
Communication Services	12.74%
Health Care	6.26%
Materials	5.02%
Industrials	4.14%
Consumer Staples	3.80%
Real Estate	2.72%
Cash & Derivatives	0.93%
Utilities	0.62%
Electric Utilities	*0.41%*
Gas	*0.21%*
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0. % of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

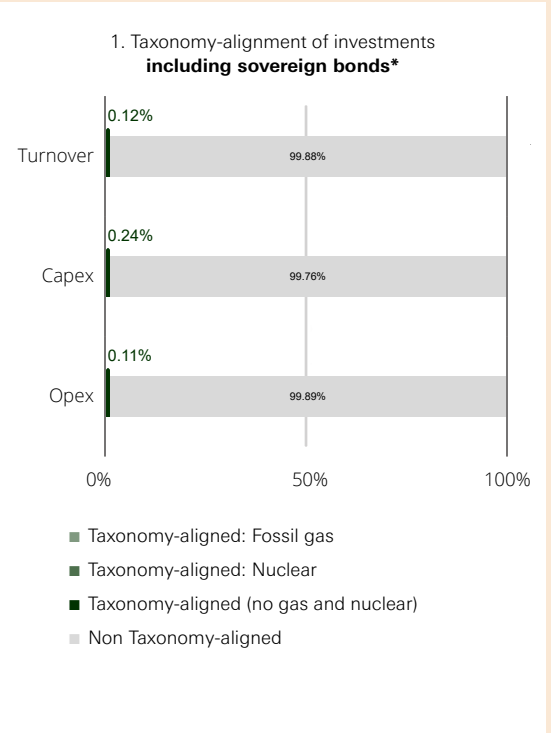

☐ In fossil gas ☐ In nuclear energy

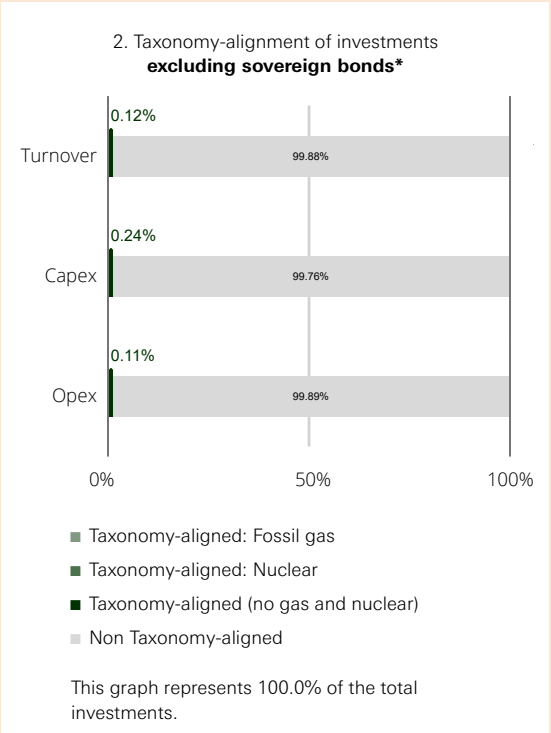

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.01%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.12%	0.06%	0.00%
Revenue - Non Taxonomy-aligned	99.88%	99.94%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.24%	0.23%	0.00%
CAPEX - Non Taxonomy-aligned	99.76%	99.77%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.11%	0.07%	0.00%
OPEX - Non Taxonomy-aligned	99.89%	99.93%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 30.94%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.

The Index achieved this in the following ways:
1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and

2. The Index applied the MSCI ESG Target methodology (which is available on the Index provider's website) to achieve its ESG objective by maximizing the exposure to the target factor(s) less a penalty for the common factor and stock-specific risk characteristics of each potential constituent, as well as placing an upper bound on the predicted tracking error of the Index, in order to maximize the exposure to the target Factor along with 20% ESG score improvement of the Factor index relative to its parent market-cap weighted index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is an equity index based on the MSCI Emerging Markets Index (the "Parent Index"), which represented emerging markets equity markets worldwide, as determined by the Index provider.

The Index first excluded securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time):

Furthermore, the Index aimed to maximise the exposure to the Value Factor along with a 20% ESG score improvement of the Index relative to the Parent Index. In order to maximise exposure to the Value Factor once the exclusionary criteria referred to above were applied, the Index provider used an optimisation technique to determine the remaining securities in the Index using a proprietary factor model which sought to maximise the performance of each security in terms of the Value Factor in relation to the overall market, while minimising the ex-ante tracking error relating to the Parent Index.

The proprietary factor model measured the exposure of each remaining security to the Value Factor using three value-specific variables (priceto-book value, price-to-forward earnings and enterprise value-to-cash flow from operations) and ranked the securities in such a way that Index comprised those securities providing maximum exposure to the Value Factor.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
ESG score (third-party score)	7.29	7.26

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark -

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.29	6.21

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Emerging Markets Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI EUROPE CLIMATE PARIS ALIGNED UCITS ETF

Legal Entity Identifier: 213800RXAMD6PSN1OQ23

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 60.44% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI Europe Climate Paris Aligned Index (the "Index"), the Fund :

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	36.00	99.19

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Europe Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	36.00	99.19
	31 December 2024	38.72	93.39
	31 December 2023	46.48	101.68

Broad Market Index - MSCI Europe Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1, 2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1, 2, 3, 4, 5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7, 8, 9) and those providing green revenues.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	262.85	611,170,907.59
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	8.18	56.77
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	36.00	99.19
4. Exposure to companies active in the fossil fuel sector	31 December 2025	2.66%	1.16%
5a. Share of non-renewable energy consumption	31 December 2025	46.75%	52.79%
5b. Share of non-renewable energy production	31 December 2025	38.56%	49.93%
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.03%	-0.05%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	1.00	15.53
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	1.46	11.09
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.58%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Europe Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
ASML Holding NV	Information Technology	3.26%	Netherlands
SAP SE	Information Technology	2.34%	Germany
AstraZeneca PLC	Health Care	2.19%	United Kingdom of Great Britain and Northern Ireland
Schneider Electric SE	Industrials	2.19%	France
Roche Holding Ltd	Health Care	2.12%	United States of America
Novartis AG	Health Care	2.06%	United States of America

Ferrovial SE	Industrials	1.34%	United States of America
Swiss Prime Site AG	Real Estate	1.29%	Switzerland
Terna S.p.A.	Utilities	1.27%	Italy

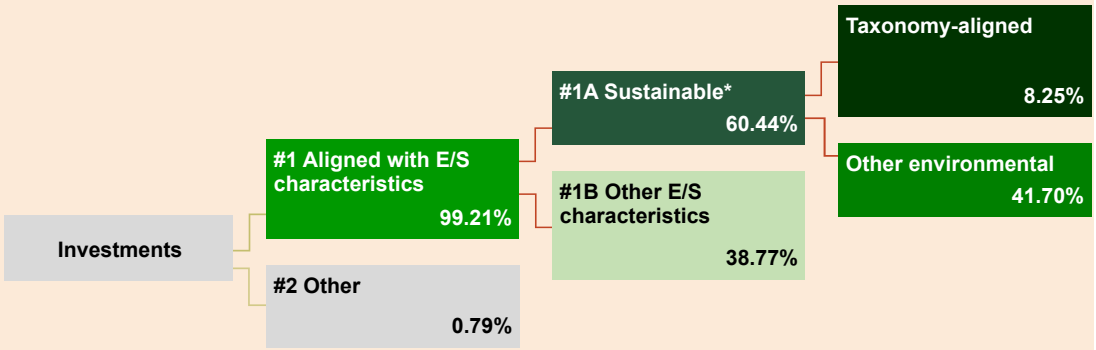

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

60.44% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Financials	24.62%
Industrials	21.08%
Health Care	15.94%
Information Technology	8.42%
Consumer Discretionary	7.76%
Consumer Staples	5.33%
Utilities	5.12%
Electric Utilities	*%*
Materials	4.19%
Real Estate	3.64%
Communication Services	3.12%
Cash & Derivatives	0.79%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

8. % of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☑ Yes:

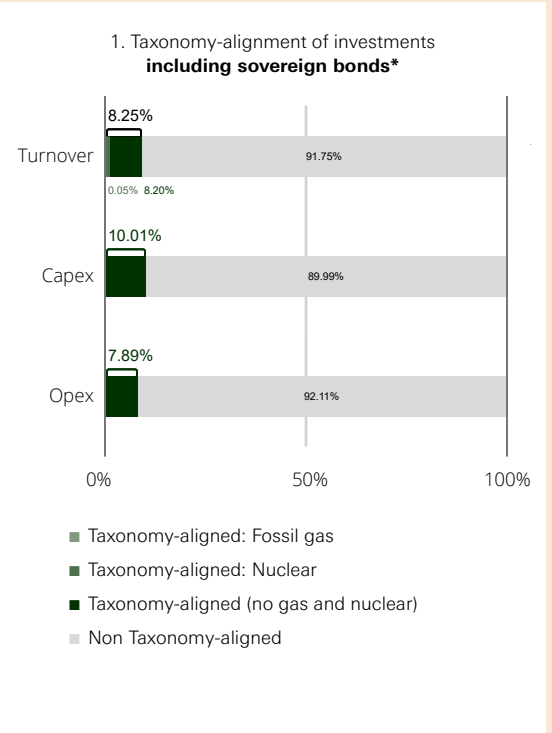

☐ In fossil gas ☑ In nuclear energy

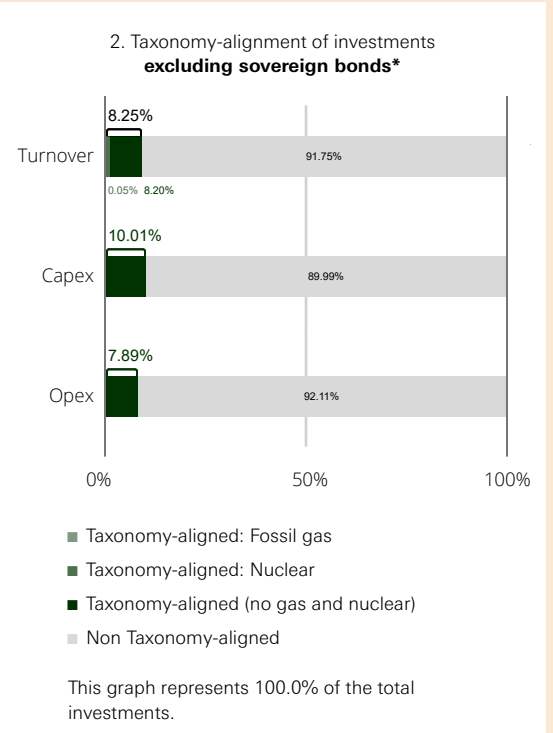

☐ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 6.35%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.05%	0.01%	0.01%
Revenue - Taxonomy-aligned (no gas and nuclear)	8.20%	8.05%	5.42%
Revenue - Non Taxonomy-aligned	91.75%	91.94%	94.57%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	10.01%	10.04%	7.88%
CAPEX - Non Taxonomy-aligned	89.99%	89.96%	92.12%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	7.89%	8.16%	6.83%
OPEX - Non Taxonomy-aligned	92.11%	91.84%	93.17%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 41.70%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements section of the SFDR Annex.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is an equity index based on the MSCI Europe Index, and includes large and mid-cap securities across 15 Developed Markets in Europe. The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining and distribution;
- oil and gas;
- power generation .

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	36.00	36.17

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI Europe Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	36.00	99.19

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Europe Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI EUROPE ISLAMIC SCREENED UCITS ETF

Legal Entity Identifier: 213800TP4J9GG6YRMU25

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 67.87% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI Europe Islamic ESG Universal Screened Select Index (the "Index"), the Fund :

- An improvement on the ESG rating against that of the MSCI Europe Islamic Index (the "Parent Index").
- An improvement in greenhouse gas intensity against that of the Parent Index.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria, excluded companies to reduce greenhouse gas intensity and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	8.32	7.83
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	223.24	236.28

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Europe Islamic Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	8.32	7.83
	31 December 2024	8.35	7.88
	31 December 2023	8.42	7.84
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	223.24	236.28
	31 December 2024		
	31 December 2023		

Broad Market Index - MSCI Europe Islamic Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU Taxonomy objectives or other climate related activities.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	6,558.91	488,513,084.97
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	223.24	236.28
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Europe Islamic Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
ASML Holding NV	Information Technology	5.66%	Netherlands
Novartis AG	Health Care	5.37%	United States of America
Schneider Electric SE	Industrials	5.25%	France
ABB Ltd.	Industrials	4.10%	Switzerland
L'Oreal S.A.	Consumer Staples	3.91%	France
TotalEnergies SE	Energy	3.82%	France
Novo Nordisk A/S Class B	Health Care	3.69%	Denmark
EssilorLuxottica SA	Health Care	3.45%	France
Shell Plc	Energy	3.33%	United States of America
Air Liquide SA	Materials	2.20%	France
Infineon Technologies AG	Information Technology	2.07%	Germany
Lonza Group AG	Health Care	1.86%	Switzerland
Sanofi SA	Health Care	1.82%	United States of America
Atlas Copco AB Class A	Industrials	1.72%	Sweden
Holcim Ltd	Materials	1.67%	United States of America

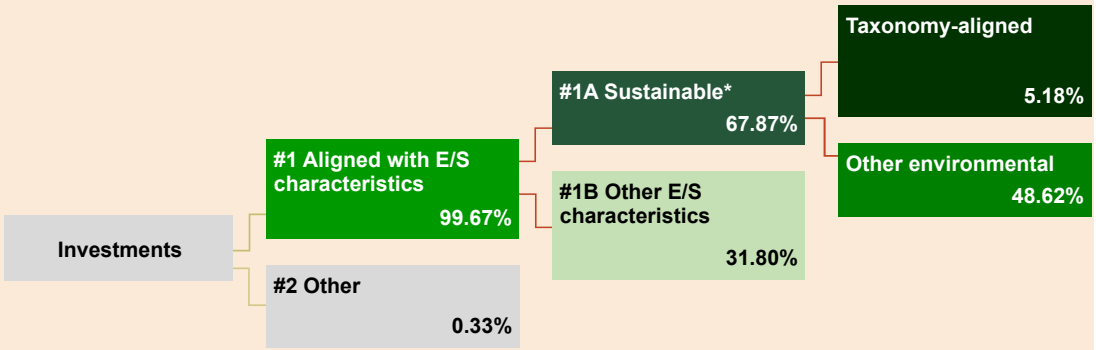

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

67.87% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Health Care	23.66%
Industrials	23.13%
Information Technology	13.64%
Materials	11.86%
Energy	9.76%
Integrated Oil & Gas	*9.31%*
Oil & Gas Equipment & Services	*0.08%*
Oil & Gas Exploration & Production	*0.32%*
	0.05%
Consumer Staples	8.29%
Consumer Discretionary	5.40%
Utilities	2.37%
Electric Utilities	*0.62%*
Multi-Utilities	*1.68%*
Communication Services	1.22%
Cash & Derivatives	0.33%
Real Estate	0.26%
Financials	0.07%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

% of the Fund's investments were deemed sustainable investments with an enviromental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☑ Yes:

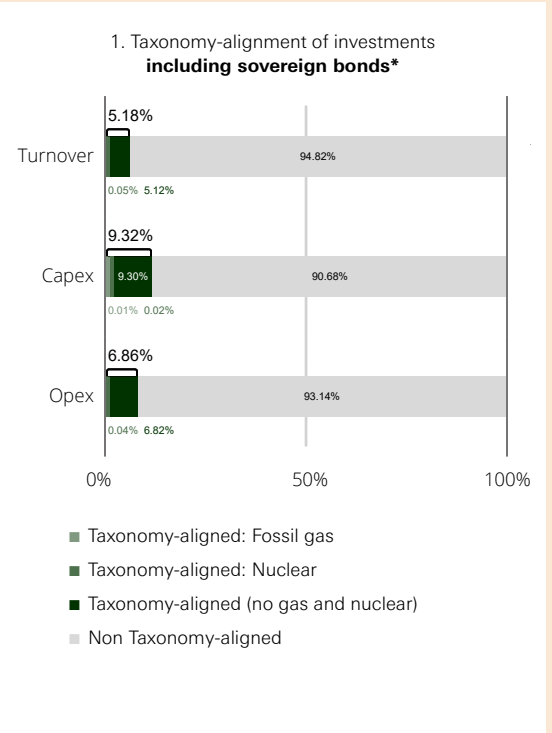

☑ In fossil gas ☑ In nuclear energy

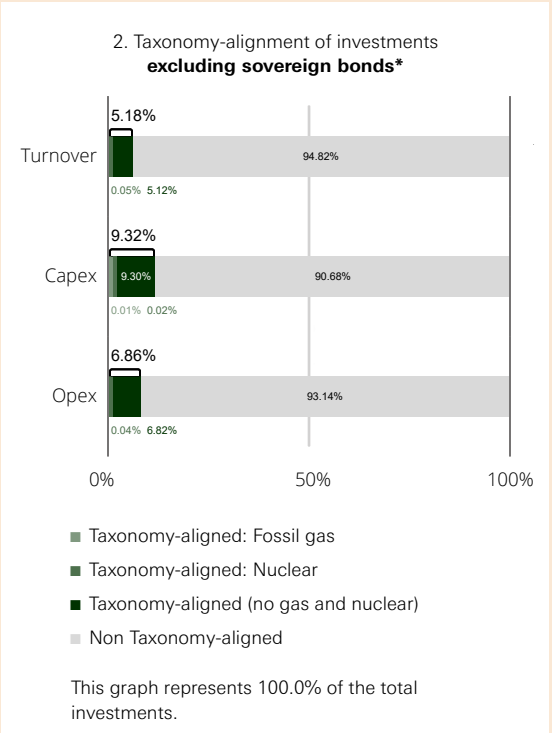

☐ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 4.11%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.05%	0.03%	0.02%
Revenue - Taxonomy-aligned (no gas and nuclear)	5.12%	4.86%	3.33%
Revenue - Non Taxonomy-aligned	94.82%	95.11%	96.65%
CAPEX - Taxonomy-aligned: Fossil gas	0.01%	0.01%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.02%	0.01%	0.02%
CAPEX - Taxonomy-aligned (no gas and nuclear)	9.30%	10.04%	7.85%
CAPEX - Non Taxonomy-aligned	90.68%	89.95%	92.13%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.04%	0.02%	0.02%
OPEX - Taxonomy-aligned (no gas and nuclear)	6.82%	7.16%	6.56%
OPEX - Non Taxonomy-aligned	93.14%	92.83%	93.42%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 48.62%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.
The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to certain characteristics. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index;
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is an equity index based on the Parent Index and which reflected Shariah investment principles and included large and mid-cap securities across 15 Developed Markets (DM) countries, as determined by the Index provider.
The Index was constructed from the Parent Index by applying values and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology) Each of the exclusionary criteria may apply thresholds which are defined by the Index provider and set out in the Index methodology and which may be amended from time to time. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective.
To achieve this, the Index provider applied the following steps to the Parent Index:
(i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index;
(ii) the Index provider defined an ESG re-weighting factor that reflected an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and
(iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.

Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

The Index also excluded securities based on the following criteria:

- Unrated Companies – Companies not assessed by MSCI ESG Research on MSCI ESG Ratings, MSCI ESG Controversies, MSCI Business Involvement Screening Research and MSCI Climate Change Metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
ESG score (third-party score)	8.32	8.31
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	223.24	224.57

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI Europe Islamic ESG Universal Screened Select Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	8.32	7.83
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	223.24	236.28

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Europe Islamic Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI JAPAN CLIMATE PARIS ALIGNED UCITS ETF **Legal Entity Identifier:** 213800SQIP6HRG29M224

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 44.11% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI Japan Climate Paris Aligned Index (the "Parent Index"), the Fund :

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	41.77	72.40

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Japan Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	41.77	72.40
	31 December 2024	38.32	73.10
	31 December 2023	41.21	73.45

Broad Market Index - MSCI Japan Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7, 8, 9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UN Global Compact which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1, 2), reduced fossil fuel exposure (PAI 2, 4) and increased exposure to securities with credible emission reduction targets (PAI 1, 2, 3, 4, 5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7, 8, 9) and those providing green revenues.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	99.68	207,195,874.60
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	10.08	57.42
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	41.77	72.40
4. Exposure to companies active in the fossil fuel sector	31 December 2025	1.26%	0.75%
5a. Share of non-renewable energy consumption	31 December 2025	60.27%	71.72%
5b. Share of non-renewable energy production	31 December 2025	0.00%	47.75%
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.01%	-0.05%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.00	0.02
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	0.13	0.51
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Japan Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Advantest Corp.	Information Technology	5.61%	Japan
Fanuc Corporation	Industrials	4.44%	Japan
East Japan Railway Company	Industrials	4.29%	Japan
Central Japan Railway Company	Industrials	4.11%	Japan
SoftBank Group Corp.	Communication Services	3.92%	Japan
Recruit Holdings Co., Ltd.	Industrials	3.69%	Japan
Chugai Pharmaceutical Co., Ltd.	Health Care	3.64%	Japan
FAST RETAILING CO., LTD.	Consumer Discretionary	3.55%	Japan
Nippon Building Fund, Inc.	Real Estate	3.28%	Japan
Keyence Corporation	Information Technology	3.24%	Japan
SMC Corporation	Industrials	2.90%	Japan
Tokio Marine Holdings, Inc.	Financials	2.87%	Japan
TIS Inc.	Information Technology	2.76%	Japan
Daiichi Sankyo Company, Limited	Health Care	2.72%	Japan

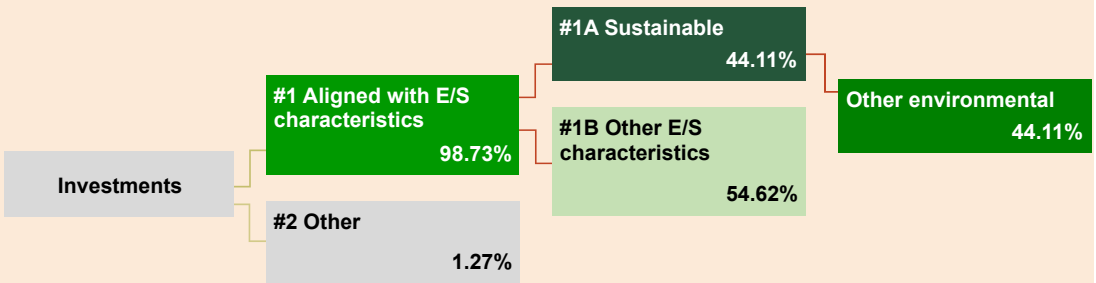

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

44.11% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Industrials	26.65%
Information Technology	23.74%
Health Care	16.85%
Consumer Discretionary	8.53%
Communication Services	7.99%
Financials	7.68%
Real Estate	7.29%
Cash & Derivatives	1.27%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

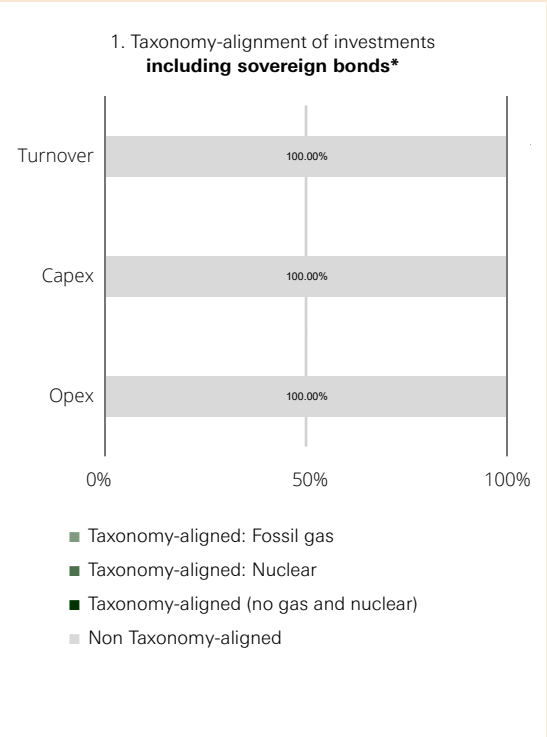

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

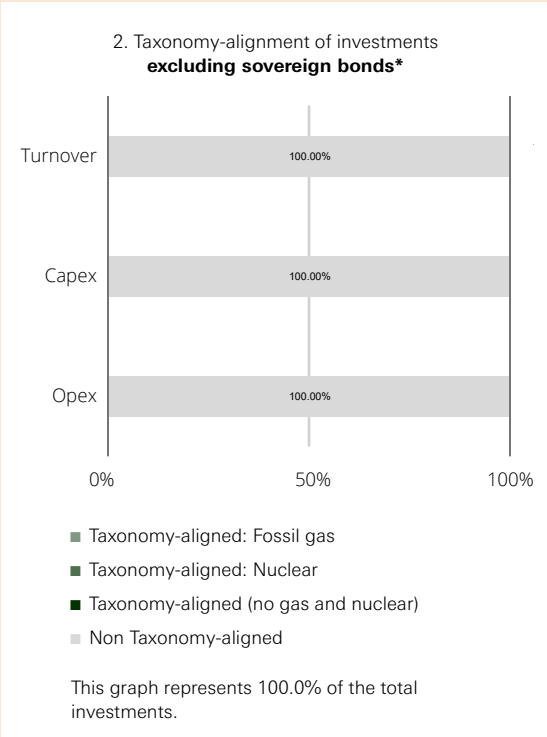

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 44.11%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is an equity index based on the MSCI Japan Index (the "Parent Index"), and includes large and mid-cap securities of the Japanese equity markets, as determined by the Index provider. The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining and distribution;
- oil and gas;
-

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	41.77	41.77

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI Japan Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	41.77	72.40

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Japan Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI JAPAN ISLAMIC SCREENED UCITS ETF

Legal Entity Identifier: 213800MI7JFIYMW18N47

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 49.51% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI Japan Islamic ESG Universal Screened Select Index (the "Index"), the Fund :

- An improvement on the ESG rating against that of the MSCI Japan Islamic Index (the "Parent Index").
- An improvement in greenhouse gas intensity against that of the Parent Index.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria, excluded companies to reduce greenhouse gas intensity and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.92	7.46
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	75.43	106.60

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index -

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	7.92	7.46
	31 December 2024	7.60	7.15
	31 December 2023		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	75.43	106.60
	31 December 2024		
	31 December 2023		

Broad Market Index - MSCI Japan Islamic Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:

- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.

Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security business involvement. As per the Index methodology, securities involved in thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	795.32	106,379,871.11
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	75.43	106.60
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Japan Islamic Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Mitsui & Co.,Ltd	Industrials	5.47%	Japan
Tokyo Electron Ltd.	Information Technology	5.32%	Japan
Hitachi, Ltd.	Industrials	4.87%	Japan
Fujitsu Limited	Information Technology	4.83%	Japan
Mitsubishi Corporation	Industrials	4.47%	Japan
NEC Corporation	Information Technology	4.32%	Japan
Daiichi Sankyo Company, Limited	Health Care	4.13%	Japan
Komatsu Ltd.	Industrials	3.34%	Japan
Fanuc Corporation	Industrials	3.22%	Japan
Canon Inc.	Information Technology	2.93%	Japan
Panasonic Holdings Corporation	Consumer Discretionary	2.92%	Japan
FUJIFILM Holdings Corp	Information Technology	2.78%	Japan
DAIKIN INDUSTRIES, LTD.	Industrials	2.77%	Japan

Cash and derivatives were excluded

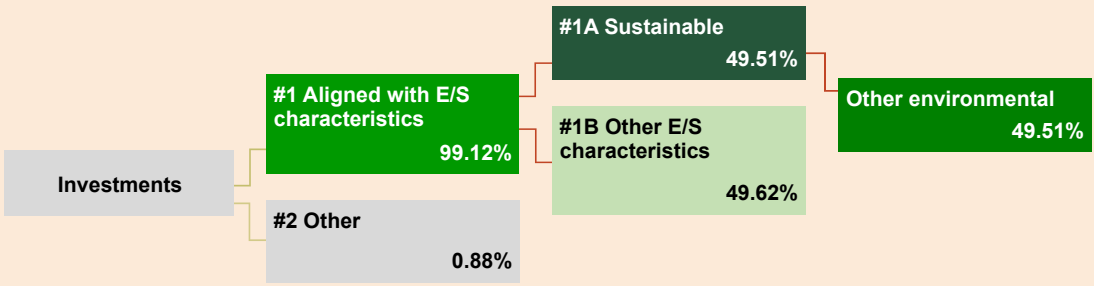

What was the proportion of sustainability-related investments?

49.51% of the portfolio was invested in sustainable assets.

As an Article 8 fund under SFDR, the Fund commited that a minimum proportion of 100% of its net assets would promote E/S characteristics. This minimum proportion was based on an estimate at the time of the Fund's approval by the Central Bank of Ireland. Since the Fund launched, its actual level of investments promoting E/S characteristics has been very close to this minimum. However, HSBC believes there should be an appropriate space between the minimum commitment level and the actual level achieved to ensure that the minimum commitment level can be maintained over time and have therefore adjusted this minimum commitment to 80%.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Industrials	41.75%
Information Technology	26.03%
Health Care	12.53%
Consumer Discretionary	8.68%
Consumer Staples	5.10%
Materials	4.57%
Cash & Derivatives	0.88%
Real Estate	0.32%
Utilities	0.13%
	0.13%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

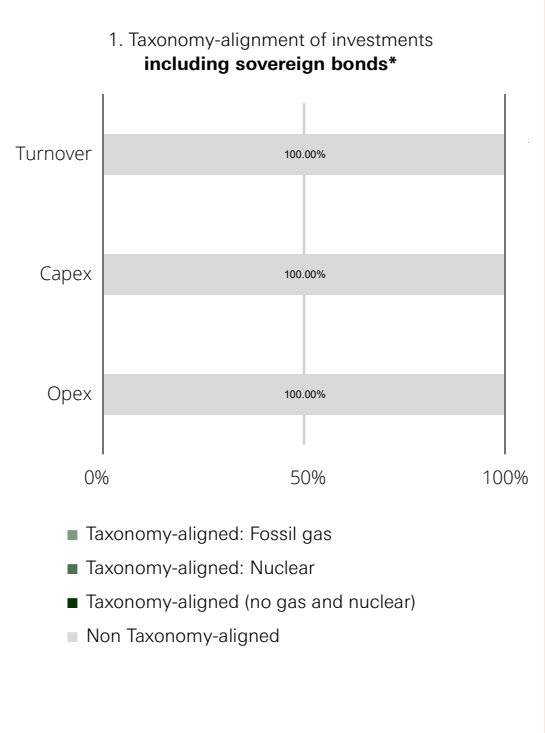

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.

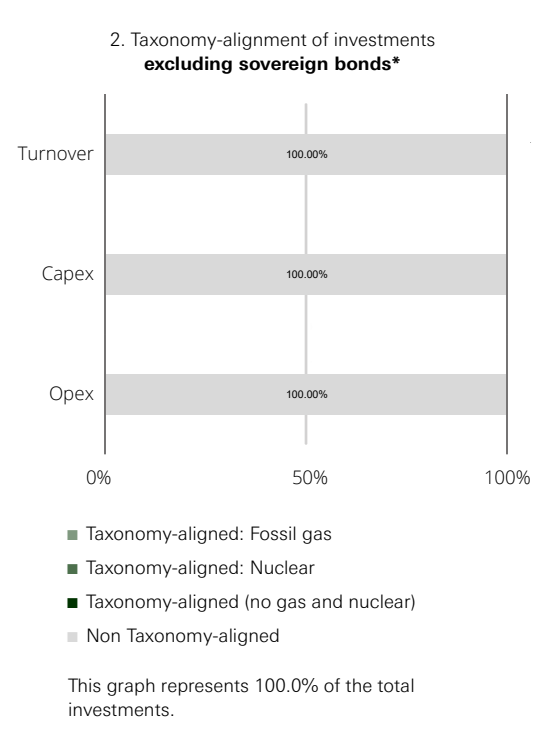

- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 49.51%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.
The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to certain characteristics. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index and
2. The Index applied the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

  The Index was an equity index based on the Parent Index and which reflected Shariah investment principles and included large and mid-cap securities of the Japanese equity markets as determined by the Index provider.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index was constructed from the Parent Index by applying values and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology): Each of the exclusionary criteria may have applied thresholds which were defined by the Index provider and set out in the Index methodology and which may have been amended from time to time. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective.
The use of the MSCI ESG Universal Indexes Methodology in the construction of the Index is to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile.
To achieve this, the Index provider applied the following steps to the Parent Index: (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index;
(ii) the Index provider defined an ESG re-weighting factor that reflected an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and
(iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.
Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

The Index also excluded securities based on the following criteria:

- Unrated Companies – Companies not assessed by MSCI ESG Research on MSCI ESG Ratings, MSCI ESG Controversies, MSCI Business Involvement Screening Research and MSCI Climate Change Metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
ESG score (third-party score)	7.92	7.92
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	75.43	75.43

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI Japan Islamic ESG Universal Screened Select Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.92	7.46
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	75.43	106.60

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Japan Islamic Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI USA CLIMATE PARIS ALIGNED UCITS ETF

Legal Entity Identifier: 213800XER7TRPRTYJD97

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 49.07% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI USA Climate Paris Aligned Index (the "Index"), the Fund
:

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability
and United Nations Global Compact ("UNGC") and which wei
ghted companies in order to achieve the climate related targets set out in the binding ele
ments section of the SFDR Annex.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
Consideration of lower carbon intensity investments		
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	45.21	107.86

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
Consideration of lower carbon intensity investments			
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	45.21	107.86
	31 December 2024	42.65	100.06
	31 December 2023	34.21	102.29

Broad Market Index - MSCI USA Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC Principles which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	121.33	1,169,942,057.62
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	4.27	24.57
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	45.21	107.86
4. Exposure to companies active in the fossil fuel sector	31 December 2025	1.14%	0.53%
5a. Share of non-renewable energy consumption	31 December 2025	46.16%	54.95%
5b. Share of non-renewable energy production	31 December 2025	0.00%	93.59%
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.01%	-0.03%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.00	0.04
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	0.11	0.34
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.56%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.18%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI U Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
NVIDIA Corporation	Information Technology	9.80%	United States of America
Microsoft Corporation	Information Technology	7.64%	United States of America
Apple Inc.	Information Technology	6.79%	United States of America
Tesla, Inc.	Consumer Discretionary	4.10%	United States of America
Amazon.com, Inc.	Consumer Discretionary	3.60%	United States of America
Alphabet Inc. Class C	Communication Services	2.94%	United States of America
Eli Lilly and Company	Health Care	2.90%	United States of America
Meta Platforms Inc Class A	Communication Services	2.89%	United States of America
Broadcom Inc.	Information Technology	2.48%	United States of America
Mastercard Incorporated Class A	Financials	2.43%	United States of America
Visa Inc. Class A	Financials	2.24%	United States of America
Digital Realty Trust, Inc.	Real Estate	1.93%	United States of America
Equinix, Inc.	Real Estate	1.89%	United States of America

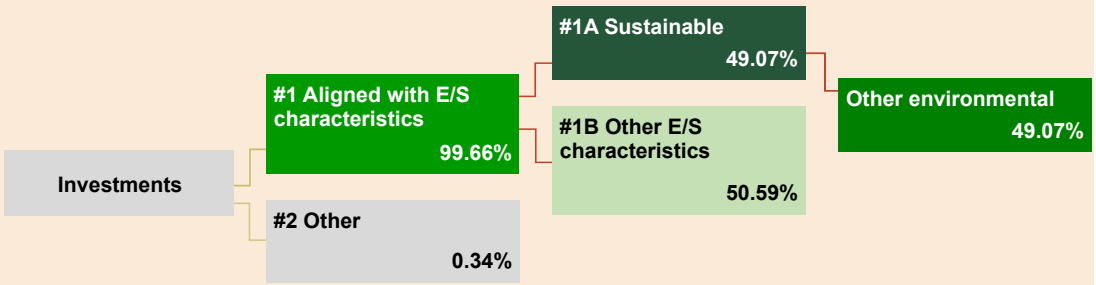

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

49.07% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	38.88%
Financials	14.84%
Consumer Discretionary	10.84%
Health Care	10.51%
Communication Services	8.52%
Real Estate	7.58%
Industrials	4.82%
Utilities	1.63%
Electric Utilities	*0.80%*
Materials	1.51%
Consumer Staples	0.53%
Cash & Derivatives	0.34%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

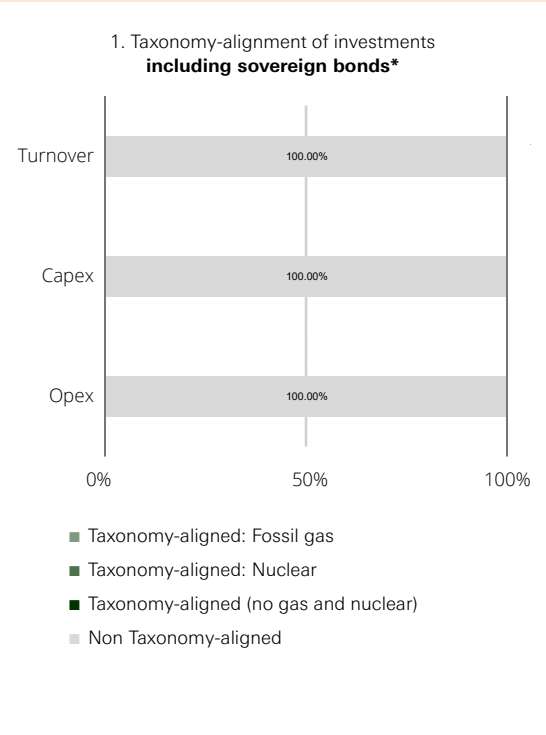

☐ In fossil gas ☐ In nuclear energy

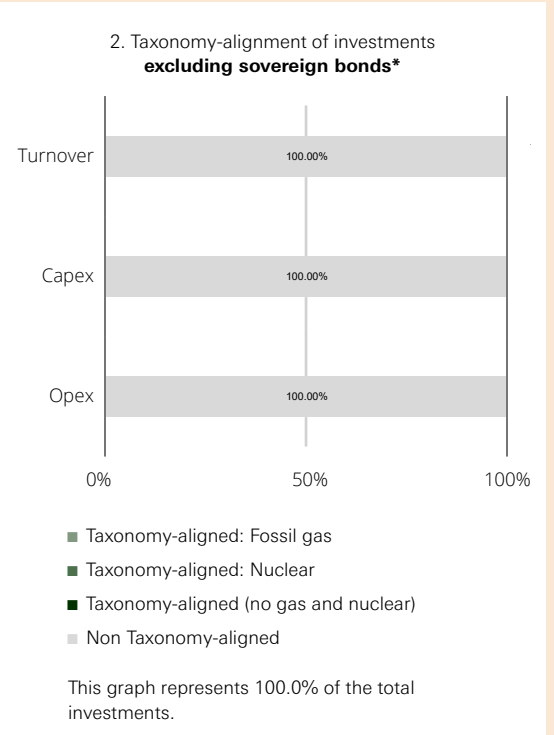

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 49.07%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

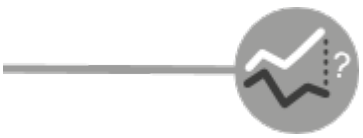

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and was designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time);
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is an equity index based on the MSCI USA Index, and includes large and mid-cap securities of the U.S. equity markets. The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining and distribution;
- oil and gas;

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	45.21	45.21

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI USA Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	45.21	107.86

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI U Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI USA ISLAMIC SCREENED UCITS ETF

Legal Entity Identifier: 2138003V13G23T6Z4N87

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 48.61% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI USA Islamic ESG Universal Screened Select Index (the "Index"), the Fund :

- An improvement on the ESG rating against that of the MSCI USA Islamic Index (the "Parent Index").
- An improvement in greenhouse gas intensity against that of the Parent Index.

The Fund sought to achieve the promotion of th characteristic by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria, excluded companies to reduce greenhouse gas intensity and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.37	6.71
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	89.79	115.52

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI USA Islamic Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	7.37	6.71
	31 December 2024	7.54	7.14
	31 December 2023	7.81	7.45
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	89.79	115.52
	31 December 2024		
	31 December 2023		

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI USA Islamic Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index

1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	1,151.71	477,894,949.7
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	89.7	115.52
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI USA Islamic Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	9.96%	United States of America
Tesla, Inc.	Consumer Discretionary	6.82%	United States of America
Cisco Systems, Inc.	Information Technology	4.00%	United States of America
Advanced Micro Devices, Inc.	Information Technology	3.93%	United States of America
Salesforce, Inc.	Information Technology	3.49%	United States of America
Johnson & Johnson	Health Care	2.79%	United States of America
ServiceNow, Inc.	Information Technology	2.66%	United States of America
Applied Materials, Inc.	Information Technology	2.43%	United States of America
Accenture Plc Class A	Information Technology	2.39%	United States of America
Lam Research Corporation	Information Technology	2.39%	United States of America
Adobe Inc.	Information Technology	2.17%	United States of America
Intuit Inc.	Information Technology	1.98%	United States of America
Palo Alto Networks, Inc.	Information Technology	1.86%	United States of America
Analog Devices, Inc.	Information Technology	1.75%	United States of America
Intel Corporation	Information Technology	1.73%	United States of America

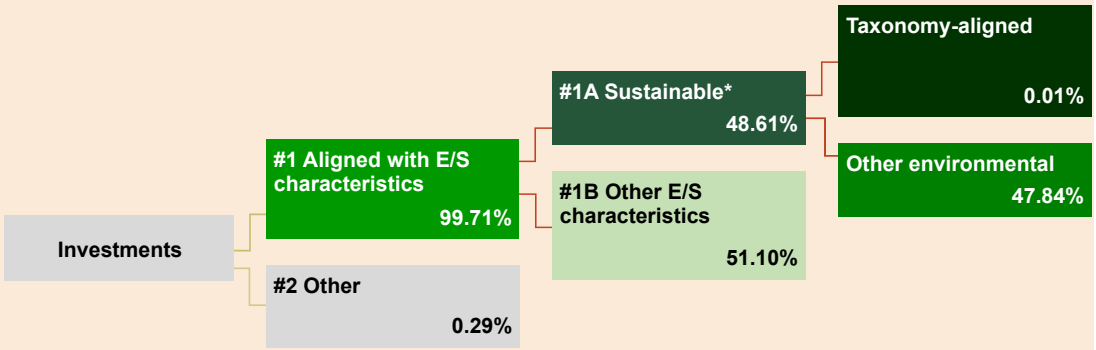

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

48.61% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	53.60%
Health Care	12.33%
Industrials	11.48%
Consumer Discretionary	8.46%
Materials	6.68%
Energy	3.35%
Integrated Oil & Gas	*0.86%*
Oil & Gas Equipment & Services	*1.31%*
Oil & Gas Refining & Marketing	*0.66%*
[Unassigned]	*0.53%*
Consumer Staples	2.04%
Communication Services	0.80%
Utilities	0.69%
Electric Utilities	*0.69%*
Real Estate	0.30%
Cash & Derivatives	0.29%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0.01% of the Fund's investments were deemed sustainable investments with an enviromental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

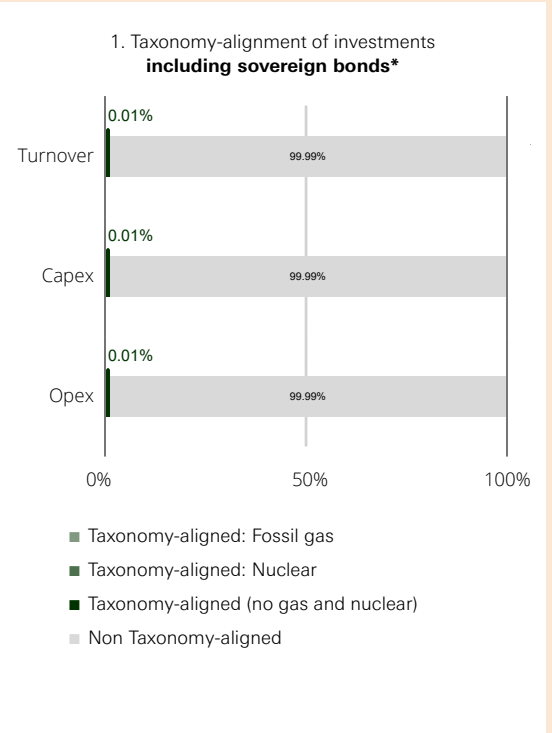

☐ In fossil gas ☐ In nuclear energy

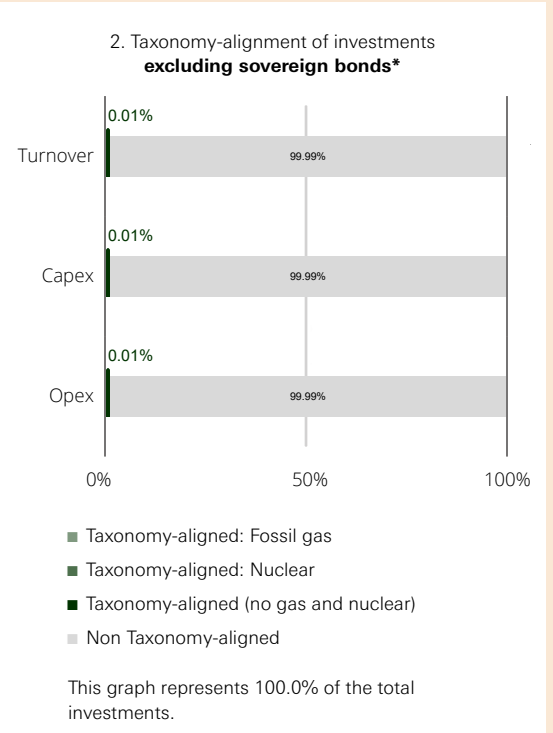

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.01%	0.01%	0.00%
Revenue - Non Taxonomy-aligned	99.99%	99.99%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.01%	0.01%	0.00%
CAPEX - Non Taxonomy-aligned	99.99%	99.99%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.01%	0.01%	0.00%
OPEX - Non Taxonomy-aligned	99.99%	99.99%	100.00%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 47.84%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to certain characteristics. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of the Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is an equity index based on the Parent Index and which reflected Shariah investment principles and included large and mid-cap securities of the US equity markets as determined by the Index provider.

The Index was constructed from the Parent Index by applying valuesand climate-based exclusionary criteria (as defined by the Index provider in the Index methodology).Each of the exclusionary criteria may apply thresholds which were defined by the Index provider and set out in the Index methodology and which may be amended from time to time. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective. The use of the MSCI ESG Universal Indexes Methodology in the construction of the Index is to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile. To achieve this, the Index provider applied the following steps to the Parent Index:(i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index;
(ii) the Index provider defined an ESG re-weighting factor that reflected an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and
(iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.

Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating System can be found on the Index provider's website.

The Index also excluded securities based on the following criteria:

- Unrated Companies – Companies not assessed by MSCI ESG Research on MSCI ESG Ratings, MSCI ESG Controversies, MSCI Business Involvement Screening Research and MSCI Climate Change Metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
ESG score (third-party score)	7.37	7.37
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	89.79	89.80

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI USA Islamic ESG Universal Screened Select Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.37	6.71
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	89.79	115.52

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI USA Islamic Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI WORLD CLIMATE PARIS ALIGNED UCITS ETF

Legal Entity Identifier: 213800J6KRZLFUV6AU98

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 47.94% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the MSCI World Climate Paris Aligned Index (the "Index"), the Fund the environmental and/or social characteristics :

- Seeking to reduce exposure to transition and physical climate risks and pursuing opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements;
- Incorporating the Task Force on Climate-related Financial Disclosures recommendations; and
- Exceeding the minimum standards of the EU Paris-Aligned Benchmark.

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which removed companies based on sustainability and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to achieve the climate related targets set out in the binding elements section of the SFDR Annex.

During the reporting period the Index qualified as an EU Paris-Aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011 and was designated as a reference benchmark for the purpose of attaining the environmental or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	44.70	109.51

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	44.70	109.51
	31 December 2024	40.39	101.87
	31 December 2023	34.56	105.49

Broad Market Index - MSCI World Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was designed to meet and exceed the minimum standards of the EU Paris Aligned Benchmarks regulation. The eligible universe was constructed once Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed. Securities that faced very severe and severe controversies pertaining to Environmental issues were also removed (PAI 7,8,9). Embedded in the ESG controversy score was an evaluation of UN Declaration of Human Rights, the ILO Declaration on Fundamental Principles and Rights at Work, and the UNGC which removed securities having faced very severe controversies (PAI 10). The resulting eligible universe was then used to construct the Index using a sophisticated optimisation approach that reduced exposure to carbon intensity (PAI 1,2), reduced fossil fuel exposure (PAI 2,4) and increased exposure to securities with credible emission reduction targets (PAI 1,2,3,4,5). The optimisation also applied overweighting of companies providing sustainable/green solutions (PAI 7,8,9) and those providing green revenues.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	2,919.27	2,214,957,366.65
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	6.20	33.55
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	44.70	109.51
4. Exposure to companies active in the fossil fuel sector	31 December 2025	2.56%	0.79%
5a. Share of non-renewable energy consumption	31 December 2025	46.44%	52.84%
5b. Share of non-renewable energy production	31 December 2025	44.34%	61.48%
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.02%	-0.04%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.04	9.02
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	0.16	5.86
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.24%	0.58%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.23%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
NVIDIA Corporation	Information Technology	6.36%	United States of America
Microsoft Corporation	Information Technology	4.98%	United States of America
Apple Inc.	Information Technology	4.84%	United States of America
Amazon.com, Inc.	Consumer Discretionary	2.74%	United States of America
Alphabet Inc. Class C	Communication Services	2.22%	United States of America
Meta Platforms Inc Class A	Communication Services	2.05%	United States of America
Tesla, Inc.	Consumer Discretionary	1.98%	United States of America
Broadcom Inc.	Information Technology	1.92%	United States of America
JPMorgan Chase & Co.	Financials	1.41%	United States of America
Alphabet Inc. Class A	Communication Services	1.27%	United States of America
Digital Realty Trust, Inc.	Real Estate	1.14%	United States of America
Equinix, Inc.	Real Estate	1.13%	United States of America
Eli Lilly and Company	Health Care	1.08%	United States of America
International Business Machines Corporation	Information Technology	0.97%	United States of America
Xylem Inc.	Industrials	0.85%	United States of America

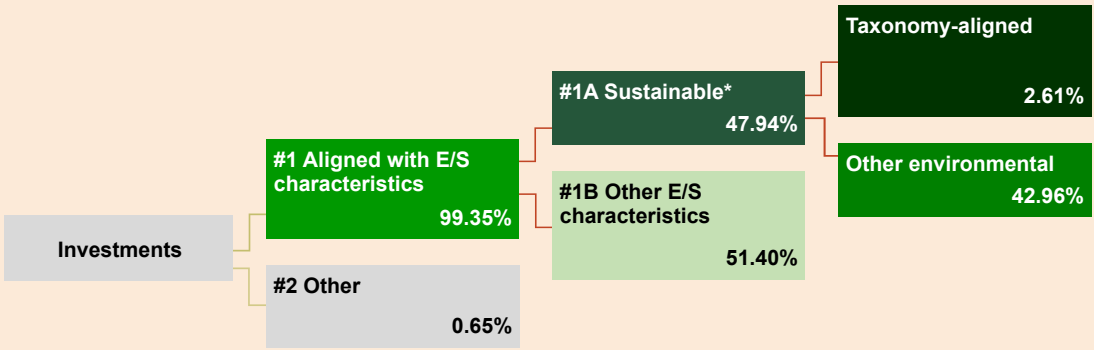

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

47.94% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	30.34%
Financials	17.62%
Industrials	11.18%
Health Care	10.46%
Consumer Discretionary	9.30%
Communication Services	7.91%
Real Estate	6.73%
Utilities	2.28%
Electric Utilities	*1.71%*
Materials	2.20%
Consumer Staples	1.34%
Cash & Derivatives	0.65%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

2. % of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

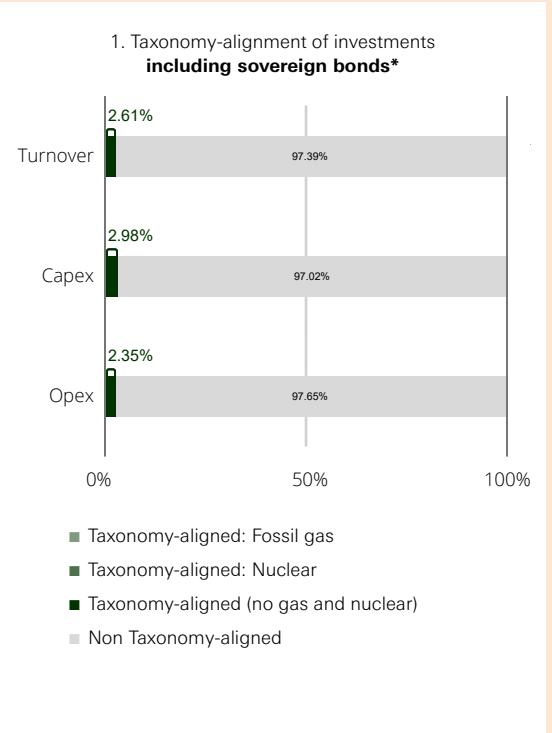

☐ In fossil gas ☐ In nuclear energy

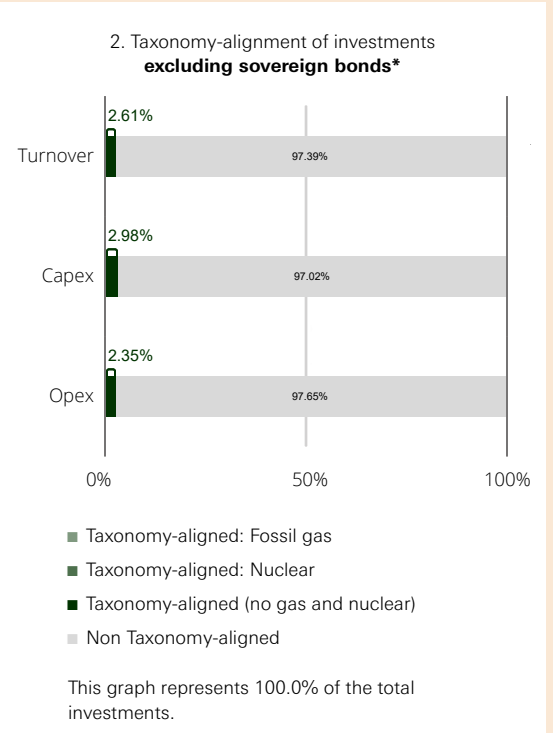

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.78%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	2.61%	2.44%	1.41%
Revenue - Non Taxonomy-aligned	97.39%	97.56%	98.59%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.98%	2.78%	1.86%
CAPEX - Non Taxonomy-aligned	97.02%	97.22%	98.14%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	2.35%	2.33%	1.81%
OPEX - Non Taxonomy-aligned	97.65%	97.67%	98.19%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 42.96%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index was designed to support investors seeking to reduce their exposure to transition and physical climate risks and who wish to pursue opportunities arising from the transition to a lower-carbon economy while aligning with the Paris Agreement requirements. The index incorporated the Task Force on Climate-related Financial Disclosures recommendations and was designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time);
2. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) as detailed in the binding elements below.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is an equity index based on the MSCI World Index, and includes large and midcap securities across 23 Developed Markets countries. The Index is constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to:

- controversial weapons;
- ESG controversies;
- tobacco;
- environmental harm;
- thermal coal mining and distribution;
- oil and gas;
-

Furthermore, the Index incorporates the Task Force on Climate-related Financial Disclosures "TCFD" recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark. On each rebalancing date, the Index is constructed using an optimisation process (as detailed in the Index methodology) to achieve the following aims:

- exceed the minimum technical requirements laid out in the draft EU Delegate Act;
- align with the recommendations of the TCFD;
- align with a 1.5°C climate scenario using the MSCI Climate Value-at-Risk and a "self-decarbonisation" rate of 10% year on year;
- reduce the Index's exposure to physical risk arising from extreme weather events by at least 50%;
- shift index weight from "brown" to "green" using the MSCI Low Carbon transition score and by excluding categories of fossil-fuel-linked companies;
- increase the weight of companies which are exposed to climate transition opportunities and reduce the weight of companies which are exposed to climate transition risks;
- reduce the weight of companies assessed as high carbon emitters using scope 1, 2 and 3 emissions;
- increase the weight of companies with credible carbon reduction targets through the weighting scheme; and
- achieve a modest tracking error compared to the Parent Index and low turnover.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	44.70	44.81

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI World Climate Paris Aligned Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	44.70	109.51

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI WORLD ISLAMIC SCREENED UCITS ETF

Legal Entity Identifier: 213800U32MXHBTON4K27

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 54.76% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI World Islamic ESG Universal Screened Select Index (the "Index"), the Fund :

- An improvement on the ESG rating against that of the MSCI World Islamic Index (the "Parent Index").
- An improvement in greenhouse gas intensity against that of the Parent Index.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria, excluded companies to reduce greenhouse gas intensity and which weighted companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.67	6.98
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	123.59	153.85

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Islamic Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	7.67	6.98
	31 December 2024	7.74	7.27
	31 December 2023	7.92	7.48
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	123.59	153.85
	31 December 2024		
	31 December 2023		

Broad Market Index - MSCI World Islamic Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

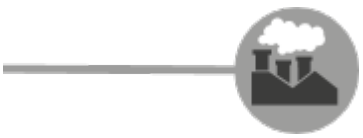

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. As per the Index methodology, securities involved in Thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the Index was calculated. In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, (PAI 10). The methodology also considered the aggregate ESG score (as calculated by MSCI ESG Research) which was applied to all eligible securities post business activity screen and weighted accordingly. The Index increased the weightings of companies with robust ESG characteristics, including those that showed improvement in the direction of their rating over the most recent 12 months, while reducing the weight of those companies who lagged behind their industry peers in terms of ESG quality.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index

1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	3,566.47	1,210,825,522.89
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	123.59	153.85
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Islamic Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Microsoft Corporation	Information Technology	9.33%	United States of America

Financials	0.02%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

1. % of the Fund's investments were deemed sustainable investments with an enviromental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☑ Yes:

☑ In fossil gas ☑ In nuclear energy

☐ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

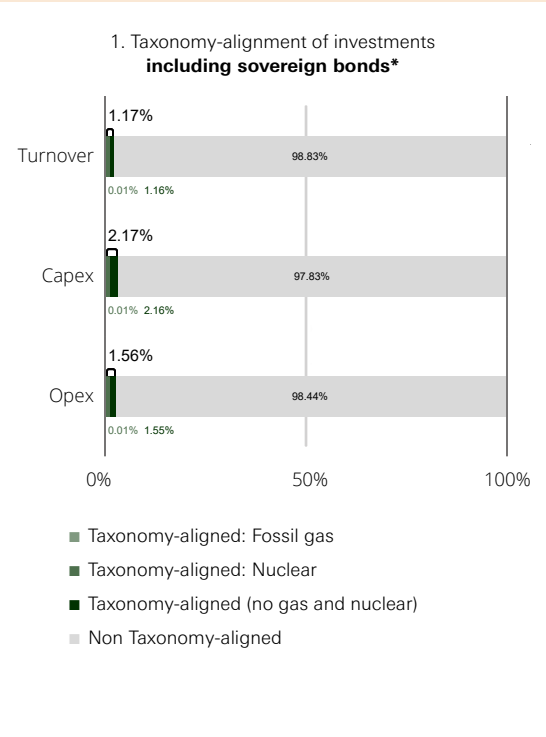

Taxonomy-aligned activities are expressed as a share of:

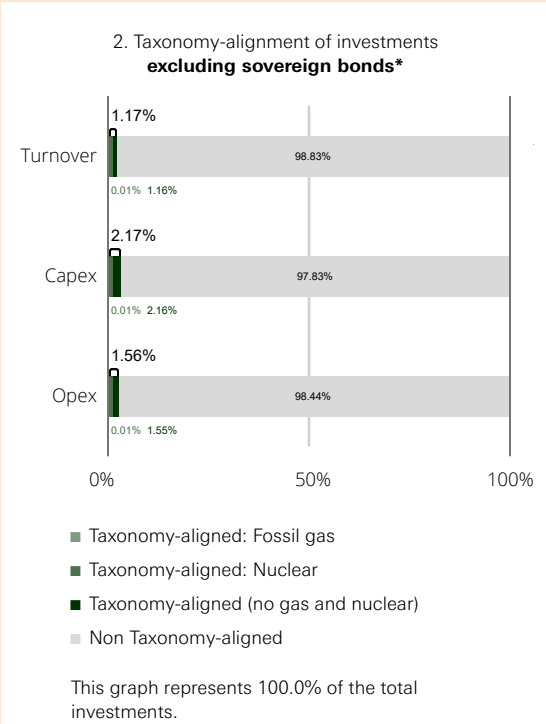

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.94%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.01%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	1.16%	1.03%	0.67%
Revenue - Non Taxonomy-aligned	98.83%	98.96%	99.33%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	2.16%	2.33%	1.63%
CAPEX - Non Taxonomy-aligned	97.83%	97.67%	98.37%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.55%	1.57%	1.34%
OPEX - Non Taxonomy-aligned	98.44%	98.43%	98.66%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 50.04%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other Shariah-compliant instruments such as financial derivative instruments may have been used for liquidity and hedging purposes in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index.
The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to certain characteristics. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index; and
2. The Index applies the MSCI ESG Universal Indexes Methodology in the construction of t he Index in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is an equity index based on the Parent Index and which reflected Shariah investment principles and included large- and mid-cap securities across 23 Developed Markets countries as determined by the Index provider. The Index was constructed from the Parent Index by applying values and climate-based exclusionary criteria (as defined by the Index provider in the Index methodology). Each of the exclusionary criteria may apply thresholds which are defined by the Index provider and set out in the Index methodology and which may be amended from time to time. If greenhouse gas intensity is not at least 30% lower than the Parent Index, after applying initial exclusions, additional securities are excluded from the eligible universe to achieve a reduction of 30% greenhouse gas intensity against the Parent Index.

In addition to the application of the exclusionary criteria, the Index applied the MSCI ESG Universal Indexes methodology to achieve its ESG objective. The use of the MSCI ESG Universal Indexes Methodology in the construction of the Index is to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile.
To achieve this, the Index provider applied the following steps to the Parent Index: (i) the Index provider excluded the securities with the weakest ESG profile from the Parent Index; (ii) the Index provider defined an ESG re-weighting factor that reflected an assessment of both the current ESG profile, based on the current MSCI ESG Rating, as well as the trend in that profile; and (iii) the Index provider re-weighted securities from the free-float market cap weights of their parent index using this combined ESG score to construct the Index.

Further information on the Index provider's ESG re-weighting factors and the MSCI ESG Rating system can be found on the Index provider's website.

The Index also excluded securities based on the following criteria:

- Unrated Companies – Companies not assessed by MSCI ESG Research on MSCI ESG Ratings, MSCI ESG Controversies, MSCI Business Involvement Screening Research and MSCI Climate Change Metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
ESG score (third-party score)	7.67	7.66
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	123.59	123.68

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - MSCI World Islamic ESG Universal Screened Select Index

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.67	6.98
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	123.59	153.85

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Islamic Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI WORLD SMALL CAP SCREENED UCITS ETF

Legal Entity Identifier: 2138004YMBEWQ8NGOY60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 22.62% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI World Small Cap Selection Screens Index (the "Index"), the Fund

:

- Better management of a broad range of environmental and social risks, and where applicable, positioning to meet demand for provision of goods and services that had a positive environmental or social contribution, collectively measured by MSCI ESG ratings. MSCI ESG ratings provided an opinion of companies' management of financially relevant ESG risks and opportunities. Each company was assessed on relevant environmental, social and
governance themes, and where applicable, positioning to meet market demand for the provision of products and services that had a positive environmental or social contribution. The themes determined by MSCI were climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance and corporate behaviour. The Fund targeted this

through an improvement of the MSCI ESG rating against that of the MSCI World Index (the "Parent Index")

The Fund sought to achieve the promotion of th characteristic by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which selected companies in order to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.34	6.08

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	7.34	6.08
	31 December 2024	7.25	6.06
	31 December 2023	7.14	5.93

Broad Market Index - MSCI World Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainablity related investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	4,479.70	600,207,355.40
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	41.06	81.58

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	71.59	154.79
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.06%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	12.92%	16.91%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.04%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Guidewire Software, Inc.	Information Technology	0.45%	United States of America
TechnipFMC plc	Energy	0.41%	United Kingdom of Great Britain and Northern Ireland
US Foods Holding Corp.	Consumer Staples	0.40%	United States of America
Comfort Systems USA, Inc.	Industrials	0.38%	United States of America
Lumentum Holdings, Inc.	Information Technology	0.38%	United States of America
Flex Ltd	Information Technology	0.36%	United States of America
nVent Electric plc	Industrials	0.36%	United States of America
XPO, Inc.	Industrials	0.36%	United States of America
Royal Gold, Inc.	Materials	0.35%	United States of America
Unum Group	Financials	0.35%	United States of America
ATI Inc.	Industrials	0.34%	United States of America
Jones Lang LaSalle Incorporated	Real Estate	0.34%	United States of America
East West Bancorp, Inc.	Financials	0.33%	United States of America
MasTec, Inc.	Industrials	0.33%	United States of America
TKO Group Holdings, Inc. Class A	Communication Services	0.33%	United States of America

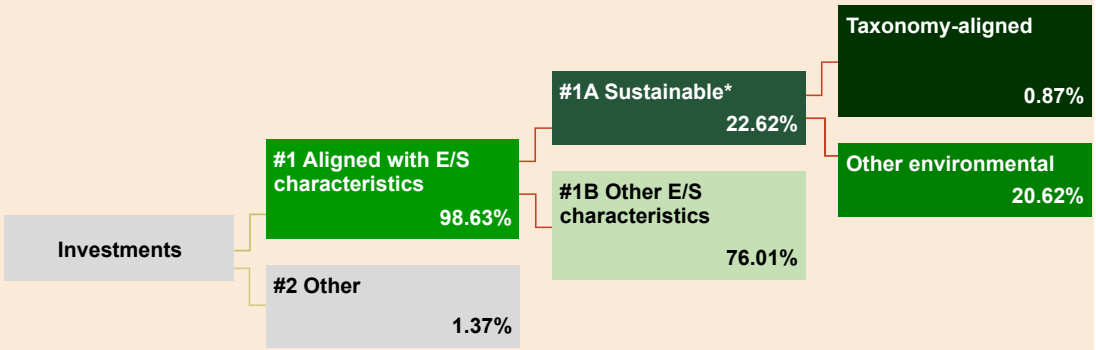

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

22.62% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Industrials	19.80%
Financials	16.94%
Consumer Discretionary	11.99%
Information Technology	11.94%
Health Care	9.76%

Materials	7.70%
Consumer Staples	4.04%
Communication Services	3.78%
Energy	2.53%
Coal & Consumable Fuels	*0.05%*
Oil & Gas Equipment & Services	*1.4 %*
Oil & Gas Refining & Marketing	*0. %*
Oil & Gas Storage & Transportation	*0.5 %*
Utilities	1.69%
Electric Utilities	*0.0 %*
Gas	*0.85%*
Multi-Utilities	*0.18%*
Cash & Derivatives	1.37%
Other	0.02%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0. % of the Fund's investments were deemed sustainable investments with an environmental objective aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

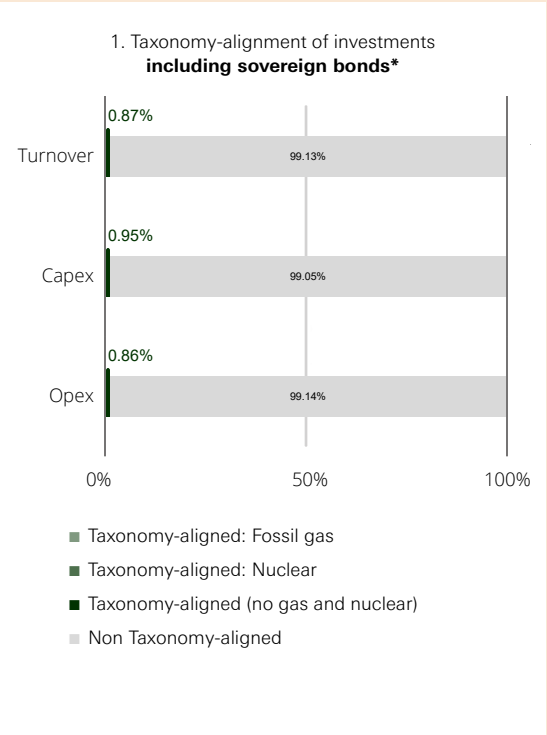

Taxonomy-aligned activities are expressed as a share of:

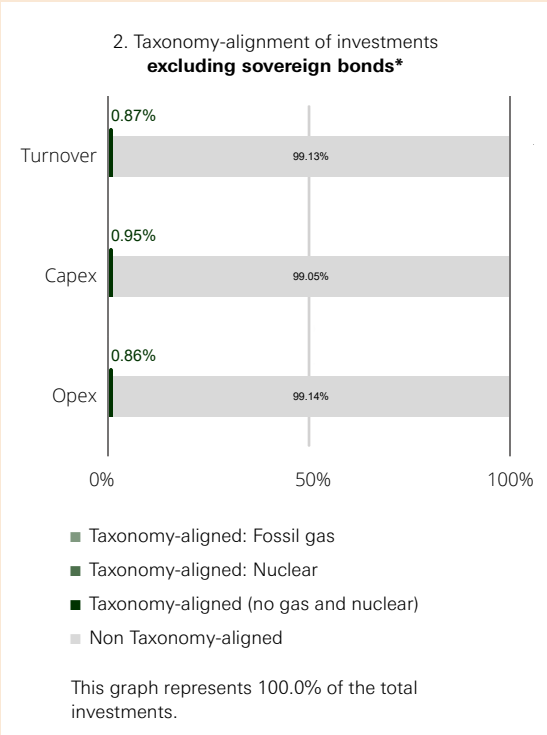

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.42%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.87%	0.63%	0.15%
Revenue - Non Taxonomy-aligned	99.13%	99.37%	99.85%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.95%	0.72%	0.25%
CAPEX - Non Taxonomy-aligned	99.05%	99.28%	99.75%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.86%	0.62%	0.14%
OPEX - Non Taxonomy-aligned	99.14%	99.38%	99.86%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 20.62%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index.

The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this in the following ways:

1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time);
2. The Index applies the MSCI Selection methodology (which is available on the Index provider's website) to achieve its ESG objective by only selecting companies that have the highest MSCI ESG Ratings, in order to increase exposure to those companies demonstrating both a robust ESG profile as well as a positive trend in improving that profile, while seeking to minimise exclusions from their parent index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is an equity index based on the MSCI World Small Cap Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The small-cap market coverage in the Index was derived from the Parent Index by applying the Index provider's criteria on free-float adjustment, size & liquidity. The Index was constructed from the Parent Index by excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time): Furthermore, the Index applied the MSCI Selection methodology (which is available on the Index provider's website) to achieve its ESG objective. To achieve this, the Index provider applied the following steps:
i. After application of exclusionary criteria, securities are then weighted and ranked on the basis of their ESG score (as determined by the MSCI Selection scoring system);
ii. Securities are then selected in the following order until the target 50% coverage of the sectors included in the Parent Index is reached;
a. Firstly, securities in the top 35% cumulative free float-adjusted market capitalisation coverage of the ranked universe are selected, including the first security that increases the cumulative coverage above 35%;
b. then, 'AAA' rated securities in the top 50% cumulative free float-adjusted market capitalisation coverage of the ranked universe are selected, including the first security that increases the cumulative coverage above 50%;
c. then, current Index constituents in the top 65% cumulative free float-adjusted market capitalisation coverage of the ranked universe are selected, including the first security that increases the cumulative coverage above 65% if that security is a current Index constituent; and
d. lastly, the remaining eligible securities in the ranked universe.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
ESG score (third-party score)	7.34	7.33

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark -

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.34	6.08

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC MSCI WORLD VALUE SCREENED UCITS ETF

Legal Entity Identifier: 213800HBCCB8EAOBHT49

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 42.94% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the MSCI World Value Select Screens Advanced Index (the "Index"), the Fund

:

- Better management of a broad range of environmental and social risks, and where applicable, positioning to meet demand for provision of goods and services that had a positive environmental or social contribution, collectively measured by MSCI ESG ratings. MSCI ESG ratings provided an opinion of companies' management of financially relevant ESG risks and opportunities. Each company was assessed on relevant environmental, social and governance themes, and where applicable, positioning to meet market demand for the

provision of products and services that had a positive environmental or social contribution. The themes determined by MSCI were climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition, social opportunities, corporate governance and corporate behaviour. The Fund targeted this through an improvement of the MSCI ESG rating against that of the MSCI World Index (the "Parent Index")

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and improved the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.96	7.04

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
ESG score (third-party score)	31 December 2025	7.96	7.04
	31 December 2024	8.17	7.03
	31 December 2023	8.30	7.15

Broad Market Index - MSCI World Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

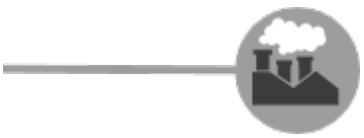

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using MSCI proprietary data on each security's business involvement. The Business Involvement Screening Research (BISR) highlights each security's involvement or adherence to Global sanctions, Controversies and global norms (PAI 10, 13), Carbon and Sustainable Impact (Positive screening) (PAI 8, 9). In addition, a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles (PAI 10). In addition, securities involved in thermal coal mining and generation, Oil & Gas, were screened at a minimum threshold level and controversial weapons (PAI 14) were removed before the final index was calculated.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	7,507.11	990,737,378.56

2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	34.83	99.23
3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	68.39	124.36
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	1.16%	1.80%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.00%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
NVIDIA Corporation	Information Technology	6.93%	United States of America
Microsoft Corporation	Information Technology	4.02%	United States of America
Apple Inc.	Information Technology	3.10%	United States of America
Citigroup Inc.	Financials	2.42%	United States of America
Cisco Systems, Inc.	Information Technology	2.39%	United States of America
Merck & Co., Inc.	Health Care	2.38%	United States of America
Applied Materials, Inc.	Information Technology	2.3 %	United States of America
Verizon Communications Inc.	Communication Services	2.20%	United States of America
Sony Group Corporation	Consumer Discretionary	2.01%	Japan
Pfizer Inc.	Health Care	1.99%	United States of America
Gilead Sciences, Inc.	Health Care	1.97%	United States of America
ServiceNow, Inc.	Information Technology	1.83%	United States of America
Comcast Corporation Class A	Communication Services	1.71%	United States of America
Adobe Inc.	Information Technology	1.69%	United States of America
Intuit Inc.	Information Technology	1.3 %	United States of America

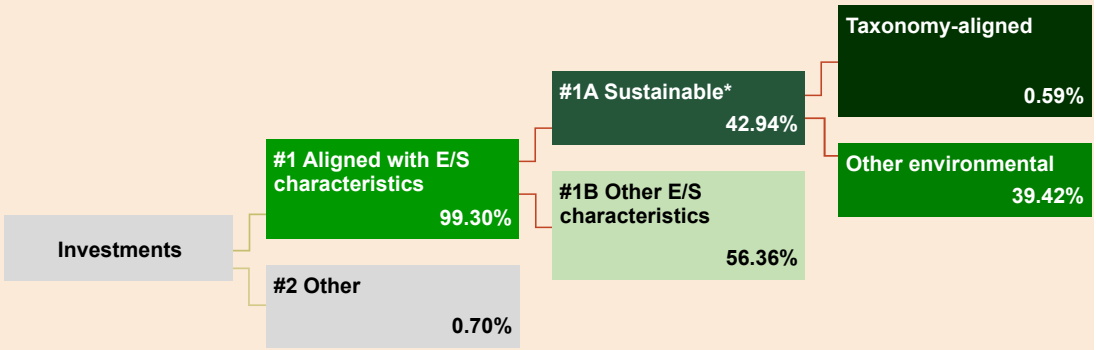

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

42.94% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	30.71%
Financials	19.08%
Health Care	13.89%
Industrials	10.53%
Consumer Discretionary	8.95%
Communication Services	6.87%
Materials	4.46%
Consumer Staples	2.85%
Real Estate	1.03%
Cash & Derivatives	0.70%
Utilities	0.60%
Electric Utilities	*0.46%*
Multi-Utilities	*0.12%*
Energy	0.34%
Oil & Gas Storage & Transportation	*0.3 %*
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0. % of the Fund's investments were deemed sustainable investments with an enviromental objective aligned with the EU Taxonomy.

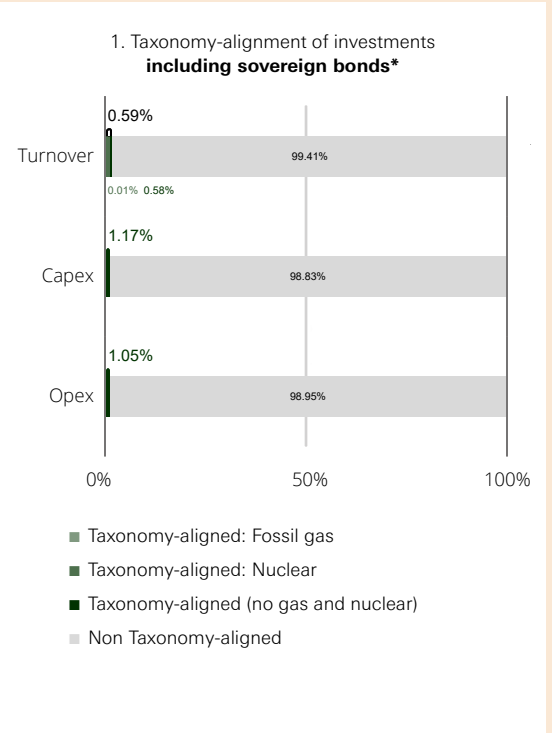

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

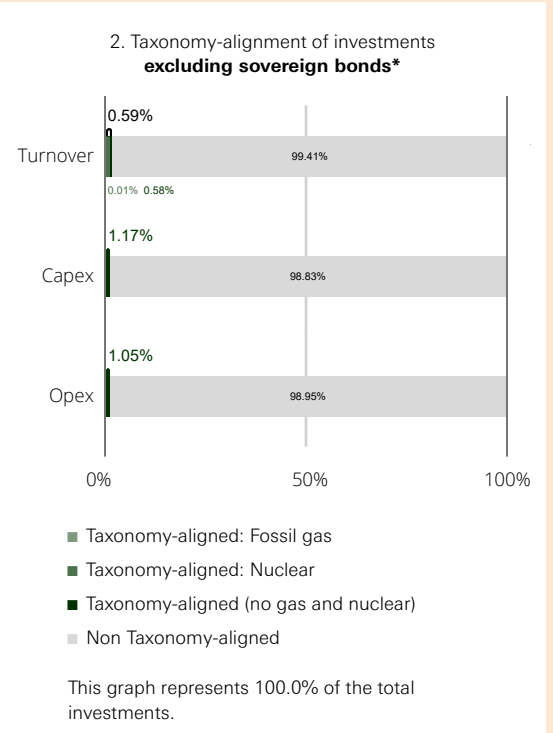

- [x] Yes:
  - [ ] In fossil gas
  - [x] In nuclear energy
- [ ] No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.46%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.58%	0.72%	0.63%
Revenue - Non Taxonomy-aligned	99.41%	99.28%	99.37%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.17%	1.47%	1.18%
CAPEX - Non Taxonomy-aligned	98.83%	98.53%	98.82%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	1.05%	1.42%	1.54%
OPEX - Non Taxonomy-aligned	98.95%	98.58%	98.46%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 39.42%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve an improvement of the MSCI ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. Excluding securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time); and
2. The Index applies the MSCI ESG Target methodology (which is available on the Index provider's website) to achieve its ESG objective by maximizing the exposure to the target factor(s) less a penalty for the common factor and stock-specific risk characteristics of each potential constituent, as well as placing an upper bound on the predicted tracking error of the Index, in order to maximize the exposure to the target Factor along with 20% ESG score improvement of the Factor index relative to its parent market-cap weighted index.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Index is an equity index based on the MSCI World Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider.

The Index first excluded securities of companies with exposure (as defined by the Index provider in the Index methodology) to any of the following characteristics (each characteristic will apply thresholds, as defined by the Index provider and set out in the Index methodology and which may be amended from time to time). Furthermore, the Index aimed to maximise the exposure to the Value Factor along with a 20% ESG score improvement of the Index relative to the Parent Index. In order to maximise exposure to the Value Factor once the exclusionary criteria referred to above were applied, the Index provider used an optimisation technique to determine the remaining securities in the Index using a proprietary factor model which sought to maximise the performance of each security in terms of the Value Factor in relation to the overall market, while minimising the ex-ante tracking error relating to the Parent Index. The proprietary factor model measured the exposure of each remaining security to the Value Factor using three value-specific variables (price-to-book value, price-to-forward earnings and enterprise value-to-cash flow from operations) and ranked the securities in such a way that Index comprises those securities providing maximum exposure to the Value Factor.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

In seeking to achieve its investment objective, the Fund invest in the constituents of the Index in generally the same proportions in which they were included in the Index.

In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark
ESG score (third-party score)	7.96	7.95

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark -

How did this financial product perform compared with the broad market index?

Sustainability Indicator	Fund	Broad Market Index
ESG score (third-party score)	7.96	7.04

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - MSCI World Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC NASDAQ Global Climate Tech UCITS ETF **Legal Entity Identifier:** 213800DKCS3RGHPANZ73

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 74.39% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the NASDAQ CTA Global Climate Technology Index (the "Index"), the Fund the environmental and/or social characteristic :

- the promotion of climate technology by investing in companies where the objective of the company is instrumental in transitioning to a carbon neutral global economy ("Climate Technology").

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which comprises, amongst other things, companies considered as "Enablers", "Enhancers" and "Engagers" (as defined by the Index Provider and further explained below) in the Climate Technology space and which applies a number of ESG related exclusions, which include controversial weapons, cannabis, thermal coal, oil & gas, severe ESG controversies and companies which do not adhere to the UNGC principles.

The Index has been designated as a reference benchmark for the purpose of attaining the environmental and social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Reference Benchmark

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - NASDAQ CTA Global Climate Technology Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.

In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

This Fund did not consider principal adverse impacts.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
GE Vernova Inc.	Industrials	4.90%	United States of America
Analog Devices, Inc.	Information Technology	4.60%	United States of America
Tesla, Inc.	Consumer Discretionary	4.52%	United States of America
Eaton Corp. Plc	Industrials	4.48%	United States of America
Schneider Electric SE	Industrials	4.48%	France
ABB Ltd.	Industrials	4.12%	Switzerland
Deere & Company	Industrials	4.09%	United States of America
Johnson Controls International plc	Industrials	4.01%	United States of America
Trane Technologies plc	Industrials	3.49%	United States of America
Emerson Electric Co.	Industrials	3.14%	United States of America
BYD Company Limited Class H	Consumer Discretionary	3.01%	China
Contemporary Amperex Technology Co., Limited Class A	Industrials	2.93%	China
Delta Electronics, Inc.	Information Technology	2.92%	Taiwan

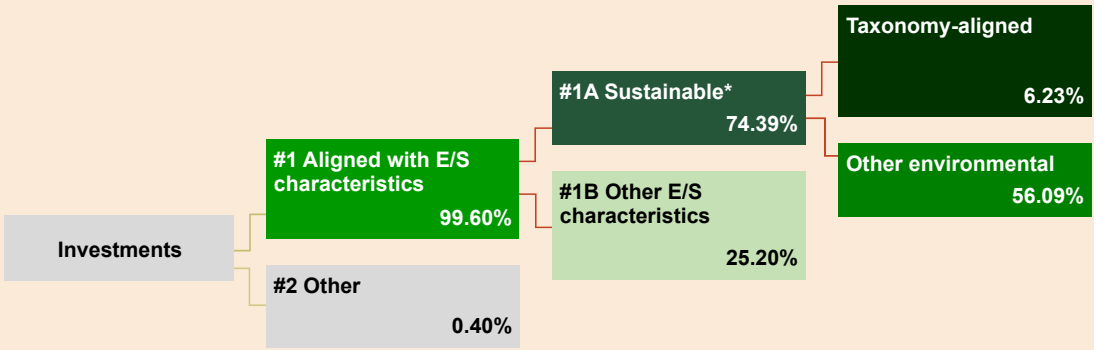

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

74.39% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Industrials	54.68%
Information Technology	20.41%
Consumer Discretionary	13.40%
Materials	5.83%
Utilities	4.86%
Electric Utilities	*2.15%*
Cash & Derivatives	0.40%
Financials	0.23%
Energy	0.12%
Oil & Gas Equipment & Services	*0.07%*
Oil & Gas Refining & Marketing	*0.05%*
Consumer Staples	0.06%
Health Care	0.01%
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

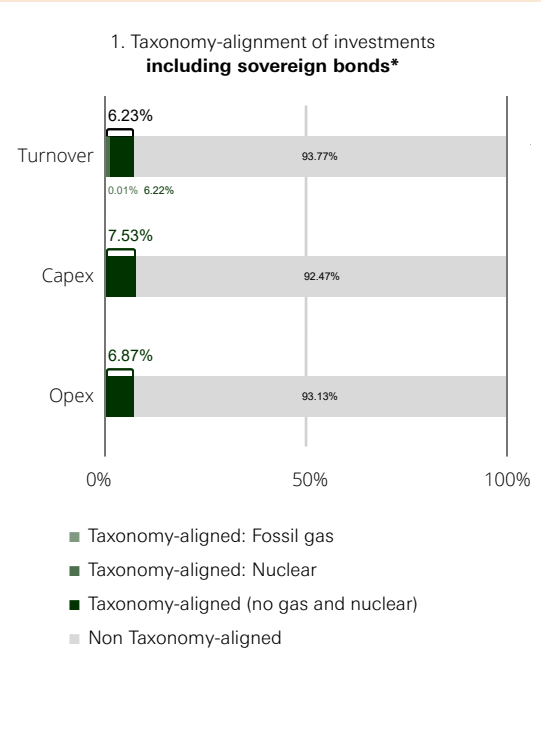

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

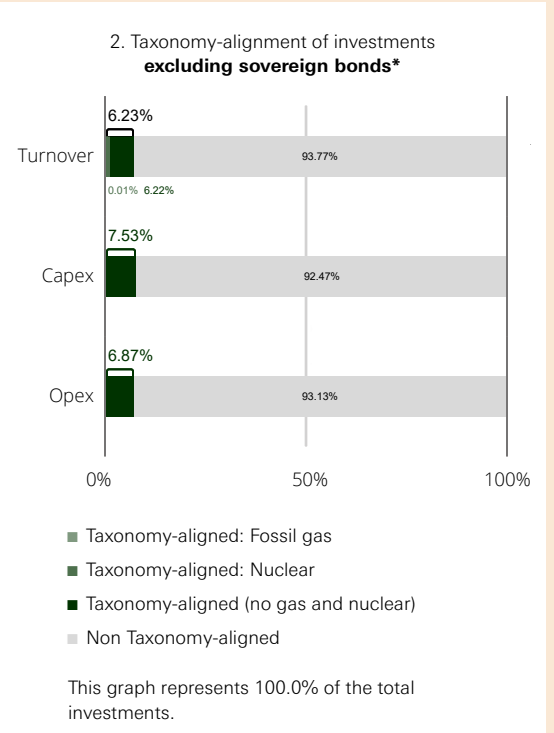

- [x] Yes:
  - [ ] In fossil gas
  - [x] In nuclear energy
- [ ] No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 4.59%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.01%	0.00%	0.01%
Revenue - Taxonomy-aligned (no gas and nuclear)	6.22%	0.00%	2.80%
Revenue - Non Taxonomy-aligned	93.77%	100.00%	97.19%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	7.53%	0.00%	4.14%
CAPEX - Non Taxonomy-aligned	92.47%	100.00%	95.86%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	6.87%	0.00%	4.47%
OPEX - Non Taxonomy-aligned	93.13%	100.00%	95.53%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 56.09%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed. The investment objective of the Fund was to replicate the performance of the Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In replicating the performance of the Index, the Fund promoted certain environmental, social and/or governance characteristics and had been categorised as an Article 8 fund for the purpose of SFDR.

1. A company must be classified by the CTA as a Climate Technology company, specifically as belonging to one of the below categories, in order to include it in the Index.
Enablers:
Power Sources & Power Storage - Companies classified as Power Sources and Power Storage enable the transition toward cleaner sources of energy across the economy including within industry, buildings (e.g. residential and commercial) and transportation. Power Sources and Power Storage include companies involved in biofuels, battery technology, fuel cells, green hydrogen, power management (including power-focused semiconductors) and renewable power generation (e.g. hydroelectric, solar and wind power).
Engagers:
Climate Infrastructure – Companies classified as Climate Infrastructure are engaged in technologies focused on reducing the carbon impact of commercial, industrial and residential buildings including advanced building materials and mechanical systems (e.g. heating, cooling, ventilation, plumbing and electric), electric vehicle charging infrastructure (e.g. public and private charging solutions), process improvements (e.g. agricultural, electrical and material technologies that improve the carbon impact of existing construction methods) and smart cities/grid (e.g. grid communication and intelligence, load control, smart metering).
Enhancers:
Adaptation – Companies classified as Adaptation provide consulting, engineering and/or software solutions to clients in order to design, construct and retrofit projects within industry, buildings and transportation including advancements in renewable power delivery, power generation and power use.
AgTech & FoodTech - Companies classified as AgTech & FoodTech are principally engaged in technology related to reducing carbon and methane emissions through the development of products intended to displace conventional meat consumption (e.g. alternative/plant-based proteins and cellular agriculture to displace beef, chicken, pork, turkey, etc.) as well as technologies designed to reduce the intensity of traditional farming methods and their related logistical/transportation impacts through engagement in indoor and vertical farming methods.
Transportation – Companies classified as Transportation are enhancing the development of less carbon intensive transportation products (e.g. battery, fuel cell, renewable power) including macromobility (e.g. passenger aircraft, buses, trains and other forms of mass transit) and micromobility (air mobility taxis/vertical take-off and landing plans vehicles, passenger cars and motorcycles, delivery/fleet/logisitcs/last-mile trucks and vehicles).

2. The following ESG exclusions were applied:
a) Companies involved in controversial weapons; b) Companies involved in power generation, power generation capacity or extraction relating to thermal coal; c) Companies which are non-compliant with the UN Global Compact Principles; d) Companies with a Sustainalytics controversies score of 5; e) Companies involved in oil and gas exploration and production, refining, transportation and/or storage; and f) Companies involved in cannabis production and/or with significant ownership of another company with involveme nt in the development and cultivation of cannabis.
What constitutes "involved" was determined by the Index Provider. Details of any revenue thresholds applicable to the ESG exclusions can be found in the Index methodology .

Each remaining security then received a Climate Technology Score which comprised the following:

· Thematic Revenue score - The Thematic Revenue Score is a quantitative assessment of each company's approximated revenue share derived from Climate Technology.
· Transition Score - The Transition Score is a qualitative assessment of each company's level of transition toward a fully carbon-neutral portfolio of products and services.
· Innovation score - The Innovation Score is a qualitative assessment of each company's impact toward achieving carbon neutrality.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  Index is a modified free float market capitalisation-weighted index designed to measure the performance of a selection of companies in global climate technology which are instrumental in the transition to a carbon neutral global economy, as determined by the Index Provider. The companies are selected for inclusion in the Index based on classification by Consumer Technology Association (CTA), as further detailed above.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

  In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Sustainability Indicator	Fund	Reference Benchmark

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - NASDAQ CTA Global Climate Technology Index

How did this financial product perform compared with the broad market index?

The Fund tracks a bespoke index that only selects companies in global climate technology universe, as such there is no Broad Market Index to compare against.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC UK SCREENED EQUITY UCITS ETF

Legal Entity Identifier: 213800HYLPRGCNY3OL03

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☑ **No**
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 38.89% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the FTSE UK ESG Low Carbon Select Index (the "Index"), the Fund

:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE UK Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	42.29	92.62
ESG Score	4.35	3.86
Fossil Fuel Reserve Exposures	1,942.09	3,968.23

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index -

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	42.29	92.62
	31 December 2024	56.58	111.41
	31 December 2023	74.98	83.45
ESG Score	31 December 2025	4.35	3.86
	31 December 2024	4.31	3.85
	31 December 2023	4.27	3.93
Fossil Fuel Reserve Exposures	31 December 2025	1,942.09	3,968.23
	31 December 2024	2,782.78	4,614.89
	31 December 2023	3,633.24	4,010.47

Broad Market Index - FTSE UK Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainablity investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	872.40	149,478,981.97
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	23.38	60.47

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	42.29	92.62
4. Exposure to companies active in the fossil fuel sector	31 December 2025	6.87%	19.86%
5a. Share of non-renewable energy consumption	31 December 2025	43.85%	54.79%
5b. Share of non-renewable energy production	31 December 2025	32.40%	51.15%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 December 2025	0.17	0.31
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.04%	-0.06%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	170.39	64.00
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	72.73	56.80
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.00%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	0.13%	0.69%
12. Unadjusted gender pay gap	31 December 2025	17.65%	14.64%
13. Board gender diversity	31 December 2025	46.40%	45.71%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	2.47%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE UK Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Barclays PLC	Financials	11.28%	United Kingdom of Great Britain and Northern Ireland
Lloyds Banking Group plc	Financials	8.20%	United Kingdom of Great Britain and Northern Ireland
GSK plc	Health Care	8.08%	United States of America
Diageo plc	Consumer Staples	7.64%	United Kingdom of Great Britain and Northern Ireland
Aviva plc	Financials	6.65%	United Kingdom of Great Britain and Northern Ireland
Next plc	Consumer Discretionary	6.02%	United Kingdom of Great Britain and Northern Ireland
Vodafone Group Public Limited Company	Communication Services	5.44%	United Kingdom of Great Britain and Northern Ireland

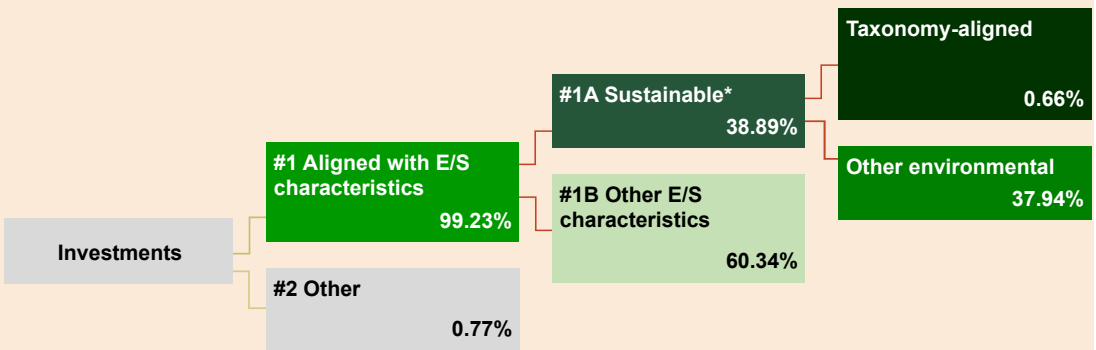

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

38.89% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Financials	30.27%
Consumer Staples	18.97%
Consumer Discretionary	11.59%
Communication Services	10.59%
Health Care	9.80%
Industrials	6.08%
Materials	4.02%
Utilities	2.72%
Electric Utilities	*0.18%*
Multi-Utilities	*1.54%*
Real Estate	2.61%
Information Technology	2.33%
Cash & Derivatives	0.77%
Energy	0.24%
Integrated Oil & Gas	*0.24%*
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

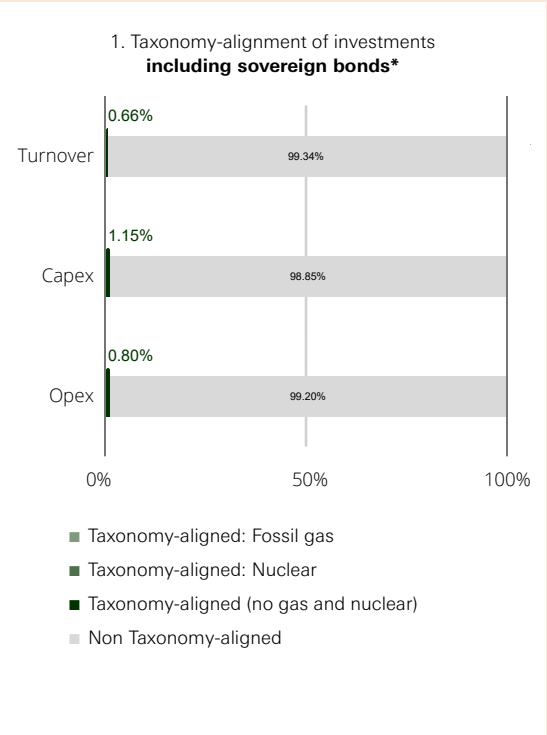

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.

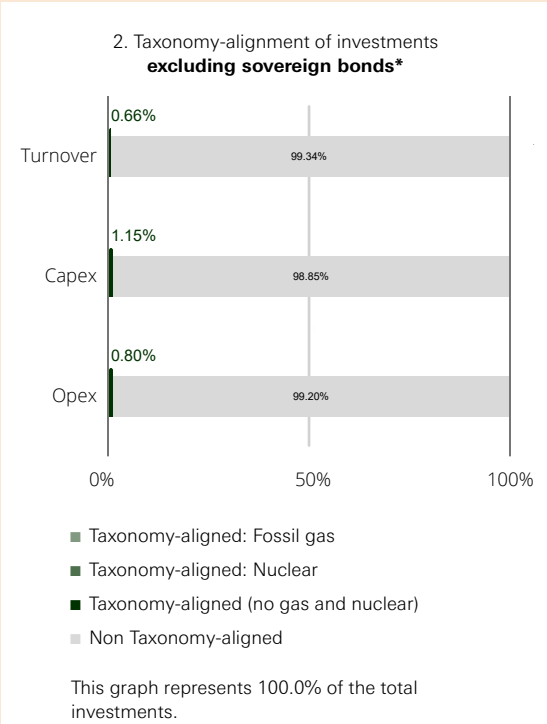

- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.55%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.66%	0.00%	0.03%
Revenue - Non Taxonomy-aligned	99.34%	100.00%	99.97%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	1.15%	0.00%	0.04%
CAPEX - Non Taxonomy-aligned	98.85%	100.00%	99.96%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.80%	0.00%	0.04%
OPEX - Non Taxonomy-aligned	99.20%	100.00%	99.96%

are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 37.94%. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria; and
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is a subset of the FTSE UK Index and aimed to measure the performance of companies in the United Kingdom as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date).

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

- ***How did this financial product perform compared with the reference benchmark?***

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	42.29	42.07
ESG Score	4.35	4.35
Fossil Fuel Reserve Exposures	1,942.09	1,957.14

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE UK ESG Low Carbon Select Index

- ***How did this financial product perform compared with the broad market index?***

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	42.29	92.62
ESG Score	4.35	3.86
Fossil Fuel Reserve Exposures	1,942.09	3,968.23

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE UK Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC USA SCREENED EQUITY UCITS ETF

Legal Entity Identifier: 213800GHFUMWVS16S925

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 50.71% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

In replicating the performance of the FTSE USA ESG Low Carbon Select Index (the "Index"), the Fund

:

- A reduction in carbon emissions and fossil fuel reserves exposure compared to the FTSE USA Index (the "Parent Index"); and
- An improvement of the FTSE Russell ESG rating against that of the Parent Index.

FTSE Russell's ESG ratings reflects a company's exposure to, and management of, ESG issues. The ratings are comprised of an overall score that breaks down into underlying environmental, social and governance pillars with underlying theme exposures and scores.

The Fund sought to achieve the promotion of the characteristics by replicating the performance of the Index which removed companies based on sustainability exclusionary criteria and United Nations Global Compact ("UNGC") exclusionary criteria and which weighted companies in order to reduce the exposure to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure to companies with favourable ESG ratings.

The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	54.18	108.80
ESG Score	4.04	3.43
Fossil Fuel Reserve Exposures	214.46	428.54

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE USA Index

...and compared to previous periods?

Sustainability Indicator	Period Ending	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	54.18	108.80
	31 December 2024	51.10	99.90
	31 December 2023	54.11	103.70
ESG Score	31 December 2025	4.04	3.43
	31 December 2024	3.91	3.35
	31 December 2023	3.90	3.32
Fossil Fuel Reserve Exposures	31 December 2025	214.46	428.54
	31 December 2024	227.02	423.99
	31 December 2023	276.40	535.19

Broad Market Index - FTSE USA Index

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to one or more of the following environmental and/or social objectives:
- Transition to a lower carbon economy;
- Supporting research and financing of technology, resources and supply chain improvements relating to climate change mitigation and/or adaptation;
- Supporting the enhancement of the United Nations Sustainable Development Goals ("UN SDGs"); and
- Adopting the highest level of environmental and social practices, ranging from the approach to climate change mitigation to board gender diversity.

Investments were considered sustainable if they made a positive contribution to an environment or social objective in accordance with the Investment Manager's sustainable investment policy. A sustainable investment's contribution to these objectives was determined by meeting one or more of the following criteria:
- Classification as net zero aligned, or better, by the Investment Manager's net zero investment framework;
- Best in class environmental and / or social scores in the investment's respective universe, as determined by the Investment Manager;
- Generation of sustainable revenues, which are those generated from activities that the Investment Manager regarded as supporting the enhancement of the UN SDGs, EU
Taxonomy objectives or other climate related activities.
Further information can be found in HSBC's Responsible Investing Methodologies document. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-
investing, by selecting your location and then choosing Policies and Disclosures.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The sustainable investments in the Fund were assessed against the principle of do no significant harm ("DNSH") to ensure they did not significantly harm any environmental or social objective. This included taking into account principal adverse impacts ("PAIs") as further described below.
In addition, companies earning 50% or more of their revenue from adult entertainment, gambling, alcohol, and those identified as involved in severe controversies by a third-party research provider, did not pass the DNSH principle. The DNSH principle applied only to the investments in the Fund deemed sustainable.

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the Fund were significantly harming the environmental or social objective.
To support the DNSH assessment, quantitative criteria was established across the PAIs.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the Fund but did not count toward the portion of 'sustainable investments' within the Fund.
Further information on the mandatory principal adverse impact indicators, as well as the data sources and limitations, can be found in HSBC's User Guide on Principal Adverse
Indicators. This is available on: www.assetmanagement.hsbc.com/about-us/responsible-investing, by selecting your location and then choosing Policies and Disclosures.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Manager used a combination of third party research and its own ESG due diligence to monitor sustainable investments for involvement in controversies which included potential breaches of UNGC principles. As part of this monitoring, there was assessment against international standards including the OECD Guidelines for Multinational Enterprises on Responsible Business Conduct and UN Guiding Principles on Business and Human Rights.
HSBC Asset Management is also a signatory of the UN Principles of Responsible Investment.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sustainablity investment data inputs into the Index methodology (e.g. ESG scores, carbon data) implicitly captured mandatory PAI metrics used in the construction of the Index.

Principal Adverse Impact	Period Ending	Fund	Broad Market Index
1. GHG Emissions - Metric tons CO2 equivalents	31 December 2025	8,916.57	1,169,591,988.03
2. Carbon Footprint - Metric tons of CO2 per million of Euros (EVIC)	31 December 2025	12.30	24.80

3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	31 December 2025	54.18	108.80
4. Exposure to companies active in the fossil fuel sector	31 December 2025	3.22%	5.10%
5a. Share of non-renewable energy consumption	31 December 2025	46.81%	54.82%
5b. Share of non-renewable energy production	31 December 2025	0.00%	93.56%
6. Energy consumption intensity per high impact climate sector - GWh per million of Euros of revenue	31 December 2025	0.21	0.50
7. Activities negatively affecting biodiversity sensitive areas	31 December 2025	-0.04%	-0.03%
8. Emissions to water - Thousands of Metric tons per million of Euros invested	31 December 2025	0.01	0.01
9. Hazardous waste and radioactive waste ratio - Thousands of Metric tons per million of Euros invested	31 December 2025	0.27	0.34
10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	31 December 2025	0.00%	0.56%
11. Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD Guidelines for Multinational Enterprises	31 December 2025	0.64%	4.21%
12. Unadjusted gender pay gap	31 December 2025	12.11%	13.01%
13. Board gender diversity	31 December 2025	37.48%	35.51%
14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	31 December 2025	0.00%	0.18%

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE USA Index

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2025

Largest Investments	Sector	% Assets	Country
Visa Inc. Class A	Financials	8.61%	United States of America
NVIDIA Corporation	Information Technology	8.22%	United States of America
Johnson & Johnson	Health Care	7.75%	United States of America
Microsoft Corporation	Information Technology	6.96%	United States of America
Apple Inc.	Information Technology	5.18%	United States of America
Cisco Systems, Inc.	Information Technology	4.32%	United States of America
Amazon.com, Inc.	Consumer Discretionary	2.50%	United States of America
Salesforce, Inc.	Information Technology	1.98%	United States of America
Merck & Co., Inc.	Health Care	1.75%	United States of America
Intel Corporation	Information Technology	1.68%	United States of America
Meta Platforms Inc Class A	Communication Services	1.63%	United States of America

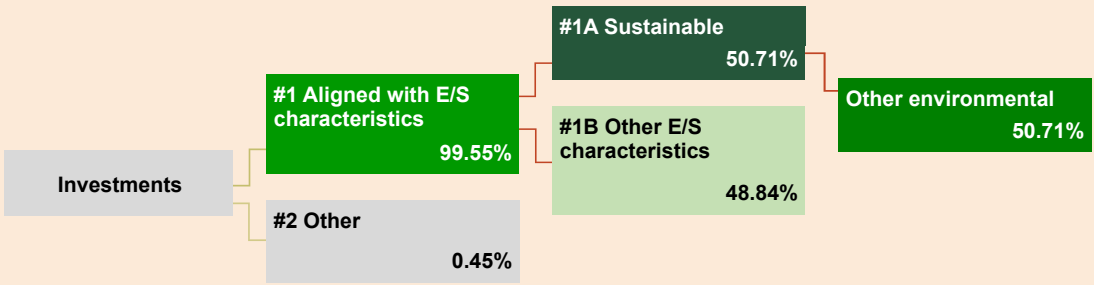

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

50.71% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**
Information Technology	40.82%
Financials	17.07%
Health Care	13.99%
Consumer Discretionary	7.77%
Communication Services	6.40%
Consumer Staples	3.85%
Materials	3.65%
Industrials	3.16%
Energy	1.87%
Integrated Oil & Gas	*0.34%*
Oil & Gas Equipment & Services	*0.19%*
Oil & Gas Exploration & Production	*0. %*
Oil & Gas Refining & Marketing	*0.18%*
Oil & Gas Storage & Transportation	*0.5 %*
Real Estate	0.73%
Cash & Derivatives	0.45%
Utilities	0.25%
Electric Utilities	*0.1 %*
Multi-Utilities	*0.0 %*
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

☐ In fossil gas ☐ In nuclear energy

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

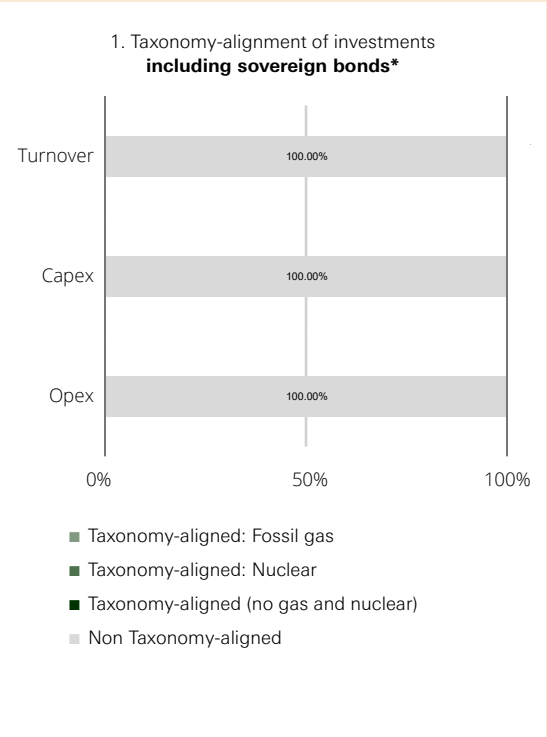

Taxonomy-aligned activities are expressed as a share of:

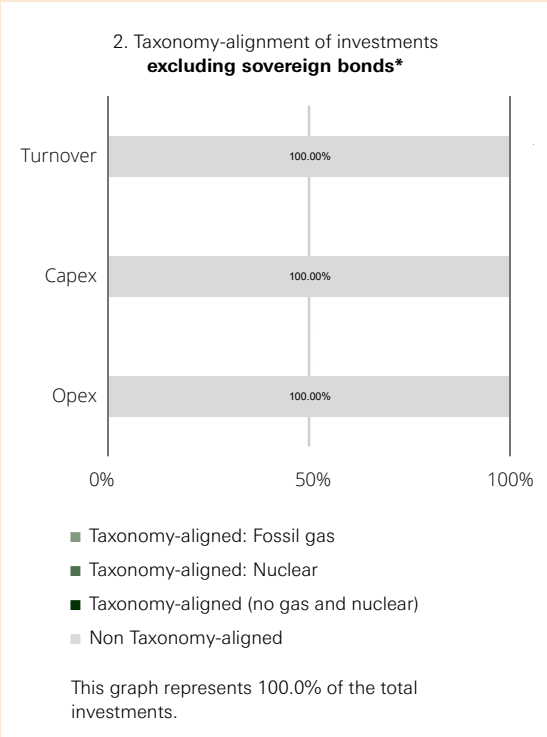

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2024-25	2023-24	2022-23
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	100.00%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.00%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	100.00%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 50. %. The Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed and aimed to replicate the net total return performance of the Index. The Index sought to achieve a reduction in carbon emissions and fossil fuel reserves exposure and an improvement of the FTSE Russell ESG rating against that of the Parent Index. The Index achieved this in the following ways:
1. on an annual basis in September, removing stocks based on sustainability exclusionary criteria;
2. on an annual basis in September, adjusting the weights of the remaining companies within the Parent Index according to carbon emissions, fossil fuel reserves exposure and FTSE Russell ESG ratings based criteria;
3. on a quarterly basis, removing companies considered to be non-compliant with one or more of the UNGC principles.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. The HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

- ***How does the reference benchmark differ from a broad market index?***

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Index is a subset of the FTSE USA Index and aimed to measure the performance of companies in the United States as defined by the Index provider. As further detailed above, on an annual basis, the Index provider applied sustainable exclusionary criteria and weighted companies in order to reduce the exposure in the Index to companies with higher carbon emissions and fossil fuel reserves and to improve the exposure in the Index to comply with favourable FTSE Russell ESG ratings compared to that of the Parent Index. In addition, the UNGC exclusionary criteria were applied to the Index on a quarterly basis (i.e. on each rebalancing date)

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

In seeking to achieve its investment objective, the Fund invested in the constituents of the Index in generally the same proportions in which they are included in the Index.

In doing so, the performance of the sustainability indicators of the Fund, was similar to the performance of the sustainability indicators of the Index, as shown below.

- ***How did this financial product perform compared with the reference benchmark?***

Sustainability Indicator	Fund	Reference Benchmark
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	54.18	53.98
ESG Score	4.04	4.05
Fossil Fuel Reserve Exposures	214.46	214.83

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Reference Benchmark - FTSE USA ESG Low Carbon Select Index

- ***How did this financial product perform compared with the broad market index?***

Sustainability Indicator	Fund	Broad Market Index
GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue	54.18	108.80
ESG Score	4.04	3.43
Fossil Fuel Reserve Exposures	214.46	428.54

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 December 2025.

Broad Market Index - FTSE USA Index

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: HSBC World ESG Biodiversity Screened Equity UCITS ETF

Legal Entity Identifier: 213800RFFZDQES43RI35

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ Yes	☑ No
☐ It made **sustainable investments with an environmental objective: _%**	☑ It **promoted Environmental/ Social (E/S) characteristics and** while it did not have as its objective a sustainable investment, it had a proportion of 39.91% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☑ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective: _%**	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities.** That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In replicating the performance of the Euronext ESG Biodiversity Screened World USD Index (the "Parent Index"), the Fund promoted the following environmental and/or social characteristics:

- Biodiversity; and
- ESG

The Fund sought to achieve the promotion of these characteristics by replicating the performance of the Index which considered, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score), together with a number of ESG related criteria. The Index was designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund. The Fund did not use derivatives to attain the environmental and/or social characteristics of the Fund.

The performance of the sustainability indicators used to measure the attainment of the environmental and/or social characteristics promoted by the Fund can be seen in the table below. The sustainability indicators were calculated by the Investment Manager and utilises data from third party data vendors.

The data can be based on company/issuer disclosures, or estimated by the data vendors in the absence of company/ issuer reports. Please note that it was not always possible to guarantee the accuracy, timeliness or completeness of data provided by third party vendors.

How did the sustainability indicators perform?

Indicator	Fund	Broad Market Index
ESG Score	16.81	16.99
Biodiversity Score	-1,462.71	-1,688.76

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - Euronext World Index

...and compared to previous periods?

Indicator	Period Ending	Fund	Broad Market Index
ESG Score	31 December 2024	16.81	16.99
	31 December 2023	17.35	17.35
	31 December 2022	17.30	21.56
Biodiversity Score	31 December 2024	-1,462.71	-1,688.76
	31 December 2023	-1,246.45	-1,247.34
	31 December 2022	-1,058.93	-6,533.48

Broad Market Index - Euronext World Index

The Fund recalculated figures for 2022 Reporting Year with figures for ESG Score Sustainalytics - 17.15 because of change in data sets and certain calculation methodology.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments in the Fund were, amongst others:

1. Companies with sustainable product and/or services or quantifiable projects (e.g. CAPEX, OPEX and Turnover) linked to sustainable goals or outcomes;
2. Companies that demonstrated qualitative alignment and/or convergence with UN Sustainable Development Goals or sustainable themes (e.g. Circular Economy);
3. Companies that were transitioning with credible progress. (e.g the transition to or use of renewable energy or other low-carbon alternatives).

By replicating the performance of the Index, the sustainable investments of the Fund contributed to these sustainable objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Index was reviewed quarterly to ensure the business activity screens are being adhered to and removes stocks based on sustainability exclusionary criteria, including, but not limited to:
• the production and/or distribution of tobacco;
• thermal coal extraction and/or electricity generation;
• oil sands extraction;
• shale energy extraction;
• oil & gas exploration and/or production;
• electricity generation from oil & gas;
• nuclear power production;
• production and/or distribution of civilian fire arms;
• providing core weapons systems, or components/services that are considered tailor made and essential for banned and controversial weapons (including antipersonnel mines, blinding laser weapons, nuclear weapons, cluster weapons, biological and chemical weapons, depleted uranium, non-detectable fragments, and white phosphorus munitions);
• animal testing;
• pesticide production;
• palm oil production and/or distribution;
• whale meat production;
• involvement in incidents which have a negative environmental impact;
• owning or operating a gambling establishment or manufacturing specialised products exclusively for gambling or providing supporting products/services to gambling operations; and
• the production or operation of adult entertainment establishments or in the distribution of adult entertainment materials.

In addition, the sustainable investments were deemed by the Investment Manager to not have caused signficiant harm against any environmental or social sustainable investment objective following assessment against the below considerations:

- Banned & controversial weapons involvement;
- Tobacco production revenues above 0%;
- Thermal coal extraction revenues above 10%;
- Thermal coal power generation revenues above 10%;
- Compliance with United Nations Global Compact principles; and
- Involvement in controversies of the highest levels.

By replicating the performance of the Index, the investments of the Fund that were deemed sustainable investments did not cause significant harm to environmental and/or social investment sustainable objectives.

How were the indicators for adverse impacts on sustainability factors taken into account?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The mandatory indicators were used in the assessment of business activities of the initial universe of securities prior to the construction of the Index. Revenue data, business involvement and other data sources were considered when assessing each security using minimum thresholds or blanket exclusions on activities identified in relation to these indicators. The Index was constructed using data on each security's business involvement. The data was aligned to quantified environmental pressures: climate change, land use, air pollution and water pollution. This along with mean species abundance, as a measure of biodiversity, created a Corporate Biodiversity Footprint ("CBF") score. The Index removed securities that had a high CBF score (being the worse) thus removing companies with the greatest impact on a number of adverse impact factors. The CBF score aligned to PAI 1, 2, 3, 4, 5, 6, 7 and 8. In addition to the CBF score, a separate controversy screen was applied to the starting universe to remove any security in violation of UN Global Compact ("UNGC") principles, PAI 10 & 11. The Index also screened out securities with controversies specifically related to environmental impact, removal of securities with 4 & 5 scores (most severe) in relation to E 2.2 Environmental Supply chain incidents, E 1.12 Operations and E 3.2 Product and services incidents (PAI, 7, 8). Additional screens covering controversial and conventional weapons (PAI 14), Pesticide production, Thermal coal mining and generation, Oil & Gas, were also applied before the final Index was calculated. The Index was reviewed quarterly and assessed using 3rd party data to ensure the business activity screens are being adhered to. Further information on the Fund's CBF score is available on request. No optional indicators were taken into account.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

As per the below, through the Index's norms based screening, Global Standard Screening, a broad range of international norms and standards were covered,including: UNGC, UN Guiding Principles on Business and Human Rights (UNGPs), OECD Guidelines for Multinational Enterprises and Related Conventions. Further information on benchmark, data and standards used can be found on the Index provider's website.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Index was constructed using data on each security business involvement. The data was aligned to quantified environmental pressures: climate change, land use, air pollution and water pollution. This along with mean species abundance, as a measure of biodiversity, CBF score. The Index removed securities that have a high CBF score (being the worse) thus removing companies with the greatest impact on a number of adverse impact factors. The CBF score considered PAI 1, 2, 3, 4, 5, 6, 7 and 8. In addition to the CBF score a separate controversy screen was applied to the starting universe to remove any security in violation of UNGC principles, PAI 10 & 11. The Index also screened out securities with controversies specifically related to environmental impact, removal of securities with 4 & 5 scores (most severe) in relation to E 2.2 Environmental Supply chain incidents, E 1.12 Operations and E 3.2 Product and services incidents (PAI, 7, 8).Additional screens covering controversial and conventional weapons (PAI 14), Emissions to water (PAI 8), Thermal coal mining and generation, Oil & Gas, were also applied before the final Index is calculated. The Index was reviewed quarterly and assessed using 3rd party data to ensure the business activity screens were being adhered to. Information on the Fund's CBF score is available on request. Further information relating to Iceberg Data Lab's Corporate Biodiversity Footprint score and the ESG Risk score (provided by Sustainalytics) is available on request. Our stewardship activity is focused on protecting and enhancing our clients' investments with us. We engaged with companies on a range of ESG issues and we have the following clear set of engagement objectives: - Improving our understanding of company business and strategy; - Monitoring company performance; - Signaling support or raise concerns about company management, performance or direction; and - Promoting good practice. Engagement issues ranged from corporate governance concerns such as the protection of minority shareholder rights, director elections and board structure to environmental issues, including climate change adaptation and mitigation and the low carbon energy transition, to social issues including human capital management, inequality and data privacy. We have a dedicated stewardship team with engagement specialists. Engagement is also integral to the fundamental research process. Our analysts and portfolio managers engaged with issuers as part of the investment process and cover relevant ESG issues in their research and discussions.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/12/2024

Largest Investments	Sector	% Assets	Country
Apple Inc.	Information Technology	8.59%	United States of America
Microsoft Corporation	Information Technology	7.57%	United States of America
Alphabet Inc. Class A	Communication Services	2.55%	United States of America
Broadcom Inc.	Information Technology	2.16%	United States of America
Visa Inc. Class A	Financials	1.85%	United States of America
Mastercard Incorporated Class A	Financials	1.60%	United States of America
Tesla, Inc.	Consumer Discretionary	1.52%	United States of America
Home Depot, Inc.	Consumer Discretionary	1.49%	United States of America
ASML Holding NV	Information Technology	1.22%	Netherlands
Netflix, Inc.	Communication Services	1.21%	United States of America
Salesforce, Inc.	Information Technology	1.14%	United States of America
Accenture Plc Class A	Information Technology	0.84%	Ireland

Oracle Corporation	Information Technology	0.69%	United States of America

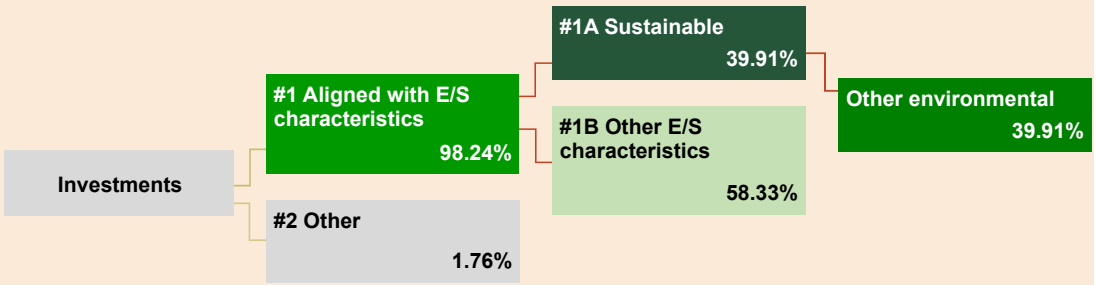

Cash and derivatives were excluded

What was the proportion of sustainability-related investments?

39.91% of the portfolio was invested in sustainable investments.

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:
- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one company or issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

The percentages of Taxonomy-aligned and Other Environmental, do not equal #1A Sustainable investment due to differing calculation methodologies of sustainable investments and Taxonomy-aligned investments.

In which economic sectors were the investments made?

Sector / *Sub-Sector*	**% Assets**

Cash & Derivatives	0.71%
Energy	0.53%
Oil & Gas Equipment & Services	*0.53%*
Total	100.00%

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make sustainable investments aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ Yes:

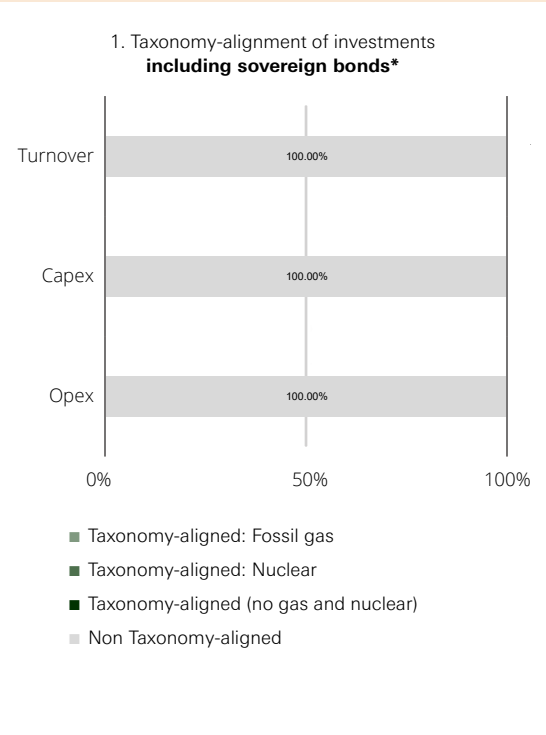

☐ In fossil gas ☐ In nuclear energy

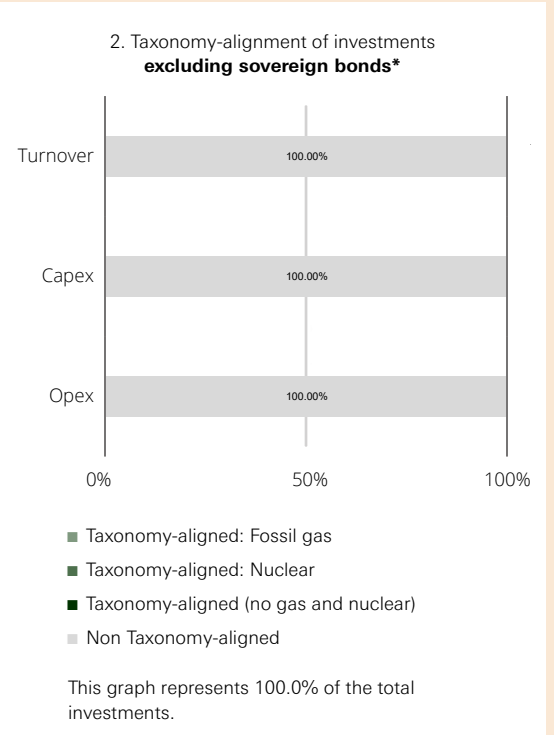

☑ No

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* *For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.*

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments made in transitional and enabling activities?

For the reference period the Fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.00%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Indicator	2023-24	2022-23	2021-22
Revenue - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
Revenue - Taxonomy-aligned (no gas and nuclear)	0.00%	0.50%	0.00%
Revenue - Non Taxonomy-aligned	100.00%	99.50%	100.00%
CAPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
CAPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.84%	0.00%
CAPEX - Non Taxonomy-aligned	100.00%	99.16%	100.00%
OPEX - Taxonomy-aligned: Fossil gas	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned: Nuclear	0.00%	0.00%	0.00%
OPEX - Taxonomy-aligned (no gas and nuclear)	0.00%	0.83%	0.00%
OPEX - Non Taxonomy-aligned	100.00%	99.17%	100.00%

 are sustainable investments with an environmental objective that **do not take into account the criteria for** environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 39.91%. Due to lack of coverage and data, the Fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The Fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Cash and other instruments such as American Depositary Receipts, European Depositary Receipts and Global Depositary Receipts, Eligible Collective Investment Schemes and/or financial derivative instruments may have been used for liquidity, hedging and efficient portfolio management in respect of which there were no minimum environmental and/or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was passively managed. The investment objective of the Fund was to replicate the performance of the Index, while minimising as far as possible the tracking error between the Fund's performance and that of the Index. In replicating the performance of the Index, the Fund promoted certain environmental, social and/or governance characteristics and had been categorised as an Article 8 fund for the purpose of SFDR. The Index was an equity index based on the Parent Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The Index employed a scoring, ratings and exclusions based approach which considered, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score), together with a number of ESG related criteria. In excluding companies based on their Corporate Biodiversity Footprint score, the Index sought to exclude companies which were deemed to have the worst impact on biodiversity within their sector (listed below). The remaining companies in the Parent Index after the application of the above exclusionary criteria were eligible for inclusion in the Index. The eligible companies were ranked by free float market capitalisation, with the 500 highest ranked companies being selected for the Index. In case less than 500 companies were eligible after the eligibility screenings, all remaining companies are selected for the Index. Further information relating to Iceberg Data Lab's Corporate Biodiversity Footprint score and the ESG Risk score (provided by Sustainalytics) is available on request.

HSBC Asset Management is a signatory of the UN Principles of Responsible Investment and UK Stewardship Code. HSBC Asset Management's stewardship team met with companies regularly to improve the understanding of their business and strategy, signal support or concerns we have with management actions and promote best practice.

Further information on shareholder engagement and voting policy can be found on our website: https://www.assetmanagement.hsbc.co.uk/en/individual-investor/about-us/responsible-investing/policies.

How did this financial product perform compared to the reference benchmark?

See below for details on how the Fund performed compared to the reference benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  The Index is an equity index based on the Euronext World Index, which offered a representation of developed equity markets worldwide, as determined by the Index provider. The Index employed a scoring, ratings and exclusions based approach which considered, amongst other things, the impact of a company's activities on biodiversity (the Corporate Biodiversity Footprint score), together with a number of ESG related criteria. In excluding companies based on their Corporate Biodiversity Footprint score, the Index sought to exclude companies which were deemed to have the worst impact on biodiversity, within their sector.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  In seeking to achieve its investment objective, the Fund invests in the constituents of the Index in generally the same proportions in which they were included in the Index.

  In doing so, the performance of the sustainability indicators of the Fund was similar to the performance of the sustainability indicators of the Index, as shown below.

How did this financial product perform compared with the reference benchmark?

Indicator	Fund	Reference Benchmark
ESG Score	16.81	16.83
Biodiversity Score	-1,462.71	-1,487.43

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Reference Benchmark - Euronext ESG Biodiversity Screened World Index

How did this financial product perform compared with the broad market index?

Indicator	Fund	Broad Market Index
ESG Score	16.81	16.99
Biodiversity Score	-1,462.71	-1,688.76

The data is based on the four-quarter average holdings of the financial year ending on 31 December 2024.

Broad Market Index - Euronext World Index
