KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

VanEck China Semiconductor UCITS ETF (the "Fund")

a sub-fund of VanEck UCITS ETFs plc (the "Company")
ISIN: IE000TS4B6Y3

This Fund is managed by VanEck Asset Management B.V., a subsidiary of Van Eck Associates Corporation.

Objectives and Investment Policy

The Fund's investment objective is to replicate the price and the performance, before fees and expenses, of the MarketVector™ China Semiconductor 10% Capped Screened Index (the “Index”). In order to seek to achieve its investment objective, the Manufacturer will normally use a replication strategy by investing directly in the underlying (physical) securities of the Index. The Index is a thematic index tracking the performance of the largest and most liquid companies that are headquartered or incorporated in China or Hong Kong and ESG screened in the semiconductor industry. To be eligible for the Index, companies must derive at least 50% (25% for current Index components) of their revenues from the semiconductor segment, including companies engaged in: (a) production of semiconductors, and/or (b) production of semiconductor equipment. The Manager has categorised the Fund as meeting the provisions set out in Article 8 of Regulation (EU) 2019/2088 on sustainability related disclosures in the financial services sector ("SFDR") for products, which promote environmental and/or social characteristics and invest in companies that follow good governance practices. The Fund does not have sustainable investment as its investment objective. The Index considers ESG factors as further detailed in the Index methodology available on the Index Provider’s website and in the Prospectus. The Fund does not take part in securities lending.
The Fund may also (or alternatively) invest in financial derivative instruments (FDIs) which relate to the Index or constituents of the Index. The FDIs which the Fund may use are futures, options (puts and calls), swaps (including equity swaps and swaps on the Index), currency forwards and non-deliverable forwards (a forward contract that does not require settlement on maturity) (NDFs). The Fund may also invest in ancillary liquid assets and money market instruments which may include bank deposits, depositary receipts, certificates of deposit, fixed or floating rate instruments (treasury bills), commercial paper, floating rate notes and freely transferable promissory notes. The ancillary liquid assets, money market instruments and FDI (other than permitted unlisted investments) will be listed or traded on the Markets referred to in Appendix II of the Prospectus. Investment in ancillary liquid assets and money market instruments may be utilised in a variety of circumstances, including but not limited to, situations such as managing total exposure to cash and borrowing on a short-term basis and in anticipation of participation in a rights offering. The Fund may not invest more than 10% of its Net Asset Value in open-ended collective investment schemes. Furthermore, the Fund may not invest less than 51% of its Net Asset Value in equity securities which constitute "equity participation" within the meaning of section 2, Article 8 of the German Investment Tax Act.
The Fund, using a “passive” or indexing investment approach, attempts to approximate the investment performance of the Index by investing in a portfolio of securities that generally replicates the Index. The Manager will regularly monitor the Fund’s tracking accuracy.
Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.
• Fund’s base currency: U.S. Dollar
• Distribution policy: Income accumulated
The shares are admitted for trading on various stock exchanges and can be traded on the secondary market. The price of the shares offered on the secondary market may deviate from the net asset value of the shares. The return of the Fund is directly related to the return of the underlying assets minus the costs associated with the Fund. If the performance of the underlying assets decreases, the performance of the Fund will also decrease. There is no capital protection against Market Risk.

Risk and Reward Profile

Lower risk — **Higher risk**
Typically lower reward — Typically higher reward

1	2	3	4	5	6	**7**

The risk and reward indicator is calculated using historical and simulated historical data. Historical data may not be a reliable indication for the future. Therefore, the risk classification may change over time.

Even if the Fund is in the lowest risk category, it does not mean it is risk free or that capital is guaranteed or protected.

This Fund is ranked at 7 because funds of this type have experienced very high rises and falls in value in the past.

The following risks can be materially relevant but are not necessarily adequately captured by the synthetic risk indicator and may cause additional loss:

- Emerging Markets Risk: Investments in emerging market countries and China in particular are subject to specific risks and securities are generally less liquid and less efficient and securities markets may be less well regulated. Specific risks may be heightened by currency fluctuations and exchange control; imposition of restrictions on the repatriation of funds or other assets; governmental interference; higher inflation; social, economic and political uncertainties.
- Risk of Investing in China: The information provided to third parties seeking to invest in Chinese domiciled companies might be inaccurate and the review by appropriate regulators of Chinese financial statements may not be adequate.
- Industry or Sector Concentration Risk: The Fund’s assets may be concentrated in one or more particular sectors or industries. The Fund may be subject to the risk that economic, political or other conditions that have a negative effect on the relevant sectors or industries will negatively impact the Fund's performance to a greater extent than if the Fund’s assets were invested in a wider variety of sectors or industries.

For more information on risks, please see the “Risk Factors” section of the Fund’s prospectus, available on www.vaneck.com.
