	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	2.97	99.85	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.13	92.96	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.19	99.85	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	58.89	99.58	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	24.67	3.37	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	37.29	99.28	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.87	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

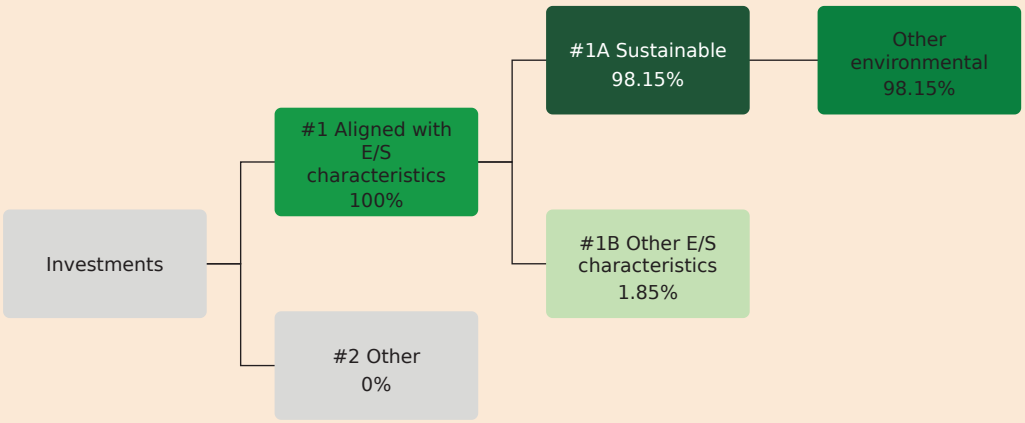
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

100.00% of the Fund's NAV was was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

98.15% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Health Care	14.99
Materials	0.84
Utilities	5.14
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.03
10101020	Oil & Gas Equipment & Services	0.32
10102010	Integrated Oil & Gas	0.02
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.38
10102040	Oil & Gas Storage & Transportation	3.70
10102050	Coal & Consumable Fuels	0.11
Total		**4.56**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

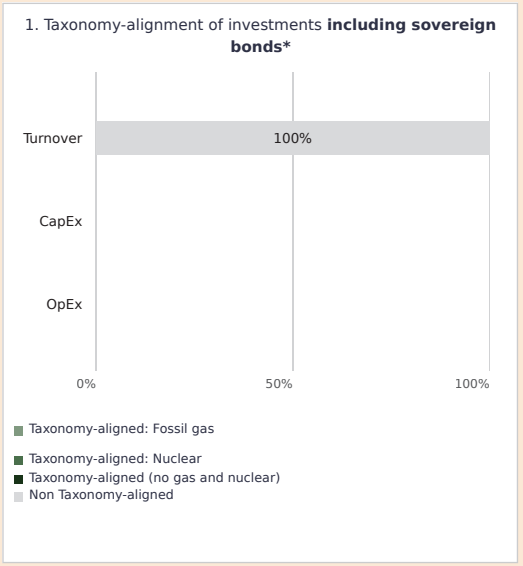
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

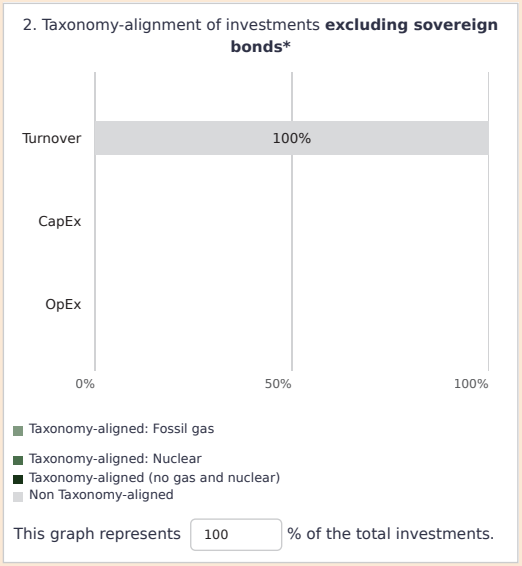
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 98.15% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics, whilst also meeting the minimum standards for an EU Climate Transition Benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Absolute GHG emissions (Scope 1+2+3) in tonnes	28.8	29.2
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	10% reduction per annum	10% reduction per annum
Percentage of the portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.30	7.32

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
Absolute GHG emissions (Scope 1+2+3) in tonnes	28.8	48.8
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	10% reduction per annum	7% reduction per annum
Percentage of the portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 13.3% exposure to excluded companies at the latest Reference Index rebalance date
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.30	6.65

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco EUR IG Corporate Bond ESG Climate Transition UCITS ETF

Legal entity identifier: 635400LW19MN29H61R85

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 99.17 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared to similar issuers. The fund also reduced exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies, whilst also reducing the Fund's overall exposure to risks arising from a transition to a lower-carbon economy by lowering exposure to carbon intensive issuers or industries.

The Fund achieved the environmental and social characteristics by tracking the Bloomberg MSCI Euro Liquid Corporate Climate Transition ESG Bond Index (CTB) ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

*Please note that pursuant to a change to the Reference Index, whereby the methodology of the Reference Index was amended by the index provider to incorporate the minimum standards for an EU Climate Transition Benchmark, including targeting a reduction of greenhouse gas (absolute GHG emissions) by at least 7% per annum (the "**Decarbonisation Target**"), the environmental and social characteristics promoted by the Fund and the sustainable investment approach of the Fund was changed on 1 May 2025.*

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2025, the data is representative of

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the reference period:

Sustainability Indicator	Indicator Performance
Absolute GHG emissions (Scope 1+2+3) relative to the Bloomberg Euro Corporate Index (the "**Parent Index**")	61.6% reduction
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	22% reduction per annum*
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies
MSCI ESG Score (as defined in the methodology of the Reference Index) relative to the Parent Index	9.6% improvement

**The Fund measures its attainment of the Decarbonisation Target once per year on the date of the incorporation of the decarbonisation target for the Reference Index, and subsequent anniversaries of this date.*

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (6.4%) for the Fund was higher. The previous CO2 emissions intensity reduction (29.7%) was based on Scope 1+2/Revenue, so is not comparable to the reduction referenced above. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to the objective of reducing exposure to risks arising from a transition to a lower-carbon economy by lowering exposure to carbon intensive companies or industries (such risks include increased cost of doing business, regulatory actions, such as carbon taxes and changes in market preferences, such as consumers shifting purchases towards low carbon products).

The Fund achieved those objectives by investing in constituents of the Reference Index, which is constructed to meet the minimum requirements of an EU Climate Transition Benchmarks as based on the commitments laid down in the Paris Agreement in accordance with the Delegated Regulation (EU) 2020/1818 for the methodology of benchmark indices that would be aligned with the objectives of the Paris Agreement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

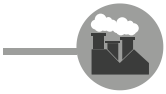
The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.



The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded comanies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	5,358.74	77.49	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		1,407.36	77.49	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		80,174.03	77.49	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		86,940.13	77.49	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	421.95	77.49	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,400.43	99.27	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.23	99.73	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	51.69	80.27	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	13.91	38.40	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.15	1.21	
	Electricity, gas, steam & air conditioning supply	0.90	5.59	
	Manufacturing	0.61	19.63	
	Mining & quarrying	0.42	0.32	
	Real Estate activities	0.84	5.92	
	Transportation & storage	0.66	2.37	
	Water supply, sewerage, waste management & remediation activities	1.00	0.19	
	Wholesale & Retail	0.10	1.01	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.82	99.76	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.56	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.45	77.68	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.11	99.76	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	31.13	99.46	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	18.53	9.95	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.10	90.03	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.74	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

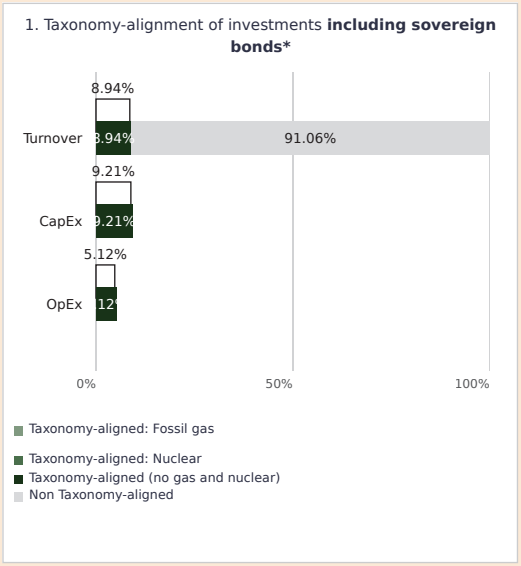
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

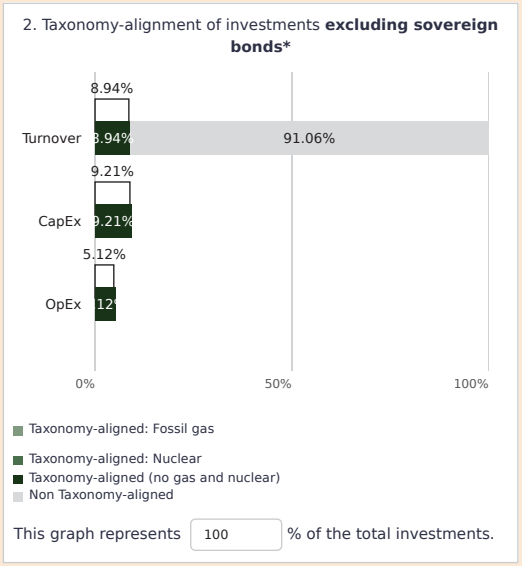
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

8.94% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**2.62%**
Transition	**0.12%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

90.23% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. The Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics, whilst also meeting the minimum standards for an EU Climate Transition Benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Absolute GHG emissions (Scope 1+2+3) in tonnes	19.7	19.4
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	22% reduction per annum	22% reduction per annum
Percentage of the portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.21	8.25

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
Absolute GHG emissions (Scope 1+2+3) in tonnes	19.7	51.5
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	22% reduction per annum	11% reduction per annum
Percentage of the portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.4% exposure to excluded companies at the latest Reference Index rebalance date
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.21	7.49

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco EUR Corporate Bond ESG Multi-Factor UCITS ETF

Legal entity identifier: 549300TSZMM3T873MK60

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.20 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to gain exposure to a portfolio of corporate bonds which met the ESG Policy of the Fund.

The Fund achieved the environmental and social characteristics by excluding certain industries and activities that were considered by the Investment Manager to be inconsistent with ESG outcomes. The Fund also applied a proprietary ESG scoring system to ensure investment was made in "best of class" securities. The Funds also maintained a lower carbon intensity of the portfolio relative to the Bloomberg Euro Corporate Bond Index (the "**Benchmark**").

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance 2025	Indicator Performance 2024
Reduction in the initial investment universe after application of the best-in-class measure based on an overall ESG profile score	22.8% reduction	25.9% reduction
Reduction in the initial investment universe after application of the exclusions depending on business involvement in controversial activities and controversies including violations of the UN Global Compact, based on third party data and the Investment Manager's proprietary analysis and research	18.5% reduction	43.2% reduction
Reduction in carbon intensity of the Fund as measured against the Benchmark	53.3% reduction	38.9% reduction

…and compared to previous periods?

See above table comparing current and previous periods figures

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund achieved those objectives by investing in: (i) issuers which contributed positively to selected Sustainable Development Goals (SGDs) that related to the above objectives; or (ii) companies which generated a material part of their revenue from environmental impact themes such as energy transition, healthcare and food. The Fund also used a best-in-class approach and selected companies scoring higher, when compared to their peers, utilizing the Investment Manager’s proprietary scoring methodology.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The Fund addressed a number of other adverse indicators by excluding companies, sectors or countries from the investment universe if they are assessed to have violated international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles. By limiting of exposure to thermal coal, shale energy and oil sands the Fund also reduced its exposure to greenhouse gas emissions.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

The Fund excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund from 1st of January 2025 to 31st of December 2025. The data is

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	374.28	72.70	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		166.46	72.70	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		10,940.85	72.70	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		11,481.59	72.70	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	596.00	72.70	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,437.54	99.57	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.57	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	55.45	82.45	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	5.80	34.85	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.20	0.96	
	Electricity, gas, steam & air conditioning supply	0.07	3.88	
	Manufacturing	0.38	27.36	
	Mining & quarrying	0.65	0.58	
	Real Estate activities	0.63	4.74	
	Transportation & storage	0.37	2.07	
	Water supply, sewerage, waste management & remediation activities	0.12	0.18	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.05	1.91	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.99	99.47	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.43	74.34	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.19	99.47	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	25.98	98.59	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	23.15	8.93	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	40.96	90.37	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.55	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI framework**”) to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

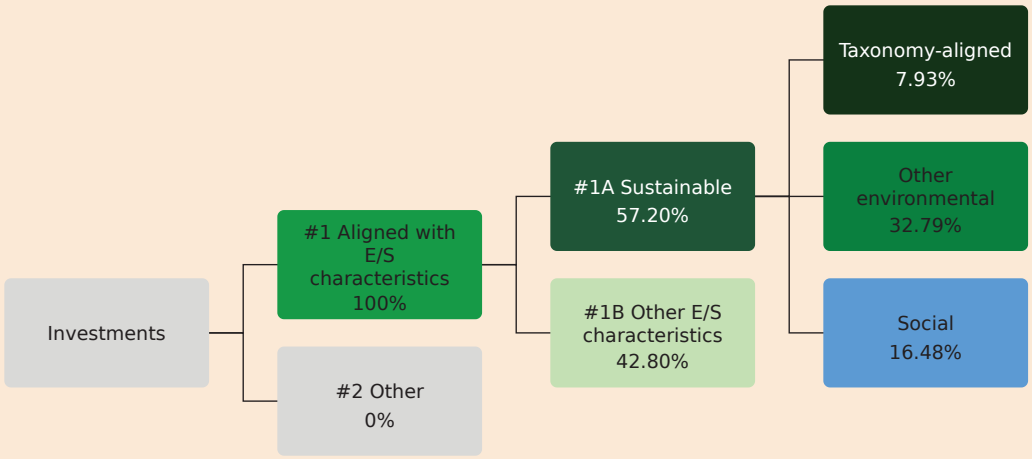
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

100.00% of the Fund's NAV was was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

57.20% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period

Total		**1.21**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

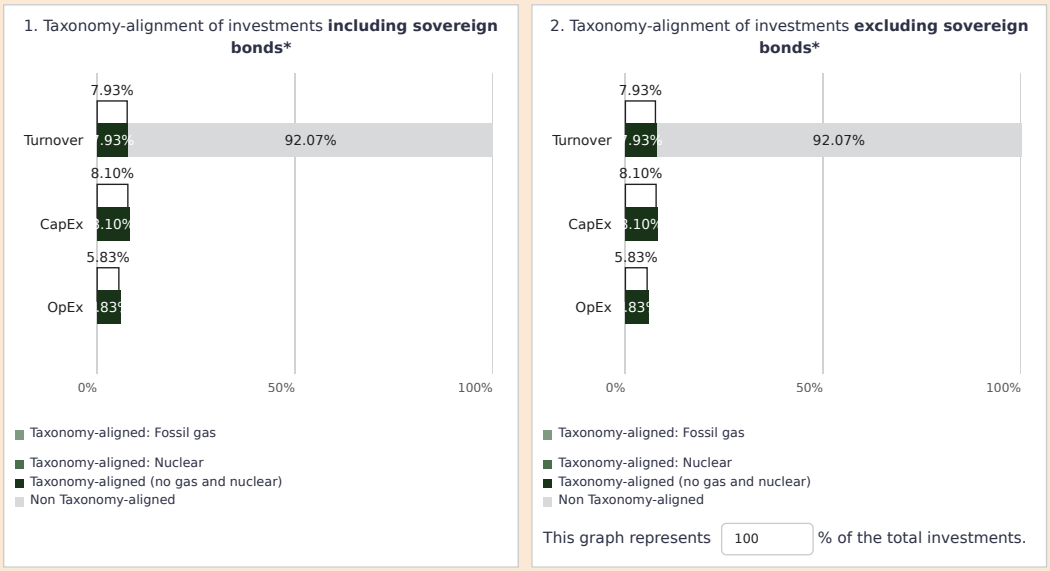
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

7.93% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**3.58%**
Transition	**0.24%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 32.79% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly

What was the share of socially sustainable investments?

16.48% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental characteristics by applying the ESG Policy of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

The Benchmark does not align with, and was not selected for the purposes of measuring the Fund's attainment of the Fund's environmental and social characteristics. The Fund does not seek to track the performance of an index. The Fund holds an actively-managed portfolio of bonds that is not constrained by the Benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

Not Applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not Applicable.

How did this financial product perform compared with the reference benchmark?

Not Applicable.

How did this financial product perform compared with the broad market index?

Not Applicable.

Product name: Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF **Legal entity identifier: 5493000AF119LESZHJ98**

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 73.25 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to gain exposure to a portfolio of corporate bonds which met the ESG Policy of the Fund.

The Fund achieved the environmental and social characteristics by excluding certain industries and activities that were considered by the Investment Manager to be inconsistent with ESG outcomes. The Fund also applied a proprietary ESG scoring system to ensure investment was made in "best of class" securities. The Funds also maintained a lower carbon intensity of the portfolio relative to the Bloomberg Euro Corporate Bond 1-5 Year Index (the "**Benchmark**").

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance 2025	Indicator Performance 2024
Reduction in the initial investment universe after application of the best-in-class measure based on an overall ESG profile score	40.9% reduction	40.3% reduction
Reduction in the initial investment universe after application of the exclusions depending on business involvement in controversial activities and controversies including violations of the UN Global Compact, based on third party data and the Investment Manager's proprietary analysis and research	16.7% reduction	50.4% reduction
Reduction in carbon intensity of the Fund as measured against the Benchmark	43.7% reduction	40.8% reduction

…and compared to previous periods?

See above table comparing current and previous periods figures

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund achieved those objectives by investing in: (i) issuers which contributed positively to selected Sustainable Development Goals (SGDs) that related to the above objectives; or (ii) companies which generated a material part of their revenue from environmental impact themes such as energy transition, healthcare and food. The Fund also used a best-in-class approach and selected companies scoring higher, when compared to their peers, utilizing the investment manager’s proprietary scoring methodology.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The Fund addressed a number of other adverse indicators by excluding companies, sectors or countries from the investment universe if they are assessed to have violated international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles. By limiting of exposure to thermal coal, shale energy and oil sands the Fund also reduced its exposure to greenhouse gas emissions.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

The Fund excluded companies that weren't compliant with the UN Global Compact, this set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund from 1st of January 2025 to 31st of December 2025. The data is

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	1,192.99	76.50	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		662.81	76.50	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		26,205.54	76.50	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		28,061.34	76.50	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	493.33	76.50	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,233.44	99.27	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.27	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	50.30	81.71	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	4.14	35.18	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.08	0.28	
	Electricity, gas, steam & air conditioning supply	0.77	4.60	
	Manufacturing	0.41	27.71	
	Mining & quarrying	0.28	0.29	
	Real Estate activities	0.76	4.12	
	Transportation & storage	0.51	2.50	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail	0.05	1.37	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.65	99.23	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.54	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.44	77.71	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.24	99.23	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	24.91	98.88	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	15.06	9.83	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.01	92.01	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.33	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CREDIT AGRICOLE	Financials	2.70%	United Kingdom
SOCGEN FLT 9/28/2029	Financials	1.69%	France
PROCTER & GAMBLE	Consumer Staples	1.41%	United States

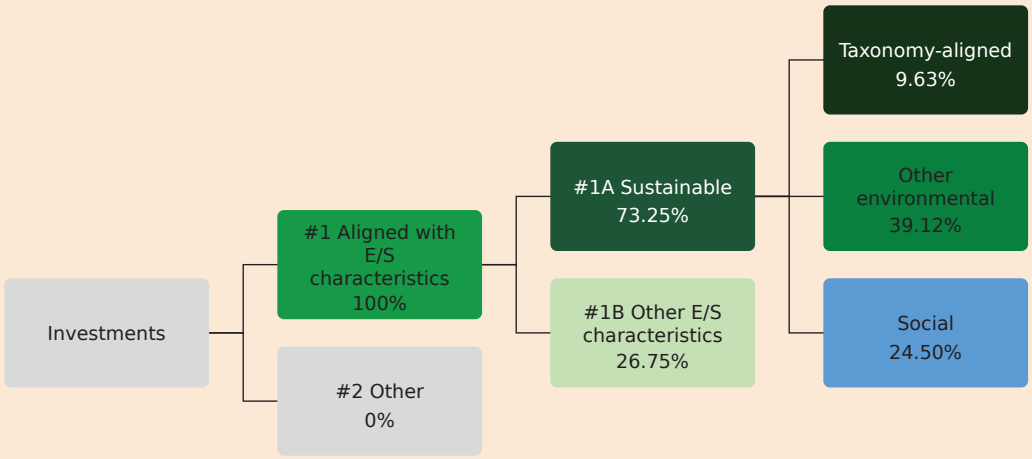
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

73.25% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	45.83
Communication Services	4.12
Consumer Discretionary	8.01
Information Technology	2.13
Industrials	12.31
Consumer Staples	10.17
Energy	0.72
Real Estate	5.83
Health Care	2.17
Materials	4.43
Utilities	4.28
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.35
10102030	Oil & Gas Refining & Marketing	0.29
10102040	Oil & Gas Storage & Transportation	0.08
10102050	Coal & Consumable Fuels	0.00
Total		**0.72**

Although the fund has exclusions around fossil fuel extraction, there may still be exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

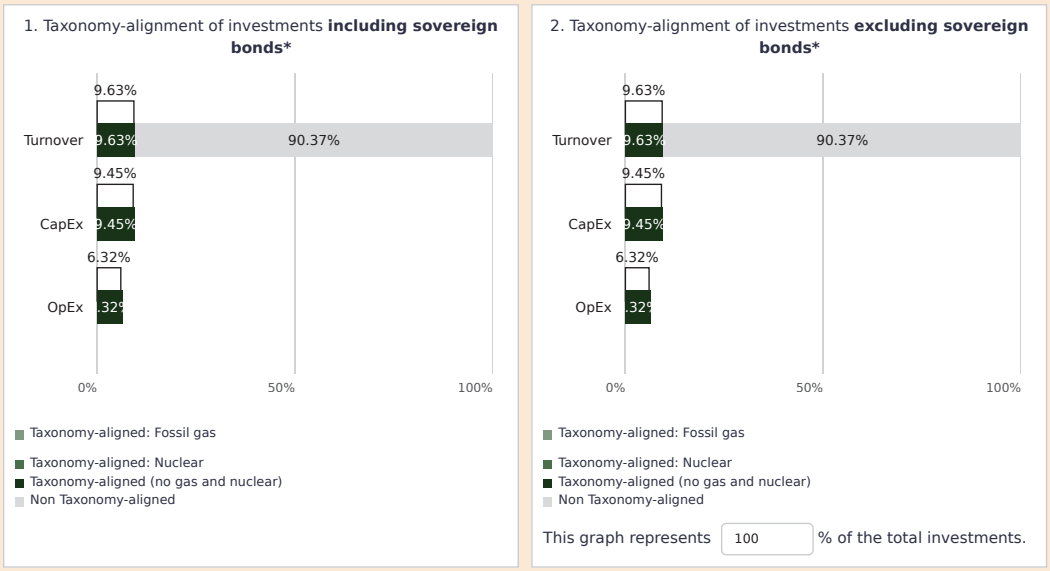
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

9.63% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

****For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**3.52%**
Transition	**0.34%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 39.12% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

24.50% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental characteristics by applying the ESG Policy of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

The Benchmark does not align with, and was not selected for the purposes of measuring the Fund's attainment of the Fund's environmental and social characteristics. The Fund does not seek to track the performance of an index. The Fund holds an actively-managed portfolio of bonds that is not constrained by the Benchmark.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco GBP Corporate Bond Screened & Tilted UCITS ETF

Legal entity identifier: 5493009S5SP0M7KFYI78

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 54.23 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the Bloomberg MSCI Sterling Liquid Corporate Screened & Tilted Index (formerly Bloomberg MSCI Sterling Liquid Corporate ESG Weighted SRI Bond Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund usesd a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Bloomberg Sterling Corporate Bond Index (the "**Parent Index**")	7.0% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	28.4% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (6.2%) and the CO2 emissions intensity reduction (17.8%) for the Fund are higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	474.17	67.26	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		339.55	67.26	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		32,486.03	67.26	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		33,299.75	67.26	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	472.18	67.26	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,296.80	96.70	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.22	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	46.33	73.32	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	14.05	35.70	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.07	0.96	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.60	94.21	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.32	69.43	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.14	94.21	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	38.79	91.91	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	21.54	24.67	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	43.00	81.69	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.12	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI**

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

framework") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
BARCLAYS PLC	Financials	0.70%	United Kingdom
HSBC FLT 11/16/2034	Financials	0.60%	United Kingdom

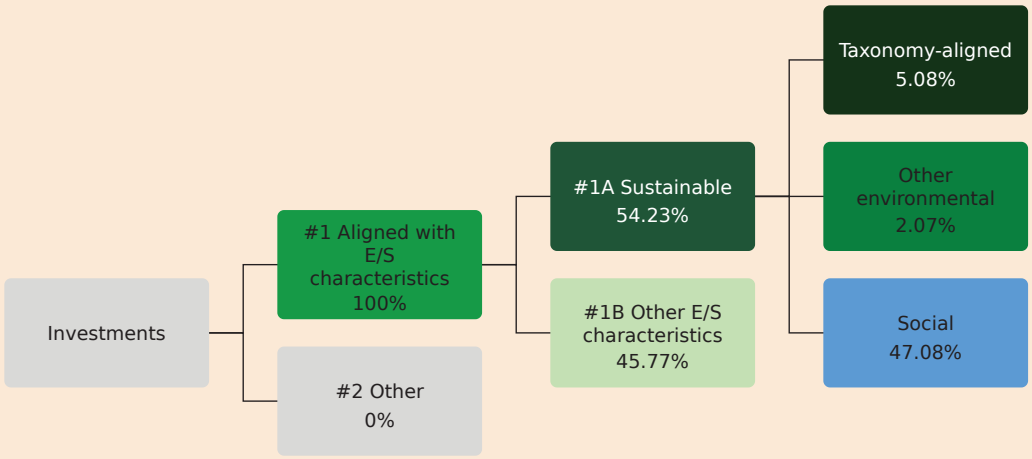
MORGAN STANLEY	Financials	0.50%	United States

What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

54.23% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	57.75

Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.20
10102050	Coal & Consumable Fuels	0.00
Total		**0.20**

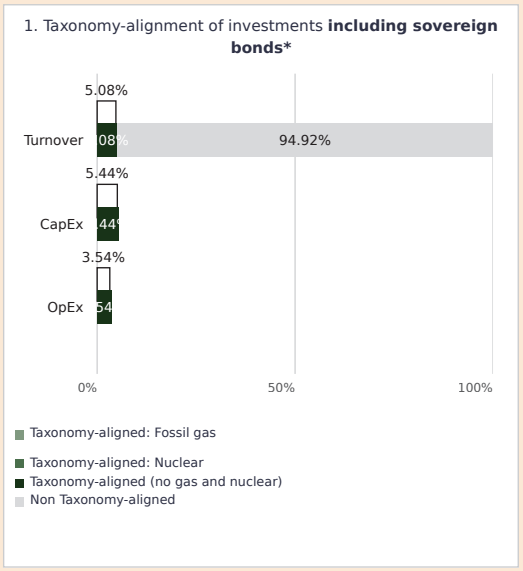
Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

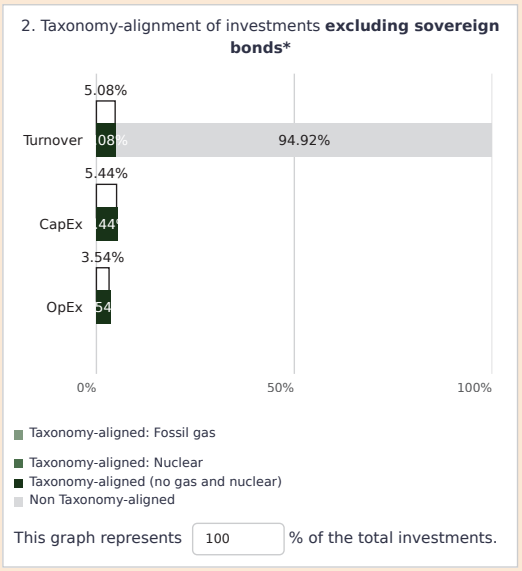
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



5.08% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**1.22%**
Transition	**0.04%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 2.07% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

47.08% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.03	8.06
CO2 emissions intensity (Scope 1+2/Revenue)	43.4	43.1
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.03	7.51
C02 emissions intensity (Scope 1+2/Revenue)	43.4	60.5
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 7.0% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global High Yield Corporate Bond ESG Climate Transition UCITS ETF

Legal entity identifier: 549300IOSJ6SE24AU714

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 93.50 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared to similar issuers. The fund also reduced exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies, whilst also reducing the Fund's overall exposure to risks arising from a transition to a lower-carbon economy by lowering exposure to carbon intensive issuers or industries.

The Fund achieved the environmental and social characteristics by tracking the Bloomberg MSCI Global High Yield Liquid Corporate Climate Transition ESG Bond Index (CTB) ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

*Please note that pursuant to a change to the Reference Index, whereby the methodology of the Reference Index was amended by the index provider to incorporate the minimum standards for an EU Climate Transition Benchmark, including targeting a reduction of greenhouse gas (absolute GHG emissions) by at least 7% per annum (the "**Decarbonisation Target**"), the environmental and social characteristics promoted by the Fund and the sustainable investment approach of the Fund was changed on 1 May 2025.*

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2025, the data is representative of

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the reference period:

Sustainability Indicator	Indicator Performance
Absolute GHG emissions (Scope 1+2+3) relative to the Bloomberg Euro Corporate Index (the "**Parent Index**")	32.9% reduction
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	15% reduction per annum*
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies
MSCI ESG Score (as defined in the methodology of the Reference Index) relative to the Parent Index	12.7% improvement

**The Fund measures its attainment of the Decarbonisation Target once per year on the date of the incorporation of the decarbonisation target for the Reference Index, and subsequent anniversaries of this date.*

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (17.0%) for the Fund was lower. The previous CO2 emissions intensity reduction (39.0%) was based on Scope 1+2/Revenue, so is not comparable to the reduction referenced above. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to the objective of reducing exposure to risks arising from a transition to a lower-carbon economy by lowering exposure to carbon intensive companies or industries (such risks include increased cost of doing business, regulatory actions, such as carbon taxes and changes in market preferences, such as consumers shifting purchases towards low carbon products).

The Fund achieved those objectives by investing in constituents of the Reference Index, which is constructed to meet the minimum requirements of an EU Climate Transition Benchmarks as based on the commitments laid down in the Paris Agreement in accordance with the Delegated Regulation (EU) 2020/1818 for the methodology of benchmark indices that would be aligned with the objectives of the Paris Agreement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data isn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	14,043.58	82.70	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		3,187.62	82.70	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		153,075.28	82.70	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		170,306.48	82.70	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	973.18	82.70	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,358.75	96.77	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	1.35	98.00	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	73.02	57.40	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	15.06	29.03	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.15	0.54	
	Electricity, gas, steam & air conditioning supply	4.59	2.51	
	Manufacturing	1.55	21.81	
	Mining & quarrying	1.47	1.37	
	Real Estate activities	0.31	4.66	
	Transportation & storage	6.08	3.75	
	Water supply, sewerage, waste management & remediation activities	0.59	0.34	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.08	5.38	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	2.50	95.88	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.02	0.09	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	2.01	83.60	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.22	95.88	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	57.31	94.12	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	10.56	3.47	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	31.25	93.01	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.70	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

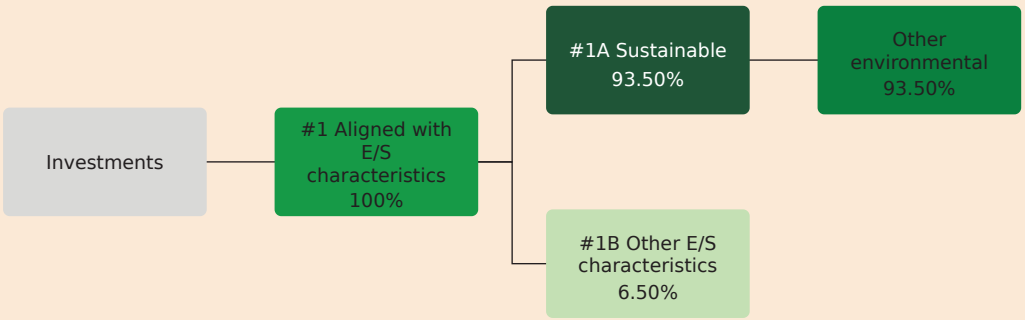
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

100% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

93.50% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown as at - The data is representative of the reference period.

10102030	Oil & Gas Refining & Marketing	1.18
10102040	Oil & Gas Storage & Transportation	1.59
10102050	Coal & Consumable Fuels	0.00
Total		**4.83**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

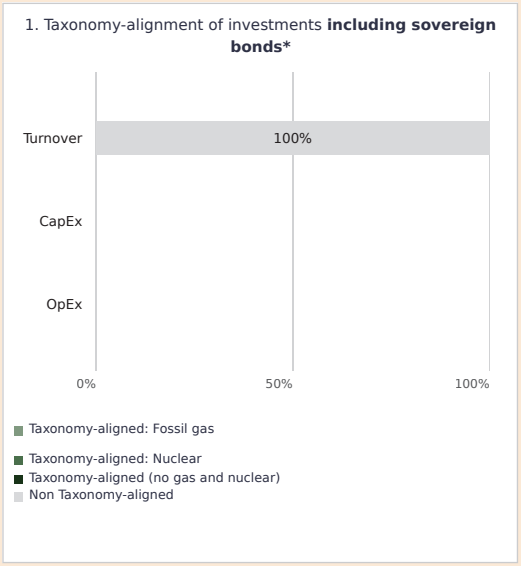
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

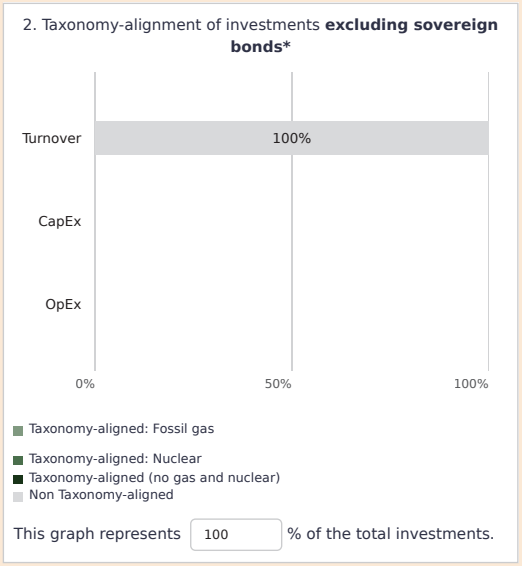
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 93.50% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See table completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics, whilst also meeting the minimum standards for an EU Climate Transition Benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Absolute GHG emissions (Scope 1+2+3) in tonnes	8.9	8.7
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	15% reduction per annum	16% reduction per annum
Percentage of the portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.41	6.38

How did this financial product perform compared with the reference benchmark?

As Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators
compared with the Reference Benchmark.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
Absolute GHG emissions (Scope 1+2+3) in tonnes	8.9	13.2
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	15% reduction per annum	15% reduction per annum
Percentage of the portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 14.4% exposure to excluded companies at the latest Reference Index rebalance date
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.41	5.68

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco AT1 Capital Bond UCITS ETF **Legal entity identifier: 63540079IESLQABALN14**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:**_____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**_____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it has exposure to are not involved in controversial and environmentally damaging business activities. The Fund achieved this by tracking the iBoxx USD Contingent Convertible Liquid Developed Market AT1 (8% Issuer Cap) Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The environmental and social characteristics were achieved by applying the Index Provider’s exclusion criteria to the eligible securities.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity of the Fund	1.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last reference period the CO2 emissions intensity (2.7) for the Fund has decreased slightly. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	49.55	98.10	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		83.53	98.10	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		369,406.30	98.10	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		369,539.38	98.10	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	339.00	98.10	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	2,059.43	99.45	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.45	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	40.75	89.63	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	31.39	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.00	0.00	
	Manufacturing	0.00	0.00	
	Mining & quarrying	0.00	0.00	
	Real Estate activities	0.00	0.00	
	Transportation & storage	0.00	0.00	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.00	0.00	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.00	99.45	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.00	98.10	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.45	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	3.42	99.45	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	31.07	13.19	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	43.76	99.45	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.45	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

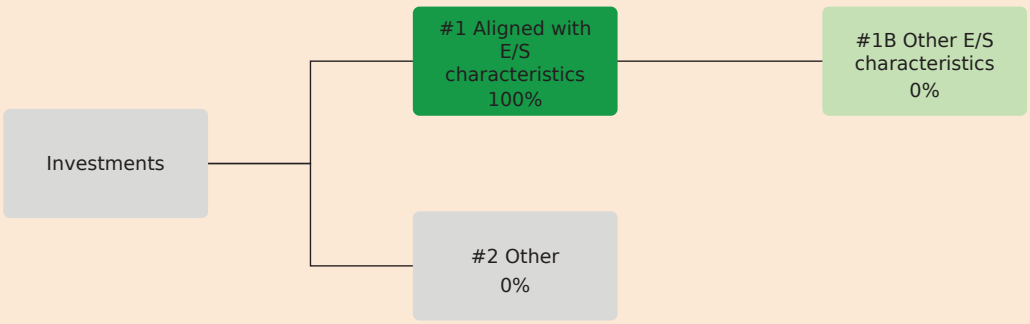
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

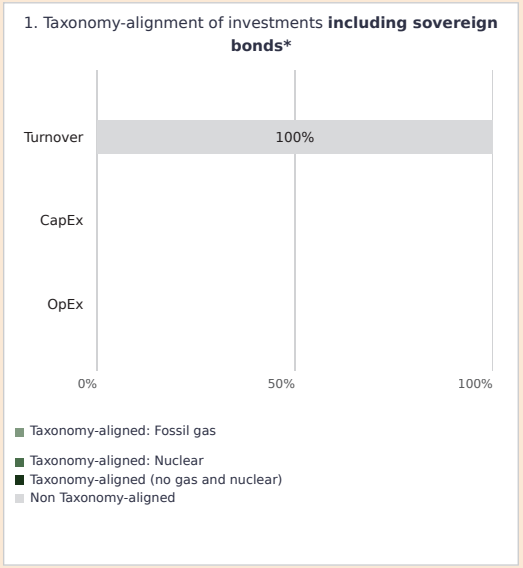
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

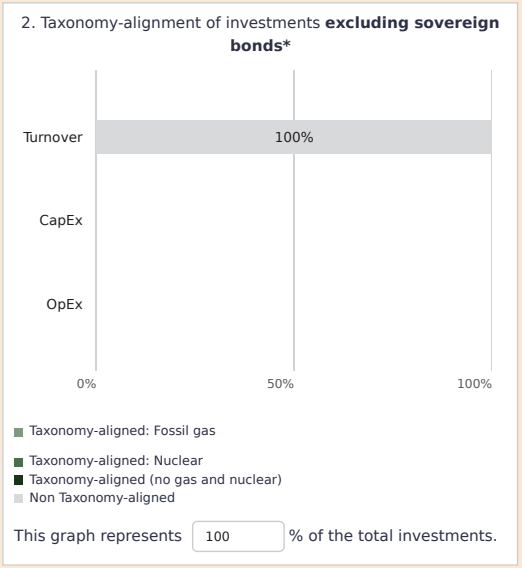
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See below fields.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator performance	Reference Index Indicator performance
CO2 emissions intensity	1.4	1.4
Percentage of exposure in excluded companies involved in controersial business activities and controversies (as defined in the methodology of the Reference Index)	This Fund had 0% exposure to excluded companies as at each Reference Index rebalance date	This Reference Index had 0% exposure to excluded companies as at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Index. Please see below for the performance of the sustainability indicators compared with the Reference Index.

How did this financial product perform compared with the broad market index?

Due to the specific nature of the asset class there is not an appropriate broad market index available for such a comparison.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Europe Catholic Principles UCITS ETF **Legal entity identifier: 5493004L1J8DLBP0LZ70**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 79.91 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to companies with high environment, social and governance ("**ESG**") ratings, relative to sector peers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Europe Select Catholic Principles Selection 10/40 Index (formerly the MSCI Europe Select Catholic Principles ESG Leaders 10/40 Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the fund relative to the MSCI Europe Index (the "**Parent Index**")	9.9% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	4.0% increase
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (9.7%) for the Fund is slightly higher and the CO2 emissions intensity reduction (2.0%) has moved to an increase. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

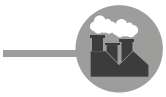
MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.



The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles . With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	862.26	99.93	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		244.66	99.93	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		13,181.10	99.93	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		14,288.01	99.93	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	543.31	99.93	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,496.94	99.95	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.95	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	49.36	80.82	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	6.45	41.51	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.12	1.94	
	Electricity, gas, steam & air conditioning supply	0.51	4.05	
	Manufacturing	0.57	43.11	
	Mining & quarrying	1.19	0.56	
	Real Estate activities	0.58	1.22	
	Transportation & storage	0.42	2.82	
	Water supply, sewerage, waste management & remediation activities	0.62	0.37	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.06	4.95	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.63	99.95	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.55	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.64	99.56	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.95	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	26.26	99.82	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	13.93	13.83	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.39	99.68	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.95	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI framework**”) to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV	Information Technology	6.36%	Netherlands
ALLIANZ SE-REG	Financials	3%	Germany
SCHNEIDER ELECTR	Industrials	2.68%	France
UNILEVER PLC	Consumer Staples	2.13%	United Kingdom
ZURICH INSURANCE	Financials	1.96%	Switzerland
ABB LTD-REG	Industrials	1.88%	Switzerland
L'OREAL	Consumer Staples	1.86%	France

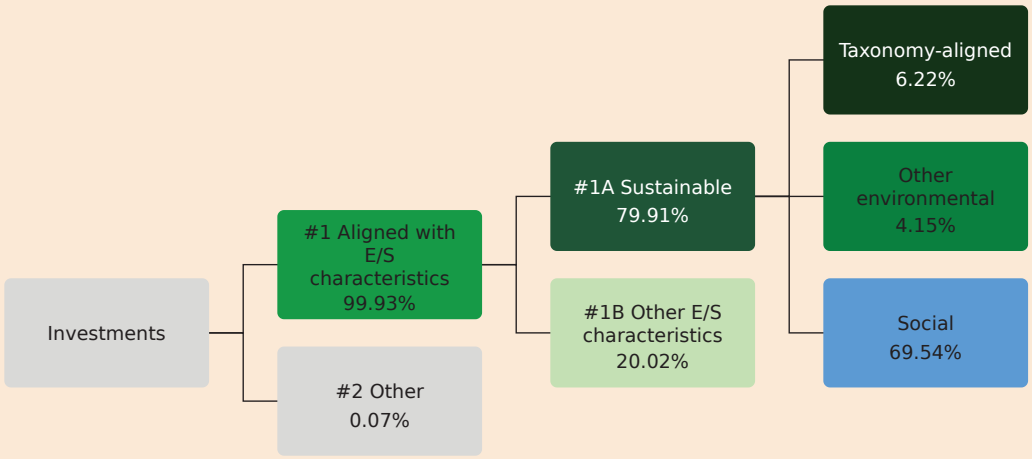
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

99.93% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.07% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

79.91% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown as the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	26.15

Consumer Discretionary	10.26
Information Technology	9.15
Industrials	21.12
Consumer Staples	9.44
Energy	0.12
Real Estate	1.22
Health Care	5.82
Materials	6.52
Utilities	4.46
Cash	0.07
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.12
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**0.12**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

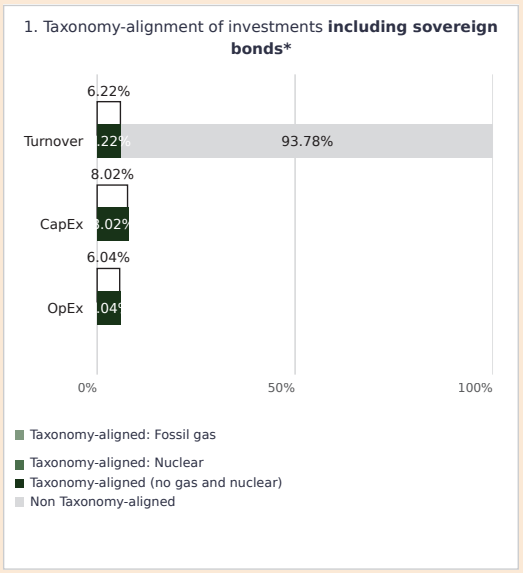
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

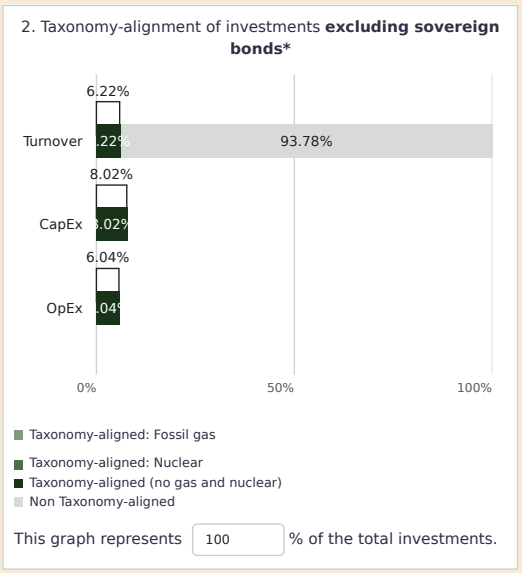
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 6.22% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

****For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**3.29%**
Transition	**0.19%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 4.15% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

69.54% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.07% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to companies with high ESG ratings, relative to sector peers.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.54	8.54
CO2 emissions intensity (Scope 1+2/Revenue)	91.9	91.9
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.54	7.76
CO2 emissions intensity (Scope 1+2/Revenue)	91.9	88.4
Percentage of the fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 58.4% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI World Universal Screened UCITS ETF **Legal entity identifier: 549300IKZ21UH0RQ7V16**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 56.33 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large and mid-capitalisation companies in developed markets worldwide demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI World Universal Select Business Screens Index (formerly MSCI World ESG Universal Select Business Screens Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the "**Parent Index**")	9.1% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	24.7% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (8.2%) for the Fund is slightly higher and the CO2 emissions intensity reduction (27.9%) slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles . With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund- the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	3,707.23	99.91	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		1,051.68	99.91	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		79,936.60	99.91	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		84,695.50	99.91	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	429.51	99.91	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,221.26	99.91	Fund level total emission intensity- Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	1.11	99.92	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	51.83	74.89	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	22.55	40.28	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	2.15	0.04	
	Construction	0.09	0.46	
	Electricity, gas, steam & air conditioning supply	3.87	2.02	
	Manufacturing	0.21	39.06	
	Mining & quarrying	1.23	1.77	
	Real Estate activities	0.95	1.88	
	Transportation & storage	2.08	2.01	
	Water supply, sewerage, waste management & remediation activities	0.54	0.21	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.08	3.56	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	3.66	99.89	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.21	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	2.11	99.38	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.06	99.89	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	53.18	99.65	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	15.59	5.15	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	36.10	99.62	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.91	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI framework**”) to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

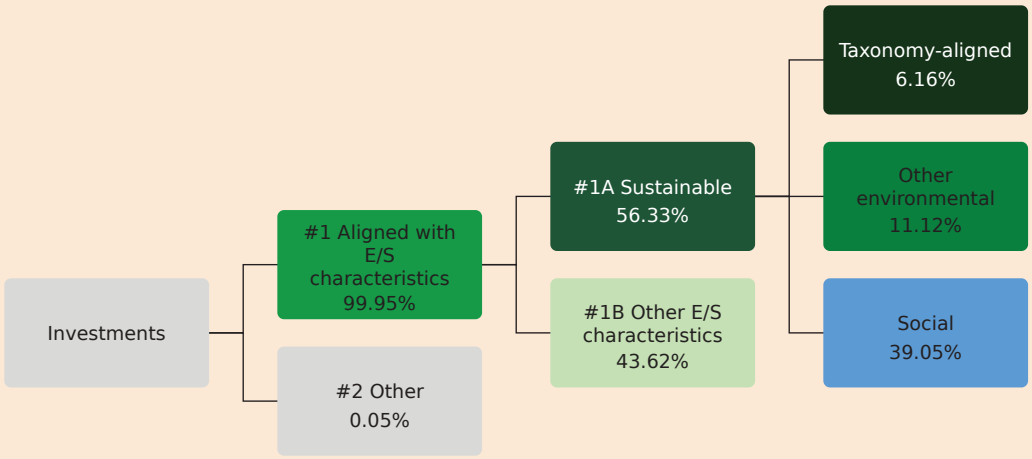
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

99.95% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.05% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

56.33% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	20.59
Communication Services	6.27
Consumer Discretionary	9.48
Information Technology	26.92
Industrials	10.68
Consumer Staples	5.56
Energy	2.27
Real Estate	2.30
Health Care	10.28
Materials	3.37
Utilities	2.23
Cash	0.05
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.21
10102010	Integrated Oil & Gas	0.28
10102020	Oil & Gas Exploration & Production	0.50
10102030	Oil & Gas Refining & Marketing	0.27
10102040	Oil & Gas Storage & Transportation	0.95
10102050	Coal & Consumable Fuels	0.06
Total		**2.27**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

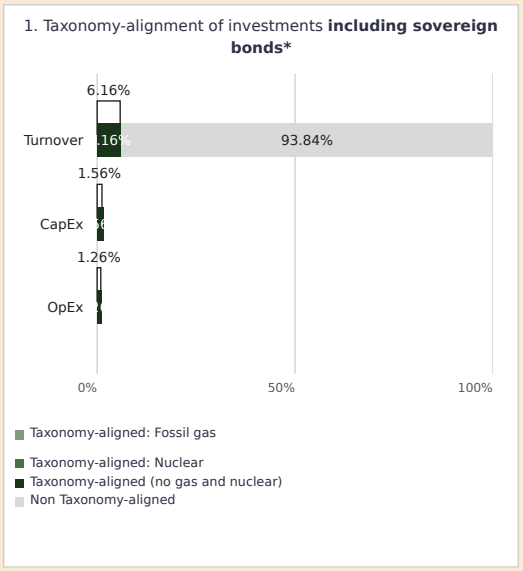
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

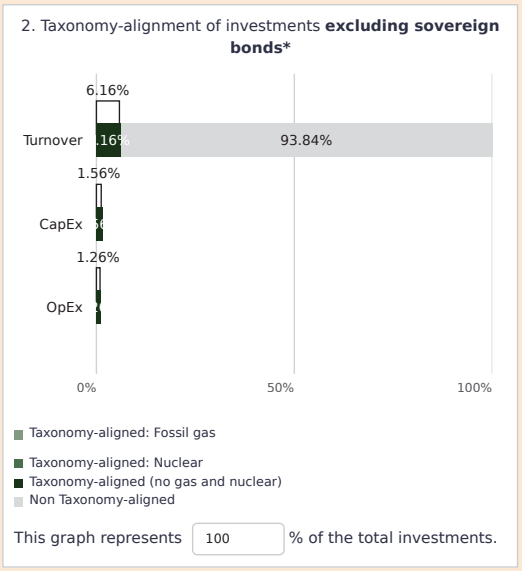
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

6.16% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**1.01%**
Transition	**0.05%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 11.12% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

39.05% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.05% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) relative to the Parent Index	7.29	7.29
CO2 emissions intensity (Scope 1+2/Revenue)	70.7	70.7
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as rebalance date defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieved the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.29	6.68
CO2 emissions intensity (Scope 1+2/Revenue)	70.7	94.0
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 5.5% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Europe Universal Screened UCITS ETF **Legal entity identifier: 549300NR0JE6T31NQ528**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.89 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies in Europe demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Europe Universal Select Business Screens Index (formerly the MSCI Europe ESG Universal Select Business Screens Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	**Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Europe Index (the "**Parent Index**")	6.7% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	17.1% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (5.3%) and the CO2 emissions intensity reduction (16.7%) for the Fund are both slightly higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles . With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	5,664.41	99.81	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		1,168.58	99.81	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		96,682.47	99.81	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		103,515.45	99.81	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	566.92	99.81	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,445.93	99.82	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.29	99.88	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	50.13	80.43	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	16.57	43.20	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.12	0.85	
	Electricity, gas, steam & air conditioning supply	1.71	4.87	
	Manufacturing	0.35	43.44	
	Mining & quarrying	1.13	2.43	
	Real Estate activities	0.50	0.88	
	Transportation & storage	0.67	1.39	
	Water supply, sewerage, waste management & remediation activities	0.64	0.11	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.07	3.09	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	2.83	99.88	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.62	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	2.43	99.62	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.88	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	20.31	99.72	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	13.07	13.03	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	42.21	99.55	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.86	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI**

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

framework") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV	Information Technology	3.59%	Netherlands

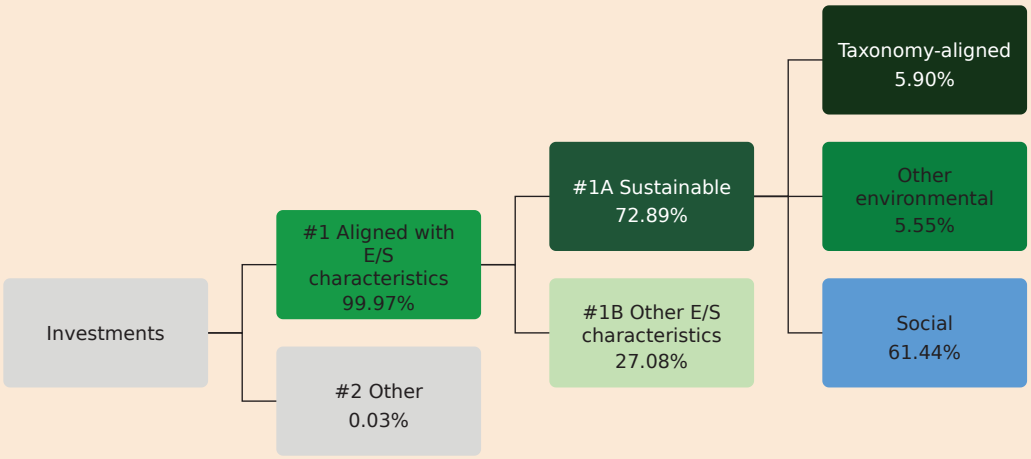
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

99.97% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.03% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

72.89% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

10102030	Oil & Gas Refining & Marketing	0.07
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**1.47**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

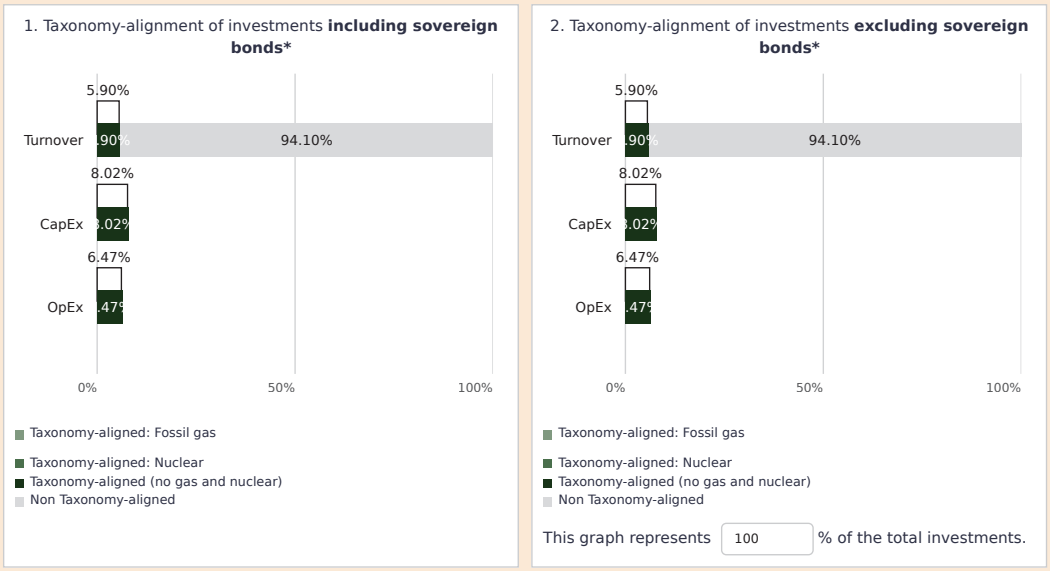
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

5.90% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

****For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**3.24%**
Transition	**0.17%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 5.55% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

61.44% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.03% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections:

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to fully replicates the performance of the Reference Index , the sustainability

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator performance	Reference Index Indicator performance
MSCI ESG Score (as defined in the methodology Of the Reference Index) relative to the Parent Index	8.28	8.28
CO2 emissions intensity (Scope 1+2/Revenue)	73.2	73.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.28	7.76
CO2 emissions intensity (Scope 1+2/Revenue)	73.2	88.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology Of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 2.2% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI USA Universal Screened UCITS ETF **Legal entity identifier: 54930050XX7J4D0I5R34**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

- ☐ **Yes**
- ☒ **No**

- ☐ It made **sustainable investments with an environmental objective:** _____%
  - ☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- ☐ It made **sustainable investments with a social objective:** _____%

- ☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 49.42 % of sustainable investments
  - ☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
  - ☒ with a social objective
- ☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies in the USA demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI USA Universal Select Business Screens Index (formerly the MSCI USA ESG Universal Select Business Screens Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI USA Index (the "**Parent Index**")	8.7% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	25.6% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (7.2%) for the Fund is higher and the CO2 emissions intensity reduction (28.1%) is lower. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles . With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	35,968.57	99.95	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		11,768.38	99.95	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		850,420.07	99.95	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		898,157.03	99.95	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	332.28	99.95	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,027.90	99.95	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	1.22	99.94	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	50.89	75.40	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	27.62	40.67	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	1.93	0.06	
	Construction	0.11	0.23	
	Electricity, gas, steam & air conditioning supply	6.18	1.45	
	Manufacturing	0.17	38.80	
	Mining & quarrying	0.95	0.85	
	Real Estate activities	1.23	2.15	
	Transportation & storage	2.08	1.65	
	Water supply, sewerage, waste management & remediation activities	0.51	0.26	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.07	4.02	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	3.67	99.90	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.08	99.25	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.90	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	65.23	99.57	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	18.13	4.07	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.22	99.66	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.93	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI**

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

framework") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	5.20%	United States
APPLE INC	Information Technology	5.17%	United States
MICROSOFT CORP	Information Technology	4.26%	United States
AMAZON.COM INC	Consumer Discretionary	3.28%	United States
BROADCOM INC	Information Technology	2.54%	United States
ALPHABET INC-A	Communication Services	2.04%	United States
VISA INC-CLASS A	Financials	1.91%	United States
ALPHABET INC-C	Communication Services	1.74%	United States
TESLA INC	Consumer Discretionary	1.37%	United States
JPMORGAN CHASE	Financials	1.31%	United States
MASTERCARD INC-A	Financials	1.27%	United States
META PLATFORMS-A	Communication Services	1.25%	United States

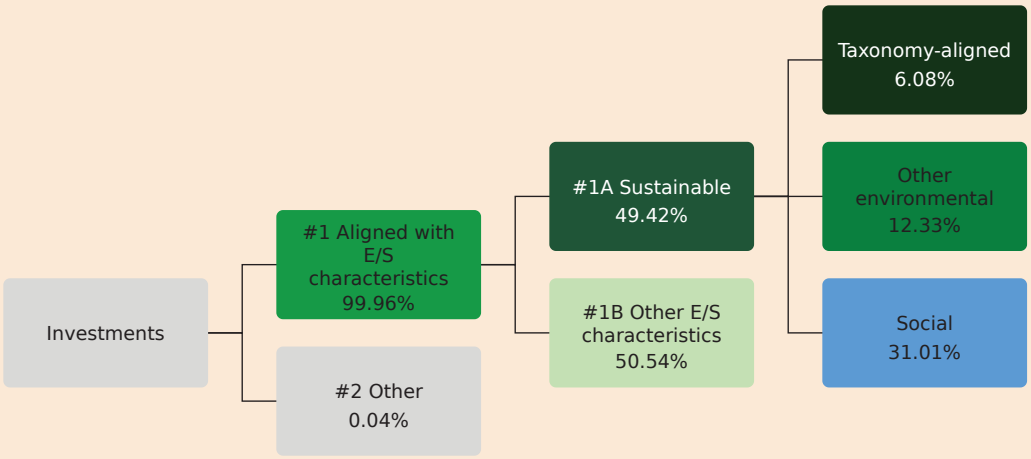
ELI LILLY & CO	Health Care	1.11%	United States
BERKSHIRE HATH-B	Financials	1.09%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

99.96% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.04% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

49.42% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	16.24
Communication Services	7.73
Consumer Discretionary	10.33
Information Technology	32.75
Industrials	8.48
Consumer Staples	5.16
Energy	2.09
Real Estate	2.71
Health Care	10.43
Materials	2.41
Utilities	1.63
Cash	0.04
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.32
10102010	Integrated Oil & Gas	0.05
10102020	Oil & Gas Exploration & Production	0.52
10102030	Oil & Gas Refining & Marketing	0.33
10102040	Oil & Gas Storage & Transportation	0.87
10102050	Coal & Consumable Fuels	0.00
Total		**2.09**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

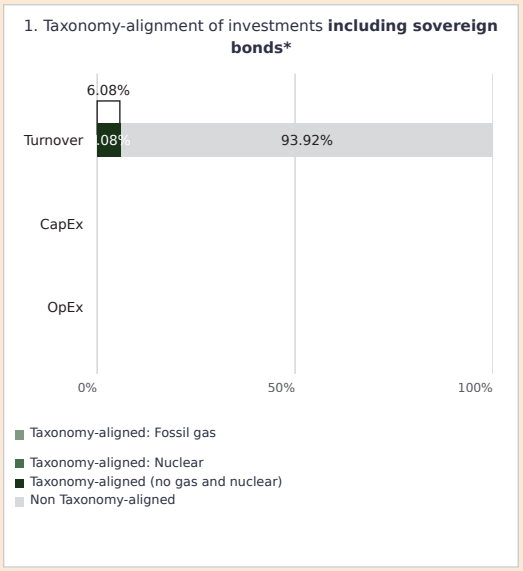
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

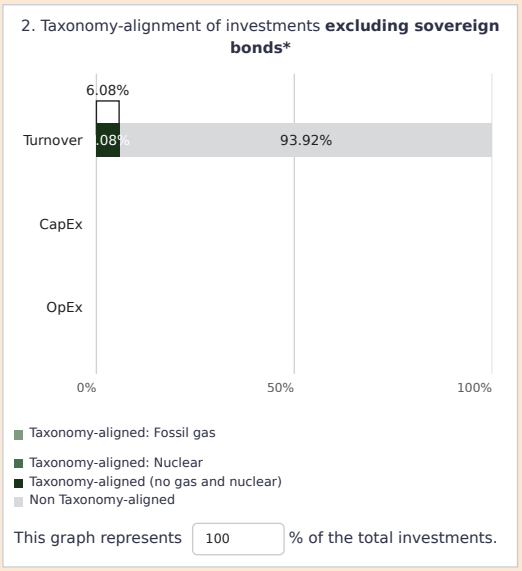
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



6.08% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**0.59%**
Transition	**0.03%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 12.33% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

31.01% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.04% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) relative to the Parent Index	6.84	6.84
CO2 emissions intensity (Scope 1+2/Revenue)	67.0	67.0
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.84	6.29
CO2 emissions intensity (Scope 1+2/Revenue)	67.0	90.1
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.5% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Pacific Ex Japan Universal Screened UCITS ETF

Legal entity identifier: 549300T97JTQ2VFQQ072

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 59.52 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies across Australia, Hong Kong, New Zealand and Singapore demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Pacific ex Japan Universal Select Business Screens Index (formerly the MSCI Pacific ex Japan ESG Universal Select Business Screens Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Pacific ex Japan Index (the "**Parent Index**")	3.3% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Index Parent	35.3% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (6.2%) for the Fund is lower and the CO2 emissions intensity reduction (32.1%) is slightly higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles . With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	1,400.68	99.98	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		466.79	99.98	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		21,607.54	99.98	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		23,475.01	99.98	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	529.58	99.98	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,533.12	99.98	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	2.91	99.98	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	63.38	50.12	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	6.91	37.85	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	5.42	2.07	
	Manufacturing	0.34	9.53	
	Mining & quarrying	2.43	9.63	
	Real Estate activities	0.15	7.66	
	Transportation & storage	0.67	3.32	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.15	6.04	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	7.71	99.98	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	7.77	98.63	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.98	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	65.69	99.98	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	17.57	0.48	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	37.74	98.58	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI framework**”) to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
DBS GROUP HLDGS	Financials	5.33%	Singapore

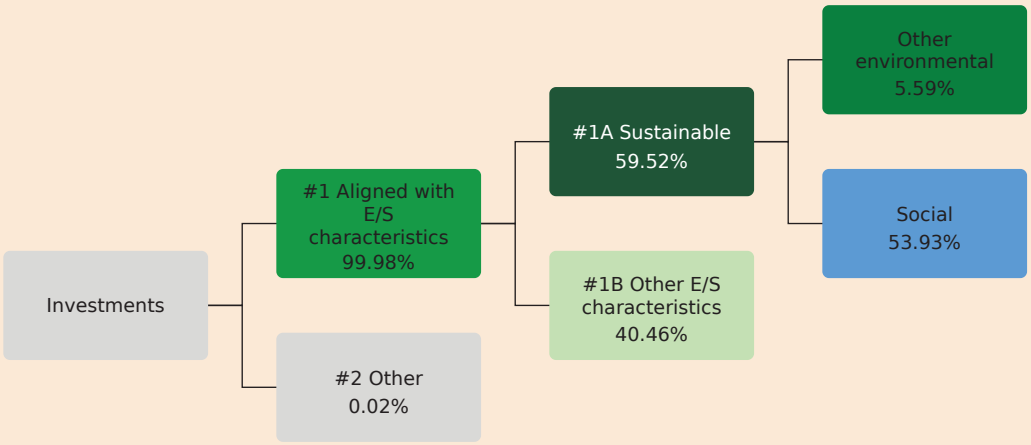
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

99.98% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.02% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

59.52% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	47.54
Communication Services	4.12
Consumer Discretionary	6.56

Health Care	6.81
Materials	8.38
Utilities	2.07
Cash	0.02
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	2.91
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**2.91**

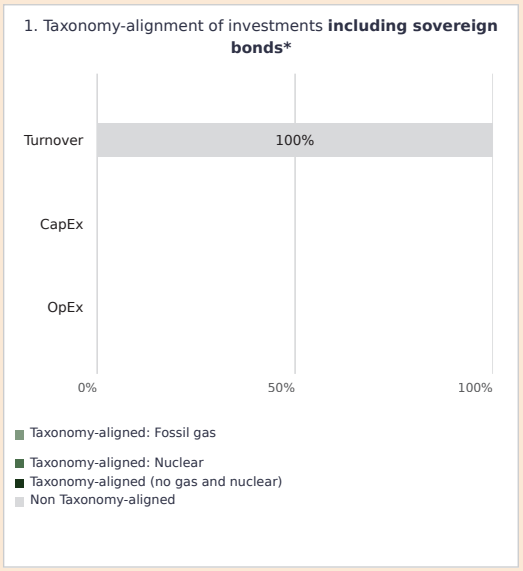
Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

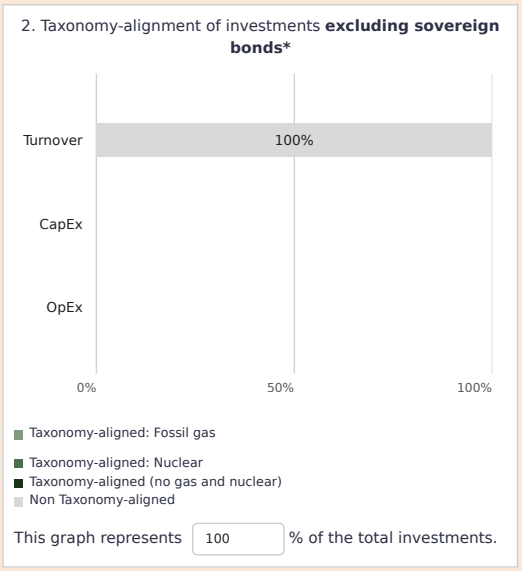
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



0% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 5.59% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

53.93% of the Fund's NAV.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.02% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) relative to the Parent Index	8.04	8.04
CO2 emissions intensity (Scope 1+2/Revenue)	110.6	110.6
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index)	8.04	7.79
CO2 emissions intensity (Scope 1+2/Revenue)	110.6	170.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 8.5% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Japan Universal Screened UCITS ETF **Legal entity identifier: 5493004I5V0ZCKPHLK17**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 72.94 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies across Japan demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Japan Universal Select Business Screens Index (formerly the MSCI Japan ESG Universal Select Business Screens Index) ((the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Japan Index (the "**Parent Index**")	6.2% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	17.0% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (6.1%) and the CO2 emissions intensity reduction (14.2%) for the Fund are slightly higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles . With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, The data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	264.68	99.55	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		89.42	99.55	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		8,352.44	99.55	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		8,706.54	99.55	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	1,119.33	99.55	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	2,376.68	99.55	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.37	99.55	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	77.15	63.38	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	5.32	22.32	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.06	1.07	
	Electricity, gas, steam & air conditioning supply	1.08	0.36	
	Manufacturing	0.27	47.83

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.15	1.38	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	2.47	99.55	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	1.34	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.19	99.25	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.55	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	27.26	99.51	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	22.44	99.41	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.55	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI framework**”) to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
SONY GROUP CORP	Consumer Discretionary	4.84%	Japan

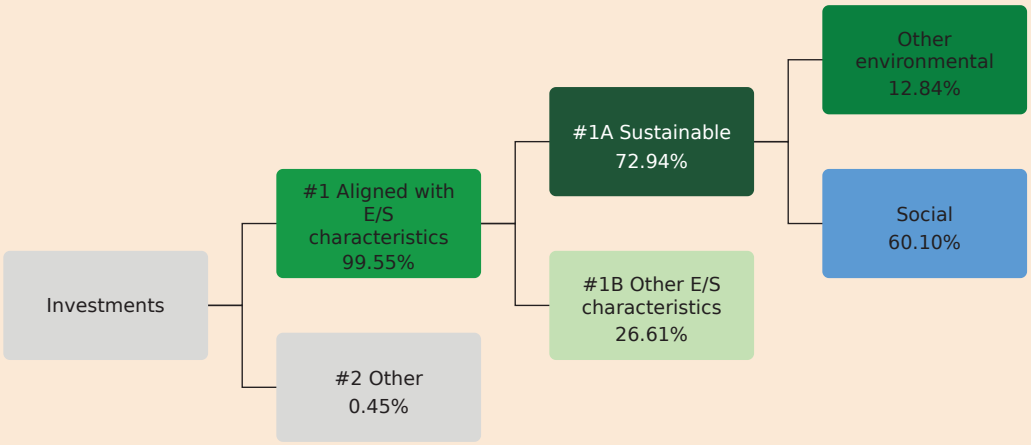
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

99.55% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.45% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

72.94% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period

Sector (GICS)	Weight %
Financials	17.79

Total		**1.03**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

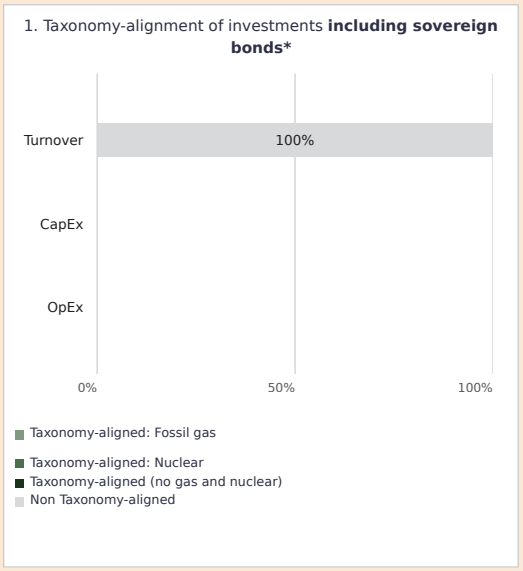
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

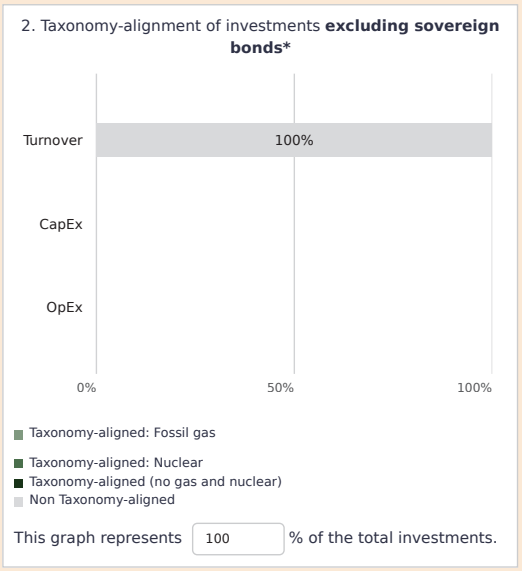
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



0% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 12.84% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

60.10% of the Fund's NAV.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.45% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator performance	Reference Index Indicator performance
MSCI ESG score (as defined in the methodology of the Reference Index) relative to the Parent Index	8.01	8.01
CO2 emissions intensity (Scope 1+2/Revenue)	48.4	48.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
MSCI ESG Score (as defined in the methodology Of the Reference Index)	8.01	7.55
CO2 emissions intensity (Scope 1+2/Revenue)	48.4	58.4
Percentage of the Fund porffolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 3.7% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Europe Ex UK Universal Screened UCITS ETF

Legal entity identifier: 549300M2XC8K4G8QB195

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 77.51 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies across 14 Developed Markets in Europe (excluding the UK) demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI Europe ex UK Universal Select Business Screens Index (formerly the MSCI Europe ex UK ESG Universal Select Business Screens Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology Of the Reference Index) Of the Fund relative to the MSCI Europe ex UK Index (the "**Parent Index**")	6.2% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	12.0% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (5.0%) for the Fund is higher and the CO2 emissions intensity reduction (12.0%) is the same. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles . With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	337.42	99.80	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		63.35	99.80	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		5,343.51	99.80	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		5,744.29	99.80	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	591.23	99.80	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,581.23	99.81	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.36	99.89	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	50.61	82.28	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	13.25	46.13	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.12	0.99	
	Electricity, gas, steam & air conditioning supply	2.19	4.74	
	Manufacturing	0.37	49.09	
	Mining & quarrying	0.90	1.42	
	Real Estate activities	0.62	0.89	
	Transportation & storage	0.66	1.76	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail	0.05	2.32	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	2.06	99.89	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.78	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.56	99.56	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.89	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	16.25	99.67	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	9.48	10.99	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	40.97	99.46	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.86	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

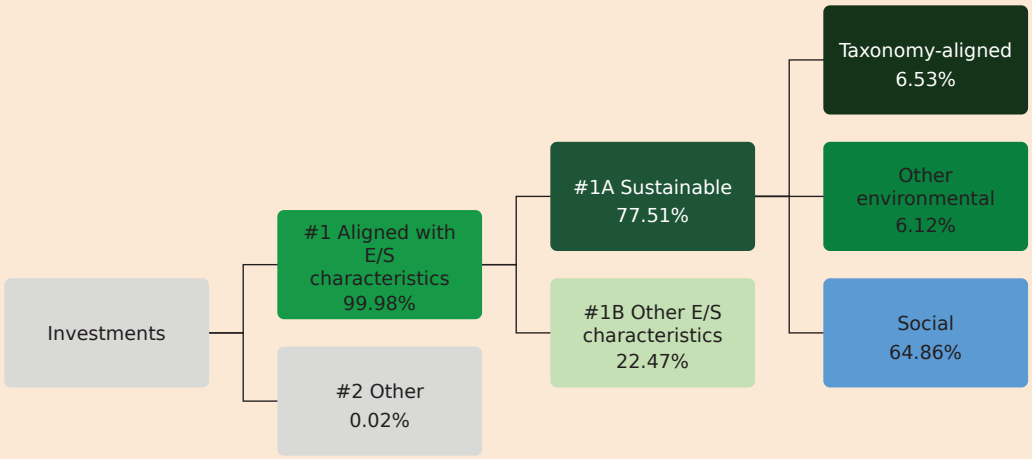
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

99.98% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.02% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

77.51% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Total		**1.30**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

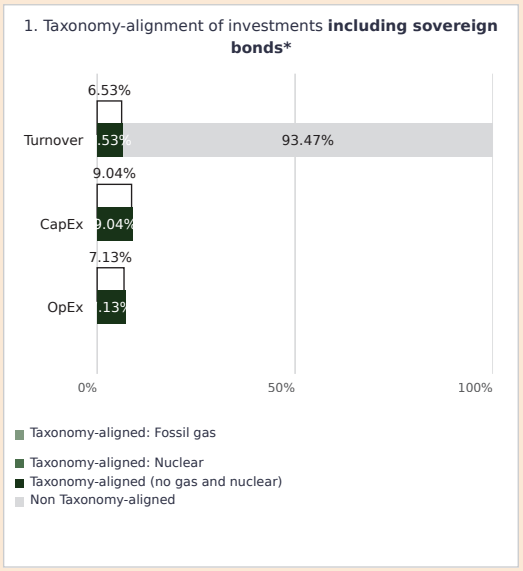
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

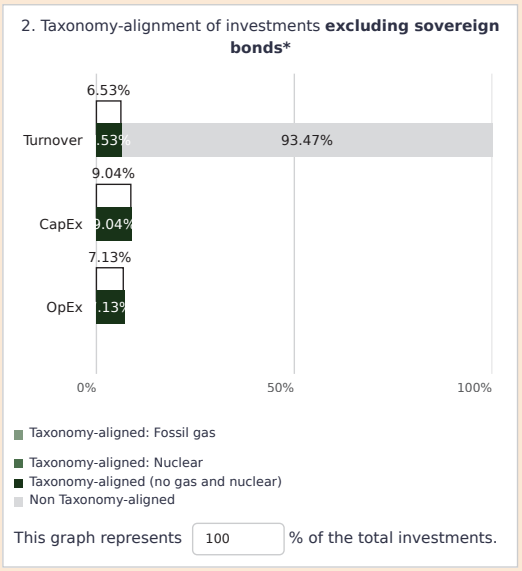
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



6.53% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

****For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**3.78%**
Transition	**0.21%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 6.12% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

64.86% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.02% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG score (as defined in the methodology of the Reference Index) relative to the Parent Index	8.31	8.31
CO2 emissions intensity (Scope 1+2/Revenue)	79.4	79.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
MSCI ESG score (as defined in the methodology of the Reference Index)	8.31	7.82
CO2 emissions intensity (Scope 1+2/Revenue)	79.4	90.2
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 9.1% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Emerging Markets Universal Screened UCITS ETF

Legal entity identifier: 549300JN2O1KVAIZA857

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 47.10 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to increase overall exposure to large- and mid-capitalisation companies across 26 Emerging Market (EM) countries demonstrating a robust ESG profile, as well as a positive trend in improving that profile. i.e. issuers with a more favourable or increasingly favourable ESG rating compared to similar issuers. The fund also reduced its exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies.

The Fund achieved the environmental and social characteristics by tracking the MSCI EM (Emerging Markets) Universal Select Business Screens Index (formerly the MSCI EM (Emerging Markets) ESG Universal Select Business Screens Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the fund relative to the MSCI Emerging Markets Index (the "**Parent Index**")	12.6% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	45.3% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (11.8%) for the Fund is slightly higher and the CO2 emissions intensity reduction (46.8%) slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to; biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that aren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, as the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	3,039.95	98.92	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		966.46	98.92	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		26,256.99	98.92	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		30,263.40	98.92	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	524.03	98.92	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,286.18	98.95	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.16	98.92	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	83.66	71.93	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	4.73	45.38	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.02	0.10	
	Electricity, gas, steam & air conditioning supply	1.06	1.16	
	Manufacturing	0.58	34.51	
	Mining & quarrying	2.01	4.91	
	Real Estate activities	0.33	1.38	
	Transportation & storage	1.98	1.06	
	Water supply, sewerage, waste management & remediation activities	0.71	0.12	
	Wholesale & Retail	0.08	3.12	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	2.62	98.92	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	3.00	98.59	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	1.62	98.92	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	63.86	98.68	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	12.23	1.20	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	20.89	94.55	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.79	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	5.84%	Taiwan
SAMSUNG ELECTRON	Information Technology	4.70%	South Korea
TENCENT	Communication Services	4.47%	China
BABA-W	Consumer Discretionary	2.89%	China
HDFC BANK LTD	Financials	2.34%	India
CCB-H	Financials	1.90%	China
SK HYNIX INC	Information Technology	1.83%	South Korea
XIAOMI CORP-W	Information Technology	1.39%	China

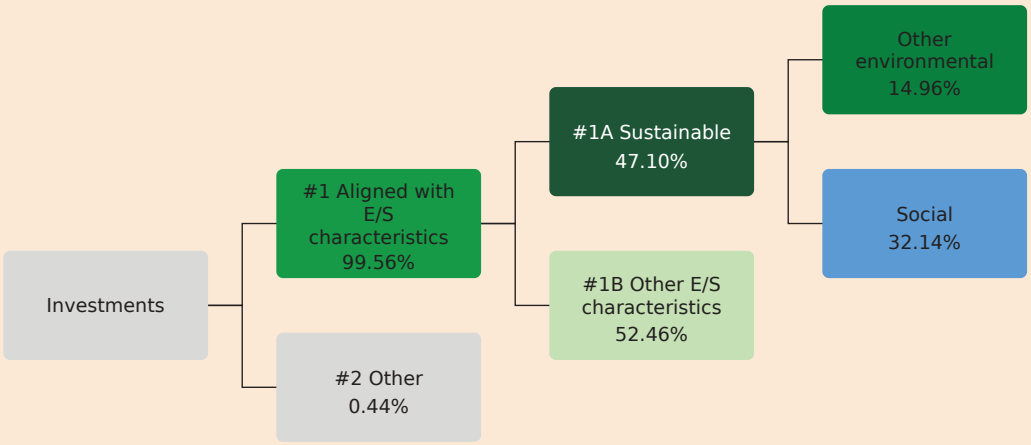
ICICI BANK LTD	Financials	0.81%	India

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

99.56% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.44% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

47.10% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown as the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	31.10
Communication Services	10.64

Health Care	2.96
Materials	4.60
Utilities	1.46
Cash	0.44
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.01
10101020	Oil & Gas Equipment & Services	0.42
10102010	Integrated Oil & Gas	1.27
10102020	Oil & Gas Exploration & Production	0.06
10102030	Oil & Gas Refining & Marketing	1.47
10102040	Oil & Gas Storage & Transportation	0.14
10102050	Coal & Consumable Fuels	0.00
Total		**3.37**

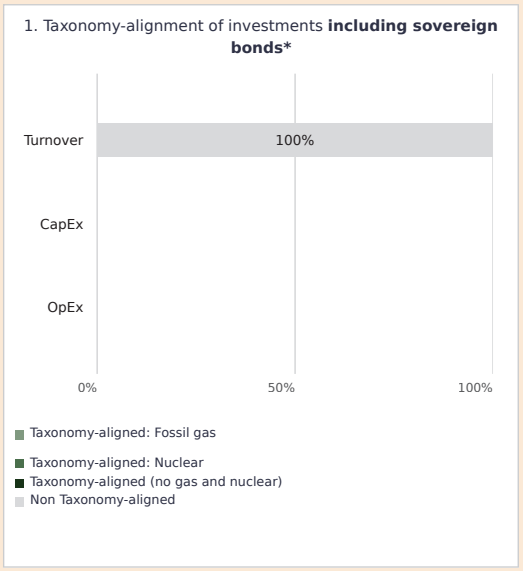
Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

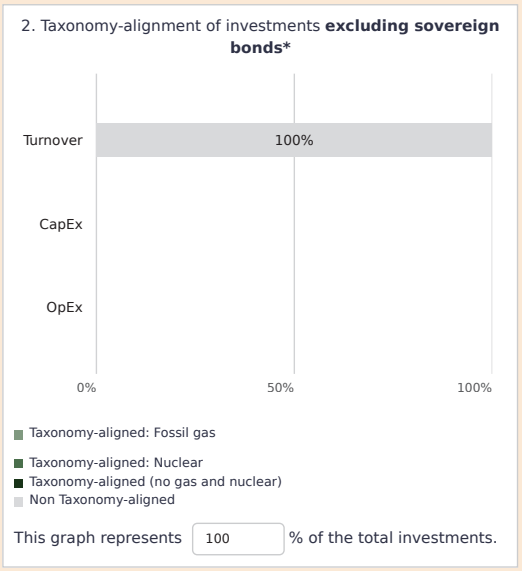
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



0% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 14.96% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

32.14% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.44% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.90	6.90
CO2 emissions intensity (Scope 1+2/Revenue)	157.8	157.8
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index)	6.90	6.12
CO2 emissions intensity (Scope 1+2/Revenue)	157.8	288.6
Percentage of the fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 6.5% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Active ESG Equity UCITS ETF **Legal entity identifier: 5493003S3W62ZS1AXM25**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

Yes	No
☐ It made **sustainable investments with an environmental objective:** _____%	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 80 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to gain exposure to a portfolio of equity and equity-related securities of companies which met the ESG Policy of the Fund.

The Fund achieved the environmental and social characteristics by excluding certain industries and activities that were considered by the Investment Manager to be inconsistent with ESG outcomes. The Fund also applied a proprietary ESG scoring system to ensure investment was made in “best of class” securities. Through the application of these criteria, the Fund continued to aim to adhere to the standards of the Febelfin ecolabel. The Fund maintained a lower carbon intensity of the portfolio relative to the MSCI World Index (the “**Benchmark**”).

The extent to which the environmental and/or social characteristics promoted by the Fund was met is further detailed in the performance of the sustainability indicators (see below).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance 2025	Indicator Performance 2024
Reduction in the initial investment universe after application of the best-in-class measure based on an overall ESG profile score	51.5% reduction	55.7% reduction
Reduction in the initial investment universe after application of the exclusions depending on business involvement in controversial activities and controversies including violations of the UN Global Compact, based on third party data and the Investment Manager's proprietary analysis and research	60.8% reduction	63.5% reduction
Reduction in carbon intensity of the Fund as measured against the Benchmark	52.1% reduction	50.1% reduction

…and compared to previous periods?

See above table comparing current and previous periods figures

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund achieved those objectives by investing in: (i) issuers which contributed positively to selected Sustainable Development Goals (SGDs) that related to the above objectives; or (ii) companies which generated a material part of their revenue from environmental impact themes such as energy transition, healthcare and food. The Fund also used a best-in-class approach and selected companies scoring higher, when compared to their peers, utilizing the investment manager’s proprietary scoring methodology.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The Fund addressed a number of other adverse indicators by excluding companies, sectors or countries from the investment universe if they are assessed to have violated international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles. By limiting of exposure to thermal coal, shale energy and oil sands the Fund also reduced its exposure to greenhouse gas emissions.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

The Fund excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund from 1st of January 2025 to 31st of December 2025. The data is

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	12,026.76	99.62	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		5,717.58	99.62	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		481,832.00	99.62	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		499,576.35	99.62	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	400.86	99.62	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,110.39	99.62	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.62	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	54.10	79.45	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	14.51	45.62	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.08	2.68	
	Electricity, gas, steam & air conditioning supply	0.14	0.16	
	Manufacturing	0.17	38.93	
	Mining & quarrying	1.13	1.89	
	Real Estate activities	0.01	0.12	
	Transportation & storage	0.95	1.38	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.06	6.27	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.99	99.62	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.76	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	13.05	99.54	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.62	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	54.88	99.58	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	12.40	3.14	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.38	99.26	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.62	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI**

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

framework") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

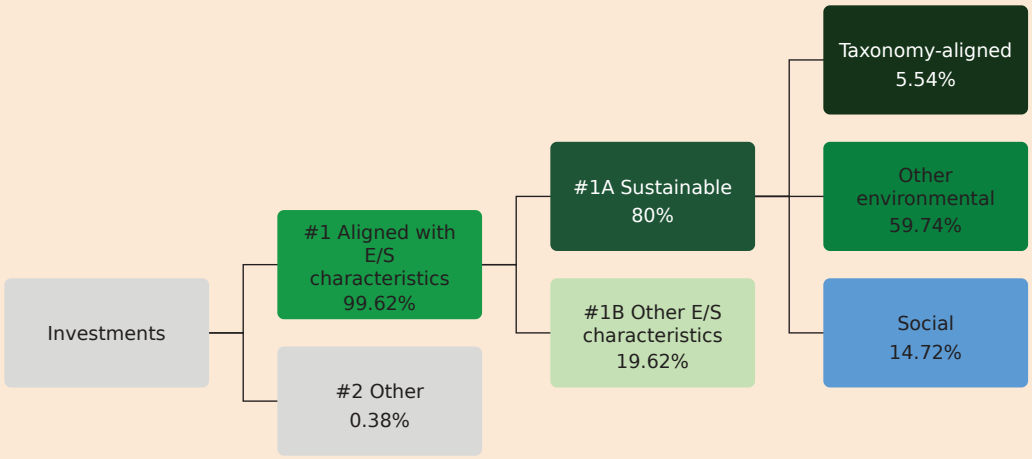
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

99.62% of the Fund's NAV was invested in investments environmental and social characteristics of the Fund.

0.38% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

80.00% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

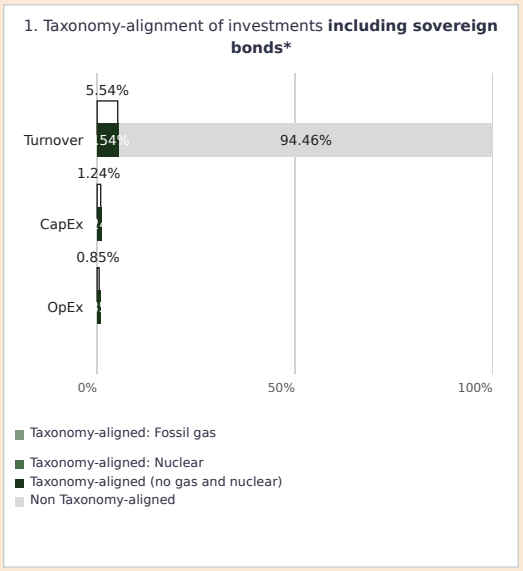
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

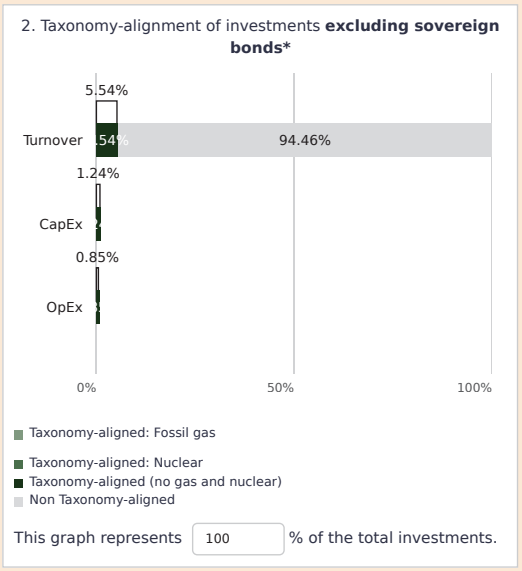
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

5.54% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

****For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**0.82%**
Transition	**0.03%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 59.74% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

14.72% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.38% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental characteristics by applying the ESG Policy of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

The Benchmark does not align with, and was not selected for the purposes of measuring the Fund's attainment of the Fund's environmental and social characteristics. The Fund does not seek to track the performance of an index. The Fund holds an actively-managed portfolio of equities and equity-related securities with the aim of delivering superior risk-adjusted returns over the long term when compared with the average performance of global equity markets. The Sub-Investment Manager selected the portfolio holdings through an optimisation process that utilised the Benchmark as a reference for risk and return calculations.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

Not Applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Active Defensive ESG Equity UCITS ETF

Legal entity identifier: 549300WDE00HSW86K568

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 75.37 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to gain exposure to a portfolio of equity and equity-related securities of companies which met the ESG Policy of the Fund.

The Fund achieved the environmental and social characteristics by excluding certain industries and activities that were considered by the Investment Manager to be inconsistent with ESG outcomes. The Fund also applied a proprietary ESG scoring system to ensure investment was made in "best of class" securities. Through the application of these criteria, the Fund continued to aim to adhere to the standards of the Towards Sustainability ecolabel. The Fund maintained a lower carbon intensity of the portfolio relative to the MSCI World Index (the "**Benchmark**").

The extent to which the environmental and/or social characteristics promoted by the Fund was met is further detailed in the performance of the sustainability indicators (see below).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance 2026	Indicator Performance 2025
Reduction in the initial investment universe after application of the best-in-class measure based on an overall ESG profile score	32.0% reduction	45.8% reduction
Reduction in the initial investment universe after application of the exclusions depending on business involvement in controversial activities and controversies including violations of the UN Global Compact, based on third party data and the Investment Manager's proprietary analysis and research	43.2% reduction	53.9% reduction
Reduction in carbon intensity of the Fund as measured against the Benchmark	68.9% reduction	50.5% reduction

…and compared to previous periods?

See above table comparing current and previous periods figures

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives (such as climate change, water management, pollution prevention) and to social objectives (such as good health, well-being and gender equality).

The Fund achieved those objectives by investing in: (i) issuers which contributed positively to selected Sustainable Development Goals (SGDs) that related to the above objectives; or (ii) companies which generated a material part of their revenue from environmental impact themes such as energy transition, healthcare and food. The Fund also used a best-in-class approach and selected companies scoring higher, when compared to their peers, utilising the investment manager’s proprietary scoring methodology.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The Fund addressed a number of other adverse indicators by excluding companies, sectors or countries from the investment universe if they are assessed to have violated international norms and standards according to the definitions of the International Labour Organisation (ILO), the OECD or the United Nations. All issuers considered for investment were screened for compliance with, and excluded if they do not meet, UN Global Compact principles. By limiting of exposure to thermal coal, shale energy and oil sands the Fund also reduced its exposure to greenhouse gas emissions.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

The Fund excluded companies that weren't compliant with the UN Global Compact, this set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, The data is representative of the reference period.:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	459.53	99.43	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		238.18	99.43	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		11,918.47	99.43	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		12,616.18	99.43	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	208.10	99.43	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	464.32	99.43	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.43	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	57.11	72.66	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	16.82	45.25	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.11	1.13	
	Electricity, gas, steam & air conditioning supply	0.36	0.37	
	Manufacturing	0.13	31.07	
	Mining & quarrying	0.88	0.83	
	Real Estate activities	0.36	1.33	
	Transportation & storage	0.38	2.72	
	Water supply, sewerage, waste management & remediation activities	0.54	1.30	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.05	5.03	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	3.13	99.43	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.20	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	2.03	99.04	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.43	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	60.45	99.35	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	11.85	4.90	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.84	99.28	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.39	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI**

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

framework") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

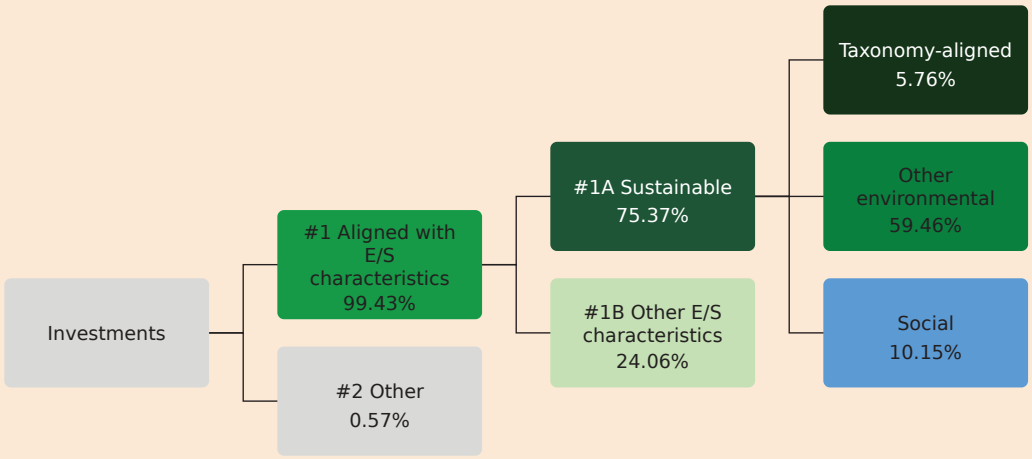
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

99.43% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.57% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

75.37% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**0.00**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

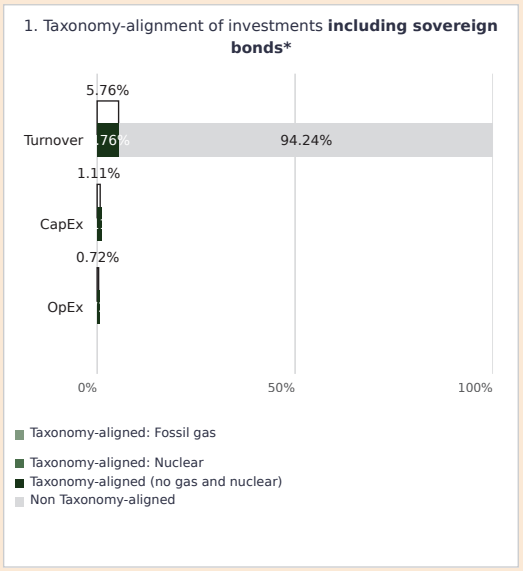
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

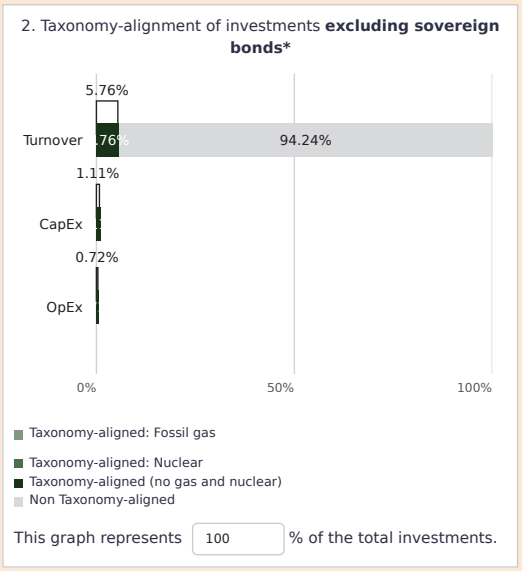
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

5.76% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**0.92%**
Transition	**0.03%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 59.46% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

10.15% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.57% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the the environmental characteristics by applying the ESG Policy of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

The Benchmark does not align with, and was not selected for the purposes of measuring the Fund's attainment of the Fund's environmental and social characteristics. The Fund does not seek to track the performance of an index. The Fund holds an actively-managed portfolio of equities and equity-related securities with the aim of delivering superior risk-adjusted returns over the long term when compared with the average performance of global equity markets. The Sub-Investment Manager selected the portfolio holdings through an optimisation process that utilised the Benchmark as a reference for risk and return calculations.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

  Not Applicable.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

  Not Applicable.

- ***How did this financial product perform compared with the reference benchmark?***

  Not Applicable.

- ***How did this financial product perform compared with the broad market index?***

  Not Applicable.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco EUR Government and Related Green Bond Weighted UCITS ETF **Legal entity identifier: 549300O4RQNIL6FL9O94**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 58.57 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were:

- to maximise exposure to Green Bonds, according to the criteria set out under the heading "What investment strategy does this financial product follow?";
- to gain exposure to a portfolio of government and government-related bonds issued by countries that had ratified and implemented in equivalent national legislation: a) the eight fundamental conventions identified in the International Labour Organisation's declaration on Fundamental Rights and Principles at Work; and b) at least half of the 18 core International Human Rights Treaties;
- to exclude securities issued by countries that did not conform with international treaties and assessments by third-party non-profit organisations (e.g. the Paris Agreement, the UN Convention on Biological Diversity, the Nuclear Non-Proliferation Treaty, it had particularly high military budgets, it was considered to be a 'Jurisdiction with strategic AML/CFT deficiencies' by FATF, if it had a score of less than 40/100 on the Transparency International Corruption Perception Index, or it was qualified as 'Not Free' by the Freedom House 'Freedom in the World' survey); and
- to exclude securities issued by Government-owned issuers that are not government guaranteed, if such issuers were involved in controversial business activity or ESG controversies (e.g. involvement in nuclear power, coal, unconventional as well as conventional oil and, controversial weapons, military weapons, civilian firearms, tobacco and activities constituting violations of the UN Human Rights Directive or the International Labour Organisation's Labour Rights Directive).

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance 2025	Indicator Performance 2024
Percentage of the Fund's NAV invested in excluded countries (as defined in the investment policy of the Fund)	0%	0%
Percentage of the Fund's NAV invested in government-owned issuers that are not government guaranteed involved in controversial business activities and controversies (as defined in the investment policy of the Fund)	0%	0%
Proportion of Green Bonds in the portfolio as a percentage of the Fund's invested assets (excluding cash holdings)	56.8%	56.3%

…and compared to previous periods?

See above table comparing current and previous periods figures

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The Fund made sustainable investments that contributed to environmental objectives which included renewable energy, energy efficiency, pollution prevention and control, environmentally sustainable management of living natural resources and land use, biodiversity, clean transportation, sustainable water and wastewater management, climate change adaptation, circular economy and green buildings.

The Fund achieved those objectives by investing in Green Bonds, issued under a recognised green bond standard (e.g. ICMA/CBI/EU GS), that aimed to finance or re-finance projects, expenditure or assets that helped to address climate and environmental issues.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The Fund took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Fund.

How were the indicators for adverse impacts on sustainability factors taken into account?

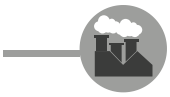
Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

In relation to government-owned issuers that are not government guaranteed, the ESG Policy of the Fund addressed a number of other adverse indicators by excluding a number of issuers involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Fund reduced its exposure to greenhouse gas emissions. The ESG Policy of the Fund also excluded issuers involved in controversial weapons, and those that were deemed non-compliant with the principles of the United Nations Global Compact.

In relation to government issuers, the relevant PAIs were considered through the eligibility and exclusion criteria, e.g. countries that had not ratified the Paris Agreement were excluded, which reduced exposure to greenhouse gas emissions. Additionally, by limiting eligibility to countries that had ratified and implemented in national legislation the eight fundamental conventions identified in

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the International Labour Organisation's Declaration on Fundamental Rights and Principles at Work, and at least half of the 18 core International Human Rights Treaties, the Fund reduced its exposure to countries exposed to social violations.



Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights was captured through exclusion of issuers, sectors or countries from the investible universe if they were deemed not to be in alignment. The Fund also excluded issuers that weren't compliant with the UN Global Compact principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI data for the Fund. The data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	0.00	0.00	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		0.00	0.00	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		0.00	0.00	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		0.00	0.00	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	0.00	0.00	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,033.12	6.14	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	6.14	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	38.21	4.60	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	2.40	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.00	0.00	
	Manufacturing	0.00	0.00	
	Mining & quarrying	0.00	0.00	
	Real Estate activities	0.00	0.00	
	Transportation & storage	0.00	0.00	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.00	5.58	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.00	0.00	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	5.58	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	2.88	5.41	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	0.00	0.00	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	3.79	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

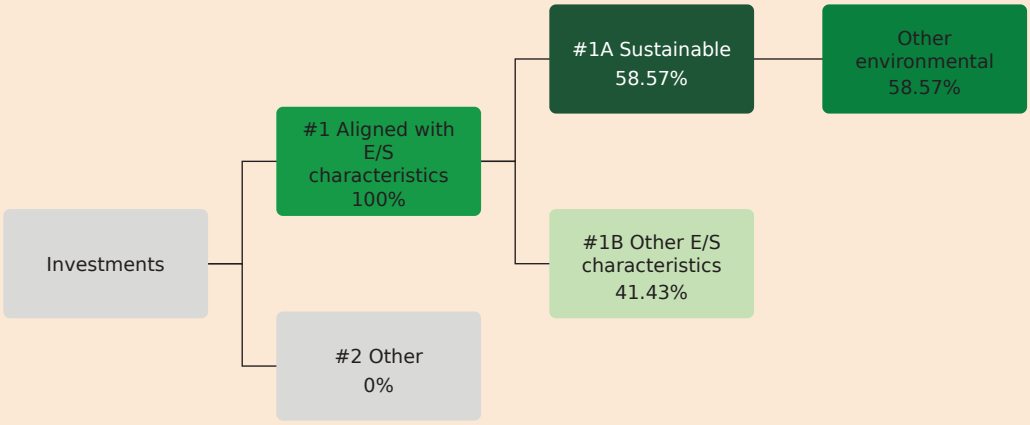
What was the proportion of sustainability-related investments?

Please see below fields.

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

58.57% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

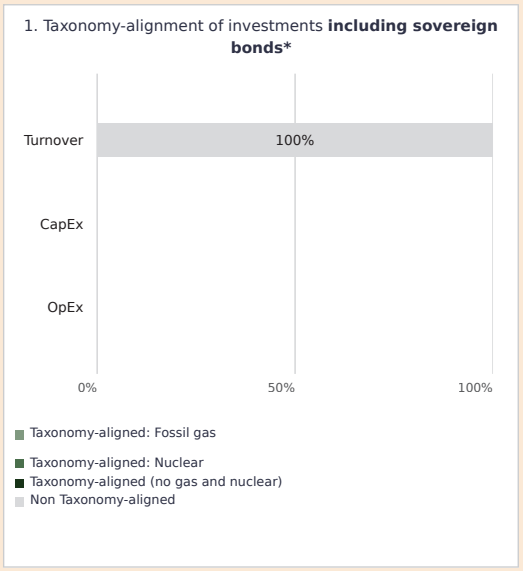
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

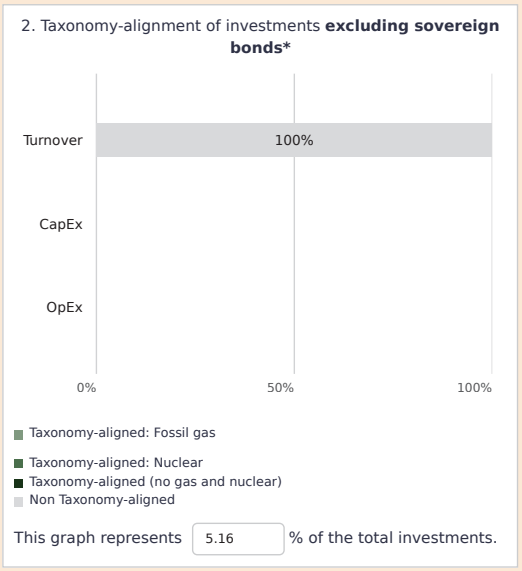
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

****For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.***

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 58.57% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Product name: Invesco FTSE All Share Screened & Tilted UCITS ETF **Legal entity identifier: 5493007Z6OBJUELALN59**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 53.39 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to gain exposure to issuers demonstrating a robust ESG profile, i.e. issuers with limited/no involvement in certain business activities and with no involvement in severe ESG controversies. The Fund also aimed to gain increased exposure to those issuers generating revenue from green projects, and those that exhibit lower levels of carbon emissions and fossil fuel reserves, relative to the companies that comprise the FTSE All-Share ex Investment Trusts Index (the "**Parent Index**").

The Fund achieved the environmental and social characteristics by tracking the FTSE All Share ex Investment Trusts ESG Climate Select Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
FTSE ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	8.7% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	43.0% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the FTSE ESG Score improvement (8.4%) and the CO2 emissions intensity reduction (41.7%) for the Fund are slightly higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Through re-weighting constituents based on FTSE ESG scores, green revenue, carbon emissions and fossil fuel reserves, the index also addressed a number of other adverse indicators.

FTSE ESG Scores consider a number of key issues in their construction, including, but not limited to; GHG emissions and energy reduction, intensity of GHG emission reports, biodiversity, quantified water discharge and resource use, policy and procedures radioactive waste, actions to address labour issues and improve diversity, Policy addressing non-discrimination, and commitment to diversity on the Board.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund- the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	1,605.11	99.95	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		300.00	99.95	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		34,474.56	99.95	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		36,379.66	99.95	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	621.65	99.95	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,029.62	99.96	Fund level total emission intensity- Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.96	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	47.96	76.16	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	27.68	44.70	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.02	1.47	
	Electricity, gas, steam & air conditioning supply	3.07	0.75	
	Manufacturing	0.12	27.93	
	Mining & quarrying	0.89	10.04	
	Real Estate activities	0.35	2.26	
	Transportation & storage	0.42	0.23	
	Water supply, sewerage, waste management & remediation activities	0.63	1.52	
	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.07	6.79	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	9.57	99.96	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.20	99.93	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.96	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	37.84	99.94	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	20.26	31.57	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	47.21	99.96	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What were the top investments of this financial product?

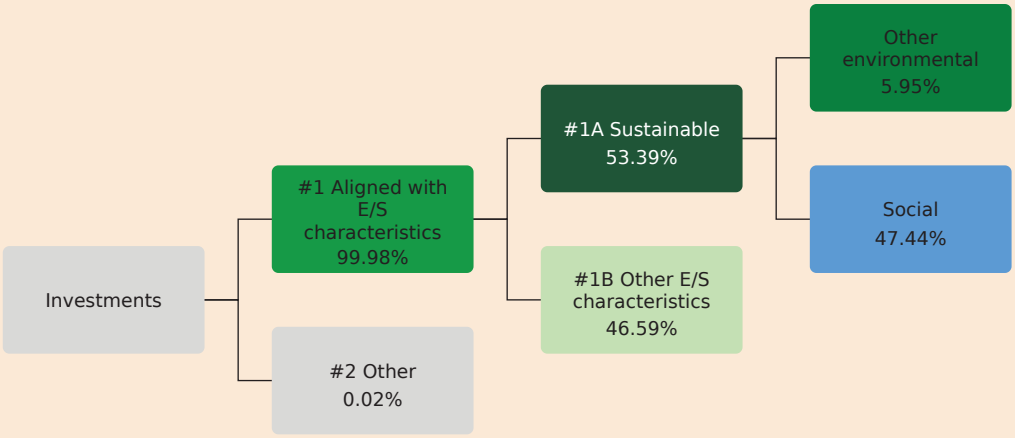
The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
GSK LN COM	Health Care	5.58%	United Kingdom
BARCLAYS PLC	Financials	5.23%	United Kingdom
LLOYDS BANKING	Financials	5.09%	United Kingdom
ASTRAZENECA PLC	Health Care	4.68%	United Kingdom
DIAGEO PLC	Consumer Staples	4.33%	United Kingdom
HSBC HOLDINGS PL	Financials	4.16%	United Kingdom
EXPERIAN PLC	Industrials	4.15%	Ireland
SHEL LN COM	Energy	4.05%	United Kingdom
RECKITT BENCKISE	Consumer Staples	3.98%	United Kingdom
NATWEST GROUP PL	Financials	3.80%	United Kingdom
UNILEVER PLC	Consumer Staples	3.75%	United Kingdom
AV/ LN COM	Financials	3.69%	United Kingdom

What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

99.98% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.02% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

53.40% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	25.92
Communication Services	6.98
Consumer Discretionary	8.50
Information Technology	5.07
Industrials	9.84
Consumer Staples	16.79
Energy	7.58
Real Estate	2.26
Health Care	10.75
Materials	4.02
Utilities	2.27
Cash	0.02
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.02
10102010	Integrated Oil & Gas	7.56
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**7.58**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

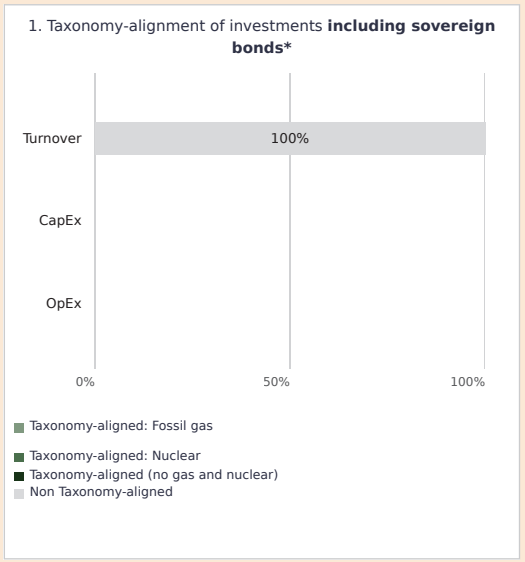
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

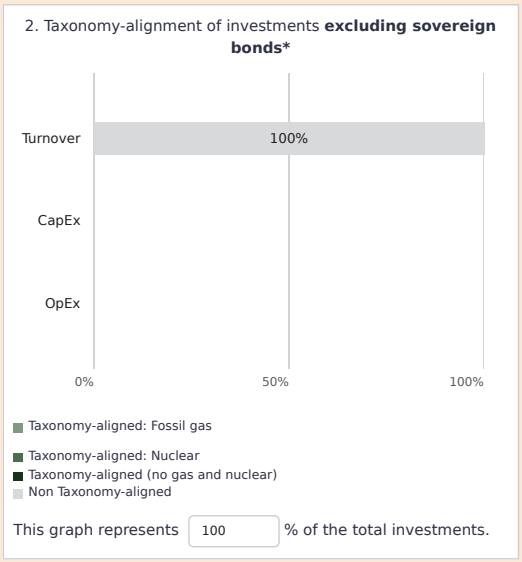
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



0% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 5.95% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

47.45% of the Fund's NAV.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.02% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to companies demonstrating both a robust ESG (environmental, social and governance) profile as well as a companies generating an increased percentage of their revenue from green projects, and those that exhibit lower levels of carbon emissions and fossil fuel reserves, relative to a broad market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
FTSE ESG Score (as defined in the methodology of the Reference Index)	4.13	4.13
CO2 emissions intensity (Scope 1+2/Revenue)	44.6	44.6
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
FTSE ESG Score (as defined in the methodology of the Reference Index)	4.13	3.79
CO2 emissions intensity (Scope 1+2/Revenue)	44.6	78.2
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 11.5% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Clean Energy UCITS ETF **Legal entity identifier: 5493003XRV20QGD58469**

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective:** 100 %	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to invest in global companies whose innovative technologies contributed to the generation and utilisation of cleaner energy, conservation, efficiency and the advancement of renewable energy. The Fund's portfolio was mainly composed of companies focused on wind, solar, biofuels, hydro, wave, tidal, geothermal and other relevant renewable energy businesses, as well as energy conversion, storage, conservation, efficiency, materials relating to those activities.The Fund achieved this by tracking the WilderHill New Energy Global Innovation Index ("**Reference Index**"), which has a methodology that is consistent with attaining the sustainable investment objective of the Fund.

The extent to which the Fund tracked Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The environmental characteristics of the Fund were achieved by applying the Index Provider's exclusion criteria and by the Index Provider determining a company's eligibility for inclusion in the Reference Index by assessing whether the primary part of the company's business activities was focused on new energy innovation.

Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

Please note that the Fund was re-categorised from Article 8 to Article 9 on 28 May 2024.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies associated with the clean energy sectors (as more fully described in the supplement)	100.00%
Sustainalytics Risk Rating (as defined in the methodology of Reference Index) of the fund	22.9
CO2 emissions intensity (Scope 1+2 / Revenue) of the Fund	154.4
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Barring ancillary liquidity holdings and derivatives, the Fund continues to invest solely in companies associated with the hydrogen economy. Compared to last period the Sustainalytics Risk Rating (23.1) for the Fund is slightly lower and the CO2 emissions intensity (131.3) is higher. The Fund continues to avoid companies excluded by the Reference Index

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through the removal of companies involved in thermal coal, shale energy and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to; discrimination & harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation & contamination (land), and controversial weapons.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"). This set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the Human Rights space.

The index methodology excluded companies that faced severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	1,214.75	97.90	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		1,058.95	97.90	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		49,737.01	97.90	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		52,010.72	97.90	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	1,769.98	97.90	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	4,370.70	96.39	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.90	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	71.94	61.80	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	3.43	44.33	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.48	16.47

	Water supply, sewerage, waste management & remediation activities	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.02	1.00	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	2.00	95.35	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.97	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.51	94.79	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	95.35	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	61.84	95.05	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	5.33	2.98	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	29.33	93.75	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.90	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
PLUG POWER INC	Industrials	1.13%	United States

What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

100.00% of the Fund's NAV was invested in sustainable investments with an environmental objective.

0.00% of the Fund's NAV was invested in investments which did not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	0.93
Communication Services	0.00
Consumer Discretionary	9.34
Information Technology	17.60
Industrials	47.14
Consumer Staples	0.88
Energy	2.10
Real Estate	0.00
Health Care	0.00
Materials	2.88
Utilities	19.13
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	2.10
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**2.10**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

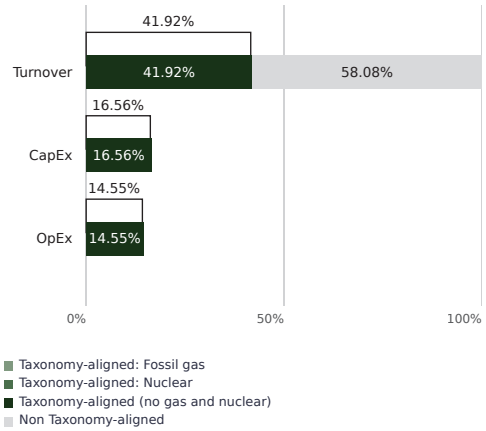
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure**(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure**(OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

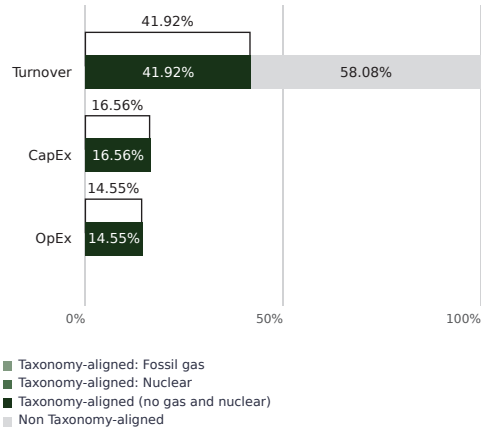
Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 41.92% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**



☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 100 % of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities - the data is representative of the reference period

	Aligned
Enabling	**16.89%**
Transition	**0.03%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 58.08% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with a meaningful exposure to clean energy.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Percentage of exposure in companies associated with the clean energy sectors (as more fully described in the supplement)	100.00%	100%
Sustainalytics Risk Rating (as defined in the methodology of Reference Index)	22.9	22.9
CO2 emissions intensity (Scope 1+2 / Revenue)	154.4	154.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Compared to a broad global equity index, the sustainability indicators for the Fund differed as below. The greater CO2 emissions intensity for the fund can be attributed somewhat to its sector breakdown.

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark Indicator Performance
Percentage of exposure in companies associated with the clean energy sectors (as more fully described in the supplement)	100.00%	0.31%
Sustainalytics Risk Rating (as defined in the methodology of Reference Index)	22.9	18.5
CO2 emissions intensity (Scope 1+2 / Revenue)	154.4	94.0
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 12.9% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Wind Energy UCITS ETF **Legal entity identifier: 549300U3T5CHSUDZNS38**

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective:** 99.75 %	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to invest in global companies whose innovative technologies focus on advancing wind energy, enabling its use, hence facilitating a transition to a lower carbon economy. The Fund's portfolio was mainly composed of companies focused on improving wind turbines and blades, providing materials used in wind energy, modernising the grid, facilitating greater wind energy deployment or expanding its use and companies involved in onshore and offshore wind energy. The Fund achieved this objective by tracking the WilderHill Wind Energy Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable objective of the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the Fund's sustainable investment objective are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. Against these indicators the fund offered the following, data is representative of the reference period

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

(ending 31st of December 2025):

Sustainability Indicator	Performance Indicator
Percentage of the Fund portfolio invested in companies associated with the wind energy sectors (as more fully described in the Supplement)	99.75%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index) of the Fund	22.0
CO2 emissions intensity (Scope 1+2 / Revenue) for the Fund	66.2
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Barring ancillary liquidity holdings and derivatives, the Fund continues to invest solely in companies associated with the hydrogen economy. Compared to last period the Sustainalytics Risk Rating (21.6) and CO2 emissions intensity (64.3) are both slightly higher. The Fund continues to avoid companies excluded by the Reference Index

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that are deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the Reference Index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	111.01	98.16	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		54.52	98.16	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		6,362.91	98.16	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		6,528.43	98.16	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	1,834.43	98.16	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	5,854.14	96.99	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.94	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	71.90	65.57	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	4.29	43.41	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.51	3.47	
	Electricity, gas, steam & air conditioning supply	0.37	24.87	
	Manufacturing	0.20	48.29	
	Mining & quarrying	0.10	0.75	
	Real Estate activities	0.00	0.00	
	Transportation & storage	0.00	0.00	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail	0.02	4.12	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	1.27	99.26	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	1.50	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.39	98.86	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.26	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	50.37	99.26	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	6.69	2.82	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	32.08	98.27	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.94	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field

What was the asset allocation?

99.75% of the Fund's NAV was invested in sustainable investments with an environmental objective.

0.25% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity.

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

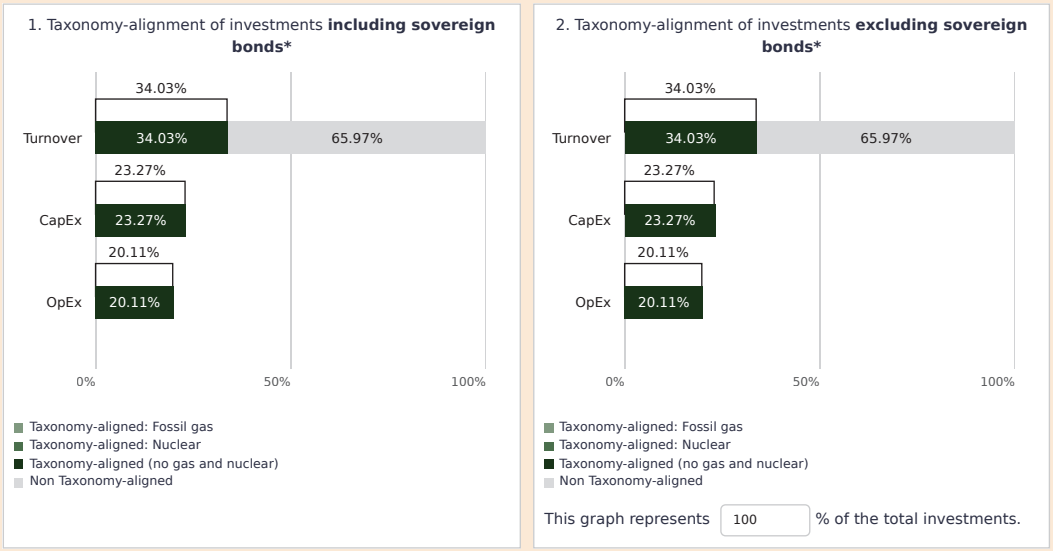
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure**(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure**(OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy, the extent to which the Fund was aligned with the EU Taxonomy was calculated for the reference period. 34.03% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities - data is representative of the reference period.

	Aligned
Enabling	**12.77%**
Transition	**0.34%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 65.72% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.25% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections:

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with a meaningful exposure to wind energy (a clean alternative energy source).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index , the sustainability indicators performed similarly

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Percentage of exposure in companies associated with the wind energy sectors (as more fully described in the Supplement)	99.75%	100%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	22.0	22.0
CO2 emissions intensity (Scope 1+2 / Revenue)	66.2	66.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Compared to a broad global equity index, the sustainability indicators for the Fund differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark Indicator Performance
Percentage of exposure in companies associated with the wind energy sectors (as more fully described in the Supplement)	99.75%	0.53%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	22.0	18.5
CO2 emissions intensity (Scope 1+2 / Revenue)	66.2	94.0
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 12.9% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Hydrogen Economy UCITS ETF **Legal entity identifier: 549300WBWH5KRAVXDB80**

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective:** 99.76 %	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective is to invest in global companies whose innovative technologies focus on advancing the use of hydrogen, fuel cells and the potential hydrogen economy hence facilitating a transition to a lower carbon economy. The Fund's portfolio was mainly composed of companies involved in renewable green hydrogen, improving hydrogen generation, its storage, conversion, uses in transportation, innovation and the advancement of fuel cells. The Fund achieved this objective by tracking the WilderHill Hydrogen Economy Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable objective of the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in section "Tracking Error Analysis" of the annual report.

Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. Against these indicators the fund offered the following, data is representative of the reference period (ending

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

31st of December 2025):

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies associated with the hydrogen economy sectors (as more fully described in the Supplement)	99.76%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index) of the Fund	23.9
CO2 emissions intensity (Scope 1+2 / Revenue) for the Fund	281.1
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Barring ancillary liquidity holdings and derivatives, the Fund continues to invest solely in companies associated with the hydrogen economy. Compared to last period the Sustainalytics Risk Rating (23.8) and CO2 emissions intensity (171.2) for the Fund are both higher. The Fund continues to avoid companies excluded by the Reference Index

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the Reference Index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics considered global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	418.87	99.13	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		194.30	99.13	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		6,701.25	99.13	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		7,314.42	99.13	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	2,477.59	99.13	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	4,156.73	99.58	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.94	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	75.67	68.61	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	15.07	42.56	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.22	2.72	
	Electricity, gas, steam & air conditioning supply	0.57	7.78	
	Manufacturing	1.56	69.23	
	Mining & quarrying	1.00	1.93	
	Real Estate activities	0.00	0.00	
	Transportation & storage	0.00	0.00	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.47	97.52	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	4.97	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	2.29	97.07	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	97.52	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	50.65	97.12	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	6.07	3.78	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	28.82	95.73	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.94	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
PLUG POWER INC	Industrials	1.96%	United States
BE US COM	Industrials	1.83%	United States
FLNC COM	Industrials	1.83%	United States
VERBIO SE	Energy	1.79%	Germany
KOLON INDUSTRIES	Materials	1.76%	South Korea
SPIE SA	Industrials	1.75%	France
NCH2 COM	Industrials	1.74%	Germany
ITM POWER PLC	Industrials	1.74%	United Kingdom
NFI CN COM	Industrials	1.74%	Canada
RESONAC HOLDINGS	Materials	1.74%	Japan
SMA SOLAR TECHNO	Information Technology	1.72%	Germany

SCATEC ASA	Utilities	1.69%	Norway
DELTA ELEC	Information Technology	1.68%	Taiwan
ASAHI KASEI CORP	Materials	1.67%	Japan

What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.76% of the Fund's NAV was invested in sustainable investments with an environmental objective.

0.24% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	0.00
Communication Services	0.00
Consumer Discretionary	3.22
Information Technology	16.92
Industrials	44.07
Consumer Staples	0.00
Energy	2.09
Real Estate	0.00
Health Care	0.00
Materials	25.50
Utilities	7.96
Cash	0.24
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	2.09
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**2.09**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

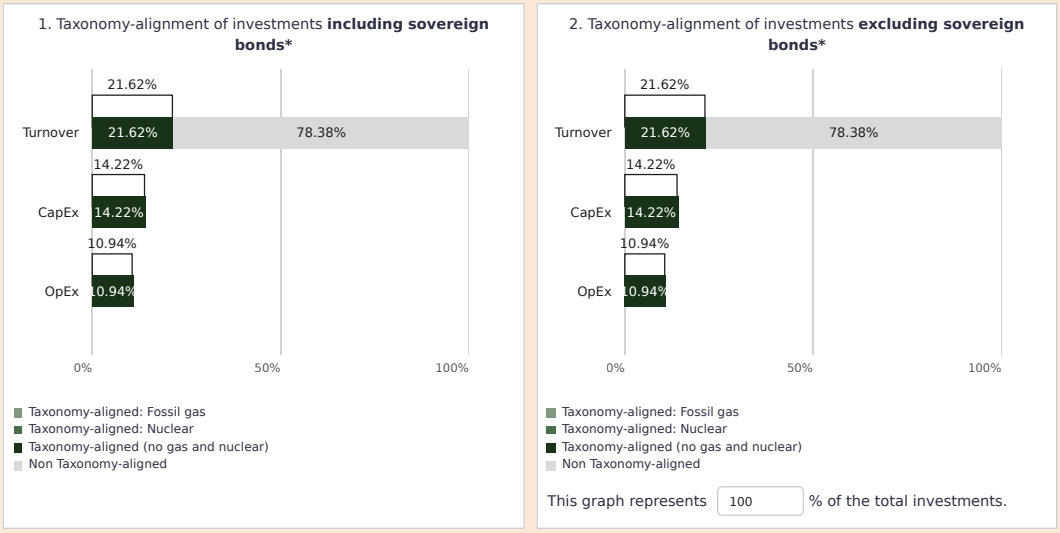
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure**(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure**(OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy, the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 21.62% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities - the data is representative of the reference period

	Aligned
Enabling	**8.03%**
Transition	**0.13%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 78.14% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.24% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections:

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with a meaningful exposure to hydrogen (a clean alternative to natural gas).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index , the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Percentage of exposure in companies associated with the hydrogen economy sectors (as more fully described in the Supplement)	99.76%	100%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	23.9	23.9
CO2 emissions intensity (Scope 1+2 / Revenue)	281.1	281.1
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Compared to a broad global equity index, the sustainability indicators for the Fund differed as below. The greater CO2 emissions intensity for the fund can be attributed somewhat to its sector breakdown.

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
Percentage of exposure in companies associated with the hydrogen economy sectors (as more fully described in the Supplement)	99.76%	0.42%
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	23.9	18.5
CO2 emissions intensity (Scope 1+2 / Revenue)	281.1	94.0
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 12.9% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Solar Energy UCITS ETF **Legal entity identifier: 549300F3Y1FVUG9DNW45**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 96.18 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental characteristics promoted by the Fund were to gain exposure to the global solar energy equity sector by investing in companies that derived significant revenue from solar business activities. The Fund achieved this by tracking the MAC Global Solar Energy Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The environmental characteristics were achieved by applying the Index Provider's exclusion criteria to the index universe and the Index Provider determining a company's eligibility for inclusion in the Reference Index by assessing whether solar power was a significant component of the company's business.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the reference

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies associated with the solar energy sectors (as more fully described in the Supplement)	99.87%
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund	583.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Barring ancillary liquidity holdings and derivatives, the fund continues to only offer exposure to companies associated with the solar energy sector and exhibits 0% exposure to companies excluded by the methodology of the Reference Index. Emissions have risen from the previous period (394.6).

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The environmental objectives that the sustainable investments contributed to are the generation and use of solar energy.

The sustainable investments contributed to the objectives as the companies invested in had solar power as a significant component of its business, from which they derived significant revenue (as determined by the Index Provider).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in coal and petroleum power generation, as well as those extracting crude petroleum and natural gas, the Reference Index reduced its exposure to greenhouse gas emissions. Index selection is based on revenue derived from solar business activities, as such the index limits its exposure to companies engaged in non-renewable energy production. The methodology also excluded companies that have the lowest S&P Global Governance & Economic Score.

S&P Global Governance & Economic Score consider a number of key issues in their construction, including, but not limited to, board gender diversity.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The index methodology excluded companies that had the lowest S&P Global Governance & Economic Score. As part of their research S&P consider a number of topics that overlap with the OECD Guidelines, including the areas of corruption & bribery, customer relationship management, marketing practices, energy mix, innovation management, anti-competitive practices and tax strategy.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	4,179.14	97.09	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		5,292.24	97.09	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		50,297.31	97.09	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		59,768.69	97.09	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	1,243.36	97.09	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	2,229.05	97.09	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.87	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	74.29	55.30	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	1.44	57.83	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.04	16.40	
	Manufacturing	1.92	53.46	
	Mining & quarrying	0.00	0.00	
	Real Estate activities	0.00	4.38	
	Transportation & storage	0.00	0.00	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.00	95.27	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.16	95.00	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	95.27	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	68.56	95.00	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	26.50	95.27	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.87	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
FIRST SOLAR INC	Information Technology	10.01%	United States
NXT US COM	Industrials	9.74%	United States

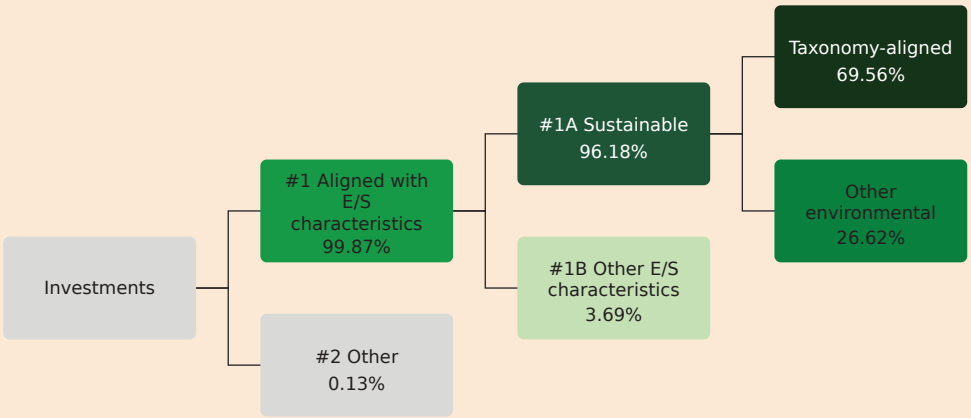
ENLIGHT RENEWABL	Utilities	4.42%	Israel
HA SUSTAINABLE I	Financials	4.38%	United States
XINYI SOLAR HLDS	Information Technology	4.37%	China

What was the proportion of sustainability-related investments?

See below field



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.87% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.13% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

96.18% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

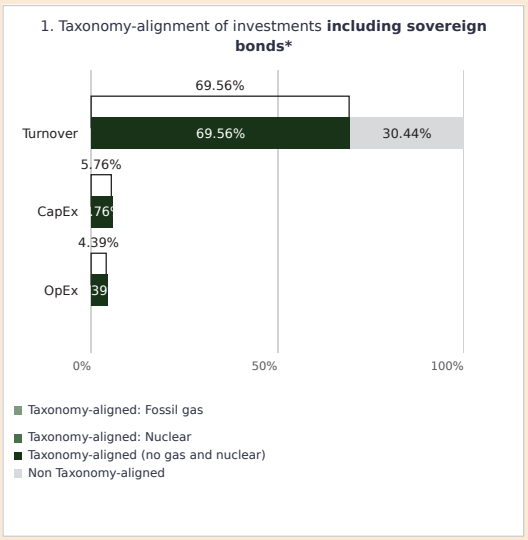
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

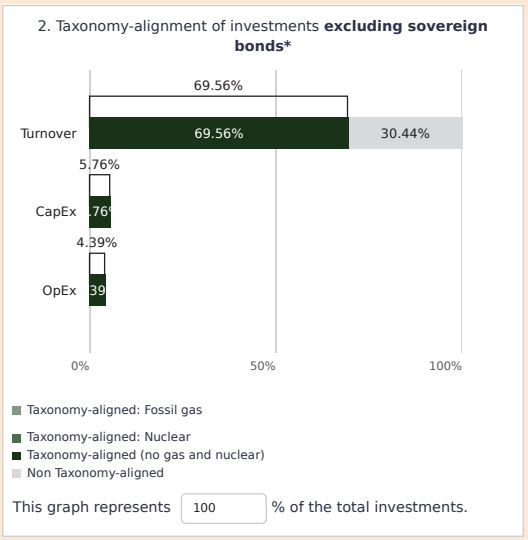
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 69.56% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities - the data is representative of the reference period

	Aligned
Enabling	**26.27%**
Transition	**0.00%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 26.62% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.13% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies that derive significant revenue from solar business activities.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Percentage of exposure in companies associated with the solar energy sectors (as more fully described in the Supplement)	99.87%	100%
CO2 emissions intensity (Scope 1+2/Revenue)	583.8	583.8
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Compared to a broad global equity index, the sustainability indicators for the Fund differed as below. The greater CO2 emissions intensity for the Fund can be attributed somewhat to its sector breakdown.

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market Benchmark Indicator Performance**
Percentage of exposure in companies associated with the solar energy sectors (as more fully described in the Supplement)	99.87%	0.03%
CO2 emissions intensity (Scope 1+2/Revenue)	583.8	94.0
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 34.7% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco NASDAQ-100 ESG UCITS ETF **Legal entity identifier: 54930070QYLC2UME7Q60**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 50.90 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to gain exposure to companies that meet certain specific ESG criteria i.e. issuers with limited/no involvement in certain business activities, with a more favourable ESG rating compared to similar issuers and with no involvement in severe ESG controversies. The Fund achieved this by tracking the NASDAQ100® ESG Index (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the Nasdaq 100® Index (the "**Parent Index**") and by evaluating and weighting the companies on the basis of their business activities, controversies and ESG Risk Ratings.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the reference period (ending

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

31st of December 2025):

Sustainability Indicator	Indicator Performance
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	9.1% improvement
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Parent Index	23.3% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the Sustainalytics Risk Rating improvement (9.7%) for the Fund is slightly lower and the CO2 emissions intensity reduction (17.1%) is slightly higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal, shale energy and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those that faced severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score, and adjustment of the weighting for those that are below the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn’t available to make such assessments.

Sustainalytics Risk Rating consider a number of key issues in their construction, including, but not limited to; biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to; discrimination & harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation & contamination (land), and controversial weapons.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured through exclusion of companies from the investible universe if they were deemed not to be in alignment.

The Fund excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	4,584.21	99.94	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		5,169.94	99.94	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		74,085.93	99.94	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		83,840.08	99.94	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	52.62	99.94	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	299.88	99.94	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.94	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	37.81	81.15	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	19.91	46.39	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

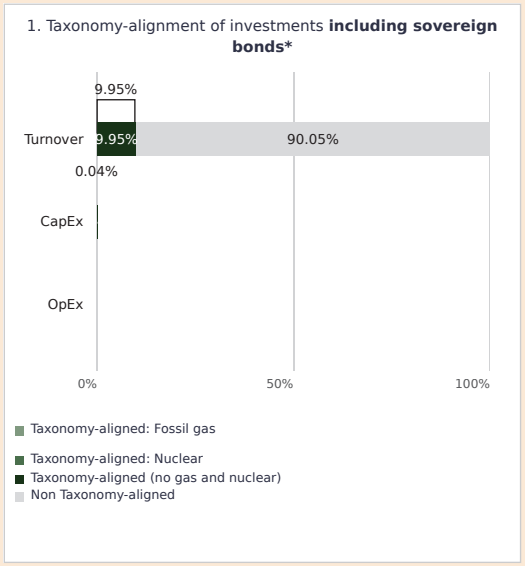
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

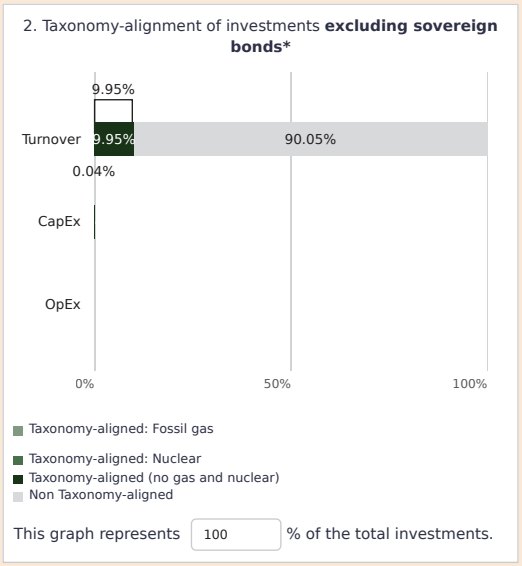
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

9.95% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**1.02%**
Transition	**0.03%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 14.85% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

26.10% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.06% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to companies demonstrating both a robust ESG profile and companies with a lower ESG risk rating relative to a broad market index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	17.21	17.21
CO2 emissions intensity (Scope 1+2/Revenue)	42.0	42.0
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as rebalance date defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
Sustainalytics Risk Rating (as defined in the methodology of the Reference Index)	17.21	18.40
CO2 emissions intensity (Scope 1+2/Revenue)	42.0	54.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 3.8% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Europe ESG Climate Paris Aligned UCITS ETF

Legal entity identifier: 549300DO2A2ZT6S92H22

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective:** 98.96 %	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI Europe ESG Climate Paris Aligned Benchmark PAB Select Index (formerly the MSCI Europe ESG Climate Paris Aligned Benchmark Select Index) (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Europe Index (the **"Parent Index"**)	8.2% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	77.5% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	11% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (6.8%) and the CO2 emissions intensity reduction (70.5%) for the Fund is higher are both higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	144.63	99.86	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		121.58	99.86	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		14,267.42	99.86	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		14,533.63	99.86	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	336.15	99.86	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,032.41	99.97	Fund level total emission intensity- Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.97	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	52.63	79.27	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	11.08	42.99	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.08	1.97	
	Electricity, gas, steam & air conditioning supply	0.24	3.26	
	Manufacturing	0.17	41.92	
	Mining & quarrying	1.54	0.94	
	Real Estate activities	0.35	5.16	
	Transportation & storage	0.22	2.65	
	Water supply, sewerage, waste management & remediation activities	0.14	0.32	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.06	4.05	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	1.04	99.97	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.95	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.31	99.42	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.97	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	34.16	99.68	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	16.19	14.25	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.37	99.51	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.89	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI framework**”) to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV	Information Technology	3.15%	Netherlands
NOVARTIS AG-REG	Health Care	2.65%	Switzerland
ASTRAZENECA PLC	Health Care	2.53%	United Kingdom

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

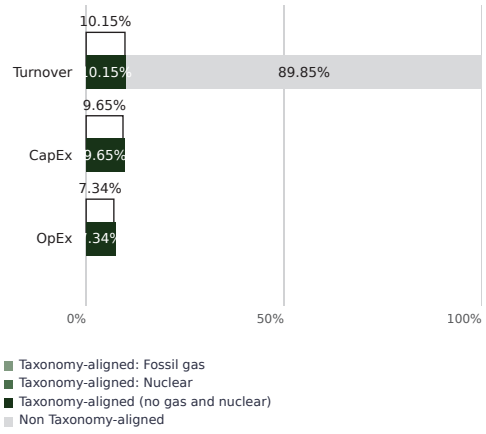
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure**(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure**(OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

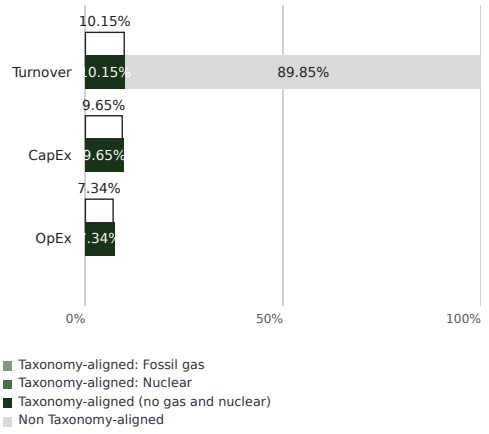
Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy, the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 10.15% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**



☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 100 % of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**4.85%**
Transition	**0.07%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 88.81% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

1.01**% of the Fund's NAV was invested in investments which did not qualify as sustainable investments, however were still aligned with the sustainable investment objective.**

0.03% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

performed similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Europe Index (the **"Parent Index"**)	8.40	8.40
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	123.9	123.9
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	13% average reduction across Reference Index rebalance dates in the period	13% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Europe Index (the **"Parent Index"**)	8.40	7.76
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	123.9	551.4
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	13% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 33.8% exposure to excluded companies at the latest Reference Index rebalance date

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective:** 99.98 %	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI USA ESG Climate Paris Aligned Benchmark PAB Select Index (formerly the MSCI USA ESG Climate Paris Aligned Benchmark Select Index) (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI USA Index (the **"Parent Index"**)	21.8% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	82.4% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	21% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (14.2%) and the CO2 emissions intensity reduction (74.8%) for the Fund are both higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	872.89	99.98	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		517.53	99.98	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		26,696.83	99.98	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		28,087.25	99.98	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	122.40	99.98	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	747.69	99.98	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.98	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	47.10	84.45	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	22.22	45.91	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.15	0.42	
	Electricity, gas, steam & air conditioning supply	0.32	0.84	
	Manufacturing	0.07	39.21	
	Mining & quarrying	0.00	0.00	
	Real Estate activities	0.76	10.24	
	Transportation & storage	0.00	0.00	
	Water supply, sewerage, waste management & remediation activities	0.47	2.29	
	Wholesale & Retail trade & repair of	0.10	0.18	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.00	99.95	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.05	99.40	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.95	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	59.20	99.01	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	13.28	3.67	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.71	99.87	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
NVIDIA CORP	Information Technology	9.59%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field

What was the asset allocation?

99.98% of the Fund's NAV was invested in sustainable investments with an environmental objective.

0.2% of the Fund’s NAV was invested in investments that were deemed “not sustainable".

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

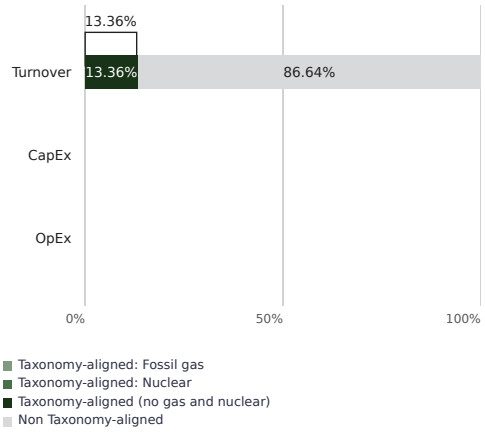
Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure**(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure**(OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

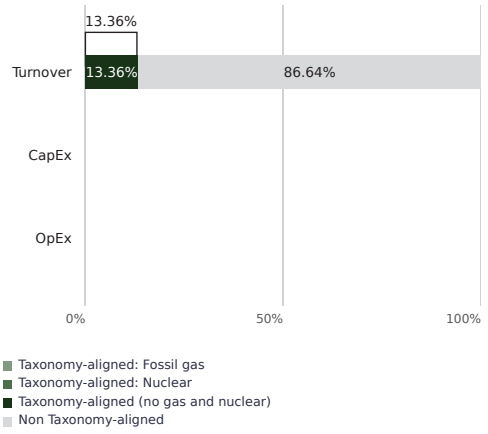
Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 13.36% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**



☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 100 % of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**0.28%**
Transition	**0.00%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 86.62% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.00**% of the Fund's NAV was invested in investments which did not qualify as sustainable investments, however were still aligned with the sustainable investment objective.**

0.02% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI USA Index (the **"Parent Index"**)	7.67	7.67
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	35.8	35.8
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	21% average reduction across Reference Index rebalance dates in the period	21% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI USA Index (the **"Parent Index"**)	7.67	6.29
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	35.8	203.5
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	24% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 43.1% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Japan ESG Climate Paris Aligned UCITS ETF

Legal entity identifier: 5493005TOQBBWPY66A96

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective:** 99.28 %	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI Japan ESG Climate Paris Aligned Benchmark PAB Select Index (formerly the MSCI Japan ESG Climate Paris Aligned Benchmark Select Index) (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Japan Index (the **"Parent Index"**)	4.3% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	85.2% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	24% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (2.7%) and the CO2 emissions intensity reduction (82.0%) for the Fund are both slightly higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	244.82	99.75	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		515.74	99.75	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		14,245.86	99.75	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		15,006.42	99.75	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	191.18	99.75	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)

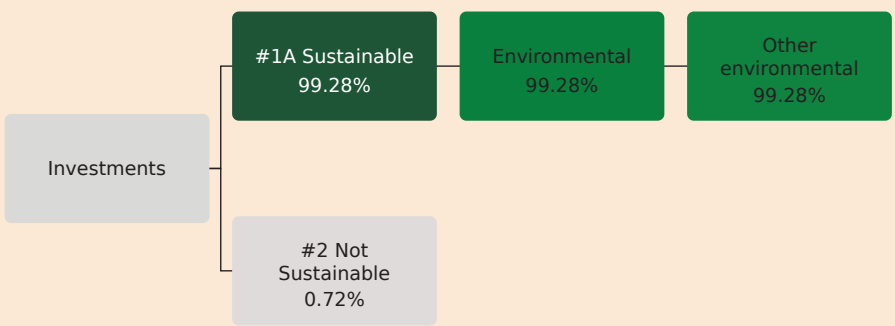
What was the proportion of sustainability-related investments?



See below field

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.28% of the Fund's NAV was invested in sustainable investments with an environmental objective.

0.72% of the Fund’s NAV was invested in investments that were deemed “not sustainable".

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown as at - The data is representative of the reference period.

Total		**0.00**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

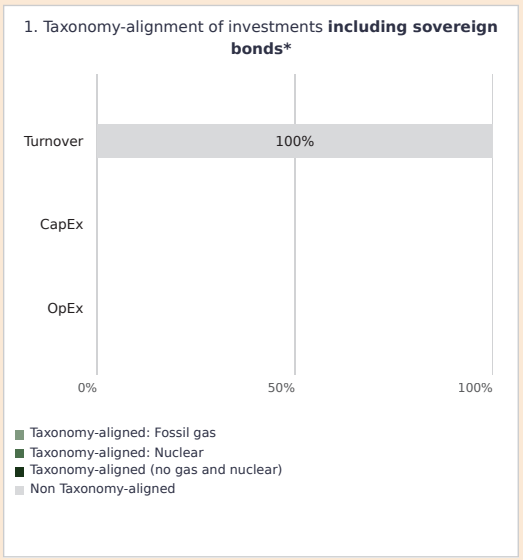
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

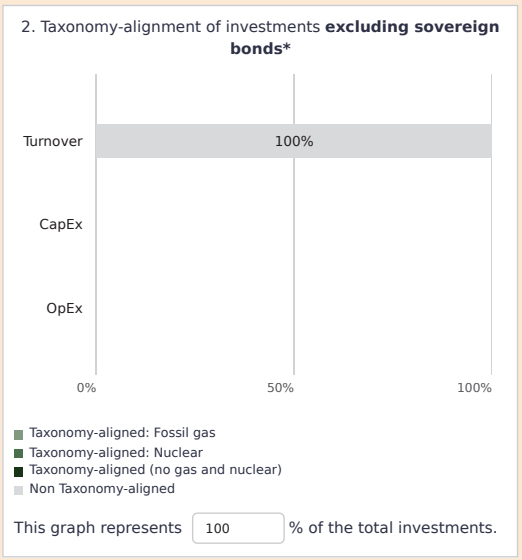
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure**(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure**(OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

0% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 99.28% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.47% of the Fund's NAV was invested in investments which did not qualify as sustainable investments, however were still aligned with the sustainable investment objective.

0.25% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Japan Index (the **"Parent Index"**)	7.87	7.87
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	91.3	91.3
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	24% average reduction across Reference Index rebalance dates in the period	24% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Japan Index (the **"Parent Index"**)	7.87	7.55
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	91.3	615.1
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	24% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 20.7% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI World ESG Climate Paris Aligned UCITS ETF

Legal entity identifier: 549300WITWZPKXMN2F56

Sustainable investment objective

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective:** 99.43 %	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI World ESG Climate Paris Aligned Benchmark PAB Select Index (formerly the MSCI World ESG Climate Paris Aligned Benchmark Select Index) (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the **"Parent Index"**)	15.6% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	80.7% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	22% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (10.5%) and the CO2 emissions intensity reduction (74.7%) for the Fund are higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	81.59	99.93	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		63.73	99.93	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		3,363.05	99.93	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		3,508.37	99.93	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	173.21	99.93	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	807.75	99.96	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.93	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	52.44	78.15	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	17.30	42.44	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.11	1.31

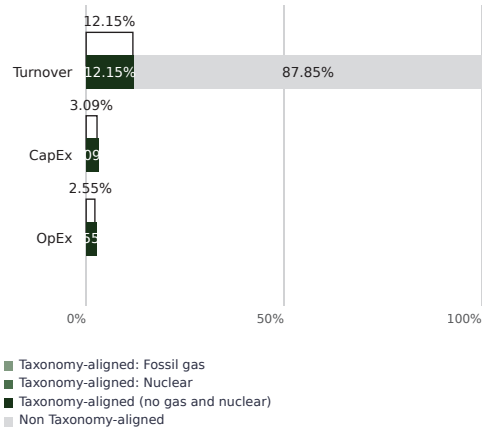
- **operational expenditure**(OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

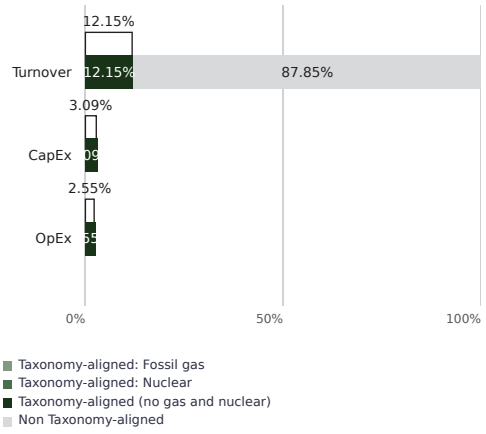
Although the Fund does not commit to a minimum of sustainable investments aligned with the EU Taxonomy the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 12.15% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**



☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 100 % of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**2.04%**
Transition	**0.03%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 87.28% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

0.53**% of the Fund's NAV was invested in investments which did not qualify as sustainable investments, however were still aligned with the sustainable investment objective.**

0.04% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the **"Parent Index"**)	7.72	7.72
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	58.1	58.1
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	22% average reduction across Reference Index rebalance dates in the period	22% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI World Index (the **"Parent Index"**)	7.72	6.68
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	58.1	300.3
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	22% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 40.0% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 9, paragraphs 1 to 4a, of Regulation (EU) 2019/2088 and Article 5, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco MSCI Emerging Markets ESG Climate Paris Aligned UCITS ETF

Legal entity identifier: 549300LKQGRABQZ01C57

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852 establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

☒ **Yes**	☐ **No**
☒ It made **sustainable investments with an environmental objective:** 90.93 %	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
☒ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☒ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent was the sustainable investment objective of this financial product met?

The Fund's sustainable investment objective was to reduce exposure to transition and physical climate risks whilst pursuing opportunities arising from the transition to a lower carbon economy and aligning with the Paris Agreement requirements. The Fund achieved this by tracking the MSCI Emerging Markets ESG Climate Paris Aligned Benchmark PAB Select Index (formerly the MSCI Emerging Markets ESG Climate Paris Aligned Benchmark Select Index) (the "**Reference Index**"), which has a methodology that is aligned with attaining the sustainable investment objective of the Fund. The Reference Index qualifies as an EU Paris-aligned Benchmark under Title III, Chapter 3a, of Regulation (EU) 2016/1011.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the sustainable investment objective by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the sustainable investment objective. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Emerging Markets Index (the **"Parent Index"**)	7.9% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	86.4% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	19% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (9.0%) for the Fund is lower and the CO2 emissions intensity reduction (83.7%) slightly higher. The Fund continues to avoid companies excluded by the Reference Index and reduce carbon emissions by more than 10% year on year.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

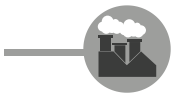
How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

The Reference Index reduced exposure to greenhouse gas emissions by specifying a minimum reduction in relation to the Parent Index, as well as a minimum year on year reduction from a given base date. Additionally, the index methodology directly excluded a number of companies involved in certain business activities, and through the removal of companies involved in thermal coal and the oil & gas industry the Reference Index further reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing severe, or very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to; carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to, biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.



Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principle**") is captured in the Reference Index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact ("**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded companies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the United Nations Guiding Principles on Business and Human Rights.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	192.80	98.27	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		571.78	98.27	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		12,758.71	98.27	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		13,523.29	98.27	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	182.24	98.27	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,002.63	98.73	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.21	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	82.28	68.75	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	1.53	38.72	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.04	0.58	
	Electricity, gas, steam & air conditioning supply	0.51	1.09	
	Manufacturing	0.30	42.34	
	Mining & quarrying	1.18	1.32	
	Real Estate activities	0.38	5.79	
	Transportation & storage	0.39	2.33	
	Water supply, sewerage, waste management & remediation activities	0.69	0.68	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.04	2.90	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	1.07	99.21	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.07	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.20	98.28	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.62	99.21	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	75.65	98.96	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	21.55	0.94	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	21.38	95.97	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.34	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI**

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

framework") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TSMC	Information Technology	12.61%	Taiwan
SK HYNIX INC	Information Technology	1.96%	South Korea

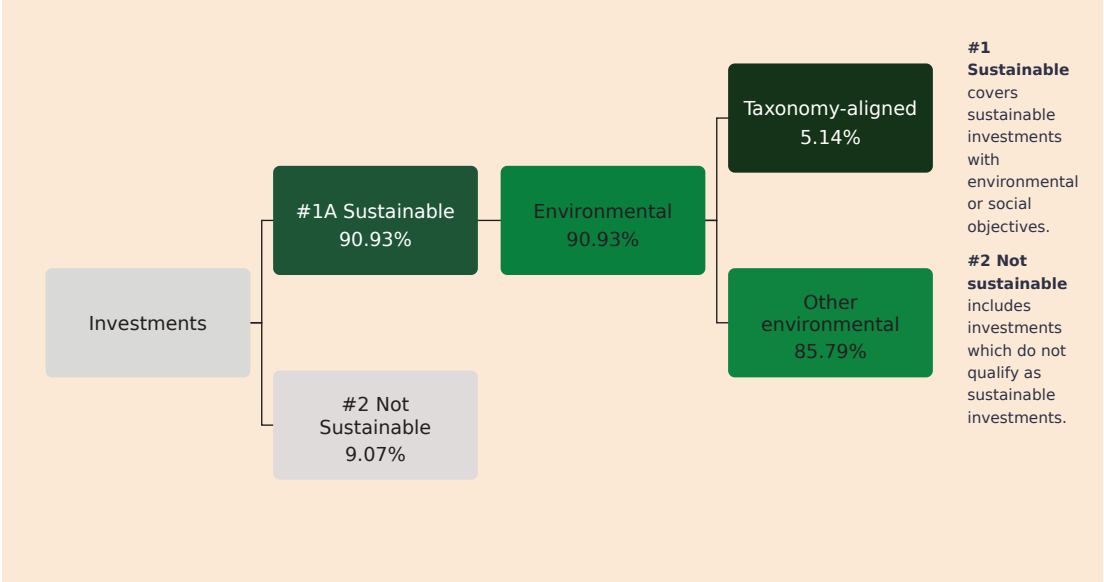
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?



99.60% of the Fund's NAV was invested in accordance with the sustainable investment objective of the Fund, by virtue of the Fund tracking as closely as possible the Reference Index.

0.40% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity.

90.93% of the Fund's NAV was invested in sustainable investments with an environmental objective.

9.07% of the Fund’s NAV was invested in investments that were deemed “not sustainable”.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown the data is representative of the reference period.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

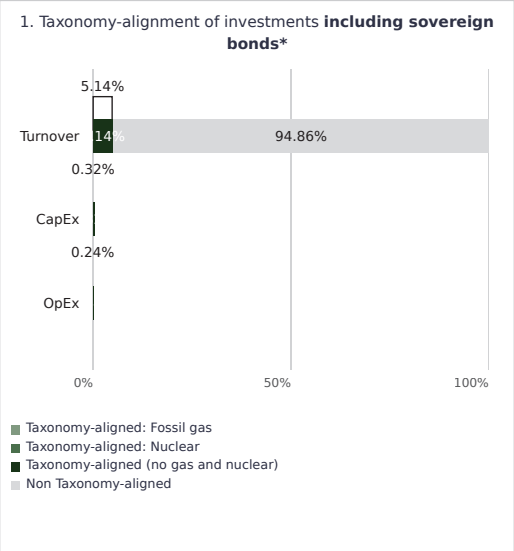
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective

Transitional activities are economic activities for which low-carbon alternatives are not yet available and that have greenhouse gas emission levels corresponding to the best performance.

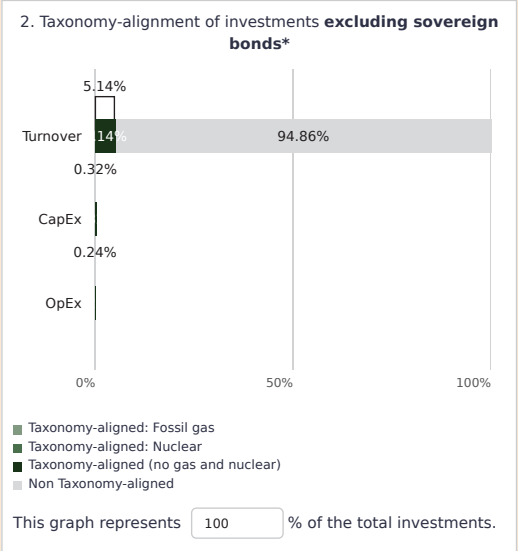
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies
- **capital expenditure**(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- **operational expenditure**(OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

5.14% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**0.48%**
Transition	**0.21%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective that were not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 85.79% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

8.67**% of the Fund's NAV was invested in investments which did not qualify as sustainable investments, however were still aligned with the sustainable investment objective.**

0.40% of the Fund's NAV was invested in other investments which do not qualify as sustainable investments, this portion included investments such as financial derivative instruments for hedging and/or efficient portfolio management and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund sought to attain the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference sustainable benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the sustainable objective.

How did the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it comprises only companies with high ESG scores, incorporates the TCFD (Task Force on Climate Related Financial Disclosures) recommendations and is designed to exceed the minimum standards of the EU Paris-Aligned Benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?

As the Fund fully replicates the performance of the Reference Index, the sustainability indicators performed

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Emerging Markets Index (the **"Parent Index"**)	6.61	6.61
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	74.4	74.4
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	19% average reduction across Reference Index rebalance dates in the period	19% average reduction across Reference Index rebalance dates in the period
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

How did this financial product perform compared with the reference benchmark?

As the Fund achieved the sustainable investment objective by tracking the Reference Index, which has a methodology that is consistent with attaining the sustainable investment objective of the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
MSCI ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the MSCI Emerging Markets Index (the **"Parent Index"**)	6.61	6.12
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	74.4	547.2
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	19% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 28.0% exposure to excluded companies at the latest Reference Index rebalance date

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to provide exposure to the risk and return profile of the S&P World Energy Index (formerly S&P Developed Ex-Korea LargeMidCap Energy Index) (the "**Parent Index**"), gaining exposure to corresponding sectors whilst improving the ESG characteristics and reducing carbon emissions of the Fund relative to the Parent Index. The Fund achieved this by tracking the S&P World Energy Targeted & Screened Index (formerly S&P World ESG Enhanced Energy Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities and by using an optimisation approach to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measuer the attainment of environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	17.3% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	33.7% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the S&P Global ESG Score improvement (10.6%) and the CO2 emissions intensity reduction (28.9%) for the Fund are both higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The index methodology of the Reference Index that the Fund tracks took into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that don't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced. The Fund also relied on the qualitative research and/or engagement of Invesco's Sustainable Investing Team to take into account the RTS PAI indicators.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	2,293.15	99.97	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		302.11	99.97	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		22,599.88	99.97	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		25,195.14	99.97	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	1,730.88	99.97	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	4,496.25	99.97	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	47.76	99.97	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	93.26	51.06	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	63.17	27.75	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.00	0.00	
	Manufacturing	0.29	6.53	
	Mining & quarrying	1.23	46.55	
	Real Estate activities	0.00	0.00

	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	50.64	99.97	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.06	99.97	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.97	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	44.60	99.97	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	0.00	0.00	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.03	99.97	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.97	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

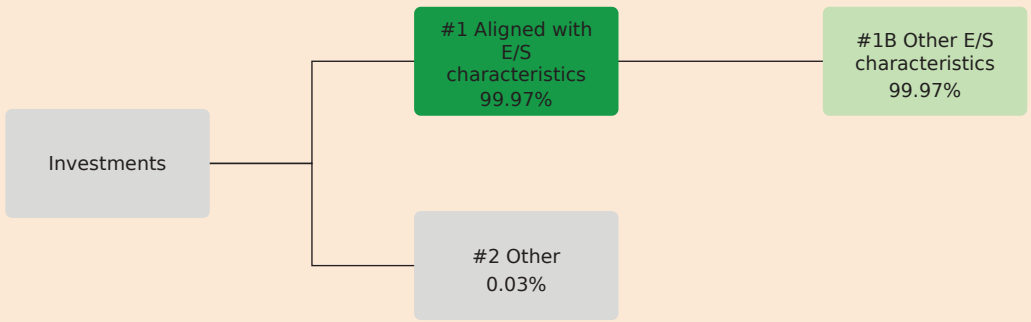
What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CONOCOPHILLIPS	Energy	9.58%	United States
ENBRIDGE INC	Energy	8.32%	Canada
BP PLC	Energy	7.67%	United Kingdom
TOTALENERGIES SE	Energy	6.98%	France
WILLIAMS COS INC	Energy	6.87%	United States
EOG RESOURCES	Energy	6.11%	United States
SCHLUMBERGER LTD	Energy	5.55%	United States

What was the proportion of sustainability-related investments?

Not Applicable.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.97% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.03% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

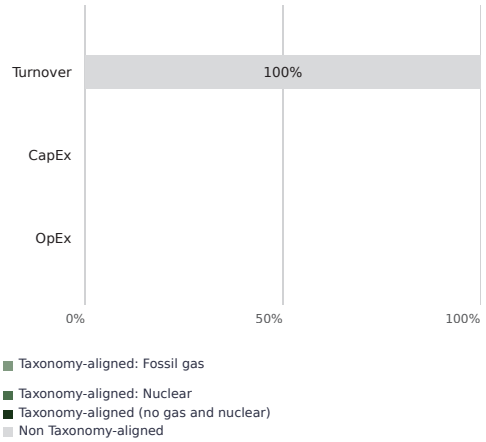
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

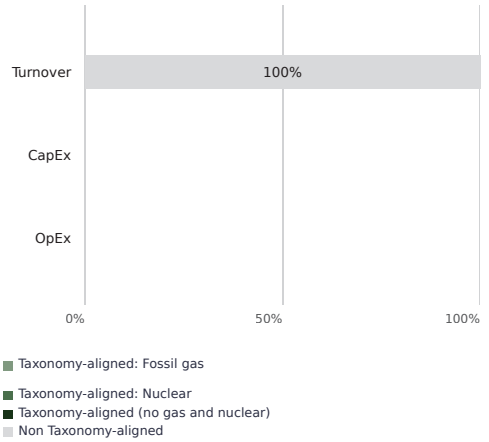
0% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**



☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 100 % of the total investments.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not Applicable.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index (a subset of the S&P World Index, formerly S&P Developed Ex-Korea LargeMidCap Index) which includes companies in the energy sector.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
S&P Global ESG Score (as defined in the methodology of the Reference Index)	53.9	53.9
CO2 emissions intensity (Scope 1+2+3/EVIC)	231.9	231.9
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
S&P Global ESG Score (as defined in the methodology of the Reference Index)	53.9	45.9
CO2 emissions intensity (Scope 1+2+3/EVIC)	231.9	349.9
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 59.3% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco S&P World Financials ESG UCITS ETF **Legal entity identifier: 549300JXBX1AUYXYGX60**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 57.70 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to provide exposure to the risk and return profile of the S&P World Financials Index (formerly S&P Developed Ex-Korea LargeMidCap Financials Index) (the "**Parent Index**"), gaining exposure to corresponding sectors whilst improving the ESG characteristics and reducing carbon emissions of the Fund relative to the Parent Index. The Fund achieved this by tracking the S&P World ESG Enhanced Financials Index (formerly S&P Developed Ex-Korea LargeMidCap ESG Enhanced Financials Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities and by using an optimisation approach to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI."

How did the sustainability indicators perform?

The Fund used a variety of indicators to measuer the attainment of environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	14.9% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	57.4% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the S&P Global ESG Score improvement (13.5%) and the CO2 emissions intensity reduction (24.9%) for the Fund are both higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through the removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the methodology of the Reference Index tracked by the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The methodology of the Reference Index excluded companies that were deemed not to be compliant with the UN Global Compact (the "**UNGC**"). This set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The methodology of the Reference Index excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	0.62	99.96	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		0.86	99.96	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		805.49	99.96	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		806.96	99.96	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	175.26	99.96	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	818.42	99.97	Fund level total emission intensity- Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.97	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	36.00	74.75	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	28.76	33.42	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.00	0.00	
	Manufacturing	0.00	0.00	
	Mining & quarrying	0.00	0.00	
	Real Estate activities	0.00	0.00

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.31	0.05	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.00	99.51	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.00	98.02	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.51	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	54.11	99.50	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	26.04	2.02	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	37.66	99.36	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.33	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund’s consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco’s Sustainable Investing Services team (“**Invesco’s PAI**

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

framework") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

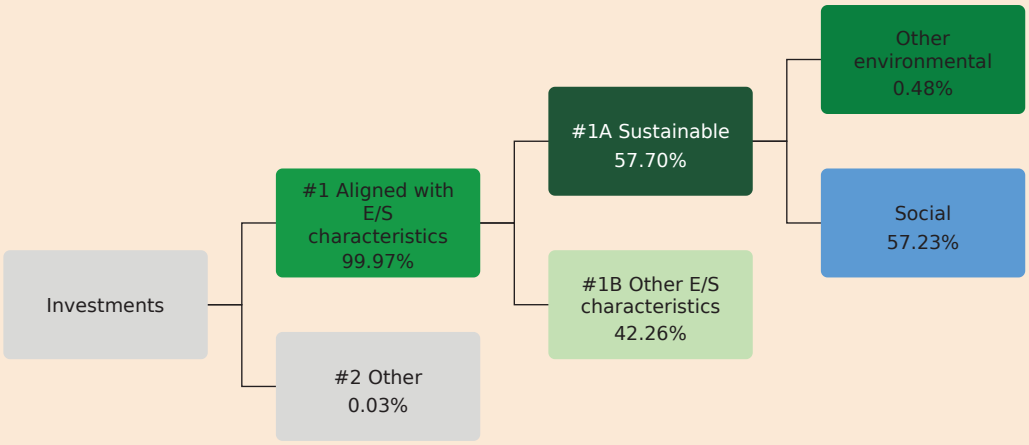
What was the proportion of sustainability-related investments?

See below

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

99.97% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.03% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

57.70% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown as at - The data is representative of the reference period.

Sector (GICS)	Weight %

10102050	Coal & Consumable Fuels	0.00
Total		**0.00**

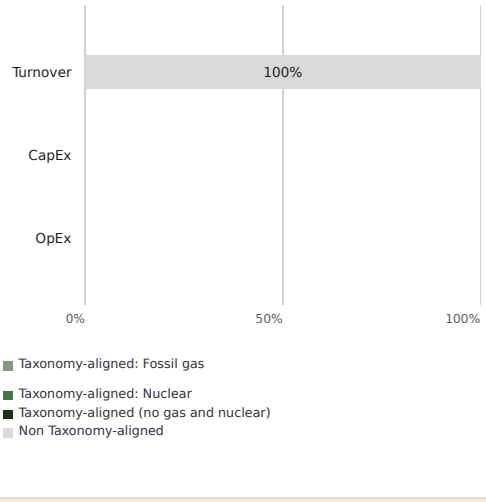
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

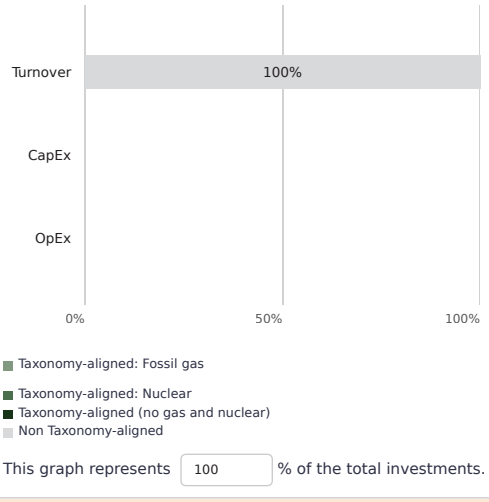
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



0% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

1. Taxonomy-alignment of investments **including sovereign bonds***

2. Taxonomy-alignment of investments **excluding sovereign bonds***

This graph represents 100 % of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 0.48% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

57.23% of the Fund's NAV.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.03% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See below.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index (a subset of the S&P World Index, formerly S&P Developed Ex-Korea LargeMidCap Index) which includes companies in the finance sector.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index)	55.4	55.4
CO2 emissions intensity (Scope 1+2+3/EVIC)	4.2	4.2
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
S&P Global ESG Score (as defined in the methodology of the Reference Index)	55.4	48.2
CO2 emissions intensity (Scope 1+2+3/EVIC)	4.2	9.9
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 26.9% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco S&P World Health Care ESG UCITS ETF **Legal entity identifier: 549300SL8I1ZSRGCHI36**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 82.42 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to provide exposure to the risk and return profile of the S&P World ESG Health Care Index (formerly S&P Developed Ex-Korea LargeMidCap Health Care Index) (the "**Parent Index**"), gaining exposure to corresponding sectors whilst improving the ESG characteristics and reducing carbon emissions of the Fund relative to the Parent Index. The Fund achieved this by tracking the S&P World ESG Enhanced Health Care Index (formerly S&P Developed Ex-Korea LargeMidCap ESG Enhanced Health Care Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities and by using an optimisation approach to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measuer the attainment of environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	10.9% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	28.6% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the S&P Global ESG Score improvement (9.2%) and the CO2 emissions intensity reduction (26.9%) for the Fund are both higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through the removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the methodology of the Reference Index tracked by the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The methodology of the Reference Index excluded companies that were deemed not to be compliant with the UN Global Compact (the "**UNGC**"). This set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The methodology of the Reference Index excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	78.89	99.91	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		56.44	99.91	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		2,854.34	99.91	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		2,989.68	99.91	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	44.69	99.91	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	188.46	99.91	Fund level total emission intensity- Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.91	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	79.36	78.63	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	32.84	71.57	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.00	0.00	
	Manufacturing	0.06	84.60	
	Mining & quarrying	0.00	0.00	
	Real Estate activities	0.00	0.00	
	Transportation & storage	0.00	0.00	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail	0.02	0.01	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	13.18	99.79	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.25	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.08	99.79	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.79	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	62.94	99.79	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	4.52	3.99	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	36.99	97.58	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.91	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ELI LILLY & CO	Health Care	11.49%	United States

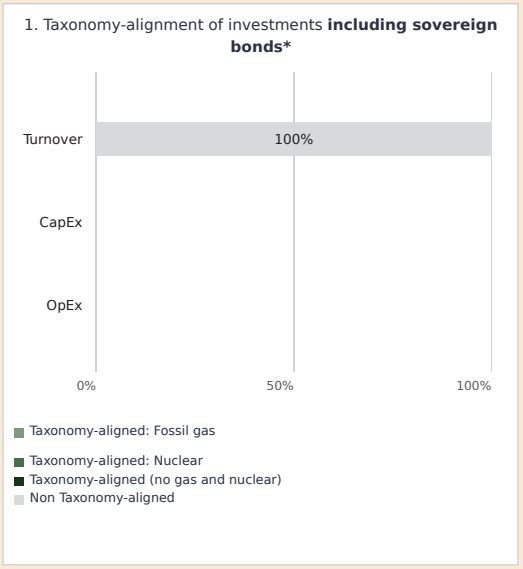
To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

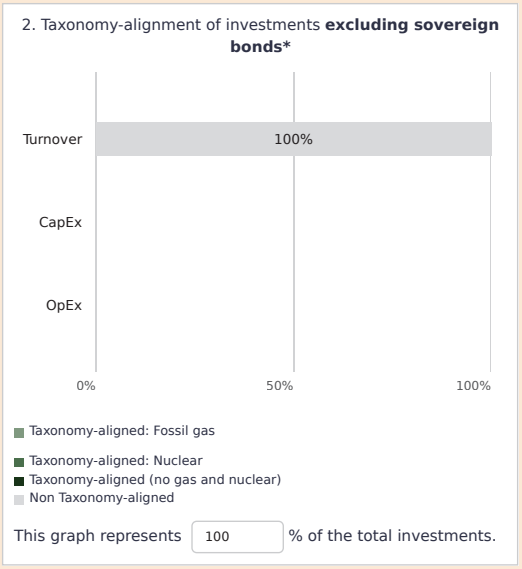
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



0% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 1.23% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

81.19% of the Fund's NAV.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.09% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See below

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index (a subset of the S&P World Index, formerly S&P Developed Ex-Korea LargeMidCap Index) which includes companies in the health care sector).

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index)	55.6	55.6
CO2 emissions intensity (Scope 1+2+3/EVIC)	16.5	16.5
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
S&P Global ESG Score (as defined in the methodology of the Reference Index)	55.6	50.1
CO2 emissions intensity (Scope 1+2+3/EVIC)	16.5	23.1
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 21.9% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco S&P World Information Technology ESG UCITS ETF

Legal entity identifier: 549300VIQWDUCLYSV364

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 69.43 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☒ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to provide exposure to the risk and return profile of the S&P World Information Technology Index (formerly S&P Developed Ex-Korea LargeMidCap Information Technology Index) (the "**Parent Index**"), gaining exposure to corresponding sectors whilst improving the ESG characteristics and reducing carbon emissions of the Fund relative to the Parent Index. The Fund achieved this by tracking the S&P World ESG Enhanced Information Technology Index (formerly S&P Developed Ex-Korea LargeMidCap ESG Enhanced Information Technology Index) (the "**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities and by using an optimisation approach to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measuer the attainment of environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	8.7% improvement
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	6.0% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the S&P Global ESG Score improvement (7.3%) for the Fund is higher and the CO2 emissions intensity reduction (55.9%) is lower. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to environmental objectives such as climate change, water management, pollution prevention, and to social objectives such as good health, well-being and gender equality. The Fund achieved those objectives by investing in constituents of the Reference Index. According to Invesco's sustainable investment framework, a percentage (as disclosed above) of constituents of the Reference Index contributed positively to selected Sustainable Development Goals (SDGs) that related to the above objectives.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through the removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, those facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores, and those that were deemed non-compliant with the principles of the United Nations Global Compact. Additionally, through its exclusions based on Sustainalytics Risk Rating Score the index also addressed a number of other adverse indicators. Companies were assessed for inclusion based on whether they were deemed to help the world decarbonise and reduce climate risk generally.

Sustainalytics Controversy Scores consider controversies in a number of different areas, including, but not limited to discrimination and harassment, land use and biodiversity, energy use and greenhouse gas emissions, discharges and releases (water), degradation and contamination (land), and controversial weapons.

Sustainalytics Risk Ratings consider a number of key issues in their construction, including, but not limited to biodiversity programmes, hazardous waste management, water risk management, GHG risk management, carbon intensity, gender pay equality programme, gender pay disclosure, and board diversity.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the methodology of the Reference Index tracked by the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The methodology of the Reference Index excluded companies that were deemed not to be compliant with the UN Global Compact (the "**UNGC**"). This set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The methodology of the Reference Index excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund- the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	36.10	99.98	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		58.68	99.98	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		1,420.85	99.98	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		1,515.63	99.98	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	22.72	99.98	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	162.28	99.98	Fund level total emission intensity- Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.98	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	23.96	97.56	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	3.38	57.33	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.00	0.00	
	Manufacturing	0.04	57.22	
	Mining & quarrying	0.00	0.00	
	Real Estate activities	2.09	0.04	
	Transportation & storage	0.00	0.00	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail trade & repair of	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.00	99.98	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.04	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.02	99.98	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.98	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	60.27	99.88	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	7.64	1.82	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.08	99.98	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.98	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data

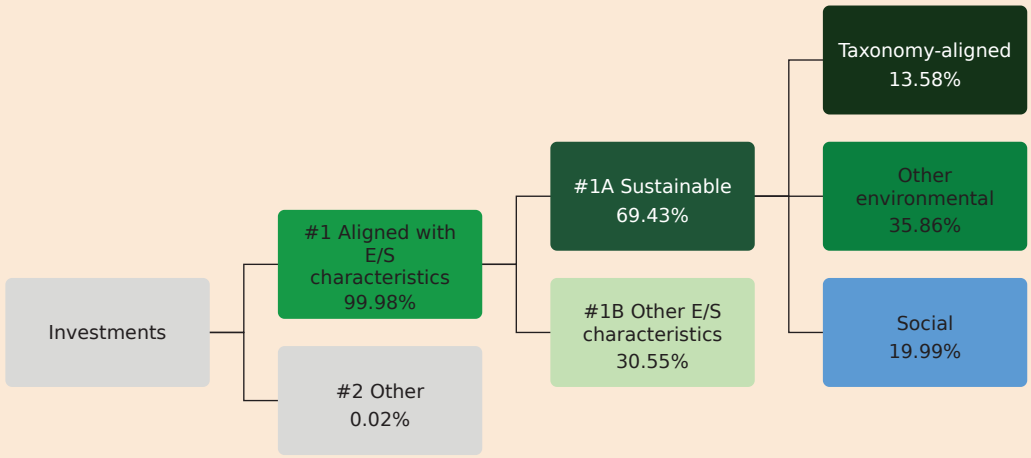
What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	22.26%	United States
NVIDIA CORP	Information Technology	20%	United States
APPLE INC	Information Technology	17.26%	United States

What was the proportion of sustainability-related investments?

Please see below.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.98% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

0.02% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes, or was held as cash for ancillary liquidity purposes.

69.43% of the Fund's NAV was invested in sustainable investments.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

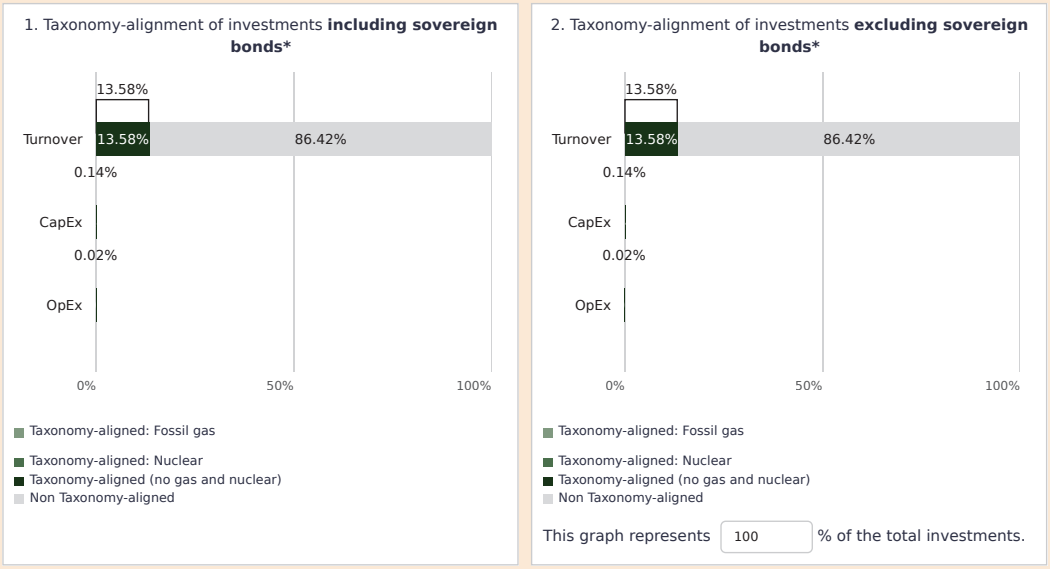
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

13.58% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**0.03%**
Transition	**0.00%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 35.86% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

19.99% of the Fund's NAV.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.02% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to achieve an uplift in the weighted average S&P Global ESG score and a decrease in the weighted average carbon intensity relative to the Parent Index (a subset of the S&P World Index, formerly S&P Developed Ex-Korea LargeMidCap Index) which includes companies in the information technology sector.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index)	54.9	54.9
CO2 emissions intensity (Scope 1+2+3/EVIC)	8.5	8.5
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index rebalance date	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	Fund Indicator Performance	Broad Market benchmark (Parent Index) Indicator Performance
S&P Global ESG Score (as defined in the methodology of the Reference Index)	54.9	50.5
CO2 emissions intensity (Scope 1+2+3/EVIC)	8.5	9.0
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 13.2% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Global Corporate Bond ESG Climate Transition UCITS ETF

Legal entity identifier: 254900SG4WZ4NOGTWF60

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 98.10 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to increase overall exposure to issuers demonstrating a robust ESG profile i.e. issuers with a more favourable ESG rating compared to similar issuers. The fund also reduced exposure to companies involved in certain business activities and those with involvement in very severe ESG controversies, whilst also reducing the Fund's overall exposure to risks arising from a transition to a lower-carbon economy by lowering exposure to carbon intensive issuers or industries.

The Fund achieved the environmental and social characteristics by tracking the Bloomberg MSCI Global Liquid Corporate Climate Transition ESG Bond Index (CTB) ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

*Please note that pursuant to a change to the Reference Index, whereby the methodology of the Reference Index was amended by the index provider to incorporate the minimum standards for an EU Climate Transition Benchmark, including targeting a reduction of greenhouse gas (absolute GHG emissions) by at least 7% per annum (the "**Decarbonisation Target**"), the environmental and social characteristics promoted by the Fund and the sustainable investment approach of the Fund was changed on 1 May 2025.*

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. The Fund performed as follows as at 31 December 2025, the data is representative of

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the reference period:

Sustainability Indicator	Indicator Performance
Absolute GHG emissions (Scope 1+2+3) relative to the Bloomberg Euro Corporate Index (the "**Parent Index**")	45.9% reduction
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	13% reduction per annum*
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies
MSCI ESG Score (as defined in the methodology of the Reference Index) relative to the Parent Index	10.0% improvement

**The Fund measures its attainment of the Decarbonisation Target once per year on the date of the incorporation of the decarbonisation target for the Reference Index, and subsequent anniversaries of this date.*

…and compared to previous periods?

Compared to last period the MSCI ESG Score improvement (9.8%) for the Fund was slightly higher. The previous CO2 emissions intensity reduction (69.7%) was based on Scope 1+2/Revenue, so is not comparable to the reduction referenced above. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments made by the Fund contributed to the objective of reducing exposure to risks arising from a transition to a lower-carbon economy by lowering exposure to carbon intensive companies or industries (such risks include increased cost of doing business, regulatory actions, such as carbon taxes and changes in market preferences, such as consumers shifting purchases towards low carbon products).

The Fund achieved those objectives by investing in constituents of the Reference Index, which is constructed to meet the minimum requirements of an EU Climate Transition Benchmarks as based on the commitments laid down in the Paris Agreement in accordance with the Delegated Regulation (EU) 2020/1818 for the methodology of benchmark indices that would be aligned with the objectives of the Paris Agreement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund tracks takes into account principal adverse impacts (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index or had their weightings reduced.

How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors have been taken into account.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The index methodology directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those facing very severe ESG controversies, as assessed via MSCI Controversy Scores. Through its exclusions based on MSCI ESG Score, and adjustment of the weighting for those that are above the threshold based on these same scores, the Reference Index also addressed a number of other adverse indicators. The Reference Index also excluded any companies where data wasn't available to make such assessments.

MSCI ESG Scores consider a number of key issues in their construction, including, but not limited to carbon emissions, product carbon footprint, biodiversity & land use, toxic emissions & waste, opportunities in renewable energy. The scores also take into account areas such as human capital as well as corporate governance, considering ownership & control, pay and the board.

MSCI Controversy Scores consider controversies in a number of different areas, including, but not limited to biodiversity & land use, energy & climate change, toxic emissions & waste, operational waste, discrimination & workforce diversity, and governance structures. Any company that violates the UN Global Compact receives a very severe MSCI Controversy Score.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") is captured in the index methodology of the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.

The index methodology excluded companies that weren't compliant with the UN Global Compact (the "**UNGC**"), this set of ten principles show significant overlap with both the OECD Guidelines and the UN Guiding Principles. With regards to OECD Guidelines, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The index methodology excluded comanies facing very severe ESG controversies, as assessed via MSCI Controversy Scores. These scores assess controversies that may constitute a breach of selected global norms and conventions, including the UNGC, the International Labour Organisation's conventions, and the UN Guiding Principles on Business and Human Rights.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	4,524.44	85.27	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		1,295.27	85.27	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		82,533.04	85.27	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		88,352.75	85.27	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	329.21	85.27	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,348.96	99.43	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	1.88	99.75	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	55.75	77.11	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	18.77	39.92	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.17	0.50	
	Electricity, gas, steam & air conditioning supply	1.35	5.44	
	Manufacturing	0.24	19.33	
	Mining & quarrying	1.29	0.60	
	Real Estate activities	0.65	1.67	
	Transportation & storage	2.57	3.75	
	Water supply, sewerage, waste management & remediation activities	0.42	0.36	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.06	2.64	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	2.65	99.29	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.10	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.19	87.05	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.25	99.29	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	47.47	98.95	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	21.54	5.90	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	38.90	95.83	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.57	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
GOLDMAN SACHS GP	Financials	0.11%	United States
ABBV 3.2 11/21/2029	Health Care	0.10%	United States
CIGNA GROUP/THE	Health Care	0.09%	United States

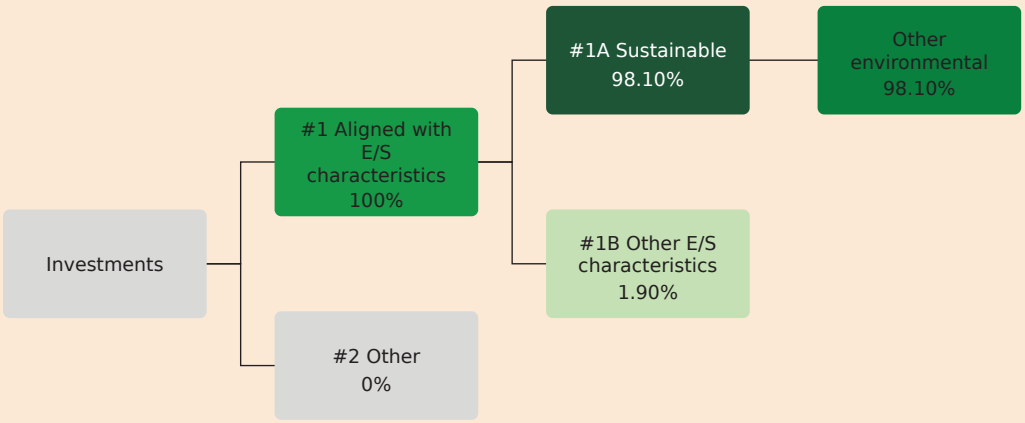
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

98.10% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - The data is representative of the reference period.

Sector (GICS)	Weight %
Financials	47.07
Communication Services	6.94
Consumer Discretionary	4.68
Information Technology	8.45
Industrials	4.89
Consumer Staples	2.41
Energy	3.48
Real Estate	1.82
Health Care	11.86
Materials	1.20
Utilities	7.20
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.04
10101020	Oil & Gas Equipment & Services	0.45
10102010	Integrated Oil & Gas	0.04
10102020	Oil & Gas Exploration & Production	0.02
10102030	Oil & Gas Refining & Marketing	0.23
10102040	Oil & Gas Storage & Transportation	2.66
10102050	Coal & Consumable Fuels	0.04
Total		**3.48**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

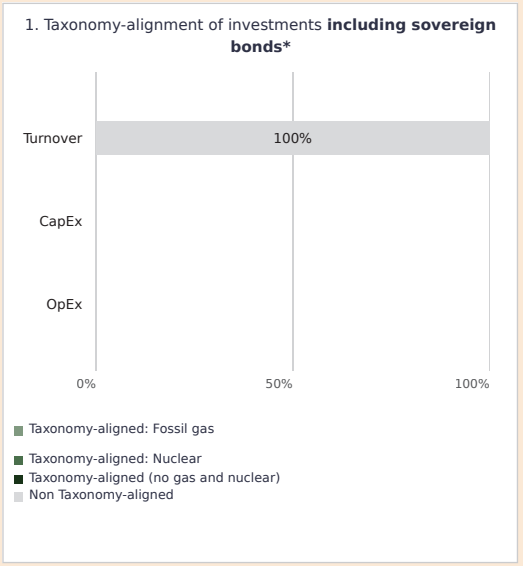
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

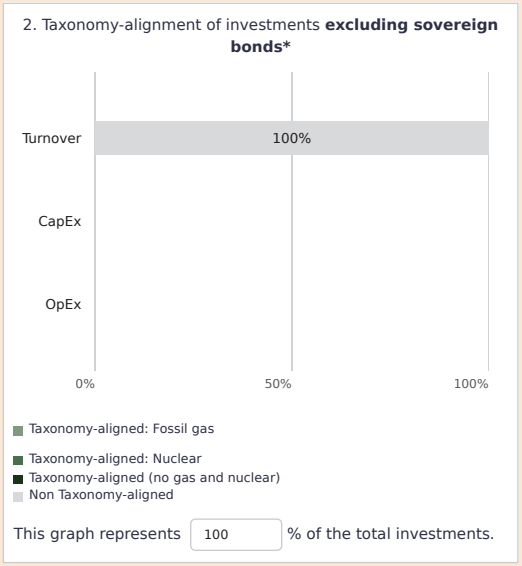
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Not Applicable.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Fund continues to have 0% alignment with the EU Taxonomy, as with the previous reference period.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 98.10% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

What was the share of socially sustainable investments?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to increase overall exposure to issuers demonstrating both a robust ESG profile, and issuers that are assigned more favourable ESG scores using MSCI ESG metrics, whilst also meeting the minimum standards for an EU Climate Transition Benchmark.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
Absolute GHG emissions (Scope 1+2+3) in tonnes	26.0	25.7
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	13% reduction per annum	14% reduction per annum
Percentage of the portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.68	7.69

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The Parent Index also acts as a relevant broad market index. The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
Absolute GHG emissions (Scope 1+2+3) in tonnes	26.0	48.0
Absolute GHG emissions (Scope 1+2+3) relative to the decarbonisation trajectory anchor date	13% reduction per annum	9% reduction per annum
Percentage of the portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 16.0% exposure to excluded companies at the latest Reference Index rebalance date
MSCI ESG Score (as defined in the methodology of the Reference Index)	7.68	6.98

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2026 USD Corporate Bond UCITS ETF

Legal entity identifier: 254900RZMN3XJIHGP923

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:**_____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**_____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities. The Fund achieved this by tracking the Bloomberg 2026 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	71.9% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity reduction (62.4%) for the Fund is higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	414.46	78.75	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		108.07	78.75	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		7,568.63	78.75	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		8,091.16	78.75	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	462.26	78.75	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,669.45	98.11	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	1.63	99.86	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	60.49	69.96	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	25.95	37.80	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.85	0.08	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	4.44	2.14	
	Manufacturing	0.16	27.14	
	Mining & quarrying	1.12	3.50	
	Real Estate activities	1.31	4.47	
	Transportation & storage	2.39	3.44	
	Water supply, sewerage, waste management & remediation activities	0.15	0.02	
	Wholesale & Retail	0.05	4.42	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	6.70	99.84	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.69	80.86	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.84	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	62.84	99.41	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	25.35	1.72	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.81	98.56	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.84	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ABBV 2.95 11/21/2026	Health Care	0.77%	United States

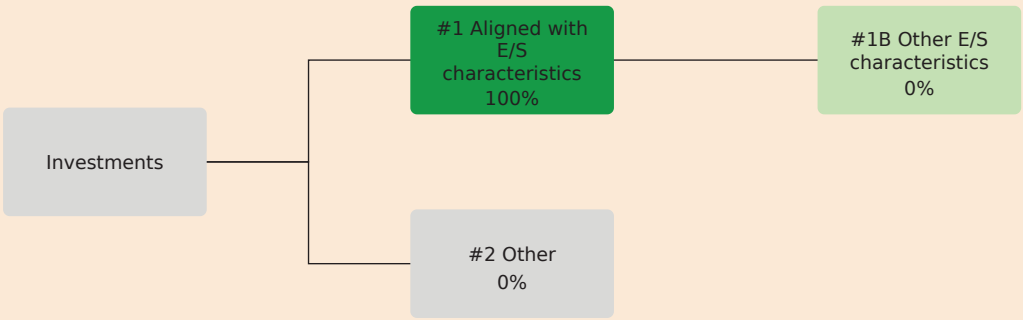
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	38.91
Communication Services	4.12
Consumer Discretionary	9.79
Information Technology	9.71
Industrials	7.07
Consumer Staples	5.07
Energy	5.60
Real Estate	5.07
Health Care	9.67
Materials	1.82
Utilities	3.17
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.10
10102010	Integrated Oil & Gas	1.92
10102020	Oil & Gas Exploration & Production	0.77
10102030	Oil & Gas Refining & Marketing	0.41
10102040	Oil & Gas Storage & Transportation	2.40
10102050	Coal & Consumable Fuels	0.00
Total		**5.60**

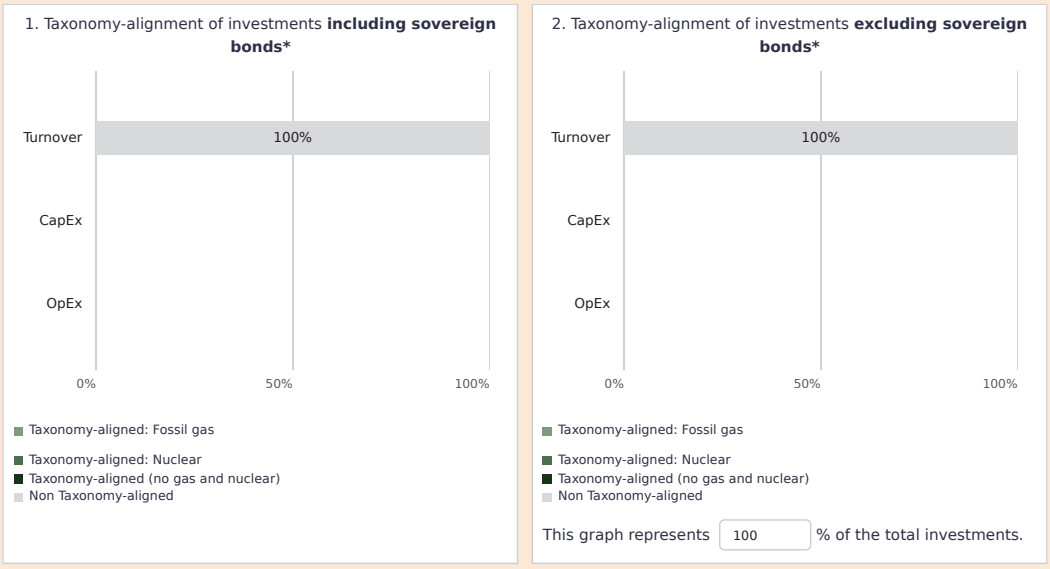
Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	73.9	70.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	73.9	262.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 9.6% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco BulletShares 2027 USD Corporate Bond UCITS ETF

Legal entity identifier: 254900033I44AZAOK669

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:**_____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**_____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2027 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	61.7% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity reduction (63.0%) for the Fund is slightly lower. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	293.83	78.88	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		65.33	78.88	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		4,196.36	78.88	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		4,555.53	78.88	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	476.06	78.88	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,679.94	98.26	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	2.33	99.99	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	63.76	70.85	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	32.56	35.33	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.42	0.04	
	Construction	0.20	0.15	
	Electricity, gas, steam & air conditioning supply	4.75	3.03	
	Manufacturing	0.22	31.35	
	Mining & quarrying	1.19	3.72	
	Real Estate activities	0.46	3.68	
	Transportation & storage	2.79	3.72	
	Water supply, sewerage, waste management & remediation activities	0.49	0.60	
	Wholesale & Retail	0.05	3.96	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	5.16	99.81	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.14	80.55	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.81	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	59.88	99.63	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	8.52	1.57	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.29	98.61	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.92	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Information Technology	0.79%	United States

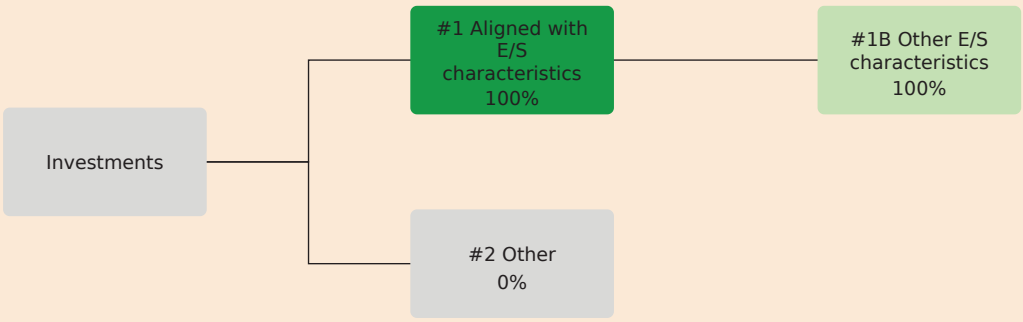
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	28.53
Communication Services	5.48
Consumer Discretionary	12.91
Information Technology	10.45
Industrials	7.18
Consumer Staples	6.95
Energy	6.28
Real Estate	4.23
Health Care	11.48
Materials	2.19
Utilities	4.32
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.07
10101020	Oil & Gas Equipment & Services	0.24
10102010	Integrated Oil & Gas	1.69
10102020	Oil & Gas Exploration & Production	1.16
10102030	Oil & Gas Refining & Marketing	0.43
10102040	Oil & Gas Storage & Transportation	2.69
10102050	Coal & Consumable Fuels	0.00
Total		**6.28**

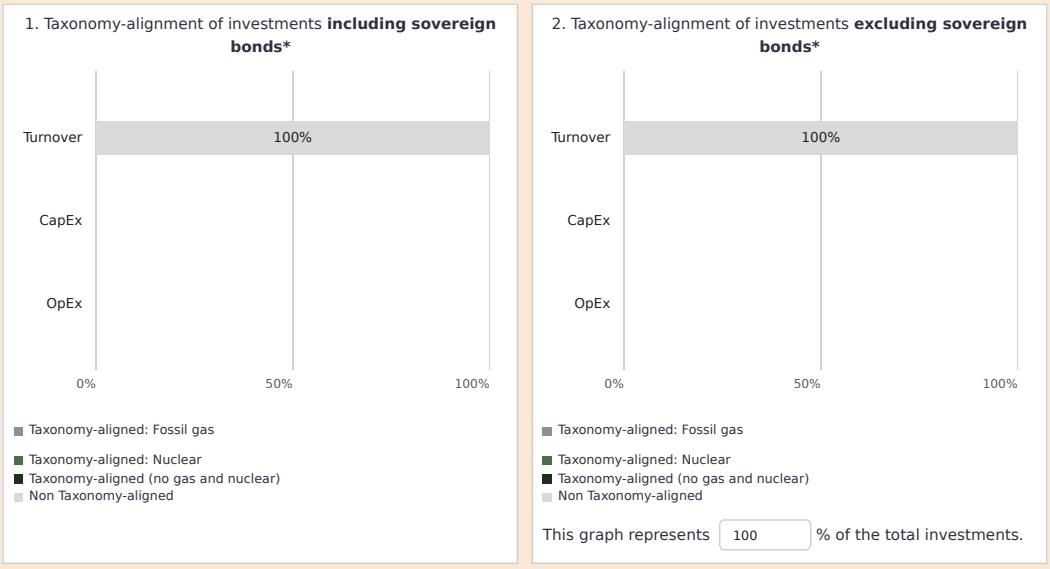
Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	100.6	103.5
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	100.6	262.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 9.6% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco BulletShares 2028 USD Corporate Bond UCITS ETF

Legal entity identifier: 254900WG7LQV9SIDJ511

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:**_____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**_____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2028 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	49.8% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity reduction (45.1%) for the Fund is higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	438.59	79.67	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		113.16	79.67	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		7,710.41	79.67	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		8,262.16	79.67	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	527.47	79.67	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,729.66	97.76	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	2.51	100.00	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	66.43	73.14	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	36.52	37.42	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.05	0.12	
	Electricity, gas, steam & air conditioning supply	5.42	4.18	
	Manufacturing	0.22	29.80	
	Mining & quarrying	1.33	3.99	
	Real Estate activities	1.61	5.46	
	Transportation & storage	2.78	3.99	
	Water supply, sewerage, waste management & remediation activities	0.49	0.72	
	Wholesale & Retail	0.07	5.15	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	6.52	99.69	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.79	81.55	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.69	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	60.40	99.05	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	23.52	1.79	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.10	98.25	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.93	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
CVS 4.3 3/25/2028	Health Care	1.07%	United States

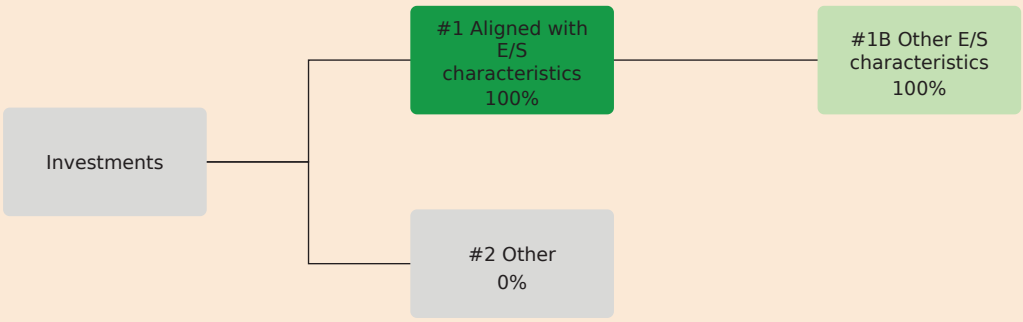
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.09
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	1.89
10102020	Oil & Gas Exploration & Production	0.66
10102030	Oil & Gas Refining & Marketing	0.59
10102040	Oil & Gas Storage & Transportation	3.06
10102050	Coal & Consumable Fuels	0.00
Total		**6.29**

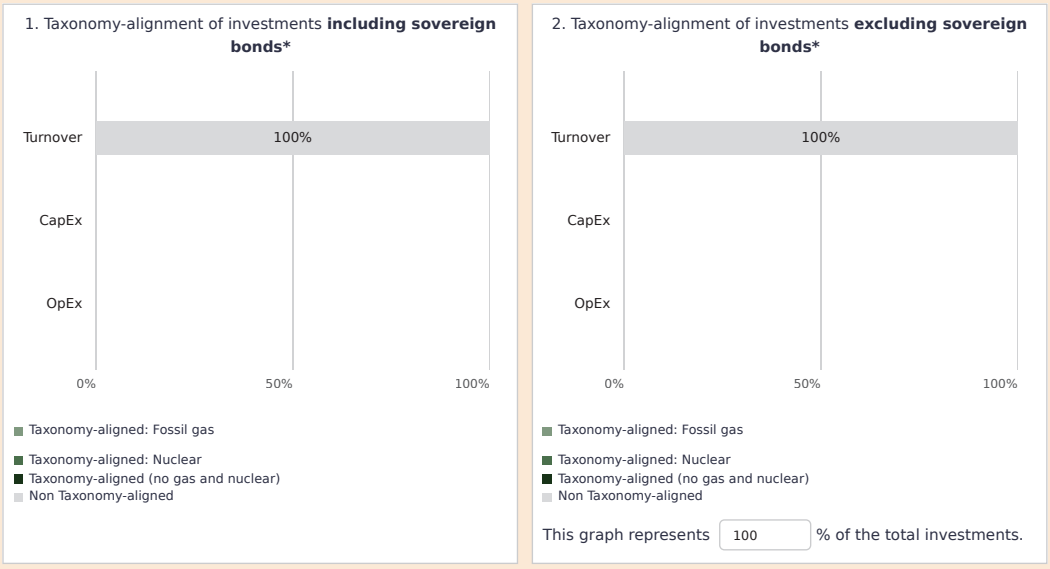
Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	131.9	132.6
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	131.9	262.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 9.6% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco BulletShares 2029 USD Corporate Bond UCITS ETF

Legal entity identifier: 2549009OCFO5I4C5RX42

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:**_____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**_____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2029 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	54.6% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity reduction (48.3%) for the Fund is higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

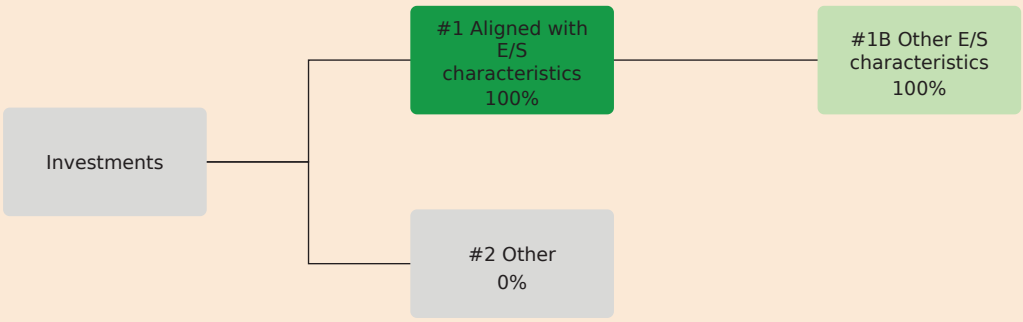
What was the proportion of sustainability-related investments?

See below field



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

10102040	Oil & Gas Storage & Transportation	3.07
10102050	Coal & Consumable Fuels	0.44
Total		**7.28**

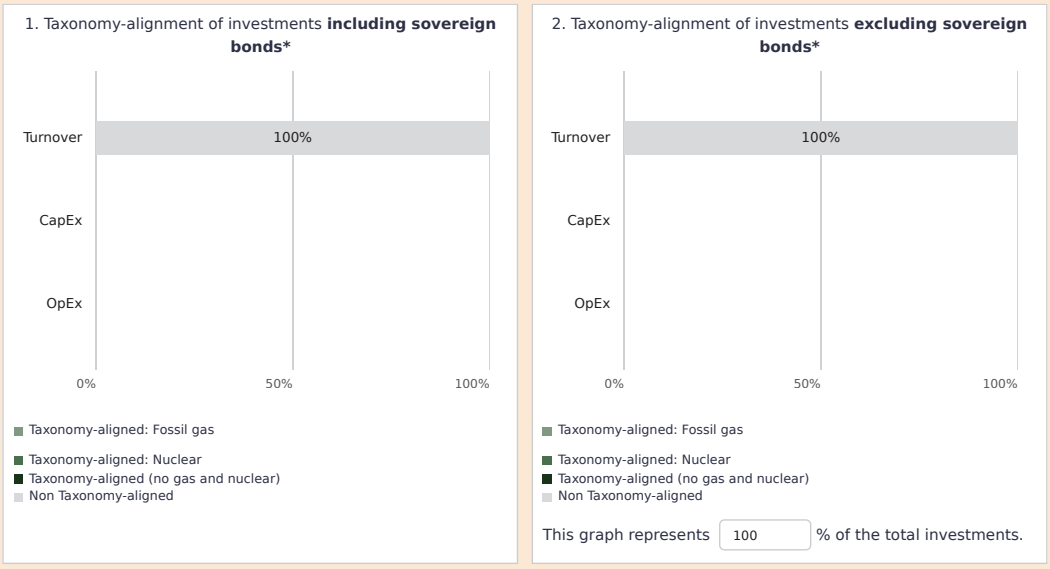
Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	119.3	121.5
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	119.3	262.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 9.6% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco BulletShares 2030 USD Corporate Bond UCITS ETF

Legal entity identifier: 254900H14QIPU3V1TT77

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:**_____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**_____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2030 Maturity USD Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg US Corporate Bond Index (a broad market index)	53.0% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity reduction (43.6%) for the Fund is higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	717.61	83.49	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		191.74	83.49	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		12,527.23	83.49	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		13,436.59	83.49	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	656.21	83.49	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,743.66	98.15	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	4.17	99.99	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	68.97	69.70	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	35.25	38.63	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	1.93	0.20	
	Construction	0.20	0.20	
	Electricity, gas, steam & air conditioning supply	4.49	3.39	
	Manufacturing	0.30	31.22	
	Mining & quarrying	1.29	6.35	
	Real Estate activities	2.51	5.54	
	Transportation & storage	2.71	3.71	
	Water supply, sewerage, waste management & remediation activities	0.49	0.60	
	Wholesale & Retail	0.09	3.93	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	7.42	99.47	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.75	84.44	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.47	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	60.28	98.87	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	8.94	2.34	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	34.61	98.24	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.94	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
TMUS 3.875 4/15/2030	Communication Services	1.36%	United States
DEUTSCHE TEL FIN	Communication Services	0.94%	Netherlands
BRITISH TELECOMM	Communication Services	0.74%	United Kingdom
PFE 4.65 5/19/2030	Health Care	0.67%	Singapore

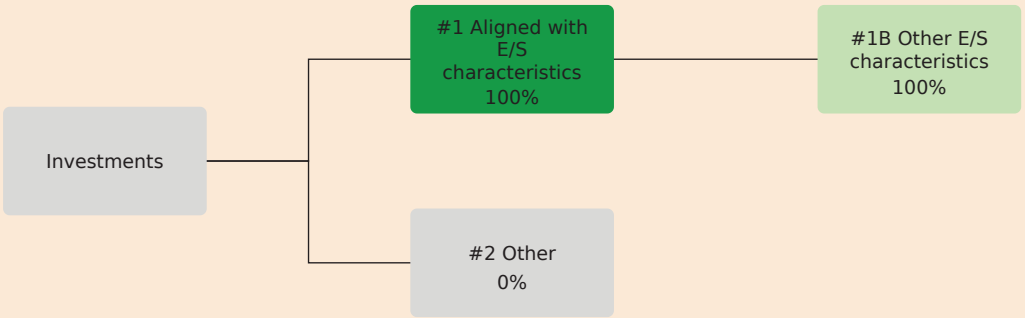
SPLLLC 4.5 5/15/2030	Energy	0.45%	United States
XOM 3.482 3/19/2030	Energy	0.45%	United States

What was the proportion of sustainability-related investments?



Asset allocation describes the share of investments in specific assets.

See below field

What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	19.05
Communication Services	8.51
Consumer Discretionary	9.19
Information Technology	9.66
Industrials	7.14
Consumer Staples	8.13
Energy	9.11
Real Estate	6.67
Health Care	13.95
Materials	3.67
Utilities	4.92
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.69
10101020	Oil & Gas Equipment & Services	0.54
10102010	Integrated Oil & Gas	3.10
10102020	Oil & Gas Exploration & Production	1.43
10102030	Oil & Gas Refining & Marketing	0.97
10102040	Oil & Gas Storage & Transportation	2.38
10102050	Coal & Consumable Fuels	0.00
Total		**9.11**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

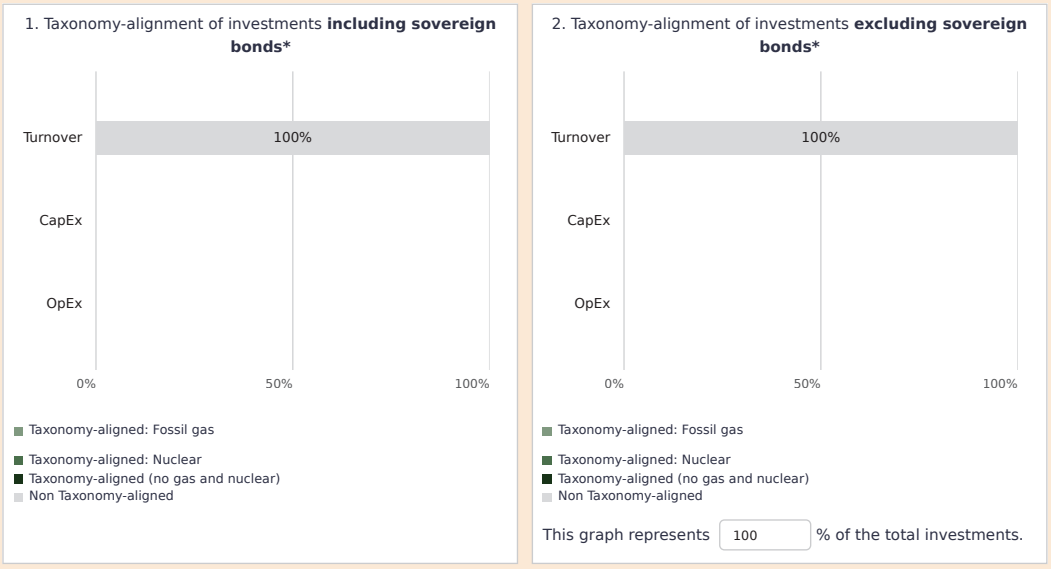
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to reduce overall exposure to issuers which may be most impacted by ESG risks and controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising United States treasury securities as these bonds mature.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	123.5	132.6
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	123.5	262.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 9.6% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2026 EUR Corporate Bond UCITS ETF

Legal entity identifier: 254900HGBMG46T2E8647

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 6.91 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2026 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	46.2% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity reduction (41.5%) for the Fund is higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	111.14	69.67	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		10.93	69.67	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		1,474.48	69.67	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		1,596.55	69.67	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	554.17	69.67	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,327.59	98.32	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	98.32	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	54.65	84.02	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	16.40	48.46	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	3.01	5.13	
	Manufacturing	0.19	28.51	
	Mining & quarrying	1.47	2.97	
	Real Estate activities	1.97	2.45	
	Transportation & storage	0.43	3.87

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	3.74	98.32	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.34	71.51	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	98.32	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	25.29	98.32	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	9.34	2.79	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	41.04	91.88	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	98.32	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
UBS AG LONDON	Financials	2.53%	United Kingdom
SOCIETE GENERALE	Financials	2.50%	France
BKNG 4 11/15/2026	Consumer Discretionary	2.50%	United States

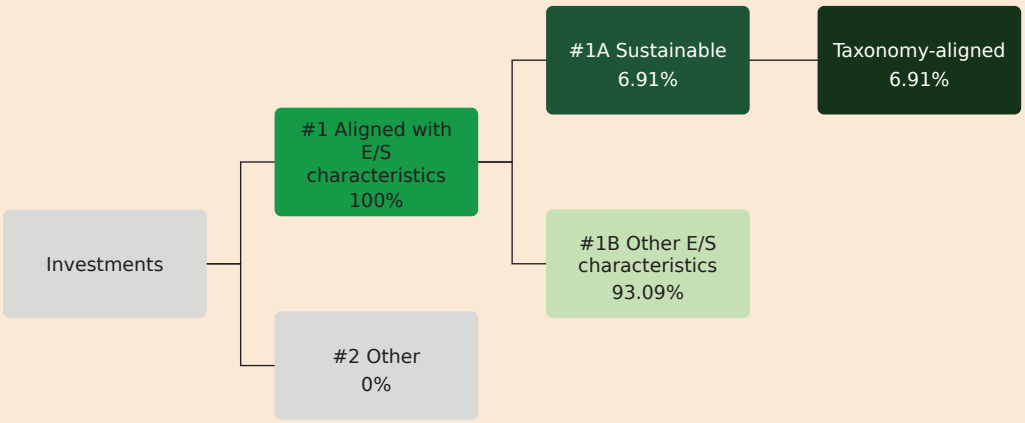
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

6.91% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	38.78
Communication Services	6.01
Consumer Discretionary	15.27
Information Technology	2.43
Industrials	12.39
Consumer Staples	7.30
Energy	2.97
Real Estate	2.45
Health Care	4.86
Materials	2.41
Utilities	5.13
Total	**100.00**

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	2.97
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**2.97**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

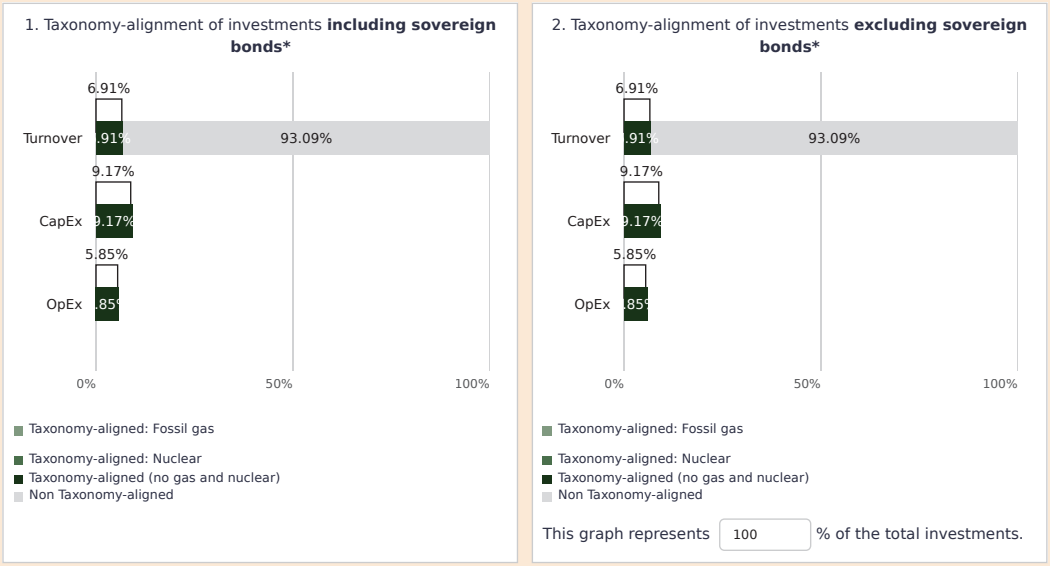
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

6.91% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**2.88%**
Transition	**0.35%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as 'Not Free' in the Freedom in the World Report published by Freedom House.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	47.3	78.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	47.3	87.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 2.2% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2027 EUR Corporate Bond UCITS ETF Legal entity identifier: 2549007IT9Z006JI8718

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 7.26 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2027 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	16.9% reduction
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity reduction (8.8%) for the Fund is higher. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	220.35	67.37	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		43.09	67.37	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		2,359.83	67.37	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		2,623.28	67.37	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	573.18	67.37	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,240.27	94.83	Fund level total emission intensity- Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.51	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	64.59	78.41	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	23.32	51.87	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.17	1.88	
	Electricity, gas, steam & air conditioning supply	2.01	7.74	
	Manufacturing	0.29	30.94	
	Mining & quarrying	1.06	3.66	
	Real Estate activities	0.67	6.52	
	Transportation & storage	0.47	3.03	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.03	0.62	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	5.77	99.51	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	1.94	66.78	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.51	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	39.10	99.51	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	11.73	3.07	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.40	84.16	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	96.55	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

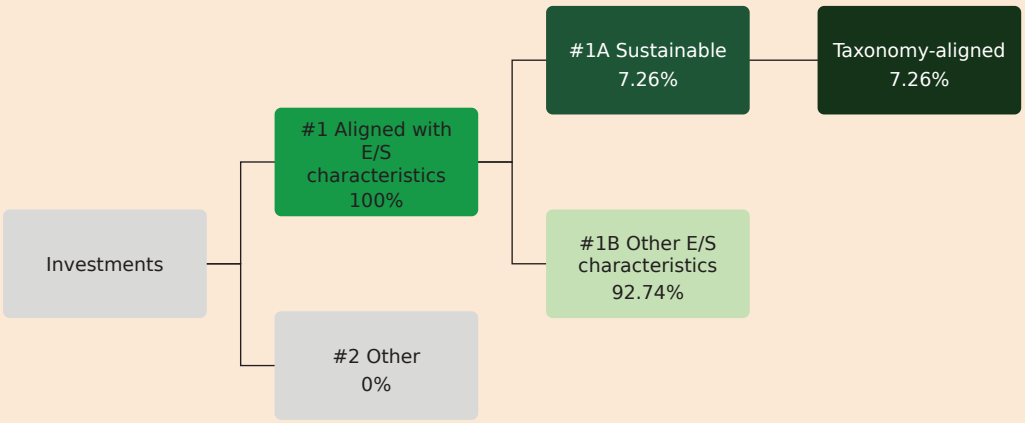
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

7.26% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Total		**3.04**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

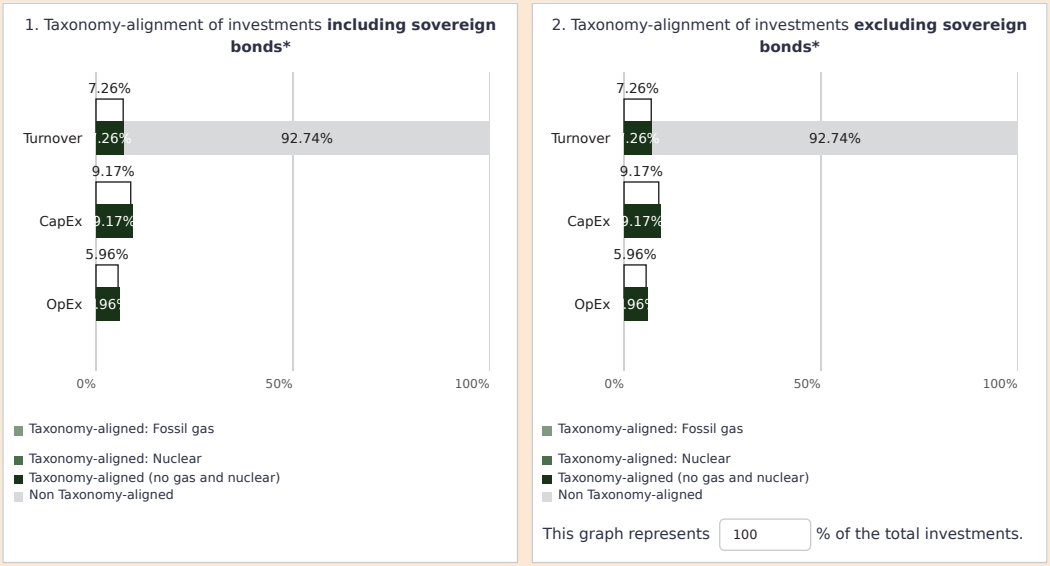
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

7.26% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**2.23%**
Transition	**0.13%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not Applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as 'Not Free' in the Freedom in the World Report published by Freedom House.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	73.0	83.4
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	73.0	87.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 2.2% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2028 EUR Corporate Bond UCITS ETF

Legal entity identifier: 2549006LL9HQBG5KWP52

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 9.15 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2028 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	10.6% increase
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity increase (49.4%) for the Fund is lower. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

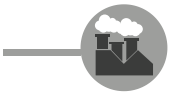
Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.



Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	374.73	66.83	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		55.50	66.83	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		2,316.33	66.83	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		2,746.57	66.83	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	659.93	66.83	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,266.82	99.14	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	100.89	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	57.02	74.11	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	20.62	55.25	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	1.59	7.22	
	Manufacturing	0.60	33.89	
	Mining & quarrying	1.02	4.90	
	Real Estate activities	1.51	3.69	
	Transportation & storage	0.52	4.64	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail	0.06	1.13	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	4.69	100.89	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.41	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.66	66.25	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	100.89	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	31.99	100.89	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	5.66	5.34	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	40.09	87.95	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	100.30	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
VW 3.875 10/11/2028	Consumer Discretionary	2.63%	Germany
ABNANV 4.375 28	Financials	1.92%	Netherlands
SWEDBANK AB	Financials	1.91%	Sweden
CARLB 4 10/5/2028	Consumer Staples	1.90%	Denmark

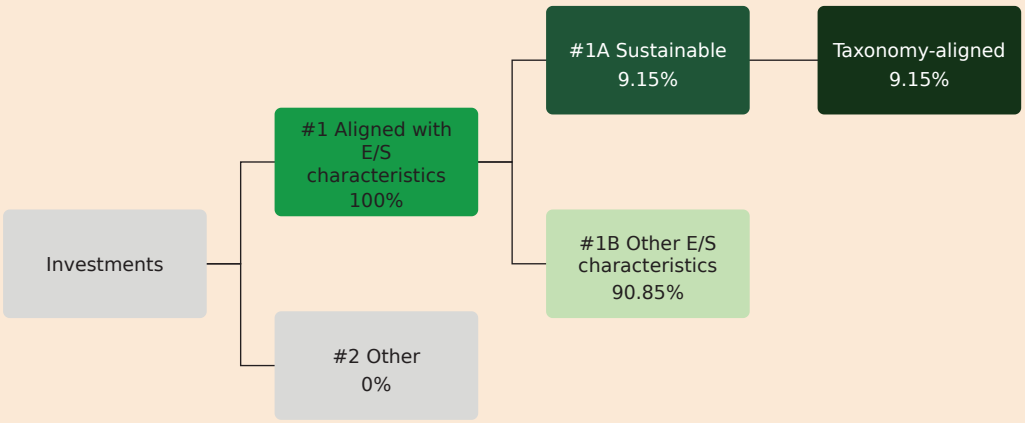
GOLDMAN SACHS GP	Financials	1.81%	United States
SCHNEIDER ELEC	Industrials	1.79%	France

What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

9.15% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %

Communication Services	5.51
Consumer Discretionary	12.15
Information Technology	2.02
Industrials	12.36
Consumer Staples	8.20
Energy	4.90
Real Estate	6.04
Health Care	5.52
Materials	4.49
Utilities	7.22
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	4.90
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**4.90**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

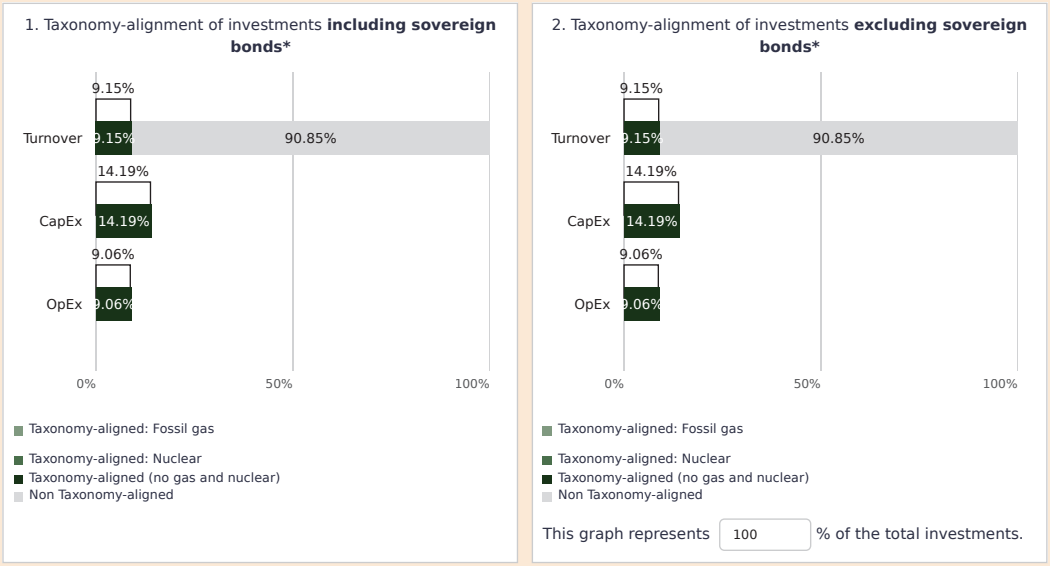
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

9.15% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

***For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.**

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**3.72%**
Transition	**0.19%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as 'Not Free' in the Freedom in the World Report published by Freedom House.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	97.1	95.5
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	97.1	87.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 2.2% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2029 EUR Corporate Bond UCITS ETF

Legal entity identifier: 254900A9PVU6KR01IH97

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 6.52 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2029 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	13.4% increase
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity increase (34.4%) for the Fund is lower. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

	motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	3.91	99.16	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	1.52	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	2.19	73.95	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.16	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	34.72	99.16	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	1.47	4.22	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.11	90.62	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.60	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
AT&T Inc 2.35 47366	Communication Services	2.43%	United States
HOLCIM FINANCE L	Materials	2.38%	Luxembourg
URW SE	Real Estate	2.34%	France
BLACKSTONE PROP	Financials	2.34%	Luxembourg

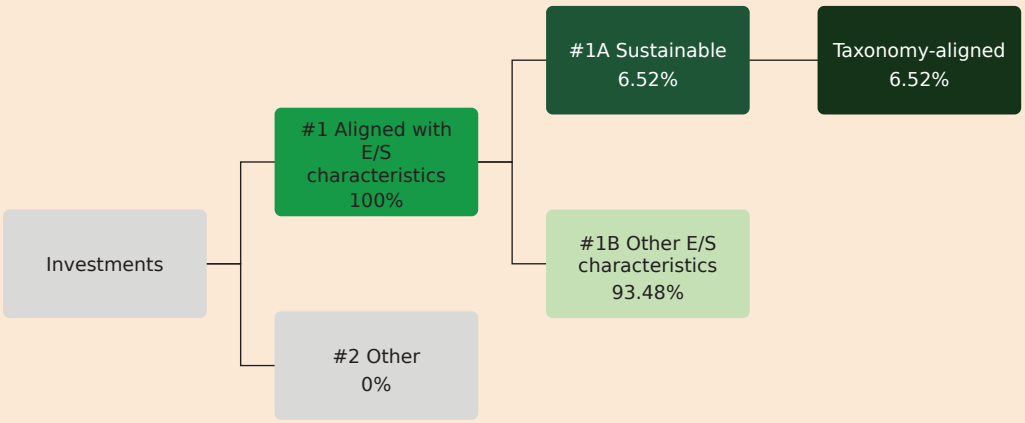
What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

6.52% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	33.61
Communication Services	6.78
Consumer Discretionary	11.41
Information Technology	1.58
Industrials	11.73
Consumer Staples	9.90
Energy	1.61
Real Estate	4.97
Health Care	6.69
Materials	3.85
Utilities	7.87
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.00
10102010	Integrated Oil & Gas	1.61
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**1.61**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

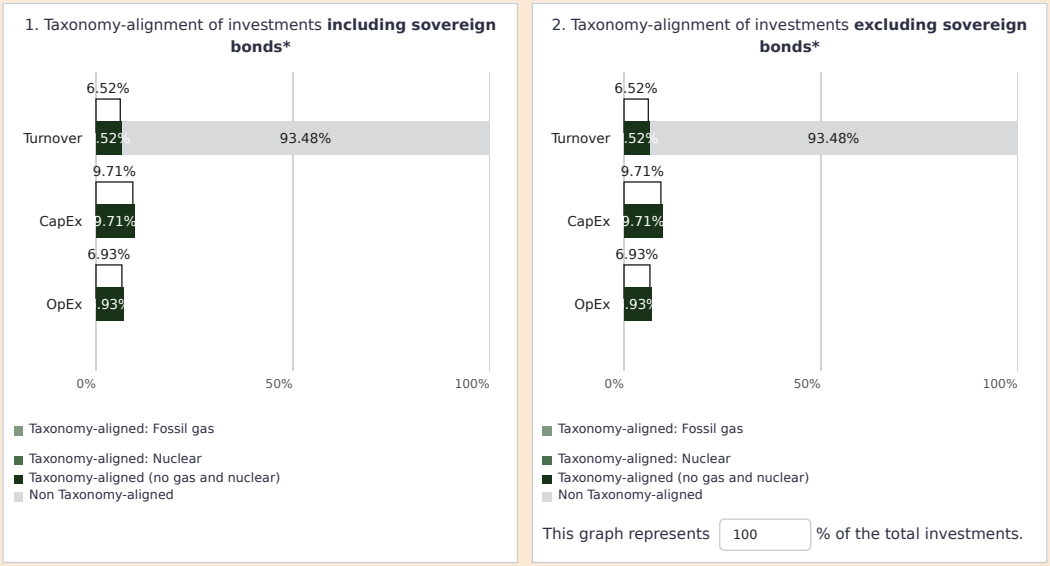
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

6.52% of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**2.59%**
Transition	**0.16%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The percentage of investments that were aligned with the EU Taxonomy increased compared to the previous reference period.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as 'Not Free' in the Freedom in the World Report published by Freedom House.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	99.6	72.6
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	99.6	87.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 2.2% exposure to excluded companies at the latest Reference Index rebalance date

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Bulletshares 2030 EUR Corporate Bond UCITS ETF

Legal entity identifier: 254900KLHK9D0N45HH12

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 8.69 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were to ensure that the issuers it had exposure to were not involved in controversial and environmentally damaging business activities, or very severe ESG controversies. The Fund achieved this by tracking the Bloomberg 2030 Maturity EUR Corporate Bond Screened Index ("**Reference Index**"), which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue) of the Fund relative to the Bloomberg Euro Aggregate Corporate Index (a broad market index)	16.8% increase
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

Compared to last period the CO2 emissions intensity increase (20.7%) for the Fund is lower. The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The methodology of the Reference Index considered principal adverse impacts on sustainability factors by directly excluding a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons and those that weren't compliant with the UN Global Compact.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for the fund, the data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	435.23	68.26	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		77.78	68.26	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		5,247.92	68.26	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		5,760.94	68.26	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	705.46	68.26	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,459.73	97.98	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.67	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	59.51	77.70	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	20.61	48.32	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.13	1.48	
	Electricity, gas, steam & air conditioning supply	1.72	7.32	
	Manufacturing	0.55	33.59	
	Mining & quarrying	1.34	1.71	
	Real Estate activities	0.69	6.50	
	Transportation & storage	0.72	3.21	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail	0.04	0.58	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	trade & repair of motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	2.35	99.67	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	1.24	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.84	69.10	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.67	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	30.42	98.40	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	11.25	5.41	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	39.58	88.57	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	97.99	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	2.08
10102050	Coal & Consumable Fuels	0.00
Total		**3.79**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

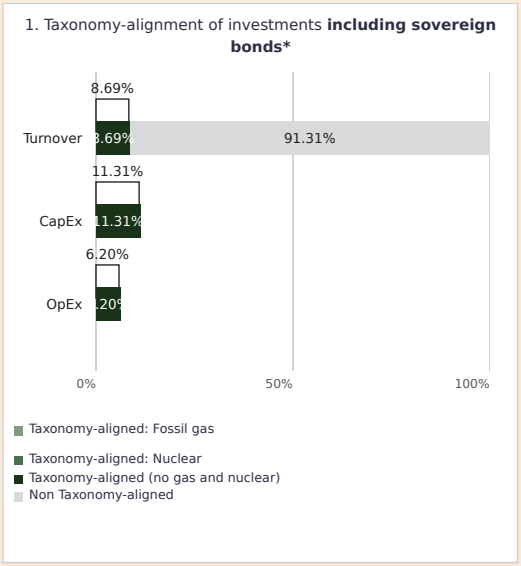
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

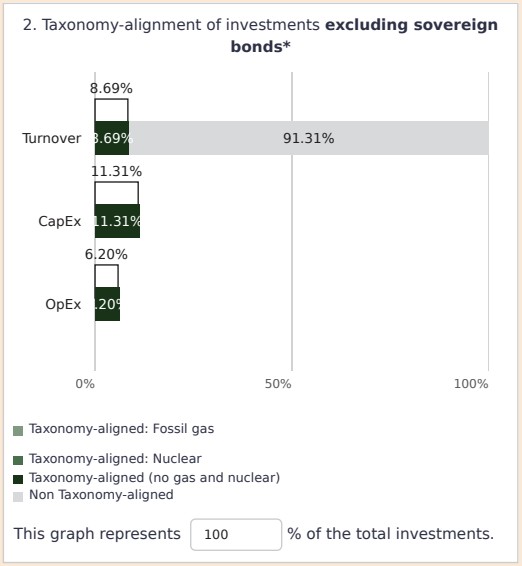
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

8.69% of the Fund's portfolio was aligned with the EU Taxonomy.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**3.01%**
Transition	**0.24%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

Not applicable.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a generic broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities or very severe ESG controversies. The Reference Index targets bonds which mature in a specific timeframe, and will transition to an index comprising EUR denominated treasury securities as these bonds mature. Government issuers will be assessed on the level of freedom and democracy they exhibit, reducing exposure to those categorised as 'Not Free' in the Freedom in the World Report published by Freedom House.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund aims to replicate the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	Fund Indicator Performance	Reference Index Indicator Performance
CO2 emissions intensity (Scope 1+2/Revenue)	102.6	93.1
Percentage of exposure in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Fund had 0% exposure to excluded companies at each Reference Index date rebalance	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date

How did this financial product perform compared with the reference benchmark?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
CO2 emissions intensity (Scope 1+2/Revenue)	102.6	87.8
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	The Reference Index had 0% exposure to excluded companies at each Reference Index rebalance date	The Broad Market benchmark had 2.2% exposure to excluded companies at the latest Reference Index rebalance date

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:**_____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**_____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were investments that respect international norms and standards (i.e. fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption) through the exclusion of companies involved in controversies and those deemed non-compliant with the United Nations Global Compact Principles, and through additional exclusion criteria to also ensure that exposure to environmentally and socially damaging business activities is limited. The Fund achieved this by tracking the S&P Kensho Global Artificial Intelligence Enablers Screened Index (the "**Reference Index**"), which had a methodology that was consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the reference period (ending 31st

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

of December 2025):

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies

…and compared to previous periods?

The Fund continues to avoid companies excluded by the Reference Index.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not Applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not Applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not Applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not Applicable.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The index methodology considered principal adverse impacts on sustainability factors through the exclusion and selection criteria. The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, and those that were deemed non-compliant with the principles of the United Nations Global Compact. The Reference Index also excluded any companies where data wasn't available to make such assessments. The selection of constituents was based on S&P Global ESG Scores. These scores considered greenhouse gas emissions, energy consumption, hazardous waste, board gender diversity, gender pay gap, and if there had been recent controversies in the area of water operations.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the Sustainable Investing Team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	10.31	99.81	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		32.67	99.81	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		839.34	99.81	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		882.32	99.81	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	73.77	99.81	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	435.29	99.81	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.81	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	51.52	61.17	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	18.41	27.54	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.00	0.00	
	Manufacturing	0.07	29.27	
	Mining & quarrying	0.00	0.00	
	Real Estate activities	0.00	0.00	
	Transportation & storage	0.00	0.00	
	Water supply, sewerage, waste management & remediation activities	0.00	0.00	
	Wholesale & Retail trade & repair of	0.00	0.00	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	0.00	99.81	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.03	99.81	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.81	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	69.14	99.81	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	17.70	3.13	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	31.29	98.71	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.81	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 1st of January 2025 to 31st of December 2025. The data is representative of the reference period.

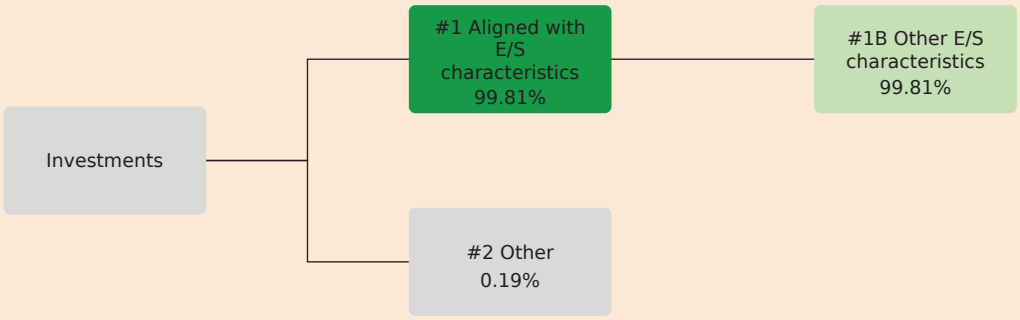
What was the proportion of sustainability-related investments?

See below field

Asset allocation describes the share of investments in specific assets.



What was the asset allocation?

99.81% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.19% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

0.00% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

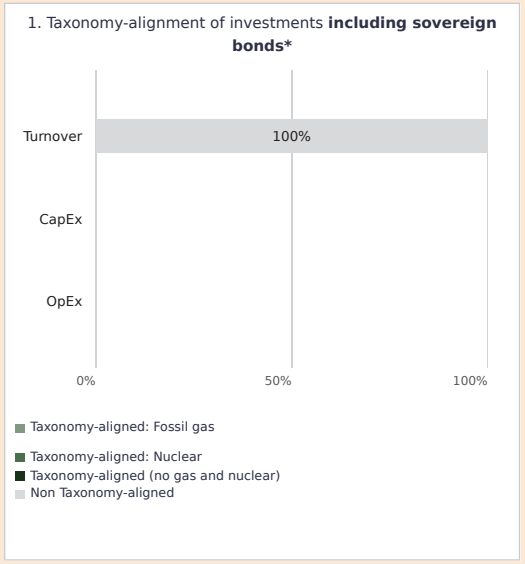
Total		**0.00**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

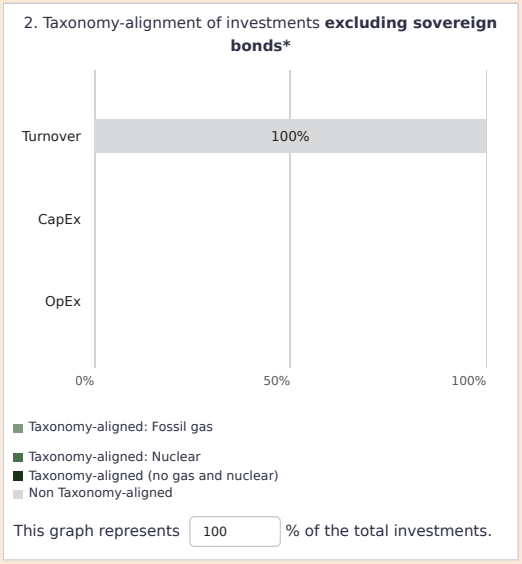
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?



The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

0.19% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities, as well as comprising companies that are assessed by the Index Provider to be focused on developing and enabling technology, infrastructure and services propelling the growth and functionality of artificial intelligence.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and a relevant broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 5.0% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.0% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.4% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 4.4% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.3% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco Cybersecurity UCITS ETF **Legal entity identifier: 254900U45T90Z324YF96**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:**_____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**_____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental and social characteristics promoted by the Fund were investments that respected international norms and standards (i.e. fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption) through the exclusion of companies involved in controversies and those deemed non-compliant with the United Nations Global Compact Principles, and through additional exclusion criteria to also ensure that exposure to environmentally and socially damaging business activities was limited. The Fund achieved this by tracking the S&P Kensho Global Cyber Security Screened Index (the "**Reference Index**"), which had a methodology that was consistent with attaining the environmental and social characteristics promoted by the Fund. The environmental and social characteristics were achieved by applying the Index Provider's exclusion criteria to the eligible securities.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the reference

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

period (ending 31st of December 2025):

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The index methodology considered principal adverse impacts on sustainability factors through the exclusion and selection criteria. The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions. The methodology also excluded companies involved in controversial weapons, and those that were deemed non-compliant with the principles of the United Nations Global Compact. The Reference Index also excluded any companies where data wasn't available to make such assessments. The selection of constituents was based on S&P Global ESG Scores. These scores considered greenhouse gas emissions, energy consumption, hazardous waste, board gender diversity, gender pay gap, and if there had been recent controversies in the area of water operations.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the Sustainable Investing Team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was required in accordance with the engagement policy.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	1.48	99.95	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		9.53	99.95	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		256.51	99.95	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		267.52	99.95	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	73.60	99.95	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	198.46	99.95	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.00	99.68	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	58.61	36.85	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	0.00	12.91	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.00	0.00	
	Electricity, gas, steam & air conditioning supply	0.00	0.00

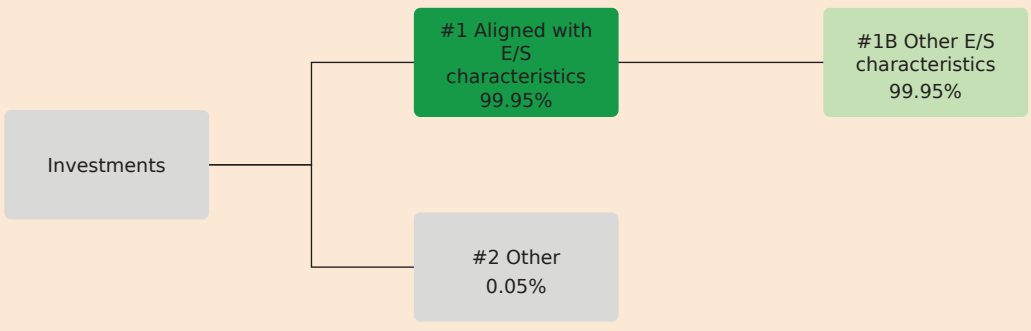
What was the proportion of sustainability-related investments?



See below field

Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.95% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.05% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Total		**0.00**

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

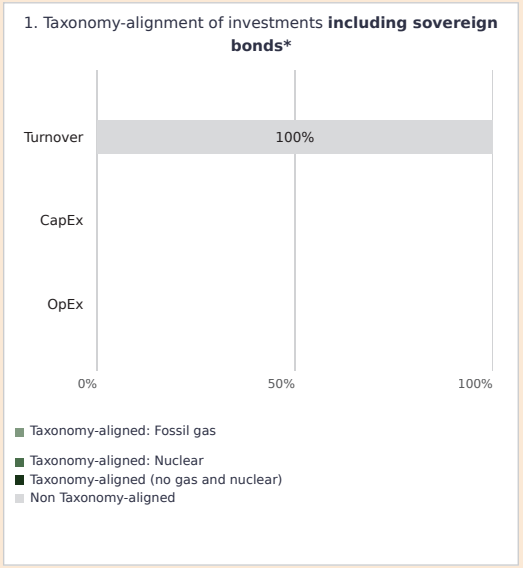
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

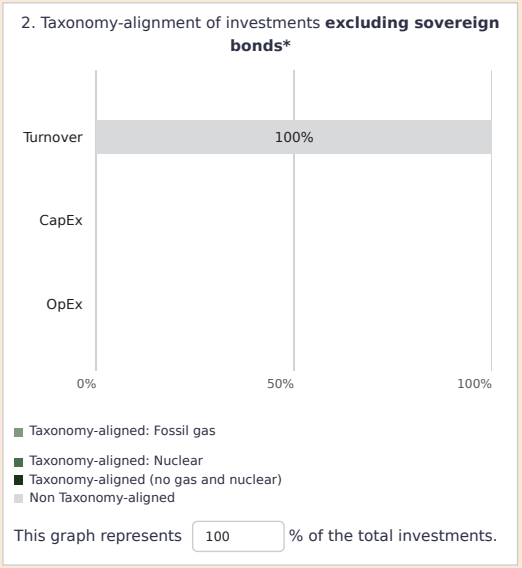
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not Applicable.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not Applicable.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

Not Applicable.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.05% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section “How did the sustainability indicators perform” above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because it seeks to exclude issuers that are involved in controversial and environmentally damaging business activities, as well as comprising only companies that are assessed by the Index Provider to be focused on protecting enterprises and devices from unauthorised access via electronic means.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to such companies

How did this financial product perform compared with the reference benchmark?

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The sustainability indicators for the Fund and a relevant broad market index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark Indicator Performance**
Percentage of the Fund portfolio invested in companies involved in controversial business activities (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 5.0% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies involved in controversies (as defined by the Index Provider)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.0% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies classified as Non-Compliant according to Sustainalytics' Global Standards Screening (GSS) which provides an opinion as to whether a company is violating UN Global Compact (UNGC) Principles and related international norms and standards (including the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights)	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.4% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies that have an S&P Global ESG Score which falls in the bottom 10% (i.e. the worst performers in terms of ESG score) of the S&P Global BMI Index, which is a broad global equity universe	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 4.4% exposure to excluded companies at the latest Reference Index rebalance date
Percentage of the Fund portfolio invested in companies that were not covered by the ESG data solution used by the Index Provider	As at each Reference Index rebalance date, the Fund had 0% exposure to such companies	The Broad Market benchmark had 0.3% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco S&P 500 CTB Net Zero Pathway ESG UCITS ETF Legal entity identifier: 254900V3YFTVUHR25E45

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 96.66 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The environmental characteristics promoted by the Fund was the reduction of exposure to risks arising from a transition to a lower-carbon economy by lowering exposure to carbon intensive companies or industries (such risks included increased cost of doing business, regulatory actions, such as carbon taxes and changes in market preferences, such as consumers shifting purchases towards low carbon products). It achieved this by tracking an index that adheres to the standards for EU Climate Transition Benchmarks as based on the commitments laid down in the Paris Agreement. The Fund achieved this by replicating the S&P 500 CTB Base Pathway-Aligned ESG Index (the "**Reference Index**"), which has a methodology that is aligned with attaining the environmental and/or social characteristics promoted by the Fund.

The extent to which the Fund tracked the Reference Index is reflected by the tracking error figures available in the section "Tracking Error Analysis" of the Annual Report.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicators (see below).

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measuer the attainment of environmental and social characteristics. The Fund performed as follows as at 31 December 2025, the data is representative of

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the reference period:

Sustainability Indicator	Indicator Performance
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the S&P 500 Index (the **"Parent Index"**)	70.0% reduction
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory anchor date	7% average reduction across Reference Index rebalance dates in the period
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	10.8% improvement
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies

…and compared to previous periods?

NA

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

The sustainable investments contributed to the objective of reducing exposure to risks arising from a transition to a lower-carbon economy by lowering exposure to carbon intensive companies or industries (such risks included increased cost of doing business, regulatory actions, such as carbon taxes and changes in market preferences, such as consumers shifting purchases towards low carbon products).

The sustainable investments contributed to the objective as they were selected based on the criteria of the Reference Index, which is constructed to meet the minimum requirements of an EU Climate Transition Benchmarks as based on the commitments laid down in the Paris Agreement in accordance with the Delegated Regulation (EU) 2020/1818 for the methodology of benchmark indices that would be aligned with the objectives of the Paris Agreement.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

The index methodology of the Reference Index that the Fund replicates takes into account principal adverse impact (PAI) indicators defined in Table 1 of Annex I of the regulatory technical standards for Regulation 2019/2088 (RTS). Securities that didn't meet certain PAI thresholds were excluded from the Reference Index.

The Fund also relied on the qualitative research and monitoring of Invesco's Global Sustainable Investing Team, which is a central team across Invesco, to take into account the RTS PAI indicators ("**Invesco's DNSH framework**") and, in doing so, to assess whether the sustainable investments of the Fund caused significant harm to any environmental and/or social objectives. This framework involved an analysis of a PAI dataset with respect to the Fund. Invesco analysed each issuer for its relative performance compared to other issuers in the universe under each PAI category and determined thresholds to identify issuers that performed poorly on each indicator. The RTS PAI indicators taken into account by Invesco's DNSH framework aligned with the RTS PAI indicators taken into account in the methodology of the Reference Index. Invesco further used its own thresholds to assess whether the sustainable investments of the Fund caused significant harm to any environmental and/or social objective.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

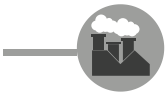
How were the indicators for adverse impacts on sustainability factors taken into account?

Please see above on how the indicators for adverse impacts on sustainability factors were taken into account.

The methodology of the Reference Index directly excluded a number of companies involved in certain business activities. Through the removal of companies involved in thermal coal and oil sands the Reference Index reduced its exposure to greenhouse gas emissions, and those that were deemed non-compliant with the principles of the United Nations Global Compact. The Reference Index also excluded any companies where data wasn't available to make such assessments.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Alignment with the OECD Guidelines for Multinational Enterprises (the "**OECD Guidelines**") and the UN Guiding Principles on Business and Human Rights (the "**UN Guiding Principles**") was captured in the methodology of the Reference Index tracked by the Fund, with the result that securities were excluded from the investible universe if they were deemed not to be in alignment.



The methodology of the Reference Index excluded companies that were deemed not to be compliant with the UN Global Compact (the "**UNGC**"). This set of ten principles show significant overlap with both the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles. With regards to OECD, these guidelines and the UNGC both aim to promote corporate responsibility and sustainable business practices, in terms of specific topics, they both cover the areas of human rights, employment relations, environment and anti-corruption. As for the two UN frameworks, whilst they do vary in nature, scope and depth, the two come together in their overriding objective (to achieve a more responsible and accountable business community) as well as some of the key areas they address, namely in the human rights space.

The methodology of the Reference Index excluded companies facing severe ESG controversies, as assessed via Sustainalytics Controversy Scores. As part of their research Sustainalytics consider global standards screening, in particular specific international norms and standards including both the OECD Guidelines and the UN Guiding Principles.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the index methodology considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI scores for fund, the data is representative of the reference period.

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	15.84	99.97	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		6.20	99.97	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		186.67	99.97	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		208.71	99.97	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	113.57	99.97	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	518.06	99.97	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.75	99.96	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	47.13	84.34	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	29.90	49.08	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	1.93	0.16	
	Construction	0.14	0.25	
	Electricity, gas, steam & air conditioning supply	2.00	1.76	
	Manufacturing	0.12	39.31	
	Mining & quarrying	0.85	0.68	
	Real Estate activities	0.47	1.55	
	Transportation & storage	2.62	2.92	
	Water supply, sewerage, waste management & remediation activities	0.52	0.78	
	Wholesale & Retail trade & repair of	0.07	3.70	

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

	motor vehicles & motorcycles			
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	5.43	99.86	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.00	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	0.04	99.63	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.86	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	62.88	99.74	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	17.39	5.09	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	35.82	99.55	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.76	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the fund's consideration of principal adverse impacts on sustainability factors, the Fund also used the qualitative research and monitoring of Invesco's Sustainable Investing Services team ("**Invesco's PAI framework**") to assess whether the sustainable investments of the Fund caused significant harm to the relevant environmental or social investment objectives.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 27th of January 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country

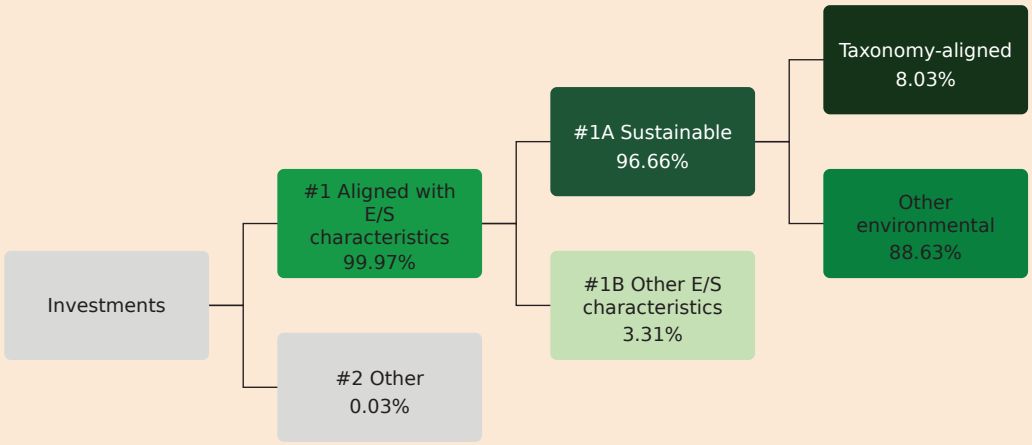
BROADCOM INC	Information Technology	1.33%	United States

What was the proportion of sustainability-related investments?

Asset allocation describes the share of investments in specific assets.

See below field



What was the asset allocation?

99.97% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.03% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

96.66% of the Fund's NAV was invested in sustainable investments.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	14.13
Communication Services	9.85
Consumer Discretionary	10.39
Information Technology	33.96
Industrials	7.48
Consumer Staples	5.32
Energy	2.46
Real Estate	2.11
Health Care	10.17
Materials	1.95
Utilities	2.15
Cash	0.03
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.34
10102010	Integrated Oil & Gas	0.00
10102020	Oil & Gas Exploration & Production	0.49
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	1.63
10102050	Coal & Consumable Fuels	0.00
Total		**2.46**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

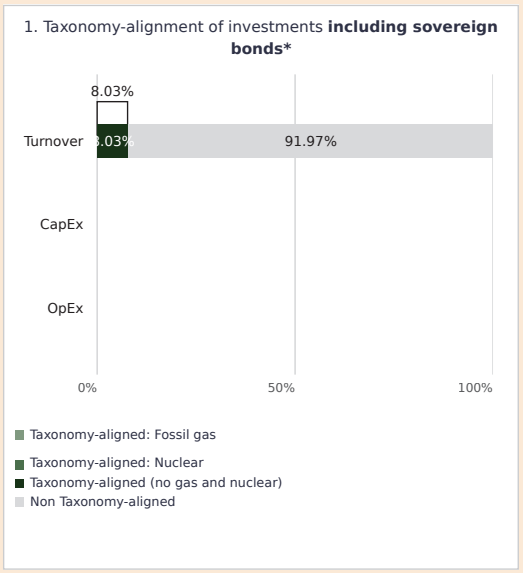
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

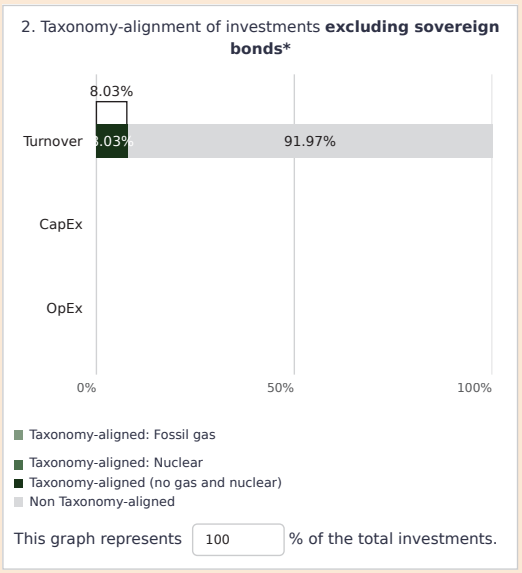
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Although the Fund did not commit to a minimum of sustainable investments aligned with the EU Taxonomy the extent to which the Fund as a whole was aligned with the EU Taxonomy was calculated for the reference period. 8.03% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy. The figures are representative of the reference period.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities - the data is representative of the reference period.

	Aligned
Enabling	**1.22%**
Transition	**0.07%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

As the Fund does not currently intend to be EU Taxonomy aligned, 88.63% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy. Currently, the Fund does not intend to be aligned with the Taxonomy Regulation and the Manager intends to keep the Fund's position in relation to the Taxonomy Regulation under consideration along with the reliability of datasets to determine Taxonomy alignment. To the extent required, the Manager will amend the pre-contractual documentation accordingly.

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What was the share of socially sustainable investments?

Not Applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.03% of the Fund's NAV was invested in investments that did not align with the environmental characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

See tables completed in below sections.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

The Reference Index differs from a broad market index because the underlying assets are selected, weighted or excluded in such a manner that the resulting benchmark portfolio is on a decarbonisation trajectory and is also constructed in accordance with the minimum standards laid down in the Delegated Acts.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

As the Fund replicates the performance of the Reference Index, the sustainability indicators performed similarly for the Fund and Reference Index:

Sustainability Indicator	**Fund Indicator Performance**	**Reference Index Indicator Performance**
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	127.9	127.9
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	7% average reduction across Reference Index rebalance dates in the period	7% average reduction across Reference Index rebalance dates in the period
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	48.9	48.9
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	As at each Reference Index rebalance date, the Reference Index had 0% exposure to excluded companies

How did this financial product perform compared with the reference benchmark?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

As the Fund achieves the environmental and social characteristics by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristics promoted by the Fund, the performance of the Fund is aligned with that of the Reference Benchmark. Please see above for the performance of the sustainability indicators compared with the Reference Benchmark.

How did this financial product perform compared with the broad market index?

The sustainability indicators for the Fund and Parent Index differed as below:

Sustainability Indicator	**Fund Indicator Performance**	**Broad Market benchmark (Parent Index) Indicator Performance**
CO2 emissions intensity (Scope 1+2+3/EVIC) of the Fund relative to the Parent Index	127.9	426.5
CO2 emissions intensity (Scope 1+2+3/EVIC) reduction at each Rebalance Date relative to the decarbonisation trajectory base date	7% average reduction across Reference Index rebalance dates in the period	The Broad Market benchmark has seen an increase in emissions intensity since the trajectory base date
S&P Global ESG Score (as defined in the methodology of the Reference Index) of the Fund relative to the Parent Index	48.9	44.2
Percentage of the Fund portfolio invested in excluded companies involved in controversial business activities and controversies (as defined in the methodology of the Reference Index)	As at each Reference Index rebalance date, the Fund had 0% exposure to excluded companies	The Broad Market benchmark had 5.2% exposure to excluded companies at the latest Reference Index rebalance date

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: Invesco EUR AAA CLO UCITS ETF **Legal entity identifier: 254900I6XA2UYZN61G44**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:**_____%	☐ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of_____% of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:**_____%	☒ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The Sub-Investment Manager utilised a proprietary ESG ratings framework to assess managers of collateralised loan obligations ("**CLOs**"). The framework was used to assess the extent to which CLO managers considered ESG factors when assessing the issuers of the loans held by their CLOs.

By positively screening CLO managers using this framework, the Fund's investments were shifted towards CLOs where ESG issues were addressed and resulted in the Fund promoting the following environmental and social characteristics: reducing the use of non-renewable energy resources, respecting the protection of internationally proclaimed human rights, and limiting the emission of greenhouse gasses over time.

The extent to which the environmental and/or social characteristics promoted by the Fund were met is further detailed in the performance of the sustainability indicator (see below).

The Benchmark is not aligned with the environmental or social objectives which the Fund seeks to promote. The Fund measures its performance against the Benchmark, but does not seek to track the performance of the Benchmark and the Fund does not intend for its performance to match or exceed the Benchmark. The Fund is actively managed and will hold a portfolio of corporate bonds that is not constrained by the Benchmark.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a single indicator to measure the attainment of the environmental and social characteristics. Against this indicator the fund offered the following, data is representative of the

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

reference period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in CLOs managed by CLO managers who do not have a composite ESG score less than or equal to 4, as based on the Sub-Investment Managers' proprietary ESG ratings framework	The Fund had 0% exposure to such CLOs

…and compared to previous periods?

NA

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

NA

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

NA

How were the indicators for adverse impacts on sustainability factors taken into account?

NA

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

NA

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors by addressing specific environmental and social issues within the ESG ratings framework that is used to positively screen CLO managers.

Coverage of CLOs from external providers is limited, hence we are not able to show the PAI scores for the fund.

What were the top investments of this financial product?

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 26th of September 2025 to 31st of December 2025. The data is representative of the reference period.

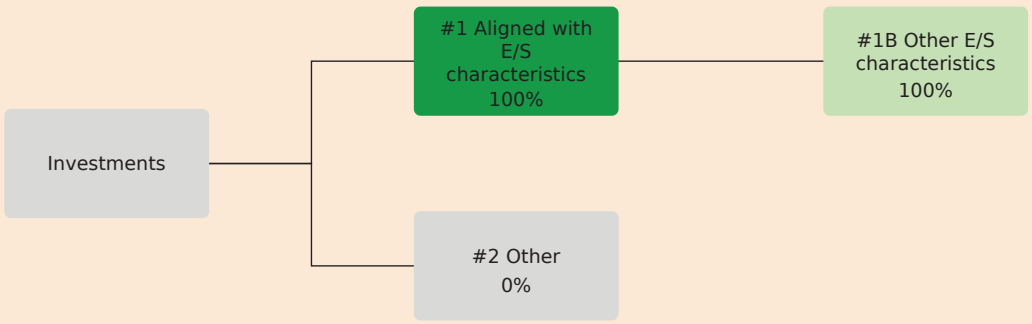
What was the proportion of sustainability-related investments?

See below field



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

100.00% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.00% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes, held as cash or other short-term instruments for ancillary liquidity purposes and managing redemptions, or invested in CLO Debt Securities that were aligned at the time of investment with the Fund’s environmental and social characteristics and subsequently ceased to be aligned.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

CLOs are not covered by GICS (or other standard sector classification systems), hence we are not able to show the economic sector breakdown for the fund.

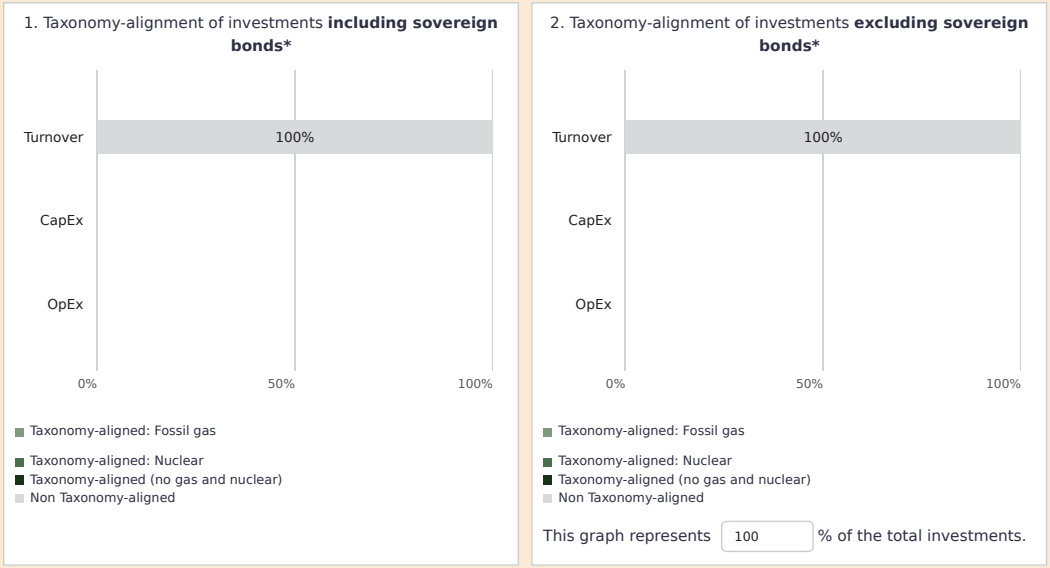
Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.



To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?

- ☐ **Yes**
  - ☐ **In fossil gas**
  - ☐ **In nuclear energy**
- ☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

NA

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

NA

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

NA

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

0.00% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund.

Investments included in this category would be financial derivative instruments for hedging and/or efficient portfolio management purposes, cash or other short-term instruments for ancillary liquidity purposes and managing redemptions, or CLO Debt Securities that were aligned at the time of investment with the Fund’s environmental and social characteristics and subsequently ceased to be aligned. No minimum environmental or social safeguards would be applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the the environmental characteristics by applying a proprietary ESG rating framework to assess CLO managers. CLO managers were assigned a composite ESG score from 1 to 5, with 1 demonstrating high levels of ESG consideration and 5 demonstrating low levels of ESG consideration. CLO managers were deemed eligible if their composite ESG score was less than or equal to 4. The managers of all CLO Debt Securities held by the Fund must have been assessed using this framework.

The ESG ratings framework is based on an assessment of a number of factors, namely the extent to which a CLO manager incorporates ESG risks into their processes when selecting underlying loans, the extent to which a CLO manager addresses the three ESG issues referred to below in assessing underlying loans, and whether a CLO manager has a screening policy in place that addresses the three ESG issues referred to below. CLO managers were assigned a rating on a scale from 1 to 5 for each factor and those ratings were averaged to assign CLO managers a final composite rating. The specific ESG issues considered as part of the ESG ratings framework were as follows:

- level of activity in the fossil fuel sector
- compliance with the UN Global Compact (UNGC) and the OECD Guidelines for Multinational Enterprises
- commitment to greenhouse gas (GHG) reduction targets

As such, if a CLO manager directly addressed these three issues within their CLO Debt Securities, through screening or otherwise, the CLO manager received an improved ESG rating. As CLO managers were screened on this ESG rating by the Fund, this shifted the Fund’s investment towards CLO Debt Securities where these ESG issues were addressed and resulted in the Fund promoting environmental and social characteristics.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period. In addition, the ESG team monitored the investments against PAI indicators.

How did this financial product perform compared to the reference benchmark?

NA

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How does the reference benchmark differ from a broad market index?

NA

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Product name: Invesco Europe Enhanced Equity UCITS ETF **Legal entity identifier: 254900UD557N432LT715**

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☐ **Yes**	☒ **No**
☐ It made **sustainable investments with an environmental objective:** _____ %	☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 5.77 % of sustainable investments
☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy	☒ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	☐ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
	☐ with a social objective
☐ It made **sustainable investments with a social objective:** _____ %	☐ It promoted E/S characteristics, but **did not make any sustainable investments**

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

The social characteristics promoted by the Fund were to reduce the availability of weapons and to improve health and wellbeing. The Fund achieved this by excluding companies involved in controversial weapons and tobacco. The Fund also promoted environmental characteristics, namely limiting pollution and restricting the use of nonrenewable natural resources. The Fund achieved this by excluding companies involved in thermal coal. These criteria were integrated into the security selection and portfolio construction process.

The extent to which the environmental and/or social characteristics promoted by the Fund was met is further detailed in the performance of the sustainability indicators (see below).

The Benchmark is not aligned with the environmental objectives or social objectives which the Fund seeks to promote. The Fund does not seek to track the performance of the Benchmark. The Fund holds an actively-managed portfolio of equities and equity-related securities with the aim of delivering superior risk-adjusted returns over the long term when compared with the average performance of global equity markets.

Further information on the attainment of the environmental and/or social characteristics promoted by the Fund are set out below. Reported data was sourced from external ESG data vendors including ISS ESG, Sustainalytics, Clarity AI and MSCI.

How did the sustainability indicators perform?

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. Against these indicators the fund offered the following, data is representative of the reference

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

period (ending 31st of December 2025):

Sustainability Indicator	Indicator Performance
Percentage of the Fund portfolio invested in companies which derive or generate revenue or turnover from restricted activities above the levels set out in the ESG Policy	The Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies involved in very severe controversies	The Fund had 0% exposure to such companies
Percentage of the Fund portfolio invested in companies in violation of the UN Global Compact's principles	The Fund had 0% exposure to such companies

…and compared to previous periods?

NA

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

NA

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

NA

How were the indicators for adverse impacts on sustainability factors taken into account?

NA

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

NA

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

As noted above, the Fund considered principal adverse impacts on sustainability factors, primarily through a set of exclusion criteria corresponding to the indicators that are defined in Table 1, Annex I of the RTS.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

The below table shows the PAI data for the Fund. The data is representative of the reference period:

Adverse sustainability indicator	PAI	Data	Coverage	Metric
Greenhouse gas emissions	1.GHG emissions	9,703.38	99.59	Scope 1 fund financed emissions (tonnes of CO2 equivalent)
		1,262.37	99.59	Scope 2 fund financed emissions (tonnes of CO2 equivalent)
		111,597.50	99.59	Scope 3 fund financed emissions (tonnes of CO2 equivalent)
		122,563.25	99.59	Total financed emissions (Scope 1 + Scope 2 + Scope 3) (tonnes of CO2 equivalent)
	2. Carbon footprint	827.61	99.59	Fund level carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR invested)
	3. GHG Intensity of investee companies	1,773.83	99.59	Fund level total emission intensity-Scope 1+2+3 (Per Million EUR revenue)
	4. Exposure to companies active in the fossil fuel sector	0.56	99.64	% of the fund exposed to any fossil fuels revenue
	5. Share of non-renewable energy consumption	54.10	81.82	Adjusted weighted average of all issuers in the fund's share of non-renewable energy consumption and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)
	5. Share of non-renewable energy production	16.94	53.61	
	6. Energy consumption intensity per high impact climate sector			Adjusted weighted average energy consumption of issuers in the fund in GWh per million EUR of revenue of investee companies, per high impact climate sector
	Agriculture, forestry & fishing	0.00	0.00	
	Construction	0.12	1.82	
	Electricity, gas, steam & air conditioning supply	2.42	3.49	
	Manufacturing	0.45	43.90

	Wholesale & Retail trade & repair of motor vehicles & motorcycles	0.08	2.87	
Biodiversity	7. Activites negatively affecting biodiversity-sensitive areas	4.66	99.64	Share of investments in the fund of investee companies with sites/operations located in or near to biodiversity-sensitive areas where activities of those investee companies negatively affect those areas
Water	8. Emissions to water	0.00	0.07	Adjusted weighted average per issuer in the fund's emissions to water generated by investee companies per million EUR invested (Tonnes)
Waste	9. Hazardous waste and radioactive waste ratio	8.07	99.50	Tonnes of hazardous waste and radioactive waste generated by investee companies per million EUR invested, expressed as a weighted average
Social and employee matters	10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) guidelines for multinational enterprises	0.00	99.64	Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD guidelines for multinational enterprises
	11. Lack of proceses and compliance mechanisms to monitor compliance with UN Global Compact principles and OECD guidelines for multinational enterprises	18.73	99.53	Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD guidelines for multinational enterprises or grievance/ complaints handling mechanisms to address violations of the UNGC principles or OECD guidelines for multinational enterprises
	12. Unadjusted gender pay gap	11.39	17.01	Weighted average of all issuers' in the portfolio unadjusted gender pay gap of investee companies
	13. Board gender diversity	42.61	99.24	Weighted average of all issuers in the portfolio ratio of female to male board members in investee companies, expressed as a percentage of all board members
	14. Exposure to controversial weap-ons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)	0.00	99.70	Share of investments in investee companies involved in the manufacture or selling of controversial weapons

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the Sustainable Investing Team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

the Fund’s portfolio that were deemed to flag against PAI indicators, in order to determine whether any engagement activity was
required in accordance with the engagement policy.

Coverage figures are calculated as the sum of the weighting in the fund of all constituents with data available, including for PAI6 where constituents are divided into sectors.

Invesco Investment Management Limited does not estimate any data, however certain data sourced from external providers may contain estimated data.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is:From the 16th of September 2025 to 31st of December 2025. The data is representative of the reference period.

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV	Information Technology	3.34%	Netherlands
NOVARTIS AG-REG	Health Care	2.19%	Switzerland
ROCHE HLDG-GENUS	Health Care	2.05%	Switzerland

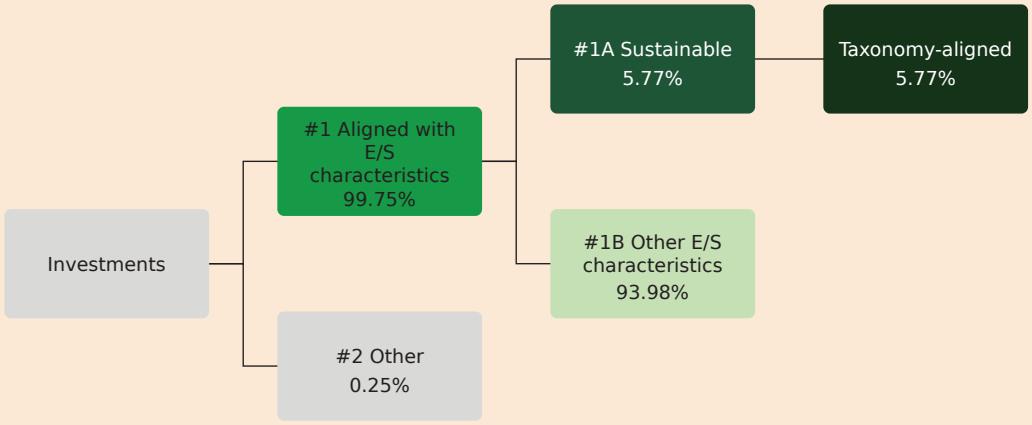
UBS GROUP AG	Financials	1.15%	Switzerland
LVMH MOET HENNE	Consumer Discretionary	1.12%	France
BBVA	Financials	1.09%	Spain

What was the proportion of sustainability-related investments?

Please see below fields.



Asset allocation describes the share of investments in specific assets.

What was the asset allocation?

99.75% of the Fund's NAV was invested in investments that aligned with the environmental and social characteristics of the Fund.

0.25% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; or was held as cash for ancillary liquidity purposes.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

GICS Sector Breakdown - the data is representative of the reference period.

Sector (GICS)	Weight %
Financials	25.38
Communication Services	4.73
Consumer Discretionary	7.18
Information Technology	7.43
Industrials	20.41
Consumer Staples	8.58
Energy	4.39
Real Estate	0.14
Health Care	12.56
Materials	5.41
Utilities	3.54
Cash	0.25
Total	**100.00**

GICS Level 4 breakdown for Energy Sector

Sub-Industry Code	Sub-Industry Name	Weight
10101010	Oil & Gas Drilling	0.00
10101020	Oil & Gas Equipment & Services	0.21
10102010	Integrated Oil & Gas	4.18
10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
Total		**4.39**

Although the Fund has exclusions around fossil fuel extraction, there may still have been exposure to fossil fuels as represented in part by exposure to the energy sector as disclosed above.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

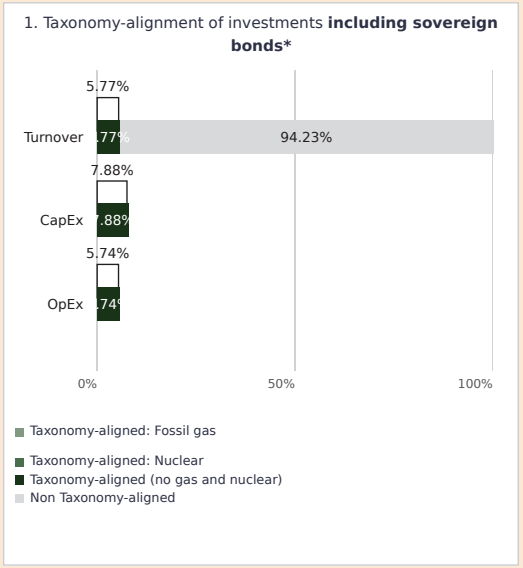
Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

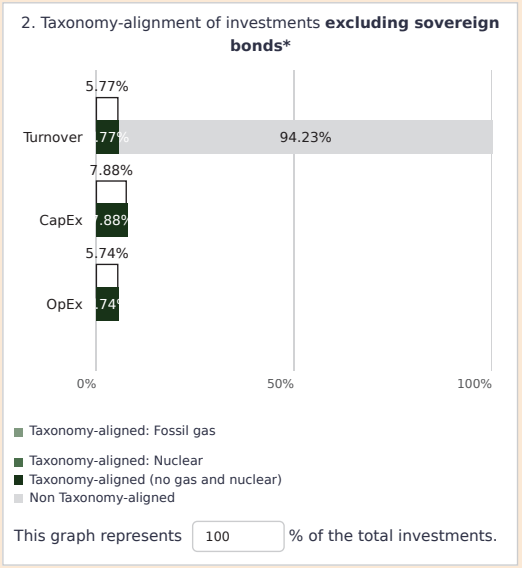
Taxonomy-aligned activities are expressed as a share of:
- **turnover** reflecting the share of revenue from green activities of investee companies.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Fund did not make any sustainable investments within the meaning of Article 2(17) of Regulation (EU) 2019/2088.



Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy[1]?



☐ **Yes**

☐ **In fossil gas** ☐ **In nuclear energy**

☒ **No**

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as the data is representative of the reference period.

	Aligned
Enabling	**3.12%**
Transition	**0.22%**

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

NA

[1] Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm to any EU Taxonomy objective – see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Docusign Envelope ID: 38B14D9B-7016-8347-823D-5C9D3BB49723

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under Regulation (EU) 2022/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The Fund did not make any sustainable investments. The Fund does not currently intend to be EU Taxonomy aligned, 0.00% of the Fund's NAV was invested in sustainable investments with an environmental objective that was not aligned with the EU Taxonomy.

What was the share of socially sustainable investments?

NA

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

0.25% of the Fund's NAV was invested in investments that did not align with the environmental and social characteristics of the Fund. Investments included under this category were financial derivative instruments for hedging and/or efficient portfolio management purposes and cash for ancillary liquidity. No minimum environmental or social safeguards were applied in relation to these instruments.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund sought to attain the environmental characteristics by applying the exclusion criteria of the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information on how the indicators performed during the reference period.

How did this financial product perform compared to the reference benchmark?

NA

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

NA

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

NA

- ***How did this financial product perform compared with the reference benchmark?***

NA

- ***How did this financial product perform compared with the broad market index?***

NA
