FIDELITY GLOBAL EQUITY RESEARCH ENHANCED PAB UCITS ETF

a sub-fund of FIDELITY UCITS ICAV I

FIDELITY GLOBAL EQUITY RESEARCH ENHANCED PAB UCITS ETF ACC

(ISIN: IE000TYGG0N6)

This fund is managed by FIL Investment Management (Luxembourg) S.à r.l. Ireland Branch

Objectives and investment policy

Objective: The investment objective of the Sub-Fund is to align with the Paris Agreement long-term global warming objectives by restricting the carbon emission exposure of its portfolio and to achieve long-term capital growth.

Investment Policy: The Sub-Fund aims to achieve its investment objective by actively investing in a portfolio primarily made up of equity securities of companies domiciled, or exercising the predominant part of their economic activity, globally. The reduction of carbon emission objective of the Sub-Fund will be aligned with the Solactive ISS ESG Screened Paris Aligned Developed Markets USD Index NTR (the "Benchmark"), as described below.

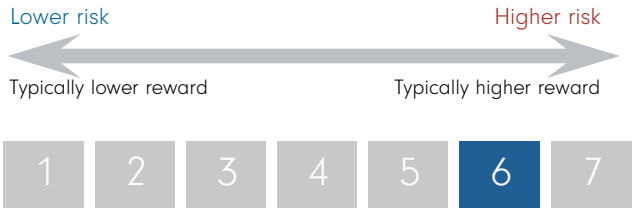

Investment Process: The fund is actively managed and references the Solactive ISS ESG Screened Paris Aligned Developed Markets USD Index NTR (the "Benchmark") as part of its investment process. The fund aims to achieve long-term capital growth while contributing to environmental objectives. The investment manager uses a combination of quantitative and fundamental research (as described below) to select securities that are: (a) weighted with a view to maximising portfolio return relative to the Benchmark; (b) at least aligned with the carbon emission performance of the Benchmark; and (c) sustainable investments in accordance with the SFDR. The fund invests in companies that contribute to an environmental objective, do no significant harm, meet minimum safeguards, and follow good governance practices. At least 90% of the fund's assets are assessed for ESG characteristics. The portfolio is systematically tilted towards securities with higher ESG ratings and excludes companies with significant negative ESG profiles. The fund may also invest in securities not included in the Benchmark in specific cases, such as during index transitions or for liquidity management. Currency hedged share classes are available and use forward foreign exchange contracts in accordance with the relevant section of the Prospectus. For more information, see the "Sustainable Investing and ESG Integration" and Sustainability Annex sections of the Prospectus.

Base Currency USD

Distribution: Income earned by the fund is reinvested in additional shares or paid to shareholders on request.

Benchmark: Solactive ISS ESG Screened Paris Aligned Developed Markets USD Index NTR, an index that takes into account ESG characteristics. Used for: alignment of the fund's carbon emission reduction objective. The Benchmark tracks the performance of large and mid-cap equity securities publicly issued globally while aiming to align with the Paris Agreement's climate targets. It is classified as an EU Paris-Aligned Benchmark (EU PAB), with an initial carbon intensity at least 50% lower than a non-ESG market index and a year-on-year decarbonisation target of at least 7%. The Benchmark excludes issuers involved in controversial activities (e.g. tobacco, fossil fuels, controversial weapons), those in breach of international norms (e.g. UN Global Compact), or those with a significant negative impact on sustainable development goals. Issuers with poor governance practices are also excluded. Further details regarding the Benchmark are available on the index provider's website at www.solactive.com/indices.

Risk and reward profile

Historical data may not be a reliable indication for the future. The risk category shown is not guaranteed and may change over time.

The lowest category does not mean a "risk free" investment. The risk and reward profile is classified by the level of historical fluctuation of the Net Asset Values of the share class, and within this classification, categories 1-2 indicate a low level of historical fluctuations, 3-5 a medium level and 6-7 a high level.

The value of your investment may fall as well as rise and you may get back less than you originally invested.

The fund may invest in instruments denominated in currencies other than the fund base currency. Changes in currency exchange rates can therefore affect the value of your investment.

This fund is categorised in risk class 6 because, in accordance with the investment policy, the value of the investments may fluctuate considerably. Consequently, both the expected return and the potential risk of loss may be high.

Additional risks: liquidity.

Recommended Holding Period: This product may appeal to investors who plan to hold their investment for a recommended holding period of at least 3 years .
