JPMorgan ETFs (Ireland) ICAV -

US Hedged Equity Laddered Overlay Active UCITS ETF

Class: JPM US Hedged Equity Laddered Overlay Active UCITS ETF - USD (acc)

Fund overview

ISIN
IE000VAZZYM3

Investment objective: The objective of the Sub-Fund is to provide long-term capital growth.

Investment policy: The Sub-Fund pursues an actively-managed investment strategy.
The Sub-Fund aims to (i) invest in a portfolio of equity securities comprising primarily of companies that are domiciled in, or carrying out the main part of their economic activity in the US, and (ii) purchase and sell exchange-traded put options and sell exchange-traded call options, to provide a continuous market hedge for the portfolio.

Investment approach

- Uses a research-driven investment process that is based on the fundamental analysis of companies and their future earnings and cash flows by a team of specialist sector analysts.
- Builds a portfolio in reference to the benchmark by overweighting securities with the highest potential to outperform and underweighting securities considered most overvalued.
- Combines bottom-up stock selection with a disciplined option overlay strategy that is intended to mitigate downside risk while limiting some capital appreciation potential.

Investor profile: Typical investors in the Sub-Fund are expected to be investors seeking exposure to the US equity markets with potentially lower volatility relative to traditional long-only US equities strategies, and who are prepared to accept the risks associated with an investment of this type.

ESG information

ESG approach - Integrated
ESG Integration is the systematic inclusion of financially material ESG factors, alongside other relevant factors, in investment analysis and investment decisions with the goals of managing risk and improving long-term returns. ESG integration does not by itself change this product's investment objective, exclude specific types of companies or constrain its investable universe. This product is not designed for investors who are looking for a product that meets specific ESG goals or wish to screen out particular types of companies or investments, other than those required by any applicable law such as companies involved in the manufacture, production or supply of cluster munitions. ESG integration does not imply that the Fund is marketed or authorised as an ESG product in any jurisdiction where such authorisation is required.

Performance Disclosures

Past performance is not a guide to current and future performance. The value of your investments and any income from them may fall as well as rise and you may not get back the full amount you invested.

Key risks

The value of your investment may fall as well as rise and you may get back less than you originally invested.
The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions, sometimes rapidly or unpredictably. If a company goes through bankruptcy or a similar financial restructuring, its shares in issue typically lose most or all of their value.
The value of FDIs can be volatile. This is because a small movement in the value of the underlying asset can cause a large movement in the value of the FDI and therefore, investment in such instruments may result in losses in excess of the amount invested by the Sub-Fund.
While the Sub-Fund uses an options overlay strategy which is intended to provide a continuous market hedge for the portfolio, there is no guarantee that the strategy will achieve this. The "laddered" component of the strategy is designed to mitigate potential risks associated with only one hedge period, but there is no guarantee that the Investment Manager will be able to do so successfully.
Selling call options will create exposure for the Sub-Fund, as it may have to deliver the underlying securities or their value and, should the market move unfavourably, this may result in an unlimited loss.
For put options, if the overall market experiences a significant downturn, the value of relevant index may decline sharply and substantial losses could be incurred. The Sub-Fund's financial liability is therefore linked to the value of the underlying index.
REITs and real estate related investments are subject to the risks associated with the ownership of real estate which may expose the relevant Sub-Fund to increased liquidity risk, price volatility and losses due to changes in economic conditions and interest rates.
Sustainability risk may materially negatively impact the financial condition or operating performance of an issuer and therefore the value of that investment. In addition, it may increase the Sub-Fund's volatility and/or magnify pre-existing risks to the Sub-Fund.
Further information about risks can be found in the "Risk Information" section of the Prospectus

General Disclosures

Before investing, obtain and review the current prospectus, Key Investor Information Document (KIID), and any applicable local offering document. These documents, as well as the sustainability-related disclosures, the annual and semi-annual reports and the articles of incorporation, are available in English from your financial adviser, your J.P. Morgan Asset Management regional contact, the fund's issuer (see below) or at https://am.jpmorgan.com/gb/en/asset-management/per/. A summary of investor rights is available in English at https://am.jpmorgan.com/lu/investor-rights. J.P. Morgan Asset Management may decide to terminate the arrangements made for the marketing of its collective investment undertakings.
This material should not be considered as advice or an investment recommendation. Fund holdings and performance are likely to have changed since the report date.
To the extent permitted by applicable law, we may record telephone calls and monitor electronic communications to comply with our legal and regulatory obligations and internal policies. Personal data will be collected, stored and processed by J.P. Morgan Asset Management in accordance with our EMEA Privacy Policy www.jpmorgan.com/emea-privacy-policy.

The risk indicator is based on the historic volatility of the Net Asset Value of the Share Class over the last five years and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown above is not guaranteed to remain unchanged and may change over time. A Share Class with the lowest risk rating does not mean a risk-free investment. See the Key Investor Information Document (KIID) for details.

The possible difference between the current ongoing charge as stated in this document and those mentioned in the KIID, is caused by the fact that the costs mentioned in the KIID are an estimate based on the actual costs incurred over the past year.

Performance information

Source: J.P. Morgan Asset Management. Share class performance is shown based on the NAV (net asset value) of the share class with income (gross) reinvested including actual ongoing charges excluding any entry and exit fees. Performance is shown based on the NAV which may not be the same as the market price of the ETF. Individual shareholders may realise returns that are different to the NAV based returns.

The return of your investment may change as a result of currency fluctuations if your investment is made in a currency other than that used in the past performance calculation.

Indices do not include fees or operating expenses and you cannot invest in them.Investors should note that the benchmark data presented is expressed in the fund's base currency, which may be different from the currency in which the share class performance data is presented. Investors should exercise caution when comparing the benchmark data with share class performance data that are in different currencies, as currency fluctuations can contribute to differences in performance outcomes.

The benchmark is for comparative purposes only unless specifically referenced in the Sub-Funds' Investment Objective and Policy.
